CEO COMMENTARY:

Mr Anthony Nantes, Chief Executive Officer, WISR, said, "As we continue to lift our pricing to protect our NIM, demand for our lending products has delivered \$186M in new loan originations for the quarter, a 41% increase on pcq. Our arrears have decreased from 0.98% to 0.89%, a great indicator of the true quality of our loan book and its ability to perform through a cycle, and we've grown operating revenue by 75% on pcq, demonstrating the high quality of our credit assets and credit decisions."

"Making prudent material reductions in operating costs, pivoting to a moderate growth trajectory and continuing to protect our margins has put us on the path to deliver profitability in the short term while protecting the business from any sustained economic downturn. We also know that prime loan books, like WISR's, have traditionally performed well through credit cycles; combined with the framework already in place to manage credit quality through the cycle, WISR is in the strongest position to navigate market conditions whilst delivering a continued growth trajectory." finished Mr Nantes.

APPENDIX 4C QUARTERLY ACTIVITY REPORT COMMENTARY:

Wizr continues its path to profitability, with \$21.2M in operating revenue, an 75% increase on Q1FY22 (**\$12.1M**) and a 20% increase on Q4FY22 (**\$17.6M**).

Cash EBTDA of \$(1.5)M[^] for Q1FY23, a 33% improvement on Q4FY22 ((\$2.3)M) consisting of:

- 20% increase in revenue as higher new loan origination yields flow through.
- 9% decrease in opex given headcount reduction in September 2022 (excludes \$0.4M relating to the restructure). The full benefits of the restructuring and other initiatives are expected to flow through in Q2FY23 and beyond and are estimated to result in a 15% reduction in Q2FY23 operating expenses versus Q4FY22.
- 8% increase in gross loan write-offs, which is well within risk appetite and represents 1.3% of the average Q1FY23 loan book. The benefit of recoveries and debt sales is not included in this figure.
- 58% increase in finance costs is driven by increased loan book size and the material increase in funding costs for new loans during the quarter, along with excess capacity and corresponding cost for WH1, given the ABS transaction in June 2022.

Per item 1.10, net cash from operating activities for Q1FY23 was \$(1.8)M (Q4FY22: \$(0.4)M), driven by higher finance costs along with the restructuring costs, the benefits of which will flow through in Q2FY23 and beyond.
