Notice to non-Australian Tamboran Shareholders

Restrictions in foreign jurisdictions may make it impractical or unlawful for Scheme Consideration to be issued under the Scheme to, or received under the Scheme by, Tamboran Shareholders in certain jurisdictions outside Australia. Tamboran Shareholders (whose addresses as shown in the Tamboran Share Register on the Record Date) in Australia, Canada, Republic of Cyprus, Hong Kong, India, Italy, Luxembourg, Malaysia, New Zealand,

Singapore, United Kingdom and United States will be entitled to receive this Scheme Booklet and have Scheme Consideration issued to them in accordance with the Scheme.

This Scheme Booklet has not been filed with, or reviewed by, the US Securities and Exchange Commission or any United States state securities authority (but instead submitted to applicable United States state securities authorities for the purpose of meeting requirements for exemption from registration or obtaining no-action letters) and none of them has passed upon the merits of the Scheme or the accuracy, adequacy or completeness of this Scheme Booklet. Any representation to the contrary is a criminal offence.

Nominees, custodians and other Tamboran Shareholders who hold Tamboran Shares on behalf of a beneficial owner resident outside Australia, Canada, Republic of Cyprus, Hong Kong, India, Italy, Luxembourg, Malaysia, New Zealand, Singapore, United Kingdom and United States may not forward this Scheme Booklet (or any accompanying document) to anyone outside these countries without the consent of Tamboran.

A Tamboran Shareholder whose address shown in the Tamboran Share Register is in a jurisdiction outside Australia, Canada, Republic of Cyprus, Hong Kong, India, Italy, Luxembourg, Malaysia, New Zealand, Singapore, United Kingdom and United States will be deemed to be an Ineligible Foreign Holder for the purposes of the Scheme. Tamboran Shareholders who are deemed to be Ineligible Foreign Holders should refer to section 4.6 for more information.

Not an offer

This Scheme Booklet is not a disclosure document for the purposes of Chapter 6D of the Corporations Act and does not constitute, nor contain, an offer to sell, or a solicitation of an offer to purchase, any securities in any jurisdiction in which, or to any person to whom, it would not be lawful to make such an offer or solicitation.

The release, publication or distribution of this Scheme Booklet and/or the accompanying documents into jurisdictions other than Australia may be restricted by law and this Scheme Booklet and/or the accompanying documents may not be distributed or published in any jurisdiction except under circumstances which result in compliance with applicable laws and regulations. Therefore, persons

into whose possession this Scheme Booklet and/or the accompanying documents come should inform themselves about, and observe, any such restrictions. Any failure to comply with these restrictions may constitute a violation of the securities laws and regulations of any such jurisdiction.

See section 10.7 for further information on legal restrictions outside Australia on the distribution of this Scheme Booklet and participation in the Scheme.

Notice to Tamboran Shareholders in the United States

The Tamboran US HoldCo CDIs have not been registered under the US Securities Act or the securities laws of any state or other jurisdiction of the United States. Instead, Tamboran US HoldCo intends to rely on an exemption from the registration requirements of the US Securities Act provided by section 3(a)(10) of the US Securities Act in connection with the consummation of the Scheme and the issuance of Tamboran US HoldCo CDIs. Section 3(a)(10) exempts securities issued in exchange for other securities from the general requirement of registration where the terms and conditions of the issuance and exchange have been approved by a court of competent jurisdiction, after a hearing upon the fairness of the terms and conditions of the issuance at which all persons to whom the securities will be issued have the right to appear. Approval of the Scheme by the Court will be relied upon by Tamboran and Tamboran US HoldCo for the purposes of qualifying for the section 3(a)(10) exemption.

The Tamboran US HoldCo CDIs issued under the Scheme to Scheme Shareholders will be freely transferable under US federal securities laws, except by persons who are deemed to be "affiliates" (as that term is defined under the US Securities Act) of Tamboran US HoldCo, including persons who are deemed to have been affiliates of Tamboran US HoldCo within 90 days before the date of the closing of the Scheme. In the event that the Tamboran US HoldCo CDIs issued under the Scheme are in fact held by affiliates of Tamboran US HoldCo, those holders may either transfer the securities in accordance with the provisions of Rule 144 promulgated under the US Securities Act, or as otherwise permitted under the US Securities Act.

Tamboran Shareholders in the United States should note that the Scheme will be conducted in

accordance with the laws of Australia and Listing Rules. As a result, it may be difficult for you to enforce your rights, including any claim you may have arising under United States federal securities laws, as Tamboran is incorporated in Australia and some of its officers and directors are resident in Australia. As such, you may not be able to take legal action against Tamboran or its officers and directors in Australia for violations of United States securities laws and it may be difficult to compel Tamboran and its officers and directors to subject themselves to a United States court's judgement.

Forward looking statements

Certain statements in this Scheme Booklet relate to the future, including forward looking statements and information ('forward looking statements') within the meaning of Australian and United States securities laws. The forward looking statements in this Scheme Booklet, including statements relating to Tamboran Group and the transactions contemplated by the Scheme Implementation Deed, are not based on historical facts, but rather reflect the current views and expectations of Tamboran. These statements may generally be identified by the use of forward looking verbs such as 'aim', 'anticipate', 'believe', 'estimate', 'expect', 'foresee', 'intend' or 'plan', qualifiers such as 'may', 'should', 'likely' or 'potential', or similar words. Similarly, statements that describe the expectations, goals, objectives, plans, targets and future costs of Tamboran are, or may be, forward looking statements.

Forward looking statements involve known and unknown risks, uncertainties, assumptions and other important factors that could cause the actual results, performances or achievements of Tamboran or Tamboran Group to be materially different from future results, performances or achievements expressed or implied by such statements. Such statements and information are based on numerous assumptions regarding present and future business strategies and the environment in which Tamboran and Tamboran Group will operate in the future, including the price of commodities, anticipated costs and ability to achieve goals. Certain important factors that could cause actual results, performances or achievements to differ materially from those in the forward looking statements include, among others, port access, customer risks, commodity price volatility, mining operational and development risk, litigation risks, regulatory restrictions (including environmental regulatory restrictions and liability), activities by governmental authorities (including changes in taxation), currency

fluctuations, the speculative nature of mining services, mineral exploration and production, the global economic climate, dilution, share price volatility, competition, loss of key directors and employees, additional funding requirements, defective title to mineral claims or property and risks associated with the Scheme.

See section 7 for a (non-exhaustive) discussion of potential risk factors underlying, and other information relevant to, the forward looking statements and information. Forward looking statements should, therefore, be construed in light of such risk factors and undue reliance should not be placed on them. All forward looking statements should be read in light of such risks and uncertainties.

You should note that the historical performance of Tamboran is no assurance of its or Tamboran Group's future financial performance. The forward looking statements in this Scheme Booklet reflect views and expectations held only at the date of this Scheme Booklet. Tamboran believes that all forward looking statements included in this Scheme Booklet about Tamboran and Tamboran US HoldCo have been made on a reasonable basis. However, none of Tamboran and its directors nor any other person gives any representation, assurance or guarantee that any outcome, performance or results expressed or implied by any forward looking statements in this Scheme Booklet will actually occur. Tamboran Shareholders should therefore treat all forward looking statements with caution and not place undue reliance on them.

Subject to any continuing obligations under law, Tamboran, Tamboran US HoldCo and their respective directors disclaim any obligation to revise or update, after the date of this Scheme Booklet, any forward looking statements to reflect any change in views, expectations or assumptions on which those statements are based.

Letter from the Chair of Tamboran

27 October 2023

Dear Tamboran Shareholder

Introduction

I am pleased to provide you with this Scheme Booklet containing information about the proposed scheme of arrangement between Tamboran and Tamboran Shareholders, under which Tamboran Group will re-domicile from Australia to the United States. If the Scheme becomes Effective:

- Tamboran US HoldCo, a newly-formed company incorporated in the State of Delaware in the United States for the purpose of the re-domiciliation, will acquire all of the Tamboran Shares and become the new holding company of Tamboran and the parent company of Tamboran Group;
- you will retain an equivalent proportional economic interest in Tamboran US HoldCo as you previously held in Tamboran, and will be entitled to one Tamboran US HoldCo CDI for each Tamboran Share you hold on the Record Date, subject to the Sale Facility aspect of the Proposed Transaction dealing with the interests of Ineligible Foreign Holders;
- a Tamboran US HoldCo CDI is a CHESS depositary interest that will confer a beneficial interest in 1/200th of a Tamboran US HoldCo Share, which will be quoted on ASX and registered in the name of CDN; and
- the operations, management and strategy of Tamboran Group will remain unchanged.

In order for the Proposed Transaction to be effected, the Scheme must be approved by Tamboran Shareholders. Tamboran Shareholders are being asked to vote on the Scheme at the Scheme Meeting to be held at **Cliftons Sydney, Level 13, 60 Margaret Street, Sydney NSW 2000** on **Friday, 1 December 2023 at 10:00am (Sydney time)**.

Recommendation of the Tamboran Board

The Tamboran Board unanimously recommends that you vote in favour of the Scheme, subject to no superior proposal emerging and the Independent Expert continuing to conclude that the Scheme is in the best interests of Tamboran Shareholders. Subject to these qualifications, each Tamboran Director intends to vote the Tamboran Shares which they hold (or that are held on their behalf) in favour of the Scheme.

The key reasons for the unanimous recommendation by the Board are set out in section 2.1.

In summary, the Tamboran Board believes that the Proposed Transaction will best position Tamboran Group for the next phase of its growth as Tamboran seeks to accelerate the commercialisation of the Beetaloo Sub-basin, including by:

- better positioning Tamboran Group in a bigger, deeper capital market in the United States for continuing international growth where exploration and production investors are more active, allowing existing Tamboran Shareholders to benefit to the maximum extent possible from that growth and more clearly evaluate the performance and future prospects of Tamboran Group, whilst maintaining a listing on ASX;
- providing access to a broader US investor pool that previously could not, or were unlikely to, invest in non-US securities in a market which is familiar with and is generally better informed regarding exploration and production companies due to its greater number of market participants and

investors, which has the potential to lead to a stronger valuation of Tamboran US HoldCo over time and improve liquidity in trading of shares;

- improving access to lower-cost US debt and equity capital markets, which are larger and more diverse than Australian capital markets, which may enable future growth to be financed at a lower cost and potentially favourable financing conditions in the United States;
- simplifying Tamboran Group's corporate structure for potential future United States merger, sale or acquisition transactions, which may increase Tamboran Group's attractiveness as a potential target to strategic and merger partners, sellers or acquirers to United States domiciled companies and better alignment with key stakeholders; and
- in the event of a listing on a United States securities exchange such as NYSE, potentially increasing demand for Tamboran US HoldCo Shares due to the possible inclusion of Tamboran US HoldCo in important US stock market indices such as the Russell 2000 and S&P Total Market. Tamboran US HoldCo has not yet made an application to list on a United States securities exchange (such as NYSE) and there is no guarantee that admission will occur on a United States securities exchange.

While the Tamboran Board considers that these advantages outweigh the disadvantages and recommend that Tamboran Shareholders vote in favour of the Scheme, you should be aware of the possible reasons to vote against the Scheme, including:

- you may disagree with the unanimous recommendation of the Tamboran Board and the conclusion of the Independent Expert;
- you may decide that you do not wish to become a CDI holder of a United States domiciled company;
- the potential taxation consequences of the Scheme may not suit your current financial position or taxation circumstances;
- the trading value of the Scheme Consideration is not certain and will depend on the price at which Tamboran US HoldCo CDIs trade on ASX after the Implementation Date;
- there may be exposure to increased litigation as a result of a parent company being domiciled in the United States, as the United States' legal environment is generally understood to be more litigious than that of Australia; and
- the Scheme, if approved, will result in additional fees and costs being incurred in order to implement the Scheme and additional listing and regulatory fees.

Tamboran Shareholders should carefully consider the key reasons to vote in favour of, or against, the Scheme set out in sections 2.1 and 2.2 respectively before voting on the Scheme.

Independent Expert

BDO Corporate Finance (WA) Pty Ltd, the Independent Expert engaged by the Tamboran Board, has concluded that the Scheme is in the best interests of Tamboran Shareholders as a whole, in the absence of an alternative proposal or any further information. The Tamboran Board encourages you to read and consider the Independent Expert's Report, which is contained in Annexure A.

Further information

This Scheme Booklet sets out important information in relation to the Scheme, including the advantages and disadvantages of the Proposed Transaction, as well as information about an investment in Tamboran US HoldCo. You should read this document carefully and in its entirety before deciding how to vote on the Scheme.

If you are in any doubt as to what you should do, you should consult your legal, financial, tax or other professional adviser immediately.

If you require further information or have any questions in relation to the Scheme, please contact the Tamboran Scheme Information Line on 1300 370 557 (within Australia) or +61 2 8023 5465 (outside Australia) Monday to Friday between 8:30am and 5:00pm (Sydney time).

Conclusion

On behalf of the Tamboran Board, I thank you for your continued support as a Tamboran Shareholder. I would like to reiterate the Tamboran Board's unanimous support for the Scheme, and encourage you to vote in favour of the Scheme.

Thank you,

A handwritten signature in blue ink, appearing to read 'Rinal Spence', is positioned above the title 'Chair'.

2 Key considerations relevant to your vote in favour of or against the Scheme

This section 2 sets out some of the reasons why:

- (a) the Tamboran Board unanimously recommend that you vote in favour of the Scheme in the absence of a superior proposal and subject to the Independent Expert continuing to conclude that the Scheme is in the best interests of Tamboran Shareholders; and
- (b) notwithstanding the unanimous recommendation of the Tamboran Board, you may decide to vote against the Scheme.

You should read and carefully consider the information in this Scheme Booklet in its entirety before deciding how to vote on the Scheme. There are answers to questions you might have in section 3.

If you require further information or have any questions in relation to the Scheme, please contact the Tamboran Scheme Information Line on 1300 370 557 (within Australia) or +61 2 8023 5465 (outside Australia) Monday to Friday between 8.30am and 5.00pm (Sydney time).

Key reasons to vote in favour of the Scheme

✓	Better position Tamboran Group in a more appropriate capital market in the United States for continuing international growth
✓	Provide access to a broader investor pool that previously could not, or were unlikely to, invest in non-US securities which has the potential to lead to a stronger valuation of Tamboran US HoldCo over time and improve liquidity
✓	Improve access to lower-cost debt and equity capital markets and potentially better financing conditions
✓	Tamboran Shareholders will retain their existing exposure to Tamboran Group by receiving equivalent securities in Tamboran US HoldCo
✓	Simplify the corporate structure of Tamboran Group for potential future merger, sale or acquisition transactions and better alignment with key stakeholders
✓	May increase demand for Tamboran US HoldCo Shares in the event of a listing on a United States securities exchange such as NYSE
✓	The Tamboran Board unanimously recommends that you vote in favour of the Scheme in the absence of a superior proposal and subject to the Independent Expert continuing to conclude that the Scheme is in the best interests of Tamboran Shareholders
✓	The Independent Expert has concluded that the Scheme is in the best interests of Tamboran Shareholders as a whole, in the absence of an alternative proposal or any further information

These reasons are discussed in more detailed in section 2.1.

Key reasons to vote against the Scheme

x	You may disagree with the unanimous recommendation of the Tamboran Board and the conclusion of the Independent Expert
x	You may decide that you do not wish to become a CDI holder of a United States domiciled company
x	The potential taxation consequences of the Scheme may not suit your current financial position or taxation circumstances
x	The trading value of the Scheme Consideration is not certain and will depend on the price at which Tamboran US HoldCo CDIs trade on ASX after the Implementation Date
x	There may be exposure to increased litigation as a result of a parent company being domiciled in the United States, as the United States' legal environment is generally understood to be more litigious than that of Australia
x	The Scheme, if approved, will result in additional fees and costs being incurred in order to implement the Scheme and additional listing and regulatory fees

These reasons are discussed in more detailed in section 2.2.

2.1 Why you should vote in favour of the Scheme

(a) **Better position Tamboran Group in a more appropriate capital market in the United States for continuing international growth**

The Tamboran Board believes that the re-domiciliation of Tamboran Group from Australia to the United States will better position Tamboran Group in a bigger, deeper capital market in the United States for continuing international growth. It is expected that exploration and production investors in the United States are more active, which will allow existing Tamboran Shareholders to benefit to the maximum extent possible from that growth and more clearly evaluate the performance and future prospects of Tamboran Group, whilst it maintains a listing on ASX.

(b) **Provide access to a broader investor pool that previously could not, or were unlikely to, invest in non-US securities which has the potential to lead to a stronger valuation of Tamboran US HoldCo over time and improve liquidity**

The Tamboran Board believes that superimposing, or “top-hatting”, a United States domiciled company as the new holding company of Tamboran and the parent company of Tamboran Group will increase the overall attractiveness of Tamboran Group by broadening and diversifying its shareholder base to extend to a United States investor pool that previously could not, or were unlikely to, invest in non-US securities. It is expected that this will lead Tamboran Group to being more fully valued over time by a greater number of investors.

The Tamboran Board also believes that the United States market is generally better informed regarding exploration and production companies due to its greater number of market participants and investors. The Scheme, once approved and implemented, will provide the North America investor pool with an opportunity to invest in a company that aims to deliver low CO₂ unconventional gas resources globally. Production tests of wells that have been drilled within and on trend in the Beetaloo Sub-Basin indicate that the gas in the basin has low CO₂ reservoir content averaging approximately 1% to 4% whereas many gas fields offshore northern/north-western Australia have high reservoir CO₂ (for example, such as Itcthys has fields which have 8% and 17% and Barossa has approximately 18% reservoir CO₂). An opportunity such as this is something the United States pool of investors may not have previously had if they were unable to invest in non-US securities.

This enhanced attractiveness, awareness and visibility in the United States comes as a result of Tamboran Group's parent company being a United States entity, which has the potential to lead to an increased valuation and improved liquidity (given higher levels of visibility in one of the deepest and most liquid global markets) of Tamboran Group, and may attract further investments and provide increased funding opportunities, despite no changes to the operations or assets of Tamboran Group.

(c) **Improve access to lower-cost debt and equity capital markets and potentially better financing conditions**

The Proposed Transaction is expected to benefit the future growth and development of Tamboran Group by providing improved access to lower-cost debt or equity capital markets in the United States in a more cost-effective way, which are both larger and more diverse than Australian capital markets.

A part of this improved access to markets is the broader pool of institutional investors in the United States which, in the Tamboran Board's view, is more familiar with the structure of United States debt issues and has a stronger interest in the provision of natural gas on a larger scale than other markets to the currently underserved and growing North America and Asia-Pacific markets, and may enable future growth to be financed at a lower cost.

Additionally, the Tamboran Board believes that there is potentially a stronger appetite for better financing conditions for gas exploration and production companies in the United States as opposed to Australia given financiers in the United States have stronger familiarity and interest in the provision of natural gas on a larger and long-term scale.

(d) **Tamboran Shareholders will retain their existing exposure to Tamboran Group by receiving equivalent securities in Tamboran US HoldCo**

If the Scheme becomes Effective, Tamboran Shareholders (except for any Ineligible Foreign Holders) as at the Record Date will become holders of Tamboran US HoldCo CDIs on a 1:1 basis.

Tamboran US HoldCo CDIs will confer a beneficial interest in 1/200th of a Tamboran US HoldCo Share and will be traded on ASX. Holders of Tamboran US HoldCo CDIs will receive all the economic benefits of actual ownership of the underlying Tamboran US HoldCo Shares.

All Tamboran Options on issue will continue, however they will instead entitle the relevant Tamboran Option Holder to be issued Tamboran US HoldCo CDIs on exercise or vesting (as applicable) rather than Tamboran Shares.

(e) **Simplify the corporate structure of Tamboran Group for potential future United States merger, sale or acquisition transactions and better alignment with key stakeholders**

The Proposed Transaction will provide a more attractive corporate structure for a potential United States merger, sale or acquisition transaction in the future. The Tamboran Board believes the corporate structure after the Scheme is implemented will make it more attractive to the United States market due to their familiarity with, and domestic nature of, a United States domiciled company.

Potential overall cost savings from no longer maintaining an Australian domicile will be realised by the restructuring of the Tamboran Group corporate structure through streamlining operations and eliminating corporate redundancies. Further, United States investors and United States based employees are likely to better understand a United States corporate structure, which should increase Tamboran Group's attraction and retention through equity-based compensation.

The Tamboran Board believes that the re-domiciliation of Tamboran Group from Australia to the United States may therefore increase the attractiveness of Tamboran US HoldCo as a potential merger partner, seller or acquirer to such United States domiciled companies. If a merger, sale or acquisition with attractive terms were consummated, it could further benefit Tamboran US HoldCo CDI Holders.

Re-domiciling Tamboran Group from Australia to the United States would also allow a corporate structure to be better aligned with a majority of Tamboran Group's key stakeholders which are based in the United States. This includes, for example, those stakeholders who are based in the United States such as the majority of Tamboran's institutional investors, its drilling partner, Helmerich & Payne, Inc., its joint venture partner, Bryan Sheffield, the Company's technical and specialist drilling team and a significant portion of the Directors and senior management.

(f) **May increase demand for Tamboran US HoldCo Shares in the event of a listing on a United States securities exchange such as NYSE**

For similar reasons to the above, implementation of the Scheme will mean that Tamboran US HoldCo, as a United States domiciled company, will be more familiar with and have greater exposure to the United States market in the event of a listing of Tamboran US HoldCo Shares.

Companies within the United States are generally more familiar with the legal, taxation and other corporate issues of SEC-registered and listed entities on NYSE than they are of an Australian domiciled entity offering American Depositary Shares on a United States exchange.

A listing on a securities exchange such as NYSE would afford Tamboran Group the opportunity to provide education to a wider investor and analyst audience through its book building process. As a result, there would likely be more demand for Tamboran US HoldCo Shares in the event of a listing if Tamboran Group re-domiciles from Australia to the United States than if it does not.

Further, in the event of a listing, Tamboran US HoldCo may become eligible for inclusion in certain US-based indices which require a domestic corporate domicile, such as the Russell 2000 and S&P Total Market, providing Tamboran Group with access to media coverage and a longer tail of US-based funds that are more accessible via a United States listing, further enhancing capital markets visibility.

(g) **The Tamboran Directors unanimously recommend that you vote in favour of the Scheme in the absence of a superior proposal and subject to the Independent Expert continuing to conclude that the Scheme is in the best interests of Tamboran Shareholders**

The Tamboran Board unanimously recommended that Tamboran Shareholders vote in favour of the Scheme, in the absence of a superior proposal and subject to the Independent Expert continuing to conclude that the Scheme is in the best interests of Tamboran Shareholders.

In reaching their recommendation, the Tamboran Board have assessed and had regard to, among other things, the key reasons to vote in favour of or against the Scheme as set out in full in this section 2, and the risks set out in section 7.

In the absence of a superior proposal and subject to the Independent Expert maintaining its conclusion that the Scheme is in the best interests of Tamboran Shareholders, each Tamboran Director intends to vote the Tamboran Shares which they hold (or that are held on their behalf) in favour of the Scheme.

(h) **The Independent Expert has concluded that the Scheme is in the best interests of Tamboran Shareholders as a whole, in the absence of an alternative proposal or any further information**

The Independent Expert, BDO Corporate Finance (WA) Pty Ltd, has prepared the Independent Expert Report to provide an opinion as to whether the Scheme is in the best interests of Tamboran Shareholders. The Independent Expert has concluded that the Scheme is in the best interests of Tamboran Shareholders as a whole, in the absence of an alternative proposal or any further information.

In the Independent Expert's opinion, on balance and considering Tamboran Shareholders as a whole, the advantages of the Scheme outweigh its disadvantages and the Independent Expert has concluded that:

- the Proposed Transaction will provide Tamboran Group with potential access to new funds;
- there are favourable financing conditions for oil and gas companies in the United States;
- dual listing on a US-based stock exchange and ASX will provide Tamboran Group with higher liquidity;
- a proposed listing on a US-based securities exchange may result in a favourable liquidation event for Tamboran Shareholders;
- a United States domicile can enhance transaction potential for Tamboran Group;

- the Proposed Transaction will better align Tamboran Group's corporate structure with key business stakeholders; and
- there is a significant presence of global natural gas producers operating within Australia, despite being domiciled overseas.

A copy of the Independent Expert's Report is included as Annexure A.

Tamboran Shareholders are encouraged to read the Independent Expert's Report carefully and in its entirety, including the assumptions, qualifications and disclaimers on which the Independent Expert's opinion is based.

