Solid financial results, innovation and A.I. provide strong foundations for growth and positive cash flow in FY24 and beyond

Sam Riley
CEO & Co Founder

Strong Q1 financial results support growth

I'm thrilled to kick off the year with strong cash flow and a \$2.9m adj EBITDA⁶ result (22% margin), a clear testimony to our continually improving operational strengths and ability to perform in challenging market conditions. A highlight is the swing to Q1 positive cash flow from operations of \$1.9m, starkly contrasting our negative cash burn from Q1 prior year. Importantly, we are also building solid foundations to continue generating growth and positive cash flow throughout FY24 and beyond.

Q1 was full of validation, progress and opportunity

Despite continued suppressed volumes of M&A deals globally, we continued to build new complementary revenue streams in less cyclical markets. We saw increased demand and signed more subscribers for our innovative newly launched Operational Resilience GRC Product. The validation of our ESG Product strategy and momentum of product build achieved the required milestones. The pipeline for our Procure Product has never been larger and more diversified globally. Procure progressed several major opportunities closer to wins. Whilst our revenue from the Deals Product declined 3% YoY we continued to see increases in refinancing and distressed deal types. Our ARPA⁹ increased, renewals results for Deals was very strong, as too was the continued build of future pipeline with a healthy volume of freemium¹² customer signups.

Increased product delivery and innovation demonstrates our ability to execute

In Q1 we also took great leaps forward in innovation and furthering our use of A.I. to deliver on the customer needs and trends we see. We did this via a week long hackathon event in partnership with A.I. experts at AWS. Several disruptive growth opportunities explored in the hackathon were so good that they are now on product roadmaps to be shipped to the marketplace. I have a lot of execution confidence in our team as I've seen them more than double the pace of product delivery over the last 18 months and simultaneously improve our product quality metrics too. It is another strong foundation we have in place to realise our growth opportunities.

Growth towards our \$100m ARR¹³ target (19% YoY) continues

Scalability and growth over the medium to long term is not dependant on a recovery in M&A deal markets. We are seeing momentum increase and milestones achieved for our growth products. The demand and addressable market remains very large for all of them. This and our increased ability to acquire customers digitally underpins our ability to achieve our \$100m ARR growth ambitions. However, when deal volumes do recover these efficiencies and scalability, combined with our +90% gross margin, places us in a strong position to convert future revenue growth into earnings.

Deals - Secure Virtual Data Room, workflow, collaboration software

The problem

In dealmaking, many complex parts are involved. Deals are highly confidential, and managing critical information securely is the most important aspect of every deal. There are tasks to do, different things to understand, various people's opinions to gather, and lots of information to sort. As a dealmaker, the goal is to bring all these different pieces together smoothly. A dealmaker must handle the complexity of deals and bring everything together securely to make successful deals happen.

Current customers

The solution

Ansarada Deals™ goes beyond a basic Virtual Data Room. Ansarada is highly secure and simple to use, it changes how deals are managed by offering a complete solution. It comes with many useful tools like Deal Workflow, AI-powered Data Rooms, Ansarada Q&A, PMI (Project Management Integration), and safe file sharing & storage. Customers can work together securely with your team and partners.

Procure - Procurement management software

The problem

Many organisations face a kind of organised confusion. Most organisations still use manual processes and spreadsheets to capture, manage, evaluate, report and make decisions and recommendations on highly complex infrastructure projects. This can mess up processes and make project teams take the risks including creating high levels of transparency, compliance and clear audit trails. When projects become big and complex, they need better and secure management.

Current customers

The solution

Ansarada Procure, our end-to-end project procurement management platform, we’ve helped organisations across the world deliver over \$1tr of infrastructure projects, including public transport, freight rail, toll roads, bridges, ports, stadiums, hospitals, IT systems and broader precinct renewals. Our technology turns security, collaboration, and efficiency of complex procurement management into the natural order for organisations and the people behind them.

GRC - Governance, Risk and Compliance management software

The problem

Most organizations still use manual processes and spreadsheets to capture, manage, and report corporate compliance, risk management, and regulatory change across the business. Static spreadsheets quickly fall apart when it comes to managing and tracking all the complex governance, risk and compliance efforts within an organisation.

