Commentary:

Executive Chairman of Uscom, Professor Rob Phillips said *"Uscom cash receipts for the quarter were up 23% boosted by end of year purchases and a one-off international sale which ensured the quarter was cash flow positive. While the signs are optimistic the global market remains difficult and current results may not predict long term trends. The China market remains challenging while SE Asia, Europe and the US continue to show encouraging activity. Overall, the Board's strategy of global diversification has delivered positive results as we look forward to China resuming its historic growth trends."*