2.2 Why you may wish to vote against the Scheme

(a) **You may disagree with the Tamboran Directors' unanimous recommendation or the Independent Expert's conclusion**

You may disagree with the unanimous recommendation of the Tamboran Board and the conclusion of the Independent Expert, who has concluded that the Scheme is in the best interests of Tamboran Shareholders as a whole, in the absence of an alternative proposal or any further information.

If this be the case, further insight into the weight given to the advantages and disadvantages of the Proposed Transaction can be found in the Independent Expert's Report in Annexure A.

(b) **You may decide that you do not wish to become a CDI holder of a United States domiciled company**

Tamboran US HoldCo, as a company incorporated in the State of Delaware, will not be subject to the Corporations Act to which Tamboran is currently subject and will instead be subject to the Delaware General Corporation Law (**DGCL**).

The rights of holders of Tamboran US HoldCo CDIs will be governed by the laws of the United States, the State of Delaware, the laws of any other states in the United States in which it operates in, as well as the Tamboran US HoldCo Charter Documents comprised of the Tamboran US HoldCo Certificate of Incorporation and Tamboran US HoldCo By-Laws. Tamboran US HoldCo will also be bound by the Listing Rules if ASX grants permission for Tamboran US HoldCo CDIs to be quoted on ASX (except to the extent that ASX grants waivers).

As a result of the differences in rights and obligations under the DGCL and the Tamboran US HoldCo Charter Documents as compared to their current rights and obligations, Tamboran Shareholders may decide that they do not wish to become a CDI holder of a United States domiciled company and prefer instead to remain a shareholder of an Australian domiciled company.

In addition, although CDI holders receive all of the economic benefits of actual ownership of the underlying shares, there are a number of differences between holding a CDI and holding the underlying share, some of which could be viewed as disadvantageous. For example, holders of CDIs will need to act through CDN for the purposes of voting the underlying shares and exercising shareholder rights attaching

to the underlying shares (although CDN is required to comply with the instructions of the CDI holder in exercising shareholder rights available to CDN).

Tamboran Shareholders should consider further information regarding Tamboran US HoldCo CDIs in Annexure F and the non-exhaustive comparison of corporate laws applicable in respect of Tamboran and Tamboran US HoldCo set out in Annexure G.

(c) **The potential taxation consequences of the Scheme may not suit your current financial position or taxation circumstances**

Implementation of the Scheme may trigger taxation consequences for you depending on your individual personal circumstances. A general guide to the United States and Australian taxation implications of the Scheme is set out in section 8.

All Tamboran Shareholders are advised to seek independent professional advice about their particular circumstances, including foreign taxation consequences for non-Australian Tamboran Shareholders.

(d) **The trading value of the Scheme Consideration is not certain and will depend on the price at which Tamboran US HoldCo CDIs trade on ASX after the Implementation Date**

The exact value of the Scheme Consideration that would be realised by individual Tamboran Shareholders will depend on the price at which Tamboran US HoldCo CDIs trade on ASX after the Implementation Date.

In addition, the Sale Agent will be issued the Tamboran US HoldCo CDIs that would otherwise have been issued to Ineligible Foreign Holders and will sell them as soon as reasonably practicable. Although the quantum of these sales is expected to be limited, it is possible that such sales may exert downward pressure on the share price of Tamboran US HoldCo during the applicable period.

(e) **There may be exposure to increased litigation as a result of a parent company being domiciled in the United States, as the United States' legal environment is generally understood to be more litigious than that of Australia**

Tamboran US HoldCo, as a Delaware corporation, may be exposed to more litigation than Tamboran due to the more litigious legal environment in the United States as compared to Australia. For example, under certain circumstances and in accordance with applicable law, a shareholder of a Delaware corporation may bring a class action lawsuit as a representative of a group (the "class") of similarly situated shareholders to enforce an obligation owed by the corporation and/or its directors or officers to shareholders where the requirements for maintaining a class action under Delaware law have been met. There is a risk that any material or costly dispute or litigation could adversely affect Tamboran US HoldCo's reputation, financial performance or value.

(f) **The Scheme, if approved, will result in additional fees and costs being incurred in order to implement the Scheme and additional listing and regulatory fees**

If approved, Tamboran estimates the total cost of implementing the re-domiciliation of Tamboran Group as being approximately A\$555,000 (excluding GST). This total cost includes a number of other costs, such as adviser fees, that will be incurred by

Tamboran independent of the result of the Scheme, as well as fees resulting from the lodging of applications with regulatory bodies.

Substantially, all of the legal fees and other expenses relating to the preparation of this Scheme Booklet will be incurred by Tamboran regardless of whether or not this Scheme is approved by the Requisite Majority of Tamboran Shareholders and by the Court. Further information regarding transaction costs can be found in section 10.9(d).

Further, listing on a United States securities exchange such as NYSE, which Tamboran US HoldCo proposes to pursue, will require compliance with US federal securities laws and the listing rules of the natural securities exchange that will result in additional listing costs and regulatory fees for Tamboran US HoldCo.

2.3 Other relevant considerations

(a) No brokerage or stamp duty will be payable on the transfer of your Tamboran Shares pursuant to the Scheme

You will not incur any brokerage or stamp duty costs on the transfer of your Tamboran Shares pursuant to the Scheme.

Brokerage fees will, however, be incurred by Ineligible Foreign Holders whose attributable Tamboran US HoldCo CDIs will be issued to, and sold by, the Sale Agent, and the net cash proceeds of the sale remitted to the Ineligible Foreign Holders by the Sale Agent.

(b) The Scheme may become Effective even if you do not vote, or vote against the Scheme

Even if you do not vote, or you voted against the Scheme, the Scheme may still become Effective if it is approved by the Requisite Majority of Tamboran Shareholders and the Court. If this occurs and you are a Tamboran Shareholder as at the Record Date, your Tamboran Shares will be transferred to Tamboran US HoldCo and you will receive the Scheme Consideration even though you did not vote on, or voted against, the Scheme.

(c) Deemed warranties by Scheme Shareholders about their Scheme Shares

If the Scheme becomes Effective, each Scheme Shareholder will be deemed to have warranted to Tamboran and Tamboran US HoldCo that to the extent permitted by law:

- (i) all of their Scheme Shares (including any rights and entitlements attaching to those shares) which are transferred to Tamboran US HoldCo under the Scheme will, at the date of transfer, be fully paid and free from any Encumbrances and interests of third parties of any kind, whether legal or otherwise, and restrictions on transfer of any kind; and
- (ii) they have full power and capacity to sell and transfer their Scheme Shares (including all rights and entitlements attaching to them) to Tamboran US HoldCo.

4 Overview of the Proposed Transaction

4.1 Background

Tamboran is proposing to re-domicile from Australia to the United States through a transaction that will involve:

- superimposing, or “top-hatting”, a new United States company, Tamboran US HoldCo, as the new holding company of the Tamboran Group; and
- Tamboran Shareholders (except for any Ineligible Foreign Holders) exchanging all of their Tamboran Shares for new securities in Tamboran US HoldCo by way of a Court and shareholder approved mechanism known as a ‘scheme of arrangement’.

On 12 October 2023, Tamboran and Tamboran US HoldCo executed a Scheme Implementation Deed, under which the parties have agreed to implement the Scheme between Tamboran and Tamboran Shareholders.

A summary of the Scheme Implementation Deed is included in section 9.1 and a copy of the Scheme Implementation Deed is set out in Annexure B. A copy of the Scheme is set out in Annexure C.

On 24 October 2023, Tamboran US HoldCo executed the Deed Poll in favour of the Tamboran Shareholders, under which it will provide the Scheme Consideration to each Scheme Shareholder and, in the case of Ineligible Foreign Holders, to the Sale Agent in accordance with the terms of the Scheme, and undertake all other actions attributed to it under the Scheme.

A copy of the Deed Poll is contained in Annexure D.

4.2 Effect on Tamboran Shareholders if the Scheme becomes Effective

If the Scheme becomes Effective:

- (a) all Tamboran Shareholders (whether or not they voted for or voted against the Scheme) who hold Tamboran Shares as at the Record Date will participate in and be bound by the Scheme, regardless of their voting decision;
- (b) all of the Tamboran Shares will be transferred from Tamboran Shareholders who hold Tamboran Shares as at the Record Date to Tamboran US HoldCo in return for the Scheme Consideration;
- (c) Tamboran US HoldCo will list on ASX and become the new holding company of Tamboran and the parent company of Tamboran Group;
- (d) Tamboran will de-list from ASX and become a wholly-owned subsidiary of Tamboran US HoldCo;
- (e) Tamboran Shareholders (except for any Ineligible Foreign Holders) who hold Tamboran Shares as at the Record Date will retain an equivalent proportional economic interest in Tamboran US HoldCo as they previously held in Tamboran, and will become holders of Tamboran US HoldCo CDIs which will be traded on ASX;

- (f) the Tamboran US HoldCo CDIs to which Ineligible Foreign Holders would otherwise have been entitled will be issued to the Sale Agent and sold in accordance with the Sale Facility, with the net proceeds of such sale being remitted to the Ineligible Foreign Holders; and
- (g) there will be no changes to the operations, management and strategy of Tamboran Group.

4.3 Recommendation of the Tamboran Board

The Tamboran Board has evaluated the Proposed Transaction and other strategic alternatives to enhance value for Tamboran Shareholders. As part of this evaluation, the Tamboran Board has considered their independence and believe that there are no factors impacting their independence at the time of the Scheme or that are likely to arise after implementation of the Scheme as a result of the Proposed Transaction. Senior management has participated in the discussions and analysis surrounding the Proposed Transaction but will not receive any direct benefit from implementation of the Proposed Transaction.

Having considered various options, the Tamboran Board considers the Proposed Transaction is the most appropriate way forward and unanimously recommends that Tamboran Shareholders vote in favour of the Scheme, subject to no superior proposal emerging and the Independent Expert continuing to conclude that the Scheme is in the best interests of Tamboran Shareholders.

The Tamboran Directors intend to vote, or procure the voting, in favour of the Scheme with respect to any Tamboran Shares controlled or held by, or on behalf of, them.

4.4 Scheme Consideration

If the Scheme becomes Effective, each Scheme Shareholder (other than any Ineligible Foreign Holder) will be entitled to receive the Scheme Consideration of one Tamboran US HoldCo CDI in exchange for every Tamboran Share held as at the Record Date. One Tamboran US HoldCo CDI will confer a beneficial interest in 1/200th of a Tamboran US HoldCo Share. The Scheme Consideration will be issued to the Scheme Shareholders on the Implementation Date.

Importantly, the Proposed Transaction will not change a Scheme Shareholder's underlying ownership interests in Tamboran Group (subject to the Sale Facility aspect of the Proposed Transaction dealing with the interests of Ineligible Foreign Holders).

Refer to section 4.7 for further details on the Sale Facility.

4.5 CHESS depositary interests

CDIs are instruments used to enable securities of foreign companies, such as Tamboran US HoldCo, to be traded on ASX and settled and held in CHESS.

Tamboran US HoldCo CDI Holders will obtain all the economic benefits of actual ownership of Tamboran US HoldCo Shares. Tamboran US HoldCo CDIs will confer the beneficial interest in Tamboran US HoldCo Shares on the holders while the legal title or beneficial ownership to Tamboran US HoldCo Shares will be held by CHESS Depositary Nominees Pty Ltd (**CDN**), a wholly owned subsidiary of ASX Limited.

Tamboran US HoldCo CDIs can be converted into Tamboran US HoldCo Shares (on a 200:1 basis) and vice versa (on a 1:200 basis) at any time following the Implementation Date.

Annexure F to this Scheme Booklet provides a further description of the rights and entitlements attaching to CDIs generally, including in relation to voting.

4.6 Ineligible Foreign Holders

An Ineligible Foreign Holder is a Tamboran Shareholder:

- (a) whose address as shown in the Tamboran Share Register on the Record Date is a place outside of Australia, Canada, Republic of Cyprus, Hong Kong, India, Italy, Luxembourg, Malaysia, New Zealand, Singapore, United Kingdom and United States; and
- (b) who Tamboran determines (in its absolute discretion) that it would be unlawful, unduly onerous or unduly impractical to issue the Scheme Consideration to such Scheme Shareholder in the relevant jurisdiction.

Ineligible Foreign Holders will not be issued Tamboran US HoldCo CDIs. Instead, the Tamboran US HoldCo CDIs to which Ineligible Foreign Holders would otherwise be entitled to under the Scheme will be issued to the Sale Agent and sold through the Sale Facility, with the net proceeds of the sale being remitted to those Ineligible Foreign Holders.

As at the date of this Scheme Booklet, there are no Ineligible Foreign Holders.

If you are an Ineligible Foreign Holder, refer to section 4.7 for further information on the Sale Facility.

4.7 Sale Facility

The Sale Facility will be established to sell the Scheme Consideration that would otherwise have been issued to Ineligible Foreign Holders.

If you are an Ineligible Foreign Holder, the entire Scheme Consideration that would otherwise have been issued to you will be issued to the Sale Agent, as your nominee on trust, for sale through the Sale Facility and you will receive a pro rata share of the net proceeds from the sale of all Scheme Consideration sold through the Sale Facility. Ineligible Foreign Holders will receive the proceeds of sale after deductions for applicable brokerage, foreign exchange, stamp duty and other selling costs, taxes and charges.

The Sale Agent will sell the Tamboran US HoldCo CDIs in such manner, on such financial markets, at such price and on such other terms as the Sale Agent determines in good faith, having due regard to the desire to achieve the best price reasonably available at the time of sale.

The Sale Facility will operate as follows:

- (a) as soon as reasonably practicable (**Sale Period**), the Sale Agent will arrange for the sale of all the Tamboran US HoldCo CDIs allotted to it, held for the benefit of Ineligible Foreign Holders; and

- (b) after settlement of the sale of the last of the Tamboran US HoldCo CDIs held by the Sale Agent, the Sale Agent will then promptly remit the sale proceeds in A\$ dollars, less any applicable brokerage, foreign exchange, stamp duty, currency conversion and other selling costs, taxes and charges, to each Ineligible Foreign Holder for their pro rata share of the aggregate sale proceeds.

Each Ineligible Foreign Holder will receive their pro rata share of the aggregate sale proceeds on an averaged basis so that all Ineligible Foreign Holders will receive the same A\$ equivalent price per Tamboran US HoldCo CDI (subject to rounding down to the nearest whole cent (in Australian dollars)).

The actual price received by an Ineligible Foreign Holder for their Tamboran US HoldCo CDIs that are sold under the Sale Facility may be less than the actual price that is received by the Sale Agent for those Tamboran US HoldCo CDIs, less any applicable brokerage, foreign exchange, stamp duty and other selling costs, taxes and charges in respect of those Tamboran US HoldCo CDIs.

Payment of the proceeds of the sale of Tamboran US HoldCo CDIs under the Sale Facility will be in full and final satisfaction of the rights of Ineligible Foreign Holders under the Scheme, and will be made as soon as practicable after implementation of the Scheme by either:

- (a) electronic funds transfer in A\$ into a bank account with any Australian "Authorised Deposit-taking Institution" (as defined in the Corporations Act) notified by the relevant Ineligible Foreign Holder to Tamboran (or the Tamboran Share Registry) and recorded in, or for the purposes of, the Tamboran Share Register at the Record Date; or
- (b) if a bank account has not been notified to Tamboran US HoldCo, dispatching a cheque for the relevant amount in A\$ sent to the relevant Ineligible Foreign Holder by prepaid post (at the risk of that Ineligible Foreign Holder) to their address as it appears on the Tamboran Share Register on the Record Date.

There is no guarantee that there will be a liquid market for the Tamboran US HoldCo CDIs. Prices for the Tamboran US HoldCo CDIs may rise and fall during the Sale Period and will depend on many factors, including the demand for and supply of the Tamboran US HoldCo CDIs. As such, the proceeds that Ineligible Foreign Holders receive under the Sale Facility may be less than the market value of Tamboran Shares as at the date of this Scheme Booklet.

None of Tamboran, Tamboran US HoldCo or the Sale Agent gives any assurance as to the price that will be achieved for the sale of the Tamboran US HoldCo CDIs under the Sale Facility. The sale of the Tamboran US HoldCo CDIs will be at the risk of the relevant Ineligible Foreign Holder and the Sale Agent is not liable for failure to sell any Tamboran US HoldCo CDIs under the Sale Facility at a particular price.

If Tamboran US HoldCo receives professional advice that any withholding or other tax is required by law or by a Regulatory Authority to be withheld from a payment to an Ineligible Foreign Holder, Tamboran US HoldCo will withhold the relevant amount before making the payment to the relevant Ineligible Foreign Holder. Tamboran US HoldCo will pay any withheld amounts to the relevant tax authorities in accordance with the applicable laws. If requested in writing by the relevant Ineligible Foreign Holder, Tamboran US HoldCo will provide a receipt or other appropriate evidence of such payment to that Ineligible Foreign Holder.

4.8 Withholding taxes under the Sale Facility

United States back-up withholding may apply to the proceeds from the Sale Facility payable to a US Holder (as that term is defined in section 8.1) if such holder fails to provide its correct taxpayer identification number or otherwise fails to certify its exemption from backup withholding. US Holders who are required to establish their exempt status generally will be required to provide a properly completed applicable IRS Form W-9 or W-8 to the Tamboran Share Registry.

4.9 Conclusion of the Independent Expert

Tamboran has appointed BDO Corporate Finance (WA) Pty Ltd as the Independent Expert to prepare a report to ascertain whether, in its view, the Scheme is in the best interests of Tamboran Shareholders.

The Independent Expert has concluded that, on balance and considering Tamboran Shareholders as a whole, the advantages of the Scheme outweigh its disadvantages and, accordingly, has opined that the Scheme is in the best interests of Tamboran Shareholders as a whole, in the absence of an alternative proposal or any further information.

A copy of the Independent Expert's Report is set out in Annexure A.

The Tamboran Board encourages you to read the Independent Expert's Report in full before deciding how to vote on the Scheme.

4.10 Warranty and appointment of Tamboran as agent and attorney by Tamboran Shareholders

Under the terms of the Scheme, each Tamboran Shareholder:

- (a) is deemed to have warranted to Tamboran, and is deemed to have authorised Tamboran to warrant to Tamboran US HoldCo as agent and attorney for the Tamboran Shareholder, that to the extent permitted by law:
 - (i) all of its Scheme Shares (including any rights and entitlements attaching to those shares) which are transferred to Tamboran US HoldCo under the Scheme will, at the date of the transfer, be fully paid and free from any Encumbrances and interests of third parties of any kind, whether legal or otherwise, and restrictions on transfer of any kind; and
 - (ii) it has full power and capacity to sell and transfer its Scheme Shares (including all rights and entitlements attaching to them) to Tamboran US HoldCo under the Scheme; and
- (b) without the need for any further action, also irrevocably appoints Tamboran and each of the Tamboran Directors and officers of Tamboran, jointly and severally, as its attorney and agent for the purposes of:
 - (i) enforcing the Deed Poll against Tamboran US HoldCo;
 - (ii) in the case of Scheme Shares in a CHESS holding:

- (A) causing a message to be transmitted to ASX Settlement in accordance with the ASX Settlement Rules so as to transfer the Scheme Shares held by the Scheme Shareholder from the CHES sub-register of Tamboran to the issuer sponsored sub-register operated by Tamboran or the Tamboran Share Registry at any time after Tamboran US HoldCo has provided the Scheme Consideration which is due under this Scheme to Scheme Shareholders; and
- (B) completing and signing on behalf of Scheme Shareholders any required form of transfer of Scheme Shares;
- (iii) in the case of Scheme Shares registered in the issuer sponsored sub-register operated by Tamboran or the Tamboran Share Registry, completing and signing on behalf of Scheme Shareholders any required form of transfer; and
- (iv) doing all things and executing all deeds, agreements, instruments, transfers or other documents that may be necessary or desirable to give full effect to the Scheme and the transactions contemplated by it,

and Tamboran accepts such appointment.

Tamboran, as attorney and agent of each Scheme Shareholder, may sub-delegate its functions, authorities or powers under this section 4.10 to all or any of its directors and officers (jointly, severally or jointly and severally).

4.11 Tax consequences for Tamboran Shareholders if the Scheme becomes Effective

A general outline of the main United States and Australian taxation implications of the Scheme for certain Tamboran Shareholders is set out in section 8. The information set out in section 8 is expressed in general terms and is not intended to provide taxation advice in respect of the particular circumstances of any Tamboran Shareholder. In addition, Tamboran Shareholders are strongly urged to consult with their tax advisers as to the specific taxation consequences for them in connection with the Proposed Transaction, including the applicability and effect of foreign and local income and other tax laws in their particular circumstances.

4.12 No brokerage or stamp duty

No brokerage or stamp duty will be payable by Scheme Shareholders on the transfer of your Tamboran Shares to Tamboran US HoldCo pursuant to the Scheme. However, brokerage fees will be incurred by Ineligible Foreign Holders whose attributable Tamboran US HoldCo CDIs will be issued to, and sold by, the Sale Agent.

4.13 Scheme Meeting

On 27 October 2023, the Court ordered Tamboran to convene the Scheme Meeting in accordance with the Notice of Scheme Meeting at which Tamboran Shareholders will be asked to approve the Scheme. 4.16 Listing of Tamboran US HoldCo on ASX and a United States securities exchange

(a) ASX

An application will be made for the admission of Tamboran US HoldCo to the official list of ASX and for the quotation of Tamboran US HoldCo CDIs after the date of this Scheme Booklet. Approval of the listing of Tamboran US HoldCo is a condition to implementation of the Scheme.

It is expected that, provided ASX grants approval for the listing and quotation, that Tamboran US HoldCo CDIs will commence trading on ASX, initially on a deferred settlement basis commencing on the Business Day after the Effective Date.

(b) United States securities exchange

In order to maximise the benefits of the Proposed Transaction, Tamboran US HoldCo intends to seek admission to have its shares traded on a United States securities exchange, such as NYSE, in the calendar year 2024. Whilst there is no guarantee that admission will occur, Tamboran US HoldCo expects a listing, should one proceed, to occur in the first half of 2024. If this listing does occur, Tamboran Shareholders will have the option of trading Tamboran US HoldCo CDIs on ASX in Australia or, after converting Tamboran US HoldCo CDIs into Tamboran US HoldCo Shares, trading Tamboran US HoldCo Shares on a securities exchange in the United States.

Even if a listing on a United States securities exchange does not occur, the Tamboran Board believes that a re-domiciliation of Tamboran Group from Australia to the United States would have sufficient benefits to warrant doing so.

5 Profile of Tamboran

5.1 Introduction

Tamboran is an ASX-listed public company (ASX:TBN) incorporated in Victoria, Australia under the laws of the Commonwealth of Australia and is regulated by Australian law, including the Corporations Act and the Listing Rules. Tamboran is a natural gas company focussed on supporting the global energy transition by delivering low-reservoir CO₂ resources in the Beetaloo Sub-Basin in the Northern Territory of Australia.

Tamboran's registered office and principal place of business is located at Suite 39.01, Level 39, Tower One, International Towers Sydney, 100 Barangaroo Avenue, Barangaroo NSW 2000.

5.2 Background and history

Tamboran Group was established on 9 February 2009. Through its subsidiaries, Tamboran Group specialises in natural gas with projects in advanced exploration in Australia.

Key highlights of Tamboran Group's progress to date includes:

- Entered into a joint venture agreement with Santos QNT Pty Ltd (Santos), under which Santos became the operator of EP 161, as well as a farm-in agreement pursuant to which Santos earned a 75% working interest in EP 161.
- Completed the Tanumbirini 2H (T2H) and 3H (T3H) wells in EP 161 with joint venture partner Santos, demonstrating commercial flow rates and deliverability of the Mid Velkerri "B Shale" formation.
- The T2H and T3H wells reached 90-day production rates (IP90) of 1.6 and 2.1 million standard cubic feet per day (mmscfd) respectively (normalised at 2.4 and 3.5 mmscfd over 1,000-metre horizontal sections).
- Completed drilling the Maverick 1V (M1V) well in EP 136, reaching a total depth of 3,050 metres and delivering a 54 per cent reduction in time compared to other near-field vertical sections drilled deeper than 2,500 meters in the Beetaloo Sub-basin.
- Completion between Tamboran and Bryan Sheffield to acquire a 77.5% interest in Beetaloo Sub-basin assets EP 76, 98 and 117 for A\$60 million and a future production royalty.
- Completed the 25-stage stimulation program over a 1,020-metre horizontal section within the Mid Velkerri "B Shale" of the Amungee 2H (A2H) well, located within EP 98.
- Acquired Sweetpea Petroleum Pty Limited, who is the registered holder of a 100% working interest in each of EP 136 and EP 143 in the Beetaloo Sub-basin and has also applied for exploration permit application EP(A) 197.
- Tamboran and Bryan Sheffield agreed to jointly (50% each) acquire Origin's 77.5% interest in three Beetaloo Sub-basin permits (EP 98, 117 and 76) through a joint venture entity for an upfront cash consideration of A\$60 million plus a future production royalty.