The solution

Ansarada GRC is a leading GRC solution that helps organisations of all sizes - from 10-person startups to 10,000 employee corporations - manage GRC more effectively. It's a long-term, user-friendly solution designed to adapt and scale based on the growth of your organisation and your evolving GRC program.

ESG - Sustainability management software

The problem

The overwhelming demand for sustainability reports, the maze of compliance, the unexpected breadth of ESG considerations – from carbon emissions to cybersecurity – it's enough to leave even the most steadfast leader feeling adrift and uncertain. Embarking on an ESG journey can feel like diving into a sea of complexity, acronyms, and confusion. ESG is no longer optional, but a challenge waiting to be solved. The question is, how can businesses uncover the simplest, most effective, and cost-efficient way to navigate these uncharted waters?

The solution

Ansarada helps businesses grow purposefully. Our Sustainability Management Platform transforms the complexities of sustainable practices into a clear and confident path forward. We bring order to the chaos, enabling companies to align with leading sustainability frameworks, deliver impact through innovation, bring people on the journey, and ultimately create long lasting value.

Footnotes

1 Total Customers refers to active customers and includes consolidated customers numbers for both Ansarada NewCo Pty Ltd and Ansarada Group Limited (formerly thedocyard) including periods prior to the merger plus TriLine GRC from Q2 FY22 onwards. Total customers includes any subscription/contract with an active platform. Customers may have more than one deal platform, board portal or governance solution open at any given time. Customer numbers include customers acquired through the freemium strategy.

2 As at 30 September 2023, refers to unique data room user profiles (unique profiles excludes those deleted or disabled)

3 Ansarada has active contracts with 2 of the top 5 largest companies in the world by market capitalisation as at September 30, 2023.

4 Non-Deal customers includes active customers from GRC, Procure, Board and other non-deal related products.

5 International customers includes total active customers less customers from Australia and New Zealand.

6 EBITDA represents earnings before interest, tax, depreciation and amortisation. Adjusted EBITDA ('EBITDA (ADJ)') equals EBITDA excluding non-cash shared based expense, business combination costs, capital raising and restructure expenses

7 AASB recognised Revenue for period ending 30 September 2022. Last twelve months (LTM) measures the accumulation of the prior 12 months AASB recognised revenue. \$0.2 million in revenue recorded in Q1 FY23 related to a specific contract that related to a prior period in FY22.

8 Deferred revenue consists of Platform Subscription and Transactional Usage which are expected to be recognised on a straight-line basis over the remaining life of the contract.

9 ARPA represents the average monthly revenue generated from customers on subscription-based contracts (includes TriLine GRC from Q2 FY22 onwards but excludes Procure subscriptions).

10 Subscriber refers to active paid subscription contracts/customers at period end, and TriLine GRC from Q2 FY22 onwards.

11 Deals revenue is revenue generated from a customer subscription contract to utilise the Deal room product

12 Freemium customers refers to customers that are utilising the products and services of Ansarada but have not yet hit the trigger point for payment. Ansarada offers free access to most products giving the customer the opportunity to experience value before converting to a paid subscriber. Corporate freemium customers are included in Q4 FY23 after successful roll out and testing in Q3 FY23. Corporate freemium customers at end of Q3 FY23 would have increased the total freemium from 3,450 to 5,540. Corporate freemium customers will be included going forward..

13 ARR or Annual recurring revenue refers to revenue, normalised on an annual basis, that Ansarada expects to receive from its ARR Subscribers for providing them with Ansarada's products or services. It is calculated by annualising MRR: Monthly Recurring Revenue (MRR) x 12

14 ARR subscribers refers to the subscribers with an enterprise contract that generate annual recurring revenue.

15 ARR Subscriber Retention refers to the ARR subscribers that remain as active paying subscribers after a 12 month period. Retention is calculated as [1-(churn/opening ARR Subscribers)] over a 12 month period.

16 Net Dollar Retention refers to the amount of monthly recurring revenue in a period generated from ARR Subscribers active in a corresponding period 12 months earlier dived by the MRR from that prior period.