5.3 Business and operations overview

The principal activities of Tamboran focus on shale gas exploration in onshore basins in the Northern Territory of Australia.

Tamboran is the largest acreage holder in the Beetaloo Sub-basin of the Northern Territory, focused on the development of its early-stage, unconventional low reservoir CO₂ natural gas resources within its portfolio (EP 76, EP 98, EP 117, EP 136, EP 143, EP 161 and EP(A) 197).

(a) **EP 76, 98 and 117 (Tamboran 38.75% working interest and operator)**

In September 2022, Tamboran announced the acquisition of Beetaloo Sub-basin permits EP 76, 98 and 117. The acquisition positions Tamboran as the largest acreage holder in the Beetaloo Sub-basin, with approximately 1.9 million net prospective acres and 147 trillion cubic feet of net prospective gas resources.

Tamboran completed the acquisition on 9 November 2022 and commenced drilling of the A2H well, the first of two wells required to finalise the Falcon Oil & Gas Ltd (**Falcon**) farm-in obligations, on 10 November 2022.

The A2H well was designed as a development well with 5-½-inch casing, the optimal casing size to place a high intensity stimulation. This is expected to deliver sand and fluid at an increased rate to the perforations during the stimulation, a proven concept that has been known to deliver significantly higher production rates and estimated ultimate recovery. The well was successfully drilled to a total depth of 3,883 metres in 38 days, including a 1,275 metre horizontal section, which was placed in the most prospective zone of the Mid-Velkerri “B Shale” formation.

In early January 2023, Tamboran contracted Condor Energy Services Ltd (**Condor**) to undertake the stimulation program for the A2H well. Under the contract, Condor will provide stimulation and coiled tubing services to complete up to 24 stimulation stages within the Mid-Velkerri “B Shale”. The stimulation program across 1,200 metre horizontal section within the shale of A2H commenced on 16 February 2023. Following the stimulation program, the Beetaloo Joint Venture contracted Silver City Drilling to undertake completion operations at the A2H well, including the installation of production tubing. Operations to install production tubing were completed in late April and the well was re-opened in preparation to commence flow testing. During the June quarter, Tamboran announced interim results from A2H. The A2H well achieved gas breakthrough during the quarter, however modelling and independent third-party analysis of fluids recovered from the well identified potential skin inhibiting gas and water flow. During the period, Tamboran commenced a comprehensive evaluation of the drilling area for the second and final well required to satisfy the Falcon farm-in obligations.

(b) **EP 161 (Tamboran 25% working interest)**

During the first half of financial year 2023, Santos, the operator of EP 161, completed the installation of production tubing within the T2H and T3H wells. Flow testing recommenced in August 2022. Both wells were drilled during the second half of calendar year 2021 and stimulated in December 2021.

Since the recommencement of flow testing, the T3H well delivered an IP30 averaging 3.1 mmscfd over a 600-metre completed horizontal section (normalised at 5.2 mmscfd over 1,000 metres). The T2H well delivered an average IP30 flow rate of 2.1 mmscfd over a 660-metre completed horizontal section (normalised at 3.3 mmscfd over 1,000 metres). This was despite the T2H well having remained on production for the majority of calendar year 2022, which had produced 0.27 BCF prior to the installation of production tubing.

The flow testing of both wells was suspended in early December 2022 following completion of the testing period. The T3H well delivered an average IP90 flow rate of 2.1 mmscfd over a 600-metre completed horizontal section (normalised at 3.5 mmscfd over 1,000 metres). The T2H well delivered an average IP90 flow rate of 1.6 mmscfd over a 660 metre completed horizontal section (normalised at 2.4 mmscfd over 1,000 metres).

The T2H and T3H wells are currently shut-in and on long term pressure build up. Both wells have provided Tamboran valuable information in drilling and stimulation design that will be implemented across future development wells within the Tamboran operated acreage.

Santos plans on conducting 2D seismic within the permit during calendar year 2023, which is subject to obtaining both regulatory approvals and an agreement with the pastoral leaseholder.

(c) EP 136, 143 and EP(A) 197 (Tamboran 100% working interest)

During the first half of financial year 2023, Tamboran mobilised the Ensign Rig 970 to the Maverick well pad for the drilling of the M1V well in Beetaloo Sub-basin permit EP 136.

Following the acquisition of the Beetaloo Sub-basin assets in September 2022, Tamboran modified the design of the M1V well to a vertical well. The decision was made in order to prioritise capital to accelerating booking of 2P gas reserves and cash flow from a pilot development in the acreage acquired from Origin.

The M1V well spudded in mid-September 2022 and reached total depth of 3,050 metres in early October 2022. Drilling time was 18.3 days, 54 per cent quicker than other near-field vertical sections drilled deeper than 2,500 metres in the Beetaloo Sub-basin. This was also significantly less than the approximately 100 days to reach total depth at the Tanumbirini 1 vertical well.

Tamboran applied its experience and technical expertise, as well as learnings from the T2H and T3H wells to the drilling of M1V. This included a carefully designed bit and bottomhole assembly, which drilled approximately 500 metres of the Moroak sandstone, the toughest interval in the Beetaloo Sub-basin, in 54-hours, averaging 9.25 metres per hour (**mph**) including connection time. This compares to offset wells within the deeper region of the basin that averaged 486 metres in 364 hours (1.33 mph).

The application of the techniques and design used in M1V are expected to result in a significant reduction in time for drilling through the Moroak sandstone in future development wells, supporting cost reductions.

In October 2022, the M1V well was cased and cemented for future possible re-entry and the Ensign 970 was subsequently rigged down and released in December 2022.

5.10 Material changes in Tamboran's financial position

To the knowledge of Tamboran Board as at the Last Practicable Date before this Scheme Booklet, other than:

- (a) as announced to ASX on 27 June 2023, Tamboran's completion of its successful two-tranche placement of approximately 295,634,390 Tamboran Shares at A\$0.18 per Tamboran Share as follows:
 - (i) Tranche 1 – comprising the issue of 288,995,504 Tamboran Shares to institutional, sophisticated and professional investors pursuant to Tamboran's existing placement capacity under Listing Rules 7.1 and 7.1A, raising approximately A\$52 million; and

- (ii) Tranche 2 – comprising the issue of 6,638,886 Tamboran Shares to Tamboran's investors as approved by Tamboran Shareholders on 21 August 2023, raising approximately A\$1.2 million;
- (b) as announced to ASX on 27 June 2023, Tamboran's entry into a subscription deed on 6 July 2023 with Helmerich & Payne International Holdings, LLC (**H&P**) to issue the Tamboran Convertible Notes, the terms of which were approved by Tamboran Shareholders on 21 August 2023, but as at the date of this Scheme Booklet have not been issued or drawn down by Tamboran; and
- (c) Tamboran entered into a lease with H&P for the use of the FlexiRig for a two-year period, commencing on 1 August 2023 and valued at approximately A\$36 million (being the present value of all committed future payments related to the lease component in the drilling contract, including the daily operating and standby rates),

the financial position of Tamboran has not materially changed since 30 June 2023, being the date of Tamboran's audited financial statements for the year ended 30 June 2023 (released to ASX on 27 September 2023).

5.11 Litigation

Tamboran is involved in a number of lawsuits incidental to its business, including litigation relating to land access and litigation arising from special interest groups opposed to Tamboran's operations in the Northern Territory.

Specifically, proceedings have been commenced by Central Australian Frack Free Alliance (**CAFFA**) against the Minister for Environment Northern Territory and Tamboran B2 Pty Ltd (**Tamboran B2**) on 30 January 2023 in the Northern Territory Supreme Court (**Proceedings**). The Proceedings seek to set aside the Minister's decision to approve the Amungee AW Delineation Program Environment Management Plan (ORI11-3) Exploration Permit (EP) 98 (**EMP**) submitted by Tamboran B2 (formerly Origin Energy B2 Pty Ltd) under the *Petroleum (Environment) Regulations 2016* (NT) (**Regulations**). The Proceedings are listed for a two-day hearing before Chief Justice Grant in the NT Supreme Court commencing on 7 November 2023. Following the hearing, Tamboran anticipates that judgment will be delivered in 2024. Although uncertain, judgment may take up to 6 months given this is the first judicial review application under the Regulations. If the Proceedings are dismissed, CAFFA will have 28 days to lodge an appeal of the judgment.

Alternatively, if CAFFA is successful in obtaining an order setting aside the EMP, Tamboran B2 will not be able to undertake any operations pursuant to the EMP. However, Tamboran B2 will have a period of 28 days to lodge an appeal of the judgment. As part of any appeal, Tamboran B2 may file an application seeking a stay of the orders setting aside the EMP, pending the determination of the appeal, to allow Tamboran B2 to continue undertaking operations pursuant to the EMP. Pursuant to the Regulations, if Tamboran B2 is ultimately unsuccessful (even on appeal), or does not appeal, Tamboran B2 will be required to halt regulated operations being undertaken under the EMP, and then revise and re-submit the EMP. The process for re-submission of the EMP is done in accordance with the Regulations and requires engagement with stakeholders, a period for public consultation and up to 90 days for the Minister to either approve or refuse the EMP. The Proceedings only concern the EMP. Any other approved environment management plan for EP98 (or any other Exploration Permit held either wholly or partly, by Tamboran B2 or any of its related entities), are not impacted by the Proceedings. Accordingly, all operations under any other environment

management plans or Exploration Permits, can continue irrespective of the outcome of the Proceedings.

This litigation may be costly and may adversely affect the operational and financial results of Tamboran. There is also a risk that Tamboran's reputation may suffer due to the profile and public scrutiny surrounding any such litigation regardless of their outcome. Although it is difficult to predict the ultimate outcome of this litigation, Tamboran believes that any ultimate liability would not have a material adverse effect on its consolidated financial condition or results of operations.

5.12 Publicly available information

As a company listed on ASX and a 'disclosing entity' under the Corporations Act, Tamboran is subject to regular reporting and disclosure obligations under the Corporations Act and the Listing Rules. Broadly, these obligations require Tamboran to notify ASX of information about specified matters and events as they arise for the purposes of ASX making that information available to participants in the market. Tamboran has an obligation under the Listing Rules (subject to some exceptions) to notify ASX immediately upon becoming aware of any information concerning it, which a reasonable person would expect to have a material effect on the price or value of Tamboran Shares.

Pursuant to the Corporations Act and the Listing Rules, Tamboran is required to prepare and lodge with ASIC and ASX both annual and half-yearly financial statements, accompanied by a statement and report from the Tamboran Directors and an audit or review report. Copies of each of these documents can be obtained free of charge by visiting ASX's website at www.asx.com.au and Tamboran's website at www.tamboran.com. ASIC also maintains a record of documents lodged with it by Tamboran and these may be obtained or inspected online through ASIC Connect. Information is also available on Tamboran's website at www.tamboran.com.

6 Profile of Tamboran US HoldCo

6.1 Overview of Tamboran US HoldCo

Tamboran US HoldCo was incorporated on 3 October 2023 in the State of Delaware under the Delaware General Corporation Law (**DGCL**) for the purpose of effecting the Scheme and retaining a listing on ASX through the issue of Tamboran US HoldCo CDIs. The rights of Tamboran US HoldCo CDI Holders are primarily governed by the DGCL and the Tamboran US HoldCo Charter Documents.

Tamboran US HoldCo was incorporated for the sole purpose of re-domiciling the parent company of Tamboran Group from Australia to the United States under the Proposed Transaction. Tamboran US HoldCo has not commenced or conducted, and does not own any assets or liabilities, other than in connection with its incorporation, the entry into transaction agreements in connection with the Proposed Transaction and performing the acts which are necessary to facilitate the Proposed Transaction.

If the Scheme becomes Effective, all of the Tamboran US HoldCo CDIs will be held by the Scheme Shareholders on the Implementation Date in the same proportions as their existing holdings in Tamboran, subject to the provisions of the Scheme dealing with Ineligible Foreign Holders. Tamboran US HoldCo will, in turn, become the holder of all of the Tamboran Shares. Accordingly, if the Scheme becomes Effective, Tamboran US HoldCo's business will consist entirely of the business of Tamboran and Tamboran will become a wholly owned subsidiary of Tamboran US HoldCo. Refer to section 6.10 for a structure diagram showing the ownership of the Tamboran Group following implementation of the Proposed Transaction.

6.2 Registered foreign company

As Tamboran US HoldCo is not established in Australia, its general corporate activities (other than any offering of securities in Australia) are not generally regulated by the Corporations Act or by ASIC, but instead are governed by the corporate law of the State of Delaware.

However, in order to be able to carry on business in Australia and be listed on ASX, Tamboran US HoldCo will be registered as a foreign company in Australia under Part 5B.2 of the Corporations Act. Being registered as a foreign company in Australia requires Tamboran US HoldCo to file its annual accounts with ASIC and comply with various other notification requirements (for example, notifying ASIC of the appointment and resignation of directors or changes to constituent documents).

As a foreign entity in Australia, Tamboran US HoldCo will also not be subject to Chapters 6, 6A, 6B or 6C of the Corporations Act dealing with the acquisition of shares (for example, substantial holdings and takeovers). However, consistent with Tamboran US HoldCo's application for admission to the official list of ASX, Tamboran US HoldCo will undertake to inform the ASX upon becoming aware of:

- (a) any person becoming a substantial holder of Tamboran US HoldCo CDIs within the meaning of section 671B of the Corporations Act, and to disclose any details of the substantial holdings of which Tamboran US HoldCo is aware; and
- (b) any subsequent changes in the substantial holdings of Tamboran US HoldCo which Tamboran US HoldCo is aware.

The insider trading provisions under the Corporations Act will also apply to Tamboran US HoldCo for any acts or omissions within Australia in relation to "Division 3 financial products" (regardless of where the issuer of the products is formed, resides or is located and of where the issuer carries on business). Tamboran US HoldCo CDIs will constitute "Division 3 financial products" and, as such, Tamboran US HoldCo will be subject to the insider trading provisions under the Corporations Act in relation to the Tamboran US HoldCo CDIs traded on the ASX.

In addition, as Tamboran US HoldCo will be a disclosing entity for the purposes of the Corporations Act, Tamboran US HoldCo will be required to comply with the continuous disclosure provisions contained in the Listing Rules in addition to any other applicable disclosure requirements in the State of Delaware.

6.3 Board and senior management of Tamboran US HoldCo

(a) Tamboran US HoldCo Directors

The Tamboran US HoldCo Board will be comprised of the same Tamboran Directors as set out in section 5.5(a).

Each of the Tamboran Directors will be appointed as a director of Tamboran US HoldCo with effect from the Implementation Date. It is proposed that each of the Tamboran Directors will receive their current remuneration as Tamboran Directors in their roles as directors of Tamboran US HoldCo.

In the event of a listing on a United States securities exchange, such as NYSE, the Tamboran US HoldCo Board may appoint additional directors to ensure that a majority of the Tamboran US HoldCo Directors are independent, based on the definition of "independence" under the NYSE listing standards, which requires the Tamboran US HoldCo Board to affirmatively determine that the director has no material relationship with Tamboran US HoldCo, either directly or as a partner, shareholder or officer of an organisation that has a relationship with Tamboran US HoldCo. In addition, Tamboran US HoldCo may review the compensation of its directors and senior management and make recommendations on the alignment of compensation with the Tamboran US HoldCo's business strategies and compensation of similar US companies. Compensation changes may be implemented as a result of these recommendations.

(b) Senior management of Tamboran US HoldCo

The senior management personnel of Tamboran US HoldCo will be comprised of the same senior management personnel of Tamboran. The senior management personnel of Tamboran as at the date of this Scheme Booklet is set out in section 5.5(b).

Each of the senior management personnel of Tamboran at the time that the Scheme is implemented will continue in their current roles and responsibilities as senior management personnel of Tamboran US HoldCo following implementation of the Scheme.

6.4 Capital structure

(a) Current capital structure of Tamboran US HoldCo

Tamboran US HoldCo is authorised to issue up to 10,000,000,000 shares of common stock with a par value of US\$0.001 and 1,000,000,000 shares of preference stock with a par value of US\$0.0001.

As at the date of this Scheme Booklet, no Tamboran US HoldCo Shares or other securities have been issued by Tamboran US HoldCo and until the Scheme becomes Effective, Tamboran US HoldCo will not have issued any securities.

(b) Capital structure of Tamboran US HoldCo on the Implementation Date

If the Scheme becomes Effective, each Scheme Shareholder (other than any Ineligible Foreign Holder) will be entitled to receive the Scheme Consideration of one Tamboran US HoldCo CDI in exchange for every Tamboran Share held as at the Record Date.

Based on the capital structure of Tamboran as at the date of this Scheme Booklet, immediately following implementation of the Proposed Transaction, Tamboran US HoldCo will have on issue 1,716,672,571 Tamboran US HoldCo CDIs.

(c) Other securities

No other securities in Tamboran US HoldCo have been issued or agreed to be issued other than in accordance with the terms of the Scheme or pursuant to the arrangements set out in section 10.6.

6.5 Options and incentive plan

As set out in section 10.6, upon implementation of the Scheme, Tamboran US HoldCo will assume all obligations in relation to the Options under the existing Employee Incentive Plan. Tamboran US HoldCo intends to evaluate and may adopt a new incentive plan to enable Tamboran US HoldCo to issue long-term incentives to senior management of Tamboran US HoldCo (including, for example, a grant of restricted stock) subsequent to completion of the Proposed Transaction, however any such determination is subject to Tamboran US HoldCo's performance, prevailing market conditions and taxation advice provided by Tamboran US HoldCo's advisers and consultants. If a new incentive plan is adopted, it is currently anticipated that the plan will be in a form and contain provisions which are customary for a public company admitted to a major stock exchange in the United States, such as NYSE.

6.6 Differences between Tamboran Shares and Tamboran US HoldCo CDIs

Tamboran US HoldCo CDIs will generally confer similar rights as Tamboran Shares. Certain differences exist due to the fact that the rights of Tamboran US HoldCo CDI Holders will be governed by:

- (a) different corporate documents, being the Tamboran US HoldCo Charter Documents rather than Tamboran's constitution; and
- (b) different laws, being Delaware and the United States law rather than Australian law.

Some of the differences between Australian and Delaware and United States laws could be viewed as advantageous to Tamboran Shareholders, while others could be viewed as disadvantageous.

A further description of the rights and entitlements attaching to CDIs generally, including in relation to voting, is set out in Annexure F.

A non-exhaustive comparison of corporate laws applicable in respect of Tamboran and Tamboran US HoldCo is set out in Annexure G.

A full copy of the Tamboran US HoldCo Charter Documents may be obtained by calling the Tamboran Scheme Information Line on 1300 370 557 (within Australia) or +61 2 8023 5465 (outside Australia) Monday to Friday between 8:30am and 5:00pm (Sydney time), or from Tamboran's website at www.tamboran.com.

6.7 Differences between corporate laws in Australia and the choice of jurisdiction

The Tamboran Board considers that the State of Delaware is an appropriate jurisdiction for the domicile of Tamboran Group's parent entity. A significant number of publicly traded companies are incorporated in Delaware. In addition, Delaware provides a well-developed body of law defining the fiduciary duties and decision-making processes expected of boards of directors in a variety of contexts, including evaluating potential and proposed corporate takeover offers and business combinations.

Tamboran's aim is to re-domicile Tamboran Group from Australia to the United States and obtain the advantages of Tamboran US HoldCo being a United States company. Tamboran US HoldCo has adopted a form of by-laws for a Delaware corporation that it believes is customary and appropriate for a company that intends to pursue a listing on a United States securities exchange, such as NYSE, rather than adopting by-laws that provide Australian-style protections for Tamboran US HoldCo CDI Holders.

Tamboran Shareholders receiving Tamboran US HoldCo CDIs as part of the Scheme Consideration under the Scheme should note that they may have reduced takeover protection under Delaware and United States laws, compared to the protection available under Australian law.

A non-exhaustive comparison of corporate laws applicable in respect of Tamboran and Tamboran US HoldCo is set out in Annexure G.

6.8 Change in reporting obligations

(a) IFRS and US GAAP

If the Scheme becomes Effective, the financial reporting regime is expected to change for Tamboran Group. Tamboran US HoldCo will initially continue to report in accordance with International Financial Reporting Standards (**IFRS**) until such time as it becomes subject to the reporting requirements of the Exchange Act, following which it will report in accordance with US Generally Accepted Accounting Principles (**US GAAP**) as parent company of Tamboran Group. The Tamboran Group fiscal year end will remain as 30 June.

The Tamboran Board believes that there is no material difference in reported results under the different sets of financial statements and that Tamboran Shareholders who

currently rely on Tamboran's financial statements prepared in accordance with IFRS will continue to understand the content of Tamboran US HoldCo's financial statements when prepared solely in accordance with US GAAP.

Financial reporting under US GAAP is similar to that under IFRS, although several items are classified and calculated differently.

A detailed comparison of the financial reporting regimes in Australia and the United States and how these differences may have affected Tamboran's accounts is set out in Annexure H. Tamboran Shareholders should note that the comparison in Annexure H is not an exhaustive statement of all relevant financial reporting principles and is intended as a general guide only.

(b) Exchange Act

Following implementation of the Scheme, if Tamboran US HoldCo Shares are listed on a United States securities exchange, such as NYSE, or Tamboran US HoldCo otherwise satisfies certain asset and record holder requirements, Tamboran US HoldCo will become subject to the reporting requirements of the Exchange Act and will be required to file annual, quarterly and current reports, proxy statements and other information with the SEC in addition to its reporting requirements under Delaware and United States law. Affiliates of Tamboran US HoldCo will also be subject to the short-swing profit disclosure and recovery provisions of section 16 of the Exchange Act.

6.9 Corporate governance

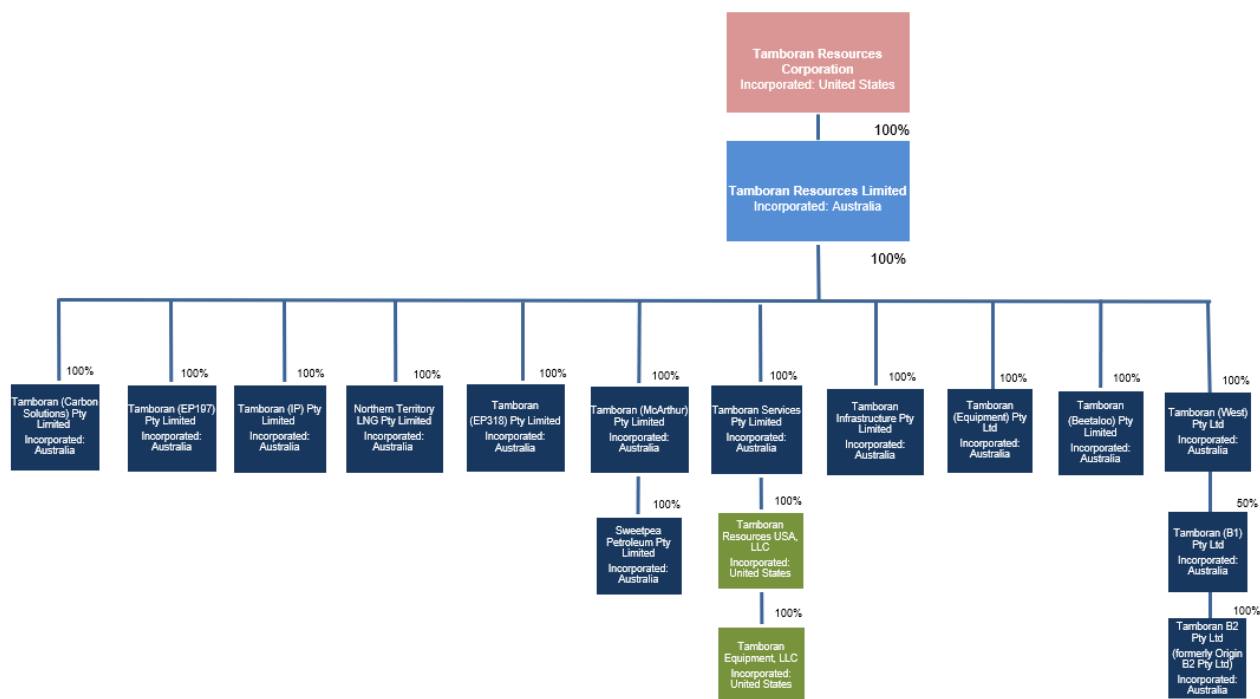

In the event that Tamboran US HoldCo lists on a United States securities exchange, Tamboran US HoldCo will adopt corporate governance policies and new board committee charters in line with the relevant listing standards. Tamboran US HoldCo intends to adopt similar policies and charters as are currently in effect for Tamboran, with such changes as are necessary for Tamboran US HoldCo to comply with the rules applicable to United States companies listed on a United States securities exchange to be consistent with United States market practice.

Under the listing rules of the relevant United States securities exchange, Tamboran US HoldCo will establish and adopt charters for its audit and finance committee, remuneration committee and nominating and corporate governance committee. Tamboran US HoldCo may adopt other charters and policies as the Tamboran US HoldCo Board determines are necessary or appropriate.

Tamboran US HoldCo is committed to ensuring that its corporate governance systems comply with statutory and stock exchange requirements and to maintaining its focus on transparency, responsibility and accountability.

6.10 Corporate structure after implementation of the Proposed Transaction

The corporate structure of Tamboran Group after implementation of the Proposed Transaction is shown below:

6.11 Tamboran US HoldCo's intentions for Tamboran's business, assets and employees following implementation

(a) Introduction

Tamboran US HoldCo's current intentions for Tamboran's business, assets and employees following implementation are set out below. The following statements are based on facts and information known to Tamboran and Tamboran US HoldCo at the time of preparing this Scheme Booklet that concern Tamboran as well as the general business environment. Accordingly, future economic, market and business conditions may cause Tamboran US HoldCo to make changes it considers necessary and in the interests of its shareholders.

(b) Business, assets and employees

If the Scheme becomes Effective, Tamboran US HoldCo will own all of the Tamboran Shares. The Tamboran US HoldCo Board intends to operate the business of Tamboran Group in a manner consistent with the past practice of Tamboran, and as previously disclosed by Tamboran. Tamboran US HoldCo intends to continue to carry on the business and operations of Tamboran Group without any material change.

Tamboran US HoldCo Board intends to continue the employment of its current employees, without any major change (although the Tamboran US HoldCo Board may undertake a review of Tamboran Group after the implementation of the Proposed Transaction to consider whether there are any appropriate measures required to compensate and retain key employees and streamline its operations and structure further).

No winding up, merger or liquidation of Tamboran, nor any transfer of material assets from Tamboran to Tamboran US HoldCo is currently contemplated.

Tamboran US HoldCo intends to undertake activities in the ordinary course of Tamboran's business, including entering into debt-financing, capital raising and offtake arrangements at the operating level.

All of Tamboran Group's operations are located in Australia and that will be unchanged following implementation of the Proposed Transaction. Notwithstanding the above, current and future economic, market and business conditions may cause the Tamboran US HoldCo Board to make changes that it considers necessary and in the interests of Tamboran US HoldCo CDI Holders.

(c) **ASX listing**

If the Scheme becomes Effective, the existing listing of Tamboran Shares on ASX will be replaced with a new listing of the Tamboran US HoldCo CDIs on ASX. This means that Tamboran will be removed from the official list of ASX and, contemporaneously, the Tamboran US HoldCo CDIs will be listed on ASX.

(d) **Listing on a United States securities exchange**

If the Scheme becomes Effective, Tamboran US HoldCo intends to seek admission to have its shares traded on a United States securities exchange, such as NYSE, in the calendar year 2024. Whilst there is no guarantee that admission will occur, Tamboran US HoldCo expects a listing, should one proceed, to occur in the first half of 2024. If this listing does occur, Tamboran US HoldCo must comply with the rules and requirements of the applicable listing exchange.

(e) **Conversion of Tamboran to a proprietary company limited by shares**

On and from the Implementation Date, Tamboran US HoldCo will own all of the Tamboran Shares and Tamboran will become a wholly-owned subsidiary of Tamboran US HoldCo. Shortly after the Implementation Date, Tamboran US HoldCo expects to pass a special resolution to convert Tamboran from a public company to a proprietary company limited by shares, and to lodge all necessary documentation with ASIC to give effect to that conversion.

(f) **Dividend policy**

Tamboran has not paid a dividend to Tamboran Shareholders. The Tamboran US HoldCo Board will review the amount of any future dividends to be paid to Tamboran US HoldCo CDI Holders having regard to, among other things, the Group's results of operations, financial condition and solvency and distributable reserves tests imposed by law and such other factors that the Tamboran US HoldCo Board may consider relevant. The Tamboran US HoldCo Board only intend to commence the payment of dividends when it becomes commercially prudent to do so.

(g) **Corporate governance**

Subject to any changes required to comply with the laws of the State of Delaware and United States federal securities laws and United States market practice, Tamboran US HoldCo intends to assume similar corporate governance, disclosure, trading,

diversity, audit, remuneration, independent professional advice, identification and risk management, ethical standards and other relevant policies as have currently been put in place by Tamboran. Tamboran US HoldCo intends to hold annual general meetings for in the United States (which may also be accessed by virtual means). See section 6.9 for further details.

(h) **Changes to Tamboran's Constitution**

Consistent with its current intention to convert Tamboran into a proprietary company limited by shares, Tamboran US HoldCo intends to replace Tamboran's existing constitution with a constitution appropriate for a proprietary company limited by shares following implementation of the Scheme.

(i) **No other intentions**

Other than as set out in this Scheme Booklet, Tamboran US HoldCo has no other intentions regarding:

- the continuation of Tamboran Group's business;
- any major change to Tamboran Group's business, including any redeployment of Tamboran Group's fixed assets; or
- the future employment of Tamboran Group's present employees.

7 Risks

7.1 Introduction

The Scheme presents a number of potential risks that Tamboran Shareholders should consider when deciding how to vote on the Scheme. Many of these risks are risks to which Tamboran and, therefore, Tamboran Shareholders are already currently exposed, while others arise as a result of the Proposed Transaction.

In order to facilitate the understanding of the risks described below, the risks have been categorised as:

- (a) risks relating to holding Tamboran US HoldCo CDIs;
- (b) specific risks relating to the Proposed Transaction;
- (c) risks relating to Tamboran US HoldCo's business after the Scheme becomes Effective; and
- (d) risks if the Scheme does not become Effective.

Tamboran Shareholders should note that the risks they will be exposed to in respect of the assets, operations and business of Tamboran US HoldCo are effectively the same risks that they are currently exposed to in relation to Tamboran Group's existing business. This is because the Proposed Transaction simply re-domiciles Tamboran Group from Australia to the United States.

There are, however, additional new risks that Tamboran Shareholders who receive Tamboran US HoldCo CDIs may be exposed to which specifically relate to the change in jurisdiction from Australia to the United States. These risks are outlined in detail in section 7.2 below. Tamboran Shareholders should also note that there are certain implementation specific risks in relation to the Proposed Transaction, which are discussed below in section 7.3.

While this section 7 identifies the major areas of risk associated with being a Tamboran US HoldCo CDI Holder, it should not be taken as an exhaustive list of the potential risk factors to which Tamboran Shareholders are exposed. These risk factors do not take into account the individual investment objectives, financial situation, position or particular needs of Tamboran Shareholders. As a result, before voting on the Scheme, you should carefully consider the following risks and understand them having regard to your own individual risk profile, portfolio strategy, investment objectives, financial circumstances and taxation position, as well as the other information contained in this Scheme Booklet.

7.2 Risks relating to holding Tamboran US HoldCo CDIs

Tamboran Shareholders (other than Ineligible Foreign Holders) who receive the Scheme Consideration may be exposed to the following additional new risks relating to holding Tamboran US HoldCo CDIs.

(a) Application of Delaware and United States law

As a company incorporated in the State of Delaware, Tamboran US HoldCo will be subject to the law of the State of Delaware and the United States, and will not be subject to the Corporations Act.

Refer to Annexure G for a more detailed summary of some of the key differences between the Australian and United States legal regimes.

(b) Changes to the tax environment

If the Proposed Transaction proceeds, there may be tax consequences for Tamboran Shareholders which may include tax payable on any gain on the disposal of Scheme Shares and tax payable (or withholding tax) on distributions in respect of Scheme Shares. See section 8 for more information. Tamboran Shareholders should seek their own professional advice regarding the individual tax consequences applicable to them.

In addition, to the extent that any assets, company or business which Tamboran acquires is or are established outside the United States, it is possible that any return Tamboran receives from such assets, company or business may be reduced by irrecoverable foreign withholding or other taxes and this may reduce any net return derived by investors from a shareholding in Tamboran.

(c) Payment of dividends

Any future determination to declare cash dividends will be made at the discretion of the Tamboran US HoldCo Board, subject to compliance with applicable laws and covenants under future credit facilities, which may restrict or limit Tamboran US HoldCo's ability to pay dividends, and will depend on its financial condition, operating results, capital requirements, general business conditions and other factors that the Tamboran US HoldCo Board may deem relevant.

Tamboran US HoldCo does not anticipate paying any cash dividends on Tamboran US HoldCo Shares in the foreseeable future. As a result, a return on your investment will only occur if Tamboran US HoldCo's share price appreciates.

(d) Litigious nature of the United States legal environment

Tamboran US HoldCo may be exposed to increased litigation as a United States company, as the United States legal environment is generally more litigious. Under Delaware law, a shareholder must meet certain eligibility and standing requirements to bring a derivative action, but settlement or dismissal of a derivative action requires the approval of the court and notice to shareholders of the proposed dismissal.

Shareholders in the United States are entitled to commence class action suits on their own behalf and on behalf of any other similarly situated shareholders to enforce an obligation owed to the shareholders directly where the requirements for maintaining a class action under Delaware law have been met.

There is a risk that any material or costly dispute or litigation could adversely affect Tamboran US HoldCo's reputation, financial performance or value.

(e) Issuance of preferred stock

The Tamboran US HoldCo Certificate of Incorporation authorises the Tamboran US HoldCo Board, in its sole discretion, to issue, one or more classes or series of preferred stock having such designations, preferences, limitations and relative rights,

including preferences over Tamboran US HoldCo Shares respecting dividends and distributions, as the Tamboran US HoldCo Board decides.

The terms of one or more classes or series of preferred stock could adversely impact the voting power or value of Tamboran US HoldCo Shares. Similarly, the repurchase or redemption rights or liquidation preferences that may be granted to holders of preferred stock could affect the residual value of Tamboran US HoldCo Shares.

(f) Exclusive forum selection

The Tamboran US HoldCo Certificate of Incorporation provides that, unless Tamboran US HoldCo consents in writing to the selection of an alternative forum, the Court of Chancery of the State of Delaware will, to the fullest extent permitted by applicable law, be the sole and exclusive forum for all internal corporate claims, including claims in the right of Tamboran US HoldCo that are based upon a violation of a duty by a current or former director or officer or stockholder in such capacity, or as to which title 8 of the Delaware Code confers jurisdiction upon the Court of Chancery, in each such case subject to such Court of Chancery of the State of Delaware having personal jurisdiction over the indispensable parties named as defendants therein.

The Tamboran US HoldCo Certificate of Incorporation further provides that where the Court of Chancery of the State of Delaware declines to accept jurisdiction over a particular matter, the Superior Court of the State of Delaware (Complex Commercial Litigation Division) followed by the District Court for the District of Delaware shall be the sole and exclusive forum for the resolutions of any complaint asserting a cause of action arising under the US Securities Act unless Tamboran US HoldCo consents in writing to the selection of an alternative forum. Any person or entity purchasing or otherwise acquiring any interest in Tamboran US HoldCo Shares (including in Tamboran US HoldCo CDIs) will be deemed to have notice of, and consented to, the provisions of the Tamboran US HoldCo Certificate of Incorporation.

These choice-of-forum provisions may limit a Tamboran US HoldCo CDI Holder's ability to bring a claim in a judicial forum that it finds favourable for disputes with Tamboran US HoldCo or the Tamboran US HoldCo Board, officers, employees or agents, which may discourage such lawsuits from being made. Alternatively, if a court were to find the relevant provisions of the Tamboran US HoldCo Certificate of Incorporation inapplicable to, or unenforceable in respect of, one or more of the specified types of actions or proceedings, Tamboran US HoldCo may incur additional costs associated with resolving such matters in other jurisdictions, which could adversely affect its business, financial condition or operating results.

(g) Returns for holders of Tamboran US HoldCo CDIs

It is intended that Tamboran US HoldCo will structure Tamboran Group, including any company or business acquired in an acquisition, to maximise returns for holders of Tamboran US HoldCo CDIs in as fiscally efficient a manner as is practicable. Tamboran has made certain assumptions regarding taxation, however if these assumptions are not correct, taxes may be imposed with respect to Tamboran Group's assets or Tamboran Group may be subject to tax on its income, profits, gains or distributions (either on a liquidation and dissolution or otherwise) in a particular jurisdiction or jurisdictions in excess of taxes that were anticipated. This could alter the post-tax returns for holders of Tamboran US HoldCo CDIs in certain jurisdictions.

The level of return for Tamboran US HoldCo CDI Holders may also be adversely affected. Any change in laws or tax authority practices could also adversely affect any post-tax returns of capital to holders of Tamboran US HoldCo CDIs or payments of dividends (if any, which Tamboran US HoldCo does not envisage the payment of, at least in the short to medium term). In addition, Tamboran US HoldCo may incur costs in taking steps to mitigate any such adverse effect on the post-tax returns for holders of Tamboran US HoldCo CDIs.

(h) **United States listing of Tamboran US HoldCo Shares**

While it is presently intended that, after the implementation of the Scheme and subject to market conditions, Tamboran US HoldCo will pursue a listing of Tamboran US HoldCo Shares on a United States securities exchange in accordance with the US Securities Act, such as NYSE, it cannot be assured that such listing will occur as intended (if at all). However, should a listing on a United States securities exchange not eventuate, Tamboran US HoldCo CDI Holders will still be able to trade their Tamboran US HoldCo CDIs on ASX. Further, the Tamboran Board believes that a re-domiciliation of Tamboran Group from Australia to the United States itself, even in the absence of a United States listing, would have sufficient benefits to warrant doing so.

If Tamboran US HoldCo Shares are listed on a United States securities exchange, Tamboran US HoldCo completes a listing at some point in the future, or otherwise becomes subject to reporting obligations under federal securities laws, Tamboran US HoldCo will become a United States public company subject to the reporting requirements of the Exchange Act and will be required to file periodic reports and other information with the SEC and the United States securities exchange, as applicable. The requirements of being a public company in the United States may strain Tamboran US HoldCo's resources and distract management.

7.3 Specific risks relating to the Proposed Transaction

The following risks have been identified as being key risks specific to an investment in the Tamboran US HoldCo. These risks have the potential to have a significantly adverse impact on Tamboran US HoldCo and may affect Tamboran US HoldCo's financial position, prospects and price of its securities.

(a) **Contract risk**

The Scheme or the issue of Tamboran US HoldCo CDIs by Tamboran US HoldCo upon implementation of the Scheme may be deemed (under contracts to which Tamboran or Tamboran US HoldCo or their subsidiaries are a party) as a change of share ownership event in respect of Tamboran or Tamboran US HoldCo that allows the counterparty to review or terminate the contract as a result of the change, or be issued shares by Tamboran US HoldCo upon implementation of the Scheme.

If the counterparty to any such contract were to validly seek to renegotiate or terminate the contract on that basis, this may have a material adverse effect on the financial performance of Tamboran US HoldCo, depending on the relevant contracts.

However, based on Tamboran's due diligence and enquiries of current key contractual counterparties, Tamboran does not expect that any of its material contracts will be terminated as a result of the Proposed Transaction.

(b) **Accounting risk**

In accounting for the Proposed Transaction, it is expected that the Proposed Transaction will be treated as a "common control transaction" and that the net assets will be recognised by Tamboran US HoldCo as the historical cost of the parent under common control.

Tamboran US HoldCo will be subject to the usual risk that potential future changes in accounting standards and principles could have an adverse impact on Tamboran US HoldCo's financial reports.

(c) **Tax losses risk**

There are certain tests that must be satisfied to carry forward Australian tax losses to be utilised to shelter Australian assessable income in future years. There is a risk that the Scheme may cause Tamboran to fail one or more of these tests, although Tamboran will continue to monitor these tests going forward and use reasonable endeavours to utilise its Australian tax losses if required.

(d) **Roll-over relief risk**

Subject to receipt of the class ruling from the ATO, there is a risk that Tamboran Shareholders will not be entitled to CGT roll-over relief in respect of the disposal of their Tamboran Shares pursuant to the terms of the Scheme.

(e) **Conditions precedent risk**

The Scheme is subject to a number of conditions precedent, including Court approval and the approval of Tamboran Shareholders. There is a risk that Court approval may not be obtained, or may be obtained subject to conditions which Tamboran and/or Tamboran US HoldCo (as applicable) are not prepared to accept (acting reasonably), or may be delayed, or that the Requisite Majority of Tamboran Shareholders may not approve the Scheme.

7.4 Risks relating to Tamboran US HoldCo's business after the Scheme becomes Effective

There are certain risks which relate directly to Tamboran's business and are largely beyond the control of Tamboran and the Tamboran Board because of the nature of the business. Tamboran Shareholders are currently already exposed to these risks as shareholders of an Australian domiciled holding company given they relate to the assets, operations and business of Tamboran. Scheme Shareholders (other than Ineligible Foreign Holders) will continue to be exposed to materially the same risks flowing from Tamboran US HoldCo's business after implementation of the Scheme. Accordingly, we have provided a brief summary of these risks below.

(a) **Risks related to Tamboran US HoldCo's business operations**

- (i) Gas exploration and development is speculative and involves elements of significant risk with no guarantee of success. Tamboran US HoldCo may not find any or may find insufficient hydrocarbon reserves and resources to commercialise, which would adversely impact the financial performance of Tamboran US HoldCo. There is the risk that drilling will result in dry holes or not result in the discovery of commercially exploitable hydrocarbons. Wells

may not be productive, or they may not provide sufficient revenues to return a profit after accounting for associated costs.

- (ii) There is a risk that Tamboran US HoldCo may fail to execute its proposed growth strategy, which includes de-risking the prospective resources identified within its highly prospective acreage in the Beetaloo Sub-basin, working with infrastructure partners such as APA Group to bring resources to market to meet anticipated domestic gas shortfalls and commercialising those resources, and adopting sustainable practices, including a vision of achieving net zero for its equity share of scope 1 and scope 2 emissions and meeting safeguard mechanism reforms which require shale gas producers to have net zero scope 1 emissions from entry into the safeguard mechanism. Tamboran US HoldCo's growth strategies could be adversely impacted by, amongst other things, legal, regulatory and policy developments, as well as failing to discover and commercially extract resources. In particular, achievement of Tamboran US HoldCo's vision of becoming, and safeguard mechanism reforms requiring Tamboran US HoldCo to be, a net zero emissions producer of gas will depend on Tamboran US HoldCo being able to economically manage its carbon emissions, which could for example be impacted by availability of future revenues to fund various carbon initiatives, market pricing of carbon offsets, technological developments affecting operations and costs of implementing sustainable practices.
- (iii) Gas development activities include numerous operational risks, including but not limited to, adverse weather conditions, environmental hazards, and unforeseen increases in establishment costs, accidents (including, for example, fires, explosions, uncontrolled releases, spills and blowouts), equipment failure, industrial disputes, technical issues, supply chain failure, labour issues and other unexpected events. Drilling operations, in particular, carry inherent risk associated with, for example, unexpected geological conditions, mechanical failures or human error. The occurrence of an operational risk event could also restrict Tamboran US HoldCo's ability to advance its development and operational programs. This, in turn, may adversely impact Tamboran US HoldCo's financial performance.
- (iv) Estimating hydrocarbon reserves and resources is subject to significant uncertainties associated with technical data and interpretation of that data, future commodity process and development and operating costs. There can be no guarantee that Tamboran US HoldCo will successfully produce the volume of hydrocarbon that it estimates are reserves or that hydrocarbon resources will be successfully converted to reserves. Downward revision of reserves and resources estimates may adversely affect Tamboran US HoldCo's operational and financial performance.
- (v) There is no guarantee that Tamboran US HoldCo will be able to gain access to appropriate infrastructure on commercially viable terms to sell the reserves it produces. Failure to obtain access to infrastructure would adversely impact Tamboran US HoldCo's financial performance.

(b) **Risks related to the natural gas industry**

- (i) While the Tamboran US HoldCo Board will, to the best of their knowledge, experience and ability (together with management) endeavour to anticipate,

identify and manage the risks inherent in the activities of Tamboran US HoldCo, their ability to do so may be affected by matters outside their control. This fact reflects the inherent risks of the gas industry, and no assurance can be given that the directors and management of Tamboran US HoldCo will be successful in these endeavours.

- (ii) The demand for, and price of gas is highly dependent on a variety of factors, including international supply and demand, the level of consumer product demand, actions taken by governments and major gas corporations, global economic and political developments and other factors all of which are beyond the control of Tamboran US HoldCo. A material decline in the price of gas may have a material adverse effect on the economic viability of a project. Examples of such uncontrollable factors that can affect gas price are unrest and political instability in countries that have increased concern over supply.
- (iii) In particular, the conflict involving Russia and Ukraine has recently led to an increase in international oil prices, which creates transitory increases in the revenues of upstream companies around the globe. The conflict has also led to increased volatility in global commodities in general and hydrocarbon prices, in particular. Tamboran US HoldCo cannot predict whether such volatility will lead to further price increases or, on the contrary, lead to a general downturn in economic activity or gas prices, and therefore adversely affect Tamboran US HoldCo's business, financial condition and results of operations.

(c) **Regulatory risks**

- (i) Tamboran US HoldCo must comply with relevant laws and regulations in each jurisdiction it operates as it applies to the environment, tenure, land access, landholders and native title holders. Non-compliance with these laws and regulations and any special licence conditions could result in suspension of operations, loss of permits or financial penalties. Non-compliance may impact Tamboran US HoldCo's ability to commercialise or retain its assets, which may in turn impact its operational and financial performance.
- (ii) Immediate access to the licences in which the Tamboran US HoldCo has an interest, cannot in all cases, be guaranteed. Tamboran US HoldCo may be required to seek the consent of landholders, government authorities and other groups with an interest in the real property encompassed by the licences. Compensation is required to be paid by Tamboran US HoldCo to stakeholders to allow Tamboran US HoldCo to carry out activities. Judicial or regulatory decisions and legislation could also unforeseeably restrict or delay land access.
- (iii) The exploration of the Tamboran US HoldCo's assets is dependent upon the maintenance (including periodic renewal) of the relevant permits. Maintenance of the permits is dependent on, among other things, meeting the permit conditions imposed by the relevant authorities including compliance with work program and expenditure requirements. As such, there is no certainty that an application for grant or renewal of a permit will be approved at all, or on satisfactory terms or within expected timeframes. Titles and access rights may also be disputed, which could result in costly litigation or disruption of Tamboran US HoldCo's operations.

- (iv) Tamboran US HoldCo's business is affected by government policy, which in turn may be influenced by international policies and laws. While Tamboran US HoldCo considers that Federal Government's current policy is supportive of the development of Australia's natural gas resources, there is no guarantee that this stance will not change in the future. Shifts in government policy could have varying degrees of impact on Tamboran US HoldCo's operations and its profitability and could range from loss or reduction in industry incentives, preventing infrastructure development to moratoriums on future gas development in specific areas or across the Beetaloo Sub-basin.

(d) **Climate change risks**

- (i) Climate change laws and regulations restricting emissions of "greenhouse gases" could result in increased operating costs and reduced demand for any natural gas that Tamboran US HoldCo may produce.
- (ii) Transitioning to a lower-carbon economy may entail extensive policy, legal, technology and market changes to address mitigation and adaption requirements related to climate change. Depending on the nature, speed and focus of these changes, transition risks may pose varying levels of financial and reputational risk to companies operating in the gas sector, such as Tamboran US HoldCo.
- (iii) Physical risks resulting from climate change can be event driven (acute) or longer term shifts (chronic) in climate patterns. Physical risks may have financial implications for companies, such as direct damage to assets (which could disrupt production) and indirect impacts from supply chain disruption, which could cause Tamboran US HoldCo to incur significant costs in preparing for or responding to those effects.

For additional information on specific risks to Tamboran and the natural gas industry, please refer to Tamboran's 2023 Annual Report and relevant ASX announcements by visiting ASX's website at www.asx.com.au and Tamboran's website at www.tamboran.com.

7.5 Risks if the Scheme does not become Effective

Tamboran Shareholders should be aware that if the Scheme does not become Effective, transaction costs of approximately A\$550,000 (excluding GST) are expected to be paid by Tamboran. In any event, Tamboran is not obliged to pay a break fee or similar payment to Tamboran US HoldCo if the Scheme does not become Effective.

8 Taxation considerations

8.1 United States federal taxation implications

The following is a summary of certain material US federal income tax consequences relevant to Tamboran Shareholders other than Ineligible Foreign Holders of: (i) the Scheme; and (ii) post-Scheme ownership and disposition of Tamboran US HoldCo CDIs. This summary is based upon the US Internal Revenue Code of 1986, as amended (the **Code**), final, temporary and proposed US Treasury regulations promulgated thereunder, published guidance and court decisions, each as in effect on the date hereof, all of which are subject to change, or changes in interpretation, possibly with retroactive effect. Any such change could result in US federal income tax consequences that differ from those summarised below. Tamboran has not sought any ruling from the United States Internal Revenue Service (**IRS**) with respect to any of the US federal income tax consequences discussed below and there can be no assurance that the IRS would not assert, or that a court would not sustain, positions contrary to those described in this summary.

The following summary assumes the Scheme will be consummated as described in this Scheme Booklet and applies only to Tamboran Shareholders other than Ineligible Foreign Holders who held Tamboran Shares and will hold Tamboran US HoldCo CDIs received pursuant to the Scheme as "capital assets" within the meaning of section 1221 of the Code (generally, property held for investment). It is generally expected that a Tamboran US HoldCo CDI Holder will be treated for US federal income purposes as holding the underlying Tamboran US HoldCo Shares represented by those Tamboran US HoldCo CDIs. The remainder of this summary assumes that a Tamboran US HoldCo CDI holder will be so treated. The summary does not address the tax consequences, if any, relating to the Tamboran Options.

This summary does not address all aspects of US federal income taxation that may be relevant to a Tamboran Shareholder in light of such Tamboran Shareholder's particular circumstances, or to any Tamboran Shareholder subject to special treatment under US federal income tax laws, including, but not limited to:

- persons who directly, indirectly or constructively own 10 percent or more of the Tamboran Shares or who will so own 10 percent or more of the Tamboran US HoldCo Shares (which each Tamboran Shareholder will have an interest in through Tamboran US HoldCo CDIs);
- banks or other financial institutions;
- broker-dealers;
- mutual funds;
- tax-exempt organisations (including private foundations);
- insurance companies;
- dealers in securities or foreign currencies;
- traders in securities who elect to use a mark-to-market method of accounting;

- controlled foreign corporations and their shareholders, or any foreign corporation with respect to which there are one or more "United States shareholders" within the meaning of section 951(b) of the Code;
- passive foreign investment companies and their shareholders;
- United States expatriates and certain former United States citizens or long-term residents;
- "S" corporations, partnerships and their partners, or other entities or arrangements classified as partnerships for United States federal income tax purposes, grantor trusts, or other pass-through entities (and investors therein);
- Tamboran Shareholders who acquired their Tamboran Shares through the exercise of options or otherwise as compensation;
- Tamboran Shareholders who hold their Tamboran Shares or as part of a hedge, straddle, constructive sale, conversion transaction, or other risk reduction or integrated transaction for United States federal income tax purposes;
- persons that are or may have been liable for alternative minimum tax;
- regulated investment companies;
- real estate investment trusts;
- persons who have acquired our common stock as compensation or otherwise in connection with the performance of services;
- investors subject to special tax accounting rules under section 451(b) of the Code; or
- Tamboran Shareholders that have a functional currency other than the United States dollar.

This summary does not address all aspects of US federal income taxes, such as consequences under the Medicare contribution tax or the alternative minimum tax. Further, this summary does not address the consequences under any US federal tax laws other than US federal income tax laws, such as US federal estate or gift tax laws, and does not address the consequences under the tax laws of any state, local, or non-US jurisdiction.

This summary is intended to provide only a general summary of certain material United States federal income tax consequences of the Scheme to holders of Tamboran Shares other than Ineligible Foreign Holders. The United States federal income tax laws are complex and subject to varying interpretation. Accordingly, the United States Internal Revenue Service (**IRS**) may not agree with the tax consequences described in this Scheme Booklet, and there can be no assurance that the IRS's position would not be sustained by a court.

This discussion is provided for general information only and does not constitute legal or tax advice to any Tamboran Shareholder. Each Tamboran Shareholder is urged to consult its own tax advisor with respect to the application of the US federal income tax laws to its particular situation, as well as any tax consequences of the Scheme or the holding and disposition of Tamboran US HoldCo CDIs arising under the US federal estate or gift tax rules.

or under the laws of any state, local, non-US or other taxing jurisdiction or under any applicable tax treaty.

For purposes of this summary, a **US Holder** includes a beneficial owner of Tamboran Shares that is, for United States federal income tax purposes:

- an individual who is a citizen or resident of the United States (including certain former citizens and former long-term residents of the United States);
- a corporation (or other entity or arrangement taxable for US federal income tax purposes as a corporation), created or organised in or under the laws of the United States or any state thereof or the District of Columbia;
- an estate the income of which is subject to United States federal income taxation regardless of its source; or
- a trust: (i) the administration of which is subject to the primary supervision of a United States court and which has one or more United States persons who have the authority to control all substantial decisions of the trust; or (ii) that has in effect a valid election under applicable Treasury regulations to be treated as a United States person.

If an entity or arrangement treated as a partnership for US federal income tax purposes holds Tamboran Shares, the tax treatment of a partner in the partnership generally will depend upon the status of the partner and the activities of the partnership. A partner in such an entity holding Tamboran Shares should consult its own tax advisor as to the US federal income tax consequences applicable to it.

A **Non-US Holder** is a beneficial owner (other than an entity or arrangement treated as a partnership for United States federal income tax purposes) of Tamboran Shares that is not a US Holder (defined above). This summary assumes that a Non-US Holder does not conduct a trade or business or maintain a permanent establishment or fixed base in the United States and has no contacts with the United States other than by reason of holding Tamboran Shares.

Subsequent Transactions. Tamboran US HoldCo may undertake transactions following the Scheme, such as a listing. Certain transactions could affect the US federal income tax consequences described below. In certain circumstances a Tamboran US HoldCo CDI Holder that otherwise would not have recognised a gain or loss on the exchange of Tamboran Shares for Tamboran US HoldCo CDIs pursuant to the Scheme could be treated as recognising a gain on the exchange. This summary does not take into account transactions that occur following the Scheme. Each Tamboran Shareholder should consult its own tax advisor regarding transactions that may occur following the Scheme and the particular tax consequences thereof to such Tamboran Shareholder, including the applicability and effect of federal, state, local, and non-US tax laws.

(a) **Certain material US federal income tax consequences of the Scheme**

The exchange of Tamboran Shares for Tamboran US HoldCo CDIs pursuant to the Scheme is intended to be treated for US federal income tax purposes as an exchange described in section 351(a) of the Code (and/or a reorganisation described in section 368(a) of the Code). This summary assumes that the exchange of Tamboran Shares for Tamboran US HoldCo CDIs pursuant to the Scheme will be

treated for such purposes as an exchange described in section 351(a) of the Code (and/or a reorganisation described in section 368(a) of the Code).

(i) **US Holders**

(A) *Exchange of Tamboran Shares for Tamboran US HoldCo CDIs*

Unless the passive foreign investment company (**PFIC**) rules described below apply, this section 8.1(a)(i)(A) will apply.

A US Holder generally will not recognise any gain or loss on the exchange of Tamboran Shares for Tamboran US HoldCo CDIs pursuant to the Scheme.

A US Holder generally will have an aggregate adjusted US federal tax basis in the Tamboran US HoldCo CDIs it receives pursuant to the Scheme equal to the US Holder's aggregate adjusted US federal tax basis in the Tamboran Shares surrendered. Thus, to the extent such a US Holder has a loss in its Tamboran Shares, such loss will be preserved. A US Holder's holding period for the Tamboran US HoldCo CDIs received pursuant to the Scheme generally will include the US Holder's holding period for the Tamboran Shares that the US Holder surrendered pursuant to the Scheme.

Each US Holder is urged to consult its own tax advisor regarding the foregoing as well as regarding reporting requirements and information statements that potentially could be applicable with respect to the Scheme and any consequences, including penalties, potentially applicable as a result of a failure to meet such requirements.

(B) *Passive Foreign Investment Company*

The Code provides special, generally adverse, rules regarding sales, exchanges and other dispositions of the stock of a PFIC. A foreign (non-US) corporation will be treated as a PFIC for any taxable year if at least 75% of its gross income for the taxable year is passive income or at least 50% of its gross assets during the taxable year, based on a quarterly average and generally by value, produce or are held for the production of passive income. Passive income for this purpose generally includes, among other things, dividends, interest, rents, royalties, gains from commodities and securities transactions and gains from assets that produce passive income. In determining whether a foreign corporation is a PFIC, a pro-rata portion of the income and assets of each corporation in which it owns, directly or indirectly, at least a 25% interest (by value) is taken into account.

Depending upon the value and the composition of Tamboran's assets and income over time, Tamboran could be classified as a PFIC for US federal income tax purposes. Based on Tamboran's assets and income, Tamboran may have been a PFIC and may be a PFIC for the current taxable year (prior to the Scheme). There can be no assurance that Tamboran is not a PFIC for US federal income tax

purposes. In general, absent an applicable exception, a US shareholder must recognise gain but not loss, upon the disposition of PFIC stock in connection with a non-recognition transaction, such as the Scheme, notwithstanding that such transfer otherwise may be eligible for non-recognition treatment.

Exceptions to such gain recognition on a transfer of PFIC stock include: (i) certain transfers to US persons; (ii) certain transfers which result in the transferring US shareholder holding an indirect ownership interest in the PFIC; and (iii) if the transferring US shareholder timely made a valid QEF or mark-to-market election with respect to the PFIC. If an exception to gain recognition applies, a US shareholder generally will be subject to additional information reporting requirements.

Upon the completion of the Scheme, Tamboran expects that the PFIC regime and associated implications discussed above will no longer be relevant to the Tamboran US HoldCo CDI Holders. This is because US Holders will then directly own Tamboran US HoldCo CDIs in Tamboran US HoldCo, which will be a United States corporation and therefore not subject to the PFIC rules. Furthermore, PFIC status of a Tamboran US HoldCo non-US subsidiary, if any, could only be attributed to a US Holder that owns 50 percent or more of the outstanding Tamboran US HoldCo CDIs, which is not expected to occur.

The PFIC rules are complex. Each US Holder is urged to consult its own tax advisor regarding Tamboran's status as a PFIC, including the impact of such PFIC status on its taxation as a result of participation in the Scheme, reporting requirements and the application of the PFIC rules in light of each US Holder's particular circumstances.

(ii) **Non-US Holders**

(A) *Exchange of Tamboran Shares for Tamboran US HoldCo CDIs*

A Non-US Holder generally will not recognise any gain or loss on the exchange of Tamboran Shares for Tamboran US HoldCo CDIs pursuant to the Scheme.

(B) *Receipt of Tamboran US HoldCo CDIs*

A Non-US Holder generally will have an aggregate adjusted US federal tax basis in the Tamboran US HoldCo CDIs received pursuant to the Scheme equal to the Non-US Holder's aggregate adjusted US federal tax basis in the Tamboran Shares surrendered in the Scheme. A Non-US Holder's holding period for Tamboran US HoldCo CDIs received pursuant to the Scheme generally will include the Non-US Holder's holding period of the Tamboran Shares surrendered.

(b) **Certain material US federal income tax consequences of holding and disposing of Tamboran US HoldCo CDIs**

(i) **US Holders**

(A) *Sale or other disposition of Tamboran US HoldCo CDIs*

A US Holder generally will recognise gain or loss on a sale or other taxable disposition of Tamboran US HoldCo CDIs in an amount equal to the difference, if any, between the amount realised on the sale or disposition and such US Holder's adjusted US federal tax basis in the Tamboran US HoldCo CDIs. Such gain or loss generally will be a capital gain or loss. If the US Holder has a holding period in the Tamboran US HoldCo CDIs sold of more than one year, such capital gain or loss will be long-term capital gain or loss. For a US Holder who is an individual as well as certain trusts and estates, long-term capital gains generally are subject to US federal income tax at preferential rates. The deductibility of capital losses is subject to significant limitations.

(B) *Distributions on Tamboran US HoldCo CDIs*

Distributions, if any, paid on Tamboran US HoldCo CDIs will be treated as dividends to the extent of Tamboran US HoldCo's current and accumulated earnings and profits. Amounts treated as dividends generally will be includable in a US Holder's gross income in the year actually or constructively received. Any amount distributed in excess of Tamboran US HoldCo's current earnings and profits will first be treated as a tax-free return of capital to the extent of a US Holder's basis in the Tamboran US HoldCo CDIs with respect to which the distribution was received. Distributions in excess of a US Holder's basis in the Tamboran US HoldCo CDIs will be treated as capital gain subject to the treatment described above in "Sale or other taxable disposition of Tamboran US HoldCo CDIs." Generally, for US Holders who are individuals (as well as certain trusts and estates), dividends paid will be subject to US federal income tax at preferential rates.

(C) *Information reporting and backup withholding*

Information reporting will apply to payments of dividends on, and to proceeds from the disposition of, Tamboran US HoldCo CDIs paid to a US Holder, unless the US Holder is an exempt recipient. US federal backup withholding generally will apply to such payments (other than to a US Holder that is exempt from backup withholding and properly certifies its exemption) at the applicable statutory rate, currently 24%, if the US Holder fails to furnish its correct taxpayer identification number or otherwise fails to comply with applicable backup withholding requirements. A US Holder who is required to establish its exempt status generally must provide a properly completed IRS Form W-9.

Backup withholding is not an additional tax. Amounts withheld as backup withholding may be credited against a US Holder's US federal income tax liability. A US Holder generally may obtain a refund of any amounts withheld under the backup withholding rules in excess of such US Holder's US federal income tax liability by filing the appropriate claim for refund with the IRS in a timely manner and furnishing any required information.

(ii) **Non-US Holders**

(A) *Sale or other disposition of Tamboran US HoldCo CDIs*

A Non-US Holder generally will not recognise any gain or loss for US federal income tax purposes on the sale or other disposition of Tamboran US HoldCo CDIs that the Non-US Holder acquires in the Scheme. If, however, Tamboran US HoldCo is considered a "United States real property holding corporation" (**USRPHC**) within the meaning of section 897 of the Code at any time during the 5-year period ending on the date of a sale or other disposition of Tamboran US HoldCo CDIs, then, absent an applicable exception, a Non-US Holder's gain, if any, on the sale or disposition of Tamboran US HoldCo CDIs will be treated as effectively connected with the conduct of a US trade or business. In that event, and except as described below for certain 5% or less Tamboran US HoldCo CDI Holders, a Non-US Holder will be subject to US federal income tax on any gain treated as effectively connected with the conduct of a US trade or business at the rates generally applicable to US persons. A Non-US Holder that is a corporation may also be subject to a branch profits tax at a rate of 30% (or lower applicable treaty rate). Additionally, a purchaser or other transferee of Tamboran US HoldCo CDIs from a Non-US Holder may withhold 15% of the purchase price or consideration therefore.

Gain recognised by a Non-US Holder who has directly, indirectly and/or constructively owned 5% or less of the outstanding Tamboran US HoldCo CDIs during the 5-year period ending on the date of any sale or disposition generally will not be treated as effectively connected with a US trade or business and therefore will not be subject to US taxation as described immediately above, provided that Tamboran US HoldCo CDIs are regularly traded on an established securities market. Tamboran US HoldCo CDIs generally will be considered to be regularly traded on an established securities market if they are regularly quoted by brokers or dealers making a market in such interests. If the Tamboran US HoldCo CDIs are not regularly traded, then the exception for a Non-US Holder who has owned 5% or less of the Tamboran US HoldCo CDIs will not be applicable.

Whether Tamboran US HoldCo is treated as a USRPHC for US federal income tax purposes is a factual determination that generally must be made annually at the close of each taxable year and at certain "determination dates," including any date on which Tamboran US HoldCo acquires a "US real property interest" or any date on which Tamboran US HoldCo disposes of a foreign real property

interest or trade or business asset, and thus is subject to significant uncertainty. Accordingly, there can be no assurance that Tamboran US HoldCo will not be treated as a USRPHC for any taxable year.

The USRPHC rules are complex. Each Non-US Holder is urged to consult its own tax advisor regarding the determination of whether Tamboran US HoldCo is or will be a USRPHC, and the implications of such determination on the US federal income tax consequences of the Scheme to such Non-US Holder.

(B) *Distributions on Tamboran US HoldCo CDIs*

Distributions, if any, paid on Tamboran US HoldCo CDIs will be treated as dividends to the extent of Tamboran US HoldCo's current and accumulated earnings and profits. Any amount distributed in excess of Tamboran US HoldCo's current earnings and profits will first be treated as a tax-free return of capital to the extent of a Non-US Holder's federal tax basis in the Tamboran US HoldCo CDIs with respect to which the distribution was received. Amounts in excess of a Non-US Holder's federal tax basis in the Tamboran US HoldCo CDIs will be treated as a capital gain subject to the treatment described above in "Sale or other disposition of Tamboran US HoldCo CDIs."

Dividends paid to a Non-US Holder generally will be subject to withholding tax at a 30% rate unless the Non-US Holder is eligible for the benefits of an income tax treaty that provides for a reduced rate of withholding and such Non-US Holder establishes its eligibility for the reduced rate by providing a valid Form W-8BEN or Form W-8BEN-E (or other applicable documentation). For example, the Australia / US Income Tax Treaty provides for a reduced withholding tax rate of 15%, or 5% for dividends paid to an Australian company which holds at least 10% of the Tamboran US HoldCo CDIs. A Non-US Holder eligible for a reduced treaty rate of withholding may file a refund claim with the IRS for a refund of any amounts withheld in excess of such reduced treaty rate.

Although distributions that are treated as a return of capital or as capital gain generally are not subject to withholding, such distributions from a USRPHC generally are subject to withholding. If Tamboran US HoldCo is treated as a USRPHC, it will withhold 15% of any amount distributed that is not treated as a dividend. A Non-US Holder can file a US tax return and claim a refund of any amount withheld with respect to a return of capital distribution or a capital gain distribution (to the extent the amount withheld exceeds such Non-US Holder's tax due).

(C) *Information reporting and backup withholding*

Information reporting generally will apply to payments to a Non-US Holder of dividends on Tamboran US HoldCo CDIs. This information may also be made available to tax authorities of the country in which the Non-US Holder resides. Dividends to a Non-US Holder on

Tamboran US HoldCo CDIs generally will not be subject to backup withholding, and payments of proceeds to a Non-US Holder upon a sale of Tamboran US HoldCo CDIs generally will not be subject to information reporting or backup withholding, in each case so long as the Non-US Holder timely certifies its non-resident status (and Tamboran US HoldCo or its paying agent do not have actual knowledge or reason to know that the Non-US Holder is a US person or that the conditions of any other exemption are not, in fact, satisfied) or otherwise establishes an exemption. The certification procedures to claim a reduced rate of withholding under an income tax treaty described above in "Distributions on Tamboran US HoldCo CDIs" generally will satisfy the certification requirements necessary to avoid backup withholding.

Backup withholding is not an additional tax. Amounts withheld as backup withholding may be credited against a Non-US Holder's US federal income tax liability. A Non-US Holder generally may obtain a refund of any amounts withheld under the backup withholding rules in excess of such Non-US Holder's US federal income tax liability by filing the appropriate claim for refund with the IRS in a timely manner and furnishing any required information.

(D) *Additional FATCA withholding*

Sections 1471 through 1474 of the Code (commonly referred to as the Foreign Account Tax Compliance Act or "FATCA") and the relevant administrative guidance thereunder impose a withholding tax of 30% on certain types of payments, including US-source dividends, that are received by foreign financial institutions and certain other non-US entities unless certain certification, information reporting and other specified requirements are satisfied. An intergovernmental agreement between the United States and an applicable non-US country may modify such requirements. Although withholding under FATCA would have applied to payments of gross proceeds from the taxable disposition of Tamboran US HoldCo CDIs, proposed Treasury regulations have eliminated FATCA withholding on payments of gross proceeds. Taxpayers generally may rely on these proposed Treasury regulations until final Treasury regulations are issued. Under certain circumstances, a Non-US Holder might be eligible for refunds or credits of such taxes. Each Non-US Holder is urged to consult its own tax adviser regarding the potential application of withholding under FATCA to its investment in Tamboran US HoldCo CDIs.

The US federal income tax summary set forth above is included for general information only. Each holder of Tamboran Shares and, after the Scheme, Tamboran US HoldCo CDIs should consult its own tax adviser to determine the particular tax consequences to it of the Scheme and of holding and disposing of Tamboran US HoldCo CDIs, including the applicability and effect of federal, state, local, and non-US tax laws.

8.2 Australian tax implications

This section 8.2 provides a general summary of certain Australian tax consequences for certain Scheme Shareholders from exchanging their Tamboran Shares for Tamboran US HoldCo CDIs as contemplated by the Scheme.

The categories of Scheme Shareholders considered in this section 8.2 are limited to individuals (who are not employees of Tamboran or any of its subsidiaries), companies, complying superannuation entities and certain trusts, each of whom hold their investments (including shares and options) on 'capital' account for Australian tax purposes. For the avoidance of doubt, it is noted that this section 8.2 does not consider other types of Scheme Shareholders (such as partnerships and employees) or Scheme Shareholders that do not hold their Tamboran Shares on 'capital' account for Australian tax purposes (e.g. where the Tamboran Shares are held on 'revenue' account, as trading stock or as part of certain employment arrangements).

This section 8.2 is prepared solely for the Scheme Shareholders as described and limited above. This section 8.2 is not intended to and should not be used or relied upon by anyone else and there is no acceptance of a duty of care to any other person or entity. This section 8.2 has been prepared for the purpose of enabling certain Scheme Shareholders to broadly understand certain Australian taxation implications of the proposed Scheme as outlined in this Scheme Booklet.

This section 8.2 does not constitute tax advice and is intended only as a general guide to certain Australian tax implications of participating in the Scheme based on taxation law and administrative practice in effect as at the date of this Scheme Booklet (which are both subject to change at any time, possibly with retrospective effect). It does not consider any specific facts or circumstances that may apply to particular Scheme Shareholders.

As the tax consequences of participating in the Scheme will depend on each Scheme Shareholder's own individual circumstances, all Scheme Shareholders are strongly advised to seek independent professional advice regarding the tax consequences of disposing of their Tamboran Shares according to their own particular circumstances.

(a) Australian tax residents

(i) Disposal of Tamboran Shares

(A) CGT event

The disposal of Tamboran Shares by a Scheme Shareholder pursuant to the Scheme will constitute a 'CGT event' for Australian tax purposes. The CGT event will occur at the time the Scheme Shareholder disposes of its Tamboran Shares under the Scheme, which should be the Implementation Date. However, as discussed further below, CGT roll-over relief may be available in Australia for a Scheme Shareholder to choose to disregard any capital gain which arises from this CGT event.

In the absence of such CGT roll-over relief, a capital gain or capital loss may arise as a consequence of this CGT event. A Scheme Shareholder will make a capital gain if the capital proceeds exceed the Scheme Shareholder's cost base for the Tamboran Shares and a

capital loss if the capital proceeds are less than the Scheme Shareholder's reduced cost base for the Tamboran Shares (all in Australian dollars).

A Scheme Shareholder's cost base (or reduced cost base) in the Tamboran Shares should generally include the historical amount paid by the Scheme Shareholder to acquire the Tamboran Shares, plus any incidental costs of acquisition and disposal (e.g. brokerage fees and stamp duty).

(B) *CGT roll-over relief*

A Scheme Shareholder who prima facie makes a capital gain or loss from the disposal of their Tamboran Shares may be able to choose to obtain CGT roll-over relief in Australia. CGT roll-over relief enables a Scheme Shareholder to choose to disregard the capital gain they make from disposing of their Tamboran Shares in exchange for Tamboran US HoldCo CDIs.

The CGT roll-over choice must be made before the Scheme Shareholder lodges their Australian income tax return for the income year in which the CGT event happens.

Scheme Shareholders should note that Tamboran has applied for a class ruling from the ATO on the availability of CGT roll-over relief.

(C) *Consequences if CGT roll-over relief is available and is chosen*

If a Scheme Shareholder chooses CGT roll-over relief, the following general treatment should apply.

(I) Capital gain is disregarded

If a Scheme Shareholder chooses CGT roll-over relief, any capital gain or loss arising on the disposal of their Tamboran Shares in exchange for Tamboran US HoldCo CDIs should be disregarded for Australian tax purposes.

(II) Cost base and reduced cost base of Tamboran US HoldCo CDIs

If a Scheme Shareholder chooses to obtain CGT roll-over relief, the first element of the cost base and reduced cost base of each Tamboran US HoldCo CDI is calculated by reference to the cost base of the Tamboran Shares.

(III) Acquisition date of Tamboran US HoldCo CDIs

If a Scheme Shareholder chooses to obtain CGT roll-over relief, the acquisition date of the Tamboran US HoldCo CDIs for Australian CGT purposes is taken to be the date when the Scheme Shareholder originally acquired the corresponding

Tamboran Shares exchanged for the relevant Tamboran US HoldCo CDIs.

This acquisition date will be relevant for the purposes of determining whether any subsequent entitlement to the Australian CGT discount regime is potentially available in respect of any future disposal of the Tamboran US HoldCo CDIs where those Tamboran US HoldCo CDIs are held by an Australian resident individual, trust or superannuation fund.

(D) *Consequences if CGT roll-over relief is not chosen or is not available*

If a Scheme Shareholder does not qualify for CGT roll-over relief or the Scheme Shareholder chooses not to apply the roll-over relief, the following general Australian tax treatment should apply.

(I) Capital loss

If a Scheme Shareholder makes a capital loss from the disposal of their Tamboran Shares, this may be used to offset capital gains they derive in the same or subsequent years of income (subject to satisfying certain conditions), but cannot be offset against ordinary income nor carried back to offset net capital gains arising in earlier income years.

(II) Discount CGT treatment

If a Scheme Shareholder makes a capital gain and has held, or is taken to have held, its Tamboran Shares for at least 12 months at the time of the disposal of its Tamboran Shares, the discount CGT provisions may apply. The discount is 50 per cent for individuals and trusts, and 33 1/3 per cent for complying superannuation entities. Companies are not entitled to a CGT discount.

If a Scheme Shareholder derives a discount capital gain, any of their available capital losses will be applied to reduce the capital gain before the discount is applied. The resulting amount is then included in the Scheme Shareholder's net capital gain for the income year.

Where a Scheme Shareholder is a trustee, the rules relating to capital gains and the CGT discount are complex. Subject to certain requirements being satisfied, the capital gain may flow through to the beneficiaries in that trust, who will assess eligibility for the CGT discount in their own right.

(III) Cost base and reduced cost base of Tamboran US HoldCo CDIs

The first element of the cost base (and reduced cost base) of the Tamboran US HoldCo CDIs received by a Scheme

Shareholder should be equal to the Australian dollar market value of the Tamboran Shares it exchanges for the Tamboran US HoldCo CDIs on the Implementation Date.

(IV) Acquisition date of Tamboran US HoldCo CDIs

The acquisition date of the Tamboran US HoldCo CDIs for Scheme Shareholders for CGT discount purposes should be the Implementation Date.

A Scheme Shareholder who does not elect roll-over treatment will need to hold their Tamboran US HoldCo CDIs for at least 12 months after the Implementation Date before the CGT discount may apply on a subsequent disposal of the Tamboran US HoldCo CDIs.

(ii) **Ongoing ownership of Tamboran US HoldCo CDIs**

The following comments are made on the basis Tamboran US HoldCo will not be a resident of Australia for Australian income tax purposes, such that Scheme Shareholders will own securities in a foreign tax resident company.

(A) *Taxation of dividends received*

Generally, a Scheme Shareholder will be required to include in its assessable income the gross amount of any dividends it received from Tamboran US HoldCo when those dividends are paid or credited to them.

On the basis that Tamboran US HoldCo will not be an Australian tax resident, it will not be able to frank any dividends it pays to its shareholders. Accordingly, Scheme Shareholders will not receive franked dividends (and will not be entitled to any franking credits in respect of such dividends) from Tamboran US HoldCo.

If a Scheme Shareholder is an Australian tax resident company that holds at least 10% of the 'direct participation' interest in Tamboran US HoldCo, dividends received from Tamboran US HoldCo may be treated as non-assessable non-exempt income for Australian tax purposes if certain conditions are satisfied. For completeness, it is also noted that Tamboran US HoldCo dividends received indirectly by a company through interposed trusts and partnerships may also be eligible for such treatment (i.e. non-assessable non-exempt) if the company's 'direct participation' and 'indirect participation' interests in Tamboran US HoldCo are at least 10% and certain other conditions are satisfied.

Scheme Shareholders in these circumstances are advised to seek independent tax advice (based on their individual circumstances), regarding the treatment of dividends received from Tamboran US HoldCo, including potential eligibility for non-assessable non-exempt income treatment.

(B) *Future disposals of Tamboran US HoldCo CDIs*

On a future disposal of Tamboran US HoldCo CDIs, Scheme Shareholders may make a capital gain if the capital proceeds of that disposal are more than the cost base or a capital loss if the capital proceeds of that disposal are less than the reduced cost base.

Any foreign capital proceeds (i.e. US dollars) should be converted into Australian dollars at the prevailing exchange rate at the time of the transaction for Australian tax purposes.

Where the Scheme Shareholder is an Australian resident company which holds more than 10% of Tamboran US HoldCo, the capital gain or capital loss on disposal of Tamboran US HoldCo CDIs may, in certain circumstances, be reduced by a percentage that reflects the degree to which the underlying assets of Tamboran US HoldCo are used in an 'active business' are not 'taxable Australian property'.

The rules regarding this CGT exemption are complex and dependent on the facts at the time of disposal (including the manner in which Tamboran US HoldCo CDIs are held and the underlying asset composition of Tamboran US HoldCo at that time). Scheme Shareholders in these circumstances are strongly advised to seek independent tax advice based on their individual circumstances, including regarding whether capital gains or capital losses arising from disposal of their Tamboran US HoldCo CDIs may be eligible for this CGT exemption treatment.

(C) *Foreign income tax*

Scheme Shareholders may be entitled to obtain an Australian non-refundable tax offset for foreign income tax paid (such as US withholding tax on dividends). This offset can reduce the Australian tax payable on the amounts included in a Scheme Shareholder's assessable income, subject to an offset limit and certain other conditions being satisfied.

(D) *Foreign income anti-deferral rules*

In certain (limited) circumstances, the Australian foreign income anti-deferral rules can operate to tax an Australian tax resident shareholder on the income of a foreign company even though the shareholder has received no actual distributions from the foreign company through the "controlled foreign company" (**CFC**) rules.

The CFC rules generally only apply where the Scheme Shareholder has a controlling interest and usually do not apply to income from active businesses in countries such as the United States. These rules are extremely complex and may be subject to change. Accordingly, Scheme Shareholders with a significant interest in Tamboran are strongly urged to monitor developments in this area closely and consult their own tax advisers as to the application of the

foreign income anti-deferral rules to their holding of Tamboran US HoldCo CDIs in their own individual circumstances.

(b) **Foreign (i.e. non-Australian) tax residents**

(i) **Disposal of Tamboran Shares**

Foreign Tamboran Shareholders that hold their Tamboran Shares on capital account, hold their Tamboran Shares at any time in carrying on a business at or through a permanent establishment in Australia or hold more than a 10% interest in Tamboran or Tamboran US HoldCo may be subject to Australian CGT on the disposal of their Tamboran Shares, as Tamboran considers the Tamboran Shares and Tamboran US HoldCo CDIs may constitute an indirect real property interest. These foreign Tamboran Shareholders should seek Australian taxation advice in respect of the implications of the Scheme in their country of tax residence and any subsequent sale of Tamboran US HoldCo CDIs as the Australian tax consequences may depend on the assets of Tamboran Group at the time of the transaction.

(ii) **Taxation on dividends received**

Foreign Tamboran Shareholders should generally not be subject to Australian income tax or withholding taxes on dividends received from Tamboran US HoldCo (on the basis Tamboran US HoldCo will not be an Australian tax resident).

(iii) **Future disposals of Tamboran US HoldCo CDIs**

Foreign Tamboran Shareholders should generally not be subject to Australian CGT on the disposal of Tamboran US HoldCo CDIs.

(c) **GST**

Scheme Shareholders should not be liable to Australian GST in respect of a disposal of their Tamboran Shares, regardless of whether the Scheme Shareholder is registered for GST or not.

In the event the Scheme Shareholder is an Australian tax resident and is registered for GST, the disposal of the Tamboran Shares to Tamboran US HoldCo should be considered a GST-free financial supply (as defined).

Scheme Shareholders may incur GST included in costs (such as adviser fees relating to their participation in the Scheme) that relate to the Scheme. Tamboran Shareholders that are registered for GST may be entitled to input tax credits or reduced input tax credits for such costs. This will depend on each Scheme Shareholder's individual circumstances.

Scheme Shareholders should seek their own independent advice in relation to the GST implications of their participation in the Scheme.

(d) **Stamp duty**

No stamp duty should be payable in any Australian State or Territory.

(b) **Termination**

Prior to the Scheme becoming Effective, the Scheme Implementation Deed may be terminated and the Proposed Transaction may be abandoned in certain circumstances set out in section 7.1 of the Scheme Implementation Deed, which includes (but is not limited to) the following:

(i) **By either Tamboran or Tamboran US HoldCo**

Either Tamboran or Tamboran US HoldCo (non-defaulting party) may terminate the Scheme Implementation Deed if:

- (A) the End Date has passed before the Proposed Transaction has been implemented (other than as a result of a breach by the terminating party of its obligations under the Scheme Implementation Deed);
- (B) each of the following has occurred:

- (I) the other party is in breach of a material provision of the Scheme Implementation Deed at any time prior to 8:00am on the Second Court Date;
 - (II) the non-defaulting party has given notice to the defaulting party setting out the relevant circumstances of the breach and stating an intention to terminate the Scheme Implementation Deed; and
 - (III) the relevant circumstances have continued to exist five Business Days (or any shorter period ending at 8:00am on the Second Court Date) from the time the notice was given;
 - (C) the Required Majority of Tamboran Shareholders do not approve the Scheme at the Scheme Meeting;
 - (D) any of the conditions precedent to the Scheme is incapable of being satisfied or fulfilled (other than as a result of a breach by the terminating party of its obligations under the Scheme Implementation Deed);
 - (E) a Court or other Regulatory Authority has issued an order, decree or ruling or taken other action that permanently restrains or prohibits the Proposed Transaction and that order, decree, ruling or other action has become final and cannot be appealed; or
 - (F) if the other party consents to do so and both parties confirm it in writing.
- (ii) **By Tamboran US HoldCo**
- Tamboran US HoldCo may terminate the Scheme Implementation Deed if a Tamboran Director:
- (A) fails to recommend, recommends against, withdraws or adversely modifies or qualifies their recommendation of the Scheme or the Proposed Transaction; or
 - (B) makes any public statement to the effect that the Scheme is not, or is no longer, recommended.

9.2 Key steps to implement the Scheme

(a) Deed Poll

On 24 October 2023, Tamboran US HoldCo executed the Deed Poll pursuant to which it agreed, subject to the Scheme becoming Effective, to comply with its obligations under the Scheme.

A copy of the Deed Poll is provided in Annexure D.

(b) **Court hearings**

On 27 October 2023, the Court ordered that Tamboran convene the Scheme Meeting to be held at **Cliftons Sydney, Level 13, 60 Margaret Street, Sydney NSW 2000 at 10:00am (Sydney time) on Friday, 1 December 2023** to consider the Scheme. The order of the Court convening the Scheme Meeting is not, and should not be treated as, an endorsement by the Court of, or any other expression of opinion by the Court on, the Scheme.

If the Scheme is approved by the Requisite Majority of Tamboran Shareholders at the Scheme Meeting, and all other conditions precedent to the Scheme are satisfied or, where applicable, waived, Tamboran will apply to the Court (on the Second Court Date) for an order approving the Scheme. The Court has discretion as to whether or not to grant the orders approving the Scheme, even if the Scheme is agreed to by the Requisite Majority of Tamboran Shareholders at the Scheme Meeting.

The Second Court Date is currently expected to be held on **Wednesday, 6 December 2023**. Any change to this date will be announced on ASX and notified on Tamboran's website at www.tamboran.com.

(c) **Actions by Tamboran and Tamboran US HoldCo**

If the Court order approving the Scheme is obtained, the Tamboran Directors and the Tamboran US HoldCo Directors will take, or procure the taking of, the steps required for the Scheme to be implemented.

In particular, Tamboran will lodge with ASIC an office copy of the Court order approving the Scheme under section 411(10) of the Corporations Act, and the Scheme will become Effective. This is expected to occur on the Business Day following the Second Court Date.

(d) **Suspension of trading of Tamboran Shares**

If the Scheme becomes Effective, it is expected that Tamboran Shares will be suspended from trading from the close of trading on the Effective Date (which is expected to be the Business Day following the Second Court Date). On a date to be determined by Tamboran US HoldCo, Tamboran will apply for the termination of the official quotation of Tamboran Shares on ASX.

(e) **Trading of Tamboran US HoldCo CDIs**

Subject to confirmation from ASX, it is expected that the Tamboran US HoldCo CDIs to be issued as Scheme Consideration will be listed for quotation on the official list of ASX.

The Tamboran US HoldCo CDIs to be issued as Scheme Consideration are expected to commence trading on ASX, initially on a deferred settlement basis commencing on the Business Day after the Effective Date, and then on a normal T+2 settlement basis commencing on the Business Day after the Implementation Date (or such other date as ASX requires) following the despatch of holding statements and confirmation advices for Tamboran US HoldCo CDIs issued under the Scheme (which is expected to occur on the Implementation Date).

It is the responsibility of each Scheme Shareholder to confirm their holdings of Tamboran US HoldCo CDIs before they trade them, to avoid the risk of committing to sell more than will be issued to them. Tamboran Shareholders who sell Tamboran US HoldCo CDIs before they receive their holding statements or confirm their holdings of Tamboran US HoldCo CDIs do so at their own risk. Neither Tamboran nor Tamboran US HoldCo takes any responsibility for such trading.

(f) **Record Date**

In order to establish the identity of Scheme Shareholders, dealings in Tamboran Shares will only be recognised if:

- (i) in the case of dealings of the type to be effected using CHESS, the transferee is registered in the Tamboran Share Register as the holder of the relevant Tamboran Shares on or before the Record Date; and
- (ii) in all other cases, registrable transfers or transmission applications in respect of those dealings, or valid requests in respect of other alterations, are received on or before the Record Date at the place where the Tamboran Share Register is kept,

and Tamboran must not accept for registration, nor recognise for any purpose (except a transfer to Tamboran US HoldCo pursuant to the Scheme and any subsequent transfer by Tamboran US HoldCo or its successors in title), any transfer or transmission application or other request received after such times, or received prior to such times but not in registrable or actionable form, as appropriate.

For the purposes of determining entitlements to the Scheme Consideration, Tamboran will maintain the Tamboran Share Register on this basis until the Scheme Consideration has been issued to the Scheme Shareholders. The Tamboran Share Register in this form will solely determine entitlements to the Scheme Consideration.

(g) **Form of Scheme Consideration**

A Scheme Shareholder will receive all their Scheme Consideration in the form of Tamboran US HoldCo CDIs, which are tradeable on ASX and have the advantage that they can be traded on ASX during Australian business hours using Australian brokers and in Australian dollars, in a similar way to existing Tamboran Shares.

A further description of the rights and entitlements attaching to CDIs generally, including in relation to voting, is set out in Annexure F.

(h) **Provision of Scheme Consideration**

On the Business Day prior to the Implementation Date, Tamboran US HoldCo must procure the allotment and issue of the Tamboran US HoldCo Shares as required under the Scheme in book entry form to CDN, which are to be held on trust for each Scheme Shareholder (other than Ineligible Foreign Holders), and the Sale Agent, which are to be held on trust for each Ineligible Foreign Holder.

On the Implementation Date, Tamboran US HoldCo must do everything reasonably necessary to cause and procure that CDN issues Tamboran US HoldCo CDIs to:

- (i) the Scheme Shareholders (other than Ineligible Foreign Holders) in accordance with the Scheme and:
 - (A) in the case of Scheme Shareholders who hold their Tamboran Shares on the CHESS sub-register, procure that the Tamboran US HoldCo CDIs are held on that sub register;
 - (B) in the case of Scheme Shareholders who hold their Scheme Shares on the issuer sponsored sub-register, procuring that the Tamboran US HoldCo CDIs are held on that sub register; and
 - (C) maintain the CDI register for each Scheme Shareholder who receives Tamboran US HoldCo CDIs under the Scheme and procures the provision of Tamboran US HoldCo CDI holding statements or confirmation advices to all applicable Scheme Shareholders in accordance with the Listing Rules; and
- (ii) the Sale Agent in respect of any Tamboran Shares held by any Ineligible Foreign Holders in accordance with the Scheme.

(i) **Tamboran Shares held in joint names**

In the case of Scheme Shares held in joint names:

- (i) the Tamboran US HoldCo CDIs to be issued under the Scheme will be issued to and registered in the names of the joint holders and entry in the Tamboran US HoldCo register must take place in the same order as the holders' names appear in the Tamboran Share Register;
- (ii) any other document required to be sent under the Scheme, will be forwarded to the registered address recorded in the Tamboran Share Register as at the Record Date; and
- (iii) in respect of any Ineligible Foreign Holder, any cheque required to be sent under the Scheme will be made payable to the joint holders and will be sent to either, at the discretion of Tamboran, the registered address of the holder whose name is recorded in the Tamboran Share Register on the Record Date or to the joint holders.

(j) **Existing instructions, notifications or elections**

If not prohibited by law (and including where permitted or facilitated by relief granted by a Regulatory Authority), all instructions, notifications or elections given by a Tamboran Shareholder to Tamboran that are binding or deemed binding between the Tamboran Shareholder and Tamboran relating to Tamboran or Tamboran Shares including instructions, notifications or elections relating to:

- (i) whether dividends are to be paid by cheque or into a specific bank account;
- (ii) payments of dividends on Tamboran Shares, including participation in any dividend reinvestment plan; and
- (iii) notices or other communications from Tamboran (including by email),

will be deemed from the Implementation Date (except to the extent determined otherwise by Tamboran US HoldCo in its sole discretion), by reason of the Scheme, to be made by the Scheme Shareholder to Tamboran US HoldCo and to be a binding instruction, notification or election to, and accepted by, Tamboran US HoldCo in respect of the Tamboran US HoldCo CDIs issued to that Scheme Shareholder until that instruction, notification or election is revoked or amended in writing by the Tamboran Shareholder in writing addressed to Tamboran US HoldCo at its registered address.

10.5 No unacceptable circumstances

The Tamboran Directors believe that the Scheme does not involve any circumstances in relation to the affairs of Tamboran that could reasonably be characterised as constituting 'unacceptable circumstances' for the purposes of section 657A of the Corporations Act.

10.6 Arrangements with Tamboran Option Holders

The existing Tamboran Options arise out of contracts between Tamboran and the relevant Tamboran Option Holders. Under those contracts, the existing Tamboran Options will continue after implementation of the Proposed Transaction, however the entitlements of Tamboran Option Holders to be issued Tamboran Shares will instead become entitlements to be issued Tamboran US HoldCo CDIs. In all other respects, the existing Tamboran Options will continue to be subject to the contractual terms pursuant to which they were granted. The Tamboran Board does not intend to accelerate the vesting of the Tamboran Options or to otherwise make any material change to the terms on which the Tamboran Options have been issued.

Tamboran intends to enter into binding agreements with each Tamboran Option Holder (**Amendment Deeds**) to amend the terms of their Tamboran Options, subject to certain conditions (including the Scheme becoming Effective).

The material terms of the Amendment Deeds are summarised below:

- (a) Each Tamboran Option Holder will agree to waive (to the extent applicable) all and any rights they may have under the terms on which their Tamboran Options were issued:
 - (i) to accelerated or early vesting of their Tamboran Options that arise as a result of, or in connection with, the Scheme or the transactions contemplated by the Scheme (including any change of control of Tamboran);
 - (ii) to being paid any cash amount by Tamboran in respect of their Tamboran Options that arise as a result of, or in connection with, the Scheme or the transactions contemplated by the Scheme (including any change of control of Tamboran);
 - (iii) to receive any Tamboran Shares upon exercise or vesting of their Tamboran Options; and
 - (iv) to exercise any of their Tamboran Options on or prior to the Implementation Date or the End Date (whichever is earlier).
- (b) Each Tamboran Option Holder will agree to amend the terms of all of their Tamboran Options held on the Record Date, such that they will be entitled to receive one Tamboran US HoldCo CDI for every one Tamboran Option exercised or vested (as applicable), and will not be entitled to any Tamboran Shares on exercise or vesting (as applicable) of their Tamboran Options.
- (c) The amendments set out in section 10.6(b) are to take effect on the Implementation Date immediately following implementation of the Scheme.
- (d) The amendments to the terms of the Tamboran Options will be conditional on:
 - (i) the Scheme becoming Effective on or before the End Date;
 - (ii) the regulatory approvals, consents and waivers necessary to give effect to the transactions contemplated by the Amendment Deeds having been obtained by Tamboran; and
 - (iii) unless otherwise waived by Tamboran in its sole discretion, all Tamboran Option Holders having entered into Amendment Deeds with Tamboran.
- (e) Subject to the satisfaction of the conditions set out in section 10.6(d), Tamboran covenants in favour of each Tamboran Option Holder that, with effect on and from the Implementation date, it will:
 - (i) ensure that the entitlements of each Tamboran Option Holder under the Tamboran Options will continue to be made available to each Tamboran Option Holder in accordance with, and subject to, the contractual terms pursuant to which the Tamboran Options were granted to the Tamboran Option Holders by Tamboran (as amended in accordance with the Amendment Deeds); and
 - (ii) in accordance with the contractual terms referred to in section 10.6(e)(i), upon the valid exercise or vesting of any of those Tamboran Options on or after the Implementation Date, procure CDN to issue to the relevant

Tamboran Option Holder the relevant number of Tamboran US HoldCo CDIs, subject to any adjustments to the terms of the Tamboran Options that may be made from time to time pursuant to and in accordance with the contractual terms referred to in clause 10.6(e)(i).

In the event that any existing Tamboran Option Holders do not agree to the proposed amendments to allow Tamboran US HoldCo CDIs to be issued in lieu of Tamboran Shares upon exercise or vesting of the Tamboran Options (as applicable), then following implementation of the Scheme, Tamboran US HoldCo will consider the available courses of action available to it (including any determination by the Tamboran Board that the Tamboran Options may lapse pursuant to the terms of the Employee Incentive Plan).

Tamboran does not intend to grant any further Tamboran Options (under the Employee Incentive Plan or otherwise) or similar rights and, once all of the existing Tamboran Options have been exercised, vested or lapsed, Tamboran intends to terminate the operation of the existing Employee Incentive Plan.

Upon implementation of the Scheme, Tamboran US HoldCo will assume all obligations in relation to the Options under the existing Employee Incentive Plan. Tamboran US HoldCo intends to evaluate and may adopt a new incentive plan to enable Tamboran US HoldCo to issue long-term incentives to senior management of Tamboran US HoldCo (including, for example, a grant of restricted stock), subsequent to completion of the Proposed Transaction, however any such determination is subject to Tamboran US HoldCo's performance, prevailing market conditions and taxation advice provided by Tamboran US HoldCo's advisers and consultants. If a new incentive plan is adopted, it is currently anticipated that the plan will be in a form and contain provisions which are customary for a public company admitted to a major stock exchange in the United States, such as NYSE.

Dear Directors

INDEPENDENT EXPERT'S REPORT

1. Introduction

The Directors of Tamboran Resources Limited (**'Tamboran'** or the **'Company'**) are proposing to re-domicile Tamboran and each of its related bodies corporate (the **'Tamboran Group'**) by means of a Scheme of Arrangement under Part 5.1 of the Corporations Act 2001 (Cth) (**'Corporations Act'** or **'the Act'**) (**'the Scheme'**). The effect will be that Tamboran Resources Corporation (**'Tamboran US HoldCo'**), a newly formed Delaware corporation, will become the ultimate parent company of the Tamboran Group following the implementation of the Scheme.

If the shareholders of Tamboran (**'Shareholders'**) approve the Scheme, the existing Australian domicile of Tamboran Group will be replaced with a new domicile in the United States of America (**'US'** or **'USA'**).

Under the terms of the Scheme, all Shareholders as at the record date of the Scheme (**'Record Date'**) (**'Scheme Shareholders'**), whether or not they voted for or against the Scheme, but excluding foreign shareholders who are restricted from receiving shares under the Scheme (**'Ineligible Foreign Holders'**), will receive one Tamboran US HoldCo CHESS depositary interest (**'CDI'**) for every one Tamboran Share held by that Scheme Shareholder (**'Scheme Consideration'**) on the Record Date. Tamboran US HoldCo CDIs will be traded on the Australian Securities Exchange (**'ASX'**) under the registered name of "CDN".

One Tamboran US HoldCo CDI will confer a beneficial interest in 1/200th of a Tamboran US HoldCo Share (**'Exchange Ratio'**). The Exchange Ratio of 200-to-1 effectively consolidates Tamboran's existing Shares as part of the Scheme, and therefore Tamboran US HoldCo will have 1/200th of the number of Shares on issue upon implementation of the Scheme.

The Scheme will not change the underlying ownership interests of Shareholders in Tamboran (subject to a sale facility aspect of the Scheme dealing with the interests of Ineligible Foreign Holders).

A more detailed description of the Scheme is set out in Section 4 of this report.

The scope and purpose of this Report are detailed in Section 3. This Report, should be read in full along with all other documentation provided to the Shareholders, including the scheme booklet prepared by Tamboran (**'the Scheme Booklet'**).

All figures in our Report are quoted in Australian dollars (**'A\$'** or **'AUD'**) unless otherwise stated.

2. Summary and Opinion

2.1 Requirement for the report

The directors of Tamboran (**'Directors'**) have requested that BDO Corporate Finance (WA) Pty Ltd (**'BDO'**) prepare an independent expert's report (**'our Report'**) to provide an opinion as to whether or not the Scheme is in the best interests of Tamboran Shareholders.

Our Report is prepared pursuant to Section 411 of the Corporations Act 2001 (**'Corporations Act'** or **'the Act'**) and is to be included in the Scheme Booklet for Tamboran in order to assist the Shareholders in their decision whether to approve the Scheme.

2.2 Approach

Our Report has been prepared having regard to Australian Securities and Investments Commission (**'ASIC'**) Regulatory Guides 60 'Schemes of Arrangements' (**'RG 60'**), Regulatory Guide 111 'Content of Expert's Reports' (**'RG 111'**) and Regulatory Guide 112 'Independence of Experts' (**'RG 112'**).

ASIC's regulatory guides do not specify the basis of evaluation for a change of domicile transaction but do indicate that the basis of evaluation selected by the expert must be appropriate for the nature of each specific transaction, that is, the expert must consider the substance of the proposed transaction and not the legal form when evaluating the proposed transaction.

Upon implementation of the Scheme, there will be no change in the economic interests of Shareholders in eligible jurisdictions, who effectively retain their interests in the assets of Tamboran by way of an interposed entity. The Scheme merely represents a restructure and change in the geographic location and as such, we do not consider it appropriate to analyse the Scheme as a control transaction.

RG 111 provides further guidance on forming an opinion as to whether a transaction is in the best interests of security holders. The range of transactions regulated by RG 111 includes transactions not involving a change of control, such as demergers and demutualisation's. RG 111 indicates that for these types of transactions the issue of value is of secondary importance and the expert should provide an opinion as to whether the advantages of the transaction outweigh the disadvantages. It provides that if the demerger or demutualisation involves a Scheme of Arrangement and the expert concludes that the advantages of the transaction outweigh the disadvantages, the expert should conclude that the Scheme of Arrangement is in the best interests of Shareholders.

Based on the guidance provided by RG 111, we consider the most appropriate approach to assess whether the Scheme is in the best interests of Shareholders is to consider whether the advantages of the Scheme outweigh the disadvantages.

To arrive at our opinion, we have assessed the terms of the Scheme as outlined in the body of this Report and have considered:

- the advantages and disadvantages of the Scheme;
- other factors which we consider to be relevant to the Shareholders in their assessment of the Scheme; and
- the position of the Shareholders if the Scheme is not approved.

2.3 Opinion

We have considered the terms of the Scheme as outlined in the body of this Report and have concluded that, in the absence of any other relevant information, the advantages outweigh the disadvantages and the Scheme is in the best interests of Shareholders.

The respective advantages and disadvantages and other matters that we considered are summarised below:

ADVANTAGES AND DISADVANTAGES			
Section	Advantages	Section	Disadvantages
9.1.1	Potential access to new funds	9.2.1	Implementation costs
9.1.2	Favourable financing conditions for oil and gas companies in the US	9.2.2	Higher listing and regulatory fees
9.1.3	Dual listing on a US-based stock exchange and ASX provides higher liquidity	9.2.3	The trading value of US HoldCo CDIs is uncertain after the Implementation Date
9.1.4	Proposed listing on a US-based securities exchange may result in a favourable liquidation event for Shareholders	9.2.4	Changes to protection of Shareholders under new jurisdiction
9.1.5	US domicile can enhance transaction potential	9.2.5	Ineligible Foreign Holders will not receive Tamboran US HoldCo CDIs
9.1.6	Better alignment of the corporate structure with key business stakeholders	9.2.6	Exposure to additional litigation risk
9.1.7	Presence of other global natural gas producers operating within Australia		

2.4 Other Considerations

We have also considered the following other factors in determining whether the Scheme is in the best interests of Shareholders:

Section	Description
9.3.1	Impacts on investment portfolios and risk preferences
9.3.2	Legal implication for Shareholders
9.3.3	Franking credits
9.3.4	Tamboran US HoldCo will change reporting standards to US GAAP

Section	Description
9.3.5	Foreign exchange implications
9.3.6	Exchange ratio under the Scheme
9.3.7	Taxation implications
9.3.8	The Scheme may be implemented even if Shareholders do not vote, or vote against the Scheme
9.3.9	Position of the Shareholders if the Scheme is not approved

3. Scope of the Report

3.1 Purpose of the Report

The Scheme is to be implemented pursuant to Section 411 of the Corporations Act. Part 3 of Schedule 8 to the Corporations Act Regulations 2001 (**‘Regulations’**) prescribes the information to be sent to shareholders in relation to schemes of arrangement pursuant to Section 411 of the Act (**‘Section 411’**).

An independent expert’s report must be obtained by a scheme company if:

- There is one or more common directors; or
- The other party to the scheme holds 30% or more of the voting shares in the scheme company.

The expert must be independent and must state whether or not, in his or her opinion, the proposed scheme is in the best interest of the members of the company that are subject to the scheme and set out the reasons for that opinion.

In this case, the requirement arises as Tamboran and Tambora US HoldCo have one or more common directors.

As a consequence, the Directors of Tamboran have commissioned this Report to satisfy their obligation.

3.2 Regulatory guidance

Neither the Act nor the Regulations defines the term ‘in the best interests of’. In determining whether the Scheme is in the best interests of Shareholders, we have had regard to the views expressed by ASIC in RG 111. This regulatory guide provides guidance as to what matters an independent expert should consider to assist security holders to make informed decisions about transactions.

Schemes of arrangement pursuant to Section 411 can encompass a wide range of transactions. Accordingly, ‘in the best interests’ must be capable of a broad interpretation to meet the particular circumstances of each transaction. This involves a judgment on the part of the expert as to the overall commercial effect of the transaction, the circumstances that have led to the transaction and the alternatives available.

The expert must weigh up the advantages and disadvantages of the proposed transaction and form an overall view as to whether shareholders are likely to be better off if the proposed transaction is

implemented than if it is not. An opinion of ‘in the best interests’ does not imply the best possible outcome for shareholders.

In determining whether the advantages of the Scheme outweigh the disadvantages, we have had regard to the views expressed by ASIC in RG 111. This Regulatory Guide suggests that an opinion as to whether the advantages of a transaction outweigh the disadvantages should focus on the purpose and outcome of the transaction, that is, the substance of the transaction rather than the legal mechanism to affect it.

We have considered the Scheme in the context of Shareholders as a whole. We have not considered the effect that the Scheme may have on individual shareholders and their specific circumstances. Individual shareholders will have different investment and risk profiles, which may result in the Scheme affecting them differently. Accordingly, what might be in the best interests of Shareholders as a whole, may not be in the best interests of an individual Shareholder.

3.3 Adopted basis of evaluation

RG 111 suggests that the main purpose of an independent expert’s report is to adequately deal with the concerns that could reasonably be anticipated of those persons affected by the transaction.

We have reviewed the terms of the Scheme and note that the underlying assets and liabilities of Tamboran US HoldCo are effectively the same as Tamboran, and that there are very few expected changes to the business operations of Tamboran Group as a result of the Scheme. Furthermore, subject to any minor impact that may arise from a sale facility aspect of the Scheme dealing with the interests of Ineligible Foreign Holders, the beneficial interest and proportionate of ownership of Tamboran Shareholders prior to the Scheme and following the Scheme is the same. Therefore, we consider that there is no change in value to the business of Tamboran Group and hence no assessment of value is required.

Having regard to the above and to RG 111, we have completed our Report as follows:

- An investigation into the advantages and disadvantages of the Scheme (Sections 9.1 and 9.2);
- An analysis of any other issues that could be reasonably anticipated to concern Shareholders as a result of the Scheme (Section 9.3); and
- A consideration of whether the Scheme is in the best interests of Shareholders.

4. Outline of the Scheme

Overview

The Directors of the Company have proposed a re-domicile of Tamboran Group to the US by way of a Scheme of Arrangement between Tamboran and its Shareholders whereby Tamboran US HoldCo would acquire the entire issued share capital of Tamboran and become the new holding and parent company for Tamboran Group. Accordingly, if the Scheme proceeds, all Tamboran Shares will be transferred to Tamboran US HoldCo and Tamboran will become a wholly-owned subsidiary of Tamboran US HoldCo.

Tamboran US HoldCo intends to acquire all of the Shares of Tamboran and, in exchange, Scheme Shareholders from the following jurisdictions will be entitled to receive the Scheme Consideration for the purposes of the Scheme:

- Australia;
- Canada;
- Republic of Cyprus;
- Hong Kong;
- India;
- Italy;
- Luxembourg;
- Malaysia;
- New Zealand;
- Singapore;
- The United Kingdom;
- The United States of America; and
- Any other jurisdiction in respect of which Tamboran determines (in its absolute discretion) is not duly onerous or duly impractical to issue Tamboran US HoldCo CDIs to the Shareholders with registered addresses in that jurisdiction.

Scheme Shareholders (other than Ineligible Foreign Holders), on receiving the Scheme Consideration, will hold an equivalent interest in Tamboran US HoldCo (subject to a sale facility aspect of the Scheme dealing with the interests of Ineligible Foreign Holders), through US CDIs, to that which they held in Tamboran prior to implementation of the Scheme.

Whether Tamboran Shareholders vote in favour, against or do not vote at all, if the Scheme is approved and implemented, Scheme Shareholders (other than Ineligible Foreign Holders) will receive one Tamboran US HoldCo CDI for every one Share held by them in Tamboran as at the Record Date. Tamboran US HoldCo CDIs represent a beneficial interest in common Shares in the capital of Tamboran US HoldCo and will rank equally in all respects with all Tamboran US HoldCo Shares. Tamboran US HoldCo CDIs will also be traded on the ASX.

Exchange Ratio

One Tamboran US HoldCo CDI will confer a beneficial interest in 1/200th of a Tamboran US HoldCo Share. The Exchange Ratio of 200-to-1 effectively consolidates Tamboran's existing Shares as part of the Scheme, and therefore, Tamboran US HoldCo will have 1/200th of the number of Shares on issue upon implementation of the Scheme.

The Exchange Ratio has been determined by Tamboran having regard to:

- the current trading price of Tamboran Shares on the ASX;
- the theoretical trading price of US HoldCo Shares and the trading price that is expected of a stock listing on a major stock exchange in the US as well as the ASX; and
- the fact that Tamboran current has 1,716,672,571 Tamboran Shares on issue.

Ineligible Foreign Holders

A Shareholder is an "Ineligible Foreign Holder" who is not entitled to receive the Scheme Consideration for the purposes of the Scheme if the Shareholder's address, as shown in the Tamboran share register on the Record Date, is a place outside of the "eligible" jurisdictions listed above being Australia, Canada, Republic of Cyprus, Hong Kong, India, Italy, Luxembourg, Malaysia, New Zealand, Singapore, United Kingdom and United States, and if Tamboran in its sole discretion determines it would be unlawful, duly onerous or duly impractical to issue the Scheme Consideration to the Shareholder.

Sale Facility

Ineligible Foreign Holders will not be entitled to receive Tamboran US HoldCo CDIs, however, their holdings in Tamboran will be dealt with through a sale facility ('**Sale Facility**') that forms part of the Scheme's implementation.

Under this treatment, the Tamboran US HoldCo CDIs to which an Ineligible Foreign Holder would otherwise be entitled will instead be issued to a sale agent appointed by Tamboran US HoldCo ('**Sale Agent**') for sale and the net proceeds from such sale will be remitted to the Ineligible Foreign Holder in accordance with the Sale Facility.

The Sale Agent will sell the Tamboran US HoldCo CDIs in such manner, on such financial markets, at such price and on such other terms as the Sale Agent determines in good faith, having due regard to the desire to achieve the best price reasonably available at the time of the sale.

The Sale Facility will operate as follows:

- a) As soon as reasonably practicable after the Scheme implementation date ('**Sale Period**'), the Sale Agent will arrange for the sale of all the Tamboran US HoldCo CDIs allotted to it, held for the benefit of Ineligible Foreign Holders. The sales will be effected in such manner, at such price and on such other terms as the Sale Agent determines in good faith and at the sole risk of the Ineligible Foreign Holders; and
- b) The Sale Agent will then remit the sale proceeds in US dollars ('**US\$**' or '**USD**'), less any applicable brokerage, foreign exchange, stamp duty, currency conversion and other selling costs, taxes and charges, to Tamboran US HoldCo which will then account to each Ineligible Foreign Holder for their pro rata share of the aggregate sale proceeds.

Tamboran Options

Tamboran currently has on issue 54,501,251 options (**'Tamboran Options'**) under certain contractual terms. As part of the implementation of the Scheme, it is intended that the holders of the Tamboran Options (**'Option Holders'**) will continue to hold the Tamboran Options under existing contractual terms, except that the entitlement of the Option Holders to be issued with Tamboran Shares will instead become an entitlement to receive Tamboran US HoldCo CDIs.

This will be enacted by Tamboran and Tamboran US HoldCo entering into binding amendment deeds with each Tamboran Option Holder to amend the terms of their unexercised Tamboran Options, subject to the Scheme becoming effective and satisfaction of other conditions.

Further details can be found within the Scheme Booklet.

5.2 Beetaloo Project

Tamboran's primary focus is the development of natural gas resources through its interests in exploration permits ('EP') within the Beetaloo area. The Beetaloo Project is situated in the Beetaloo Sub-basin, a 28,500 square kilometre ('km²') area within the Greater McArthur Basin, located approximately 500 km south-east of Darwin in the NT, Australia.

Tamboran is the largest acreage holder in the Beetaloo Sub-Basin, with approximately 1.9 million net prospective acres and 147 trillion cubic feet of net 2U prospective gas resources. Subject to successful seismic, drilling and testing programs, Tamboran intends to supply natural gas domestically to Australia's NT and East Coast markets as well as internationally via liquid natural gas ('LNG') to markets in Asia.

Tamboran's Beetaloo exploration assets include interests outlined in the paragraphs below.

EP 76, EP 98 and EP 117 (38.75% interest)

In November 2022, Tamboran completed the acquisition of 50% of Origin Energy Limited's ('Origin') interest in Beetaloo permits EP 76, EP 98 and EP 117, through a joint venture entity with Mr. Bryan Sheffield, which gave the Company a beneficial working interest of 38.75% in the permits (see Section 5.3 of our Report for further details). As part of the acquisition, the Company committed to solely funding Origin's existing farm-in obligations, which included the requirement of drilling two horizontal wells, at an estimated cost of \$80 million.

Tamboran commenced drilling of the first well (A2H) in November 2022 and completed the drilling approximately one month later, in December. The drilling was successful to a total depth of 3,883 metres and included a 1,275 metre horizontal section close to the prospective Mid-Velkerri "B Shale" formation.

In early January 2023, the Company contracted Condor Energy Services to undertake the stimulation for the A2H well, which commenced in February and completed in April. Approximately 2,125 pounds per foot of proppant was placed across the 1,020 metre horizontal section of the A2H well, using a 5.5 inch casing that was based on modern US shale design, which was incorporated by the Company's US technical team. As highlighted by the Company, this design is expected to result in improved flow rates from production testing expected in 2023.

Tamboran contracted Silver City Drilling in March 2023 to undertake further development of the A2H well including the installation of production tubing. In June 2023, the A2H well was announced to have achieved gas breakthrough, however, modelling and independent third-party analysis of fluids recovered from the well identified potential skin, inhibiting gas and water flow. The Company claims these initial results provide a potential pathway to cleaning up the well and improving flow rates, with clean-up activity intended during the third quarter of 2023. The intervention is likely to coincide with activities at the Amungee well pad where the joint venture is planning to drill the Amungee 3H well following SS1H, as per Tamboran's 1 August 2023 announcement. The well produced flow rates averaging 0.97 million standard cubic feet ('mmscf') over the first 50 days.

On 24 July 2023, Tamboran announced that the Helmerich & Payne Inc Flex 3 Rig was mobilised at an EP 117 well 60 km south of A2H (SS1H), and drilling commenced on 1 August 2023, following final approval by the Beetaloo joint venture. The well was successfully spudded on 1 August 2023 and will target the "B Shale" 700 metres deeper than the A2H well, expected to deliver higher pressures.

On 1 August 2023, Tamboran announced that it had successfully commenced the drilling of the SS1H well with the Helmerich & Payne, LLC super-sec FlexRig. The drilling was expected to take approximately 45

days, including a pilot hole and 1,000 metre horizontal section. On completion of the SS1H flow testing, Tamboran and Daly Waters Energy LP will complete the farm-in requirements to earn the 77.5% interest (being 38.75% each) and operatorship of the EP 76, 98 and 117 permits. It was noted that success at the SS1H well location could support the pilot development decision, which includes the use of Clean Energy Fuels Australia (CEFA) facilities and APA Group pipeline to the Amadeus Gas Pipeline.

EP 161 (25% interest)

EP 161 includes a total area of approximately 10,500 km², with a prospect area estimated to contain potential gas resources, based on technical attributes comparable with successful gas producing basins in the US.

Tamboran's 25% interest in EP 161 was granted in 2012. In December 2012, the Company entered into a farm-in agreement and joint operating agreement with Santos QNT Pty Limited ('Santos'), subject to the conditions that Santos spends \$71 million and drills two wells for the project, to earn a total interest of 75%. Santos satisfied its farm in conditions and gained a 75% operating interest, with Tamboran owning the remaining 25% non-operating interest. Tamboran is required to contribute its proportionate share of joint venture expenditure in order to maintain its interest in the permit.

EP 161 wells (T2H and T3H) were both drilled during the second half of 2021 and were subsequently stimulated in December 2021. In July 2022, Santos installed 2-7/8 inch production tubing at the wells. In August 2022, Santos completed flow tests, delivering a 40% increase in flow rates for T2H and a 150% increase for T3H, when compared to rates achieved previously, in January of the same year. The T2H well peaked at 4.3 mmscf per day and the T3H well peaked at 7.4 mmscf per day, normalised over 1,000 metres, which Tamboran claims is the highest sustained flows seen from any well in the Beetaloo area to date.

In December 2022, flow testing was suspended for both wells, following the completion of the testing period. T2H and T3H delivered an average IP90 flow rate over the period of 2.4 and 3.5 mmscf per day, respectively, normalised over 1,000 metres, demonstrating commercial flow rates of the "B Shale".

On 23 June 2023, Tamboran completed analysis of two flow tests at EP 161, including modelling of the production curves by independent third-party subsurface experts, Subsurface Dynamics. The Company claims modelling of T2H and T3H has demonstrated a 20-year estimated ultimate recovery of approximately 16.8 to 18.5 billion cubic feet, respectively, for a proposed 3,000 metre well.

EP 136, EP 143 and EP(A) 197 (100% interest)

Tamboran acquired Sweetpea Petroleum Pty Ltd ('Sweetpea') from Longview Petroleum LLC ('Longview') in May 2021, gaining 100% of working interests in EP 136 and EP 143 as well as Sweetpea's application for EP(A) 197. Tamboran initially planned to develop wells and infrastructure at EP 136, maintain EP 143 for future development opportunities and complete the acquisition of EP(A) 197.

In early 2022, Tamboran finalised land access approvals for EP 136 following a final determination from the Northern Territory Civil and Administrative Tribunal ('NTCAT'), allowing the Company to commence drilling within the permit area.

In May 2022, Tamboran announced it secured an Ensign Rig 970 to drill the EP 136 well (M1H). Subsequently, in June 2022, Tamboran announced it commenced an 85-kilometre 2D seismic acquisition program within the permit, approved by the NT Government with a valid Aboriginal Areas Protection Authority Certificate. Civil works also commenced with the construction of access tracks, well pads and a

camp pad. In August 2022, Tamboran announced the NT governments approval of Tamboran's Environmental Management Plan, allowing for up to seven wells to be drilled within EP 136.

Following approvals, in October 2022, Tamboran confirmed EP 136 well (M1V) was drilled to a total depth of 3,050 metres, exhibiting gas shows within the Mid-Velkerri "A", "B" and "C" shales. Tamboran claims M1V was drilled at a reduced time compared to nearby wells with similar depths, credited to the US team's technical expertise. Following the completion of logging, the M1V well was cased and suspended for possible future re-entry and side track for multi-stage stimulation work. The Ensign 970 was rigged down and released in mid-December 2022. On 28 April 2023, Tamboran announced that limited activity had been undertaken within the EP 136 permit since December 2022.

The Company noted that in April 2023, The Northern Territory Supreme Court dismissed an appeal made by Rallen Australia Pty Ltd ('Rallen'), who are the pastoral lease holders of Kalala Cattle Station in the NT. The appeal was regarding the NTCAT's decision to grant Tamboran a land access agreement for EP 136. The decision by the Supreme Court allowed Tamboran to continue conducting exploration activities in the permit area under corresponding Environmental Management Plans, despite efforts from Rallen to block these activities.

Proposed NTLNG Project

On 9 June 2023, Tamboran announced that the NT Government has provided the Company exclusivity over 170-hectares on the Middle Arm Sustainable Development Precinct for a proposed LNG development, expected to be supported by Beetaloo gas production ('NTLNG Project'). The NTLNG Project area has been allocated on a "Do Not Deal" basis for the following 12-months, to allow Tamboran to progress an initial concept select phase. The NTLNG Project is expected to host LNG that has an initial capacity of 6.6 million tonnes per annum ('mtpa'), with the Company targeting first LNG production by 2030.

On 23 June 2023, Tamboran announced it had signed two non-binding Memorandum of Understanding's ('MOU') with BP Singapore Pte. Limited ('BP') and Shell Eastern Trading (Pte) Ltd ('Shell'), regarding the potential purchase of LNG from the NTLNG Project. The two MOUs enable BP and Shell to purchase up to 2.2 mtpa of LNG over a 20-year period. Tamboran aims to execute formal LNG sale and purchase agreements in 2025.

On 25 July 2023, Tamboran announced it awarded John Wood Group plc the contract to undertake the concept select engineering phase for the NTLNG Project, expected to be completed during the first half of 2024, ahead of entering the pre-front-end-engineering and design. The scope of the studies includes evaluation of a proposed three train concept, LNG liquefaction technology selection, carbon capture infrastructure, site configuration and initial cost estimates.

On 2 August 2023, Tamboran announced that it had signed four separate non-binding letters of intent (LOIs) with Origin, AGL Energy Services Pty Limited, EnergyAustralia Pty Ltd and Shell Energy Australia Pty Ltd (together, the "Parties") to potentially purchase in aggregate 510 - 750 terajoules per day (185 - 270 petajoules per annum) of gas from Tamboran's low-reservoir carbon dioxide ('CO₂') Beetaloo Basin gas assets for a period of up to 10 - 15 years. Tamboran will separately work with the Parties toward executing separate binding fully termed Gas Sale Agreements (GSAs), including purchase price, transport arrangements and other key commercial terms. The binding GSAs support the progress of APA Group's proposed pipeline between the Beetaloo basin and the East Coast gas transmission network.

5.3 Recent Corporate Events

In May 2021, Longview and Tamboran completed a Share Exchange Agreement under which Tamboran acquired 100% of the issued share capital of Sweetpea from Longview for an undisclosed amount, following approvals. Sweetpea is the registered holder of 100% of working interests in EP 136 and EP 143 and had also applied for EP(A) 197.

On 1 July 2021, Tamboran released a prospectus for its initial public offering ('IPO') of up to 165 million shares at a price of \$0.40 per share to raise up to \$66 million (before costs and expenses), with a minimum offer of \$60 million (before costs and expenses). The offer was scheduled to close on 18 June 2021. The Company announced on 1 July 2021 that it raised \$61 million pursuant to the IPO by the issue of 153 million shares at a price of \$0.40 per share. Tamboran commenced trading on 2 July 2021.

On 26 May 2022, Tamboran commenced an American Depositary Receipt ('ADR') program, allowing over the counter trading of its shares in the US. ADRs allow non-US companies, such as Australian companies like Tamboran, to make their shares available outside their home markets. Tamboran stated the ADR allows easier investment from more liquid markets that host investors with more experience in unconventional gas, expecting the ADR to provide greater value realisation for Tamboran's shareholders.

On 20 September 2022, Tamboran announced a \$138 million (pre-costs) equity raise where 657 million shares were issued at \$0.21 per share under an institutional placement, which was completed on 31 October 2022. The raise was made up of \$30 million from American investor Bryan Sheffield, a \$22 million drilling contract from US-based Helmerich and Payne Inc and \$46 million from other US energy-focused institutional investors. The remaining \$40 million was raised via a further placement to institutional investors outside the US. The transaction was structured as a two-tranche placement.

In conjunction with the equity placement announced on 20 September 2022, the Company also announced a non-underwritten share purchase plan ('SPP') to existing shareholders targeting to raise approximately \$3 million, with the SPP capped at \$5 million. On 31 October 2022, Tamboran announced 16 million shares were issued under the SPP, raising \$3 million.

Proceeds from the capital raisings outlined above were partially used for an acquisition announced on 20 September 2022. The transaction involved Tamboran's acquisition of 50% of Origin's 77.5% interest in Beetaloo permits EP 76, 98 and 117 as part of a joint venture with Bryan Sheffield, who acquired the other 50% interest. The transaction was completed on 9 November 2022. The joint venture acquired the interest for a consideration that included a \$60 million cash payment and a 5.5% revenue royalty on production.

On 17 April 2023, Tamboran announced the resignations of Directors Daniel Chandra and Ann Mary Diamant.

On 16 March 2023, Tamboran announced that it had elected the Hon. Andrew Robb AO and John Bell Sr. to its Board of Directors, effective from 16 April 2023. The new directors bring critical skills and experience to Tamboran as a company as Tamboran executes its strategy of playing a constructive role in the global energy transition.

On 21 June 2023, Tamboran entered into a framework agreement with the Clean Energy Fuels Australia Group ('CEFA') to obtain exclusivity over gas compression and liquefaction facilities for potential early production from Beetaloo, with the potential to accelerate gas production. Tamboran and CEFA intend to work together to finalise a contract for longer term use of the facilities, with exclusivity to last until the end of 2023.

On 23 June 2023, Tamboran announced that it signed a term sheet with APA Group, for APA Group to be the preferred transmission pipeline partner for the Beetaloo Project. The term sheet is planned to be converted into a longer-form agreement, for APA Group and Tamboran to jointly develop gas transmission pipelines to connect the Beetaloo Project to Australia's East Coast gas market and the NTLNG Project. The term sheet specifies APA Group will fund all activities under the partnership, including spending up to \$10 million on studies and approvals over the following 12 months.

As outlined in Section 5.2, on 23 June 2023, Tamboran announced it had entered into two non-binding MOUs with BP and Shell regarding the potential purchase of LNG from Tamboran's proposed NTLNG development. The two MOU's included volumes for bp and Shell to each purchase up to 2.2 million tonnes of LNG per annum over a 20-year period.

On 27 June 2023, Tamboran received commitments for the institutional placement component of its \$71.4 million capital raise intended to accelerate the development of Beetaloo, comprising:

- A \$53.2 million (before costs) two tranche placement, made up of:
 - Tranche 1 unconditional placement of approximately 289 million new fully paid ordinary shares at \$0.18 per share to be issued without shareholder approval, to raise \$52.02 million; and
 - Tranche 2 conditional placement of approximately 6.6 million new fully paid ordinary shares to be issued to certain Tamboran directors to raise \$1.2 million, subject to shareholder approval at a general meeting;
- A \$13.2 million convertible note to Helmerich & Payne Inc, subject to shareholder approval, which has a 5-year term and a 5.5% interest rate; and
- A non-underwritten SPP of up to \$5 million, allowing existing shareholders to participate on the same terms as the two-tranche placement at \$0.18 per share, intended to launch following the completion of the two-tranche placement.

On 7 August 2023, Tamboran announced it had completed its SPP. The SPP closed on 3 August 2023, with applications received from eligible shareholders totalling approximately \$0.90 million. Approximately 5,027,430 new fully paid ordinary shares are expected to be issued and all valid applications made by eligible shareholders have been met in full. The SPP followed Tamboran's successful two-tranche placement as announced on 27 June 2023.

On 21 August 2023, Shareholders approved the issue of the \$13.2 million convertible note to Helmerich & Payne Inc.

Commentary on Statements of Financial Position

- Cash and cash equivalents decreased from \$63.08 million as at 30 June 2021 to \$26.81 million as at 30 June 2022. This decrease of \$36.27 million was primarily the result of payments for exploration and evaluation of \$39.66 million, payments for property, plant and equipment of \$15.23 million and payments to suppliers and employees of \$11.01 million, partially offset by proceeds from the issue of shares of \$34.96 million;
- Cash and cash equivalents decreased from \$26.81 million as at 30 June 2022 to \$10.64 million as at 30 June 2023. This decrease of \$16.17 million was primarily the result of payment for exploration and evaluation of \$117.48 million, payments for property, plant and equipment of \$19.94 million, payments to suppliers and employees of \$19.42 million and share issue transaction costs of \$9.34 million. This was primarily offset by proceeds from the September 2022 equity raises totalling \$140.42 million;

- On 12 April 2022, Tamboran began the purchase of rig machinery. On 12 September 2022, the Company's Board approved the machinery for sale, and it was classified as held for sale subject to the final payment. Tamboran made the final payment for the machinery on 23 December 2022. In relation to this, property, plant and equipment decreased from \$16.37 million as at 30 June 2022 to \$0.30 million as at 30 June 2023, primarily the result of \$36.10 million in machinery classified as held for sale, partially offset by \$20.20 million in additions to machinery, which were the final payments. Accordingly, non-current assets classified as held for sale of \$13.30 million as at 30 June 2023, reflects a change in accounting treatment for the machinery, following the sale of one of the rigs and an impairment expense on the remaining balance;
- Intangibles of \$0.43 million as at 30 June 2023 relates to Tamboran's purchase of carbon credits intended to reduce future residual emissions. The carbon credits were recognised as intangible assets at cost and will be assessed for impairment whenever an indication of impairment exists;
- Right-of-use assets of \$0.64 million as at 30 June 2023 is made up of buildings - right-of-use of \$1.03 million less depreciation of \$0.39 million, and corresponding current and non-current lease liabilities both relate to a lease contract for the Company's office premises in Sydney, Australia. The term of the lease is five years, with an option of three additional years. At the inception of the lease, the Company assessed the lease period as eight years;
- Exploration and evaluation assets increased from \$84.95 million as at 30 June 2022 to \$226.01 million as at 30 June 2023. This was primarily from \$103.57 million in exploration expenditure and capitalised restoration obligations including expenditure required to satisfy farm-in obligations, related to the acquisition of EP 76, EP 98 and EP 117 completed in November 2022 and an increase of \$34.89 million in exploration expenditure and capitalised restoration obligations related to EP 136;
- Trade and other payables increased from \$3.85 million as at 30 June 2022 to \$18.43 million as at 30 June 2023, primarily due to exploration and expenditure related to the drilling operations of the A2H well at EP 98;
- Other liabilities of \$1.40 million as at 30 June 2023 relates to the acquisition of Beetaloo permits from Origin, in which Tamboran assumed the remaining carry obligations of \$14.10 million of Falcon Oil & Gas Ltd's share of work program costs. The carry obligation reduced almost completely due to expenditure between the acquisition date and financial year end; and
- Provisions of \$13.27 million as at 30 June 2023 relate to restoration provisions, made for the present value of anticipated costs for future rehabilitation of land encompassed by the exploration permits of the Project. The equivalent amount was capitalised as the cost of the asset under exploration and evaluation expenditure.

6. Economic analysis

Tamboran Group is primarily exposed to the risks and opportunities of the Australian market through its operations and current domiciliation in Australia. Tamboran Group is also exposed to changes in the US economy with a proportion of its key management and technical staff based in the US.

Furthermore, if the Scheme is approved, Tamboran Group's exposure to the US market will be much greater following its re-domiciliation to the US. As such, we have presented an analysis on both the Australian and US economy to the extent that they relate to our assessment.

6.1 Australia

In its October 2023 Monetary Policy Decision meeting, the Reserve Bank of Australia ('RBA') made the decision to leave the cash rate target unchanged at 4.10%. Since May 2022, the RBA has increased the interest rates by four percentage points, with the intention of easing inflationary pressures and returning inflation to its target rate within a reasonable timeframe. The decision in October to hold the interest rates steady for the fourth consecutive meeting was aimed to provide additional time for the RBA to assess the impact of interest rate rises to date on key macroeconomic indicators.

Inflation reached 7.8% over the 2022 calendar year, the highest year-end inflation figure since 1990, and significantly higher than the RBA's inflation target of 2-3%. The RBA stated in its July statement that the decline in the monthly consumer price index ('CPI') indicator for May 2023 suggested that inflation has since passed its peak in Australia. However, the RBA considers that inflation is still too high at its current rate of 5.2% over the twelve months to August 2023, and predicts that it will remain at this level for some time before returning to the target range. The RBA has forecast inflation to continue to decline and return to the target range in late 2025.

According to the RBA, growth in the Australian economy was slightly stronger than expected over the first half of 2023, however the economy is still experiencing a period of below-trend growth which is expected to continue. Currently, the combination of heightened interest rates and cost-of-living pressures has led to a substantial deceleration in household spending. As a result, equity market conditions, particularly for retail investors have dampened with the decline in discretionary income.

Among major economies around the world, the rebound from the COVID-19 pandemic waned throughout 2022, which contributed to a slowdown in the global economy. Like many advanced economies, high inflation and energy prices have weighed on demand in Australia. In addition, it is anticipated in 2023-24 that Gross Domestic Product ('GDP') growth in Australia's key trading partners will remain substantially below historical norms. However, downside risks to growth in the major global economies have lessened in recent months, supported by China's reversal of its COVID-19 measures in December 2022, which has stabilised the supply chain recovery trajectory.

The March 2023 banking system crisis in the US and Switzerland has resulted in volatility in financial markets and a reassessment of the outlook for global interest rates. These problems are also expected to influence tighter financial conditions, forming an additional headwind for the global economy. However, the RBA considers the Australian banking system to be strong, well capitalised and highly liquid. It is, therefore, well placed to provide the credit that the economy needs, albeit at higher interest rates compared to the rates during the pandemic.

Conditions in the labour market have eased, although remain very tight. Firms report that labour shortages have lessened, yet job vacancies and advertisements are still at very high levels. The

unemployment rate at 3.5% remains close to a 50 year low, consequently, wage growth is stated to be increasing in response to the tight labour market and high inflation.

Outlook

Economic growth in Australia is forecast to be hampered by rising interest rates, higher living costs and declining real wealth. As a result, the forecast declining trajectory of inflation in Australia remains uncertain and the high inflation environment is expected to continue weighing on real household incomes for the short term. The composition of inflation in Australia is also likely to shift, with higher inflation expected in more persistent and non-discretionary items, such as rent, in the coming years. However, despite inflationary concerns, aggregate household incomes have been sustained by solid labour demand, which has underpinned the health of household balance sheets. Although the balance of risks has improved in recent months, the pathway forward remains uncertain, with upside and downside scenarios equally plausible.

Oil and gas exploration and development companies are not immune to the effects of inflation, with rising drilling and corporate costs impacting the level of capital required to fund exploration programs.

Additionally, a tight labour market may make it more difficult for explorers to source labour and advance exploration.

6.2 United States of America

Overview

After a strong post-pandemic rebound in 2021, the global economy lost momentum in 2022. The US economy, in terms of real GDP is reported to have risen by 3% for the second half of 2022. Growth in consumer spending plus residential and business investment (real private domestic final purchases) which more often better reflects the underlying momentum of economic activity, slowed to just a 0.6% growth rate.

Consumer spending adjusted for inflation grew moderately at a rate of 1.8% for 2022. Spending growth was concentrated on services, returning toward pre-pandemic levels. The fundamentals for household spending were less supportive of spending growth, with low consumer sentiment, tight monetary conditions and falling real incomes, despite increasing wages and jobs. As real incomes fell, consumers relied on savings that had been accumulated over the pandemic, represented in the savings rate reaching the lowest levels since the global financial crisis.

Real GDP growth is expected to be at 1.0% in 2023 and slightly increasing to 1.1% in 2024. The continuing normalisation of monetary policy, fiscal consolidation, ongoing supply disruptions and political and economic uncertainty are expected to weigh on growth in the coming period. However, the reorientation of domestic demand back towards the services sector and the reduction in COVID-related restrictions is expected to alleviate some supply shortages. The labour market has remained tight, with steady wage growth and historically low levels of unemployment, despite tight monetary conditions post the pandemic. Inflation peaked in June 2022 and has gradually declined but is still well above the US Federal Reserve's ('Fed') target.

In March 2022, the federal funds rate was 0.25%. Since then, the Fed has raised the rate by between 25 and 75 basis points in each of its Federal Open Market Committee's ('FOMC') meetings. In the most recent FOMC meeting in September 2023, the Fed decided to maintain the target range at 5.25% to 5.50%.

Equity prices were relatively volatile in 2022 but experienced a net increase over the year. Since the beginning of the year, the S&P 500 index increased moderately on net. The index declined in March, following the onset of banking concerns, but quickly made a full recovery and continued to rise. Rising interest rates reduced financing activity as the issuance of loans and certain corporate bonds decreased in the latter part of 2022, however business loans grew over the period.

As of June 2023, the Fed's balance sheet sat at US\$8.4 trillion, down from US\$8.9 trillion one year prior. According to Bloomberg, the Fed began attempting to shrink its balance sheet in the second half of 2022, in an attempt to curb inflation.

Inflation

Consumer price inflation, as measured by the 12-month change in the price index for personal consumption expenditures ('PCE'), was 4.4% in April, down from its peak of 7.0% last June. Inflation has decreased in recent months on the back of easing supply chain bottlenecks and declining energy prices. However, inflation remains elevated and is notably above the FOMC's longer-run objective of 2%.

Energy prices rose sharply in the first half of 2022, as a result of tight supply amid the Russia-Ukraine war. Subsequently, energy prices declined in the second half of the year on the back of global growth concerns, COVID-related slowdown from major importer China, and despite a European Union ('EU') embargo on Russian crude oil and petroleum products. The direct trade implications on the US due to the war in Ukraine and sanctions on Russia were limited, with just 3% of crude oil imports and 1% of total crude oil processed by US refineries being derived from Russia. Notably, the US is a net exporter of natural gas.

Inflation as well as demand for goods and services excluding food and energy slowed over the second half of 2022. In the beginning of 2023, transportation costs fell, and supplier delivery times improved. These price decreases occurred following the appreciation of the US dollar and declines in prices for commodities such as industrial metals. Conversely, housing prices have risen 8.4% over the 12 months ending April 2023.

Labour

Labour demand has remained strong and is continuing to outstrip modest supply growth across various areas of the economy. Nominal wage growth has slowed in the second half of 2022 but remains at an elevated level. Consequently, the labour market remains extremely tight, with job gains averaging 314,000 per month during the first five months of the year, which is down from 2022 levels but is still quite robust. Despite rising by 0.3% to 3.7% in May 2023, the unemployment is at historically low levels. Employment and earnings of nearly all major demographic groups are near or above their levels before the pandemic.

Clean Energy Funding

Since entering office, the Biden-Harris Administration has been positioning the US to scale up clean energy projects to create employment opportunities and deliver affordable, anti-carbon pollution energy for citizens. The Biden-Harris Administration introduced the Bipartisan Infrastructure Law which, among other goals, is addressing the climate crisis and targeting a carbon pollution-free future by 2035.

In February 2022, the US Department of Energy, through President Biden's Bipartisan Infrastructure Law, issued two notices of intent to provide US\$2.91 billion to boost production and recycling of advanced batteries crucial in a clean energy future. In May 2022, the Department of Energy also announced funding

of US\$3.16 billion directed by the Bipartisan Infrastructure Law, to manufacture more batteries and components domestically, which will support domestic supply chains and the workforce. These funding initiatives are key in America's shift towards energy independence, and President Biden's goal to have electric vehicles represent half of all vehicle sales in the US by 2030.

In August 2022, Congress passed the Inflation Reduction Act, the largest type of climate legislation in US history. It expands on the Bipartisan Infrastructure Law, introducing extensive clean energy incentives. These incentives include ten-year tax credits for various initiatives such as electric vehicles and carbon dioxide capture and storage.

More recently, through the Department of Energy, the Biden-Harris Administration issued a Request for Information seeking public input on the structure of a US\$505 million long-duration energy storage initiative in May 2022. This initiative will support the availability and accessibility of clean, reliable energy.

Also, in April 2023, the White House released a statement describing how the Biden-Harris Administration's clean energy projects intend to support coal workers and reduce reliance on competitors like China, building on over \$14 billion in total federal investments in energy communities. The initiatives included incentives to invest in clean energy and develop clean energy projects on current and former mine land. Additionally, the Department of Energy incentivised opportunities to redevelop coal power plants for new purposes such as petroleum storage.

In July 2023, the Biden-Harris administration launched a \$20 billion competition to capitalise a clean energy financing network that is aimed to expand investment in new projects that reduce pollution across the US. The funding will look to address the climate crisis by catalysing public and private capital for projects that cause harmful climate pollution in communities across the US, all while lowering energy costs for families and creating more jobs.

Outlook

Although the war in Ukraine caused supply chain issues and drove up energy prices in 2022, these effects began to unwind in the beginning of 2023. Notably, the US has not endured energy supply issues related to the war to the extent that parts of Europe have. However, as the Ukraine war develops going forward, it may have a further negative impact on GDP growth and increasingly exacerbate inflationary pressures.

In March 2023, federal regulators closed the Silicon Valley Bank when the lender was unable to meet demands from depositors for their money, as a result of having a high proportion of uninsured deposits invested in hold-to-maturity securities. The complications caused by the bank's collapse included disruptions to financial services as well as a reduction in confidence in the US economy overall.

Despite high inflation, recent developments in the banking sector and the war in Ukraine, the US financial system has remained resilient. In conjunction with the December 2022 FOMC meeting, participants submitted their projections for key US economic indicators each year up to and post-2025 and the medians of these projections were publicised. Based on this, change in real GDP is expected to increase by 1.1% in 2024 and by 1.8% in 2025 onwards, the unemployment rate is expected to be at 4.5% in 2024 and drop to 4% post-2025, and PCE is expected to be 2.1% in 2025 and 2.0% in the longer run.

7. Industry analysis

Tamboran is an exploration company focused on developing low reservoir CO₂ natural gas resources to support energy demands, specifically by supplying Australia's NT and East Coast markets domestically as well as Asian markets internationally.

As such, we have presented an analysis of the global liquefied natural gas ('LNG') industry with specific relation to the central and eastern Australian natural gas market as well as the Australian exploration sector for oil and gas.

7.1 Global LNG Industry

Natural gas deposits are often found near oil deposits, within the same geological formations. Therefore, companies often produce them together and the LNG industry is strongly connected to the oil and gas sector as a whole.

The oil and gas industry is structured by rationalising its supply chain, which comprises three business segments: upstream, midstream and downstream. Upstream oil and gas operations, such as Tamboran's operations, involve the exploration and extraction of hydrocarbons from the reservoir, while midstream operations are centred on the treatment and transportation of upstream products to consumers. The primary products of the upstream business are crude oil, natural gas, and LNG products. In the downstream segment, hydrocarbons, predominantly crude oil, are refined into various petrochemical products such as fuels, plastics, waxes, and oils, which are then marketed and distributed to end consumers.

Historically, oil and gas have been extracted from "conventional reservoirs" in which the hydrocarbons are trapped by an overlying layer of permeable rock, permitting the use of conventional extraction techniques. However, oil and gas can also be found in other geological settings, such as shale formations. Shale oil and gas resources are formed within the organic-rich shale source rock. As the low permeability of the shale inhibits the hydrocarbons from migrating to permeable reservoir rocks, shale oil and gas is often referred to as 'unconventional' or 'tight' resources. Over the last decade, there has been significant growth in unconventional resource development as technological breakthroughs have enhanced commercial viability.

While the growth, cost and risk profiles of the oil and gas industry are contingent on the specific methodology and technology employed for the extraction process, once extracted, commodities are typically traded on the same market. Consequently, the global oil and gas industry is one of the largest in the world, and as is characteristic of large markets, it is dominated by large, vertically integrated corporations. As such, the scale of operations and the capital investment required to bring fields into production represent high barriers to entry for early-stage companies.

Demand for natural gas is strongly linked with large-scale industrial and residential electricity production. According to the Department of Scientific and Industrial Research ('DSIR'), based on 2020 data, electricity generation accounted for 40% of natural gas consumption. The next three largest uses of natural gas are the residential (22%), industrial (20%) and transport sectors (19%). In total, natural gas accounted for 23% of the world's energy mix in 2020 and global LNG trade experienced a 17% increase in 2022 to continue on an upward trajectory in 2023 with a forecast growth of 9.2%, with Asia remaining the key driver of import growth. According to the Department of Industry, Science and Resources ('DISER'), in addition to the EU (21%), China (20%) and Japan (19%) were among the largest importers of LNG in 2021.

Since 2011, Australian LNG exports have increased from 20 mtpa to an expected 82.5 mtpa in 2023. This is off the back of large-scale capital investment in the industry, with several project developments being concluded. The growing demand for natural gas is tied to many developed economies transitioning towards cleaner energy. Natural gas is a well-suited alternative to other energy sources, as it can be quickly dispatched, easily transported, and emits half the emissions of coal-based power.

Australia has ten operational LNG facilities, which are owned by six large players, being Chevron Australia Pty Ltd, Woodside Energy Limited, Shell Australia Pty Ltd, Santos Limited, Origin Energy Limited and INPEX Operations Australia Pty Ltd. The industry has a nameplate capacity of 88 mtpa, with export volumes reaching 81.5 mtpa in 2022 (up 0.5% from 2021), which are expected to rise further in 2023 to 82.5 mtpa. Record-high supply from Australia is attributed to outperformance in the utilisation rate of the Wheatstone, Gorgon and Pluto LNG facilities, having a combined rate of 110%. A forecasted increase in 2023 production assumes the Prelude facility will return to a normal production profile.

7.2 Natural Gas Reserves, Pricing and Outlook

Technically recoverable natural gas resources at the start of 2021 were measured at 188 trillion metres cubed. The largest reserves were held by Russia, Iran, and Qatar, collectively representing 50% of total recoverable natural gas resource.

Source: BP Statistical Review of World Energy 2022

Although not one of the larger holders of natural gas reserves, Australia is one of the largest exporters of LNG globally, representing 20.9% of global LNG exports in 2021, realising record-high LNG export earnings of \$91 billion in 2022. Though as global gas and LNG markets reorganise in response to stranded Russian exports, export revenues are expected to fall from recent peaks to around \$45 billion in 2027-28.

Demand for natural gas has recovered corresponding to the emergence of the global economy from the pandemic, however, the conflict in Ukraine has led to tighter gas supplies and higher prices, resulting in a downward revision to the forecast demand for 2023 by the International Energy Agency.

Over the longer run, however, natural gas is expected to continue to increase its share in the global energy mix. Global energy demand is predicted to increase by 35% over the period from 2015 to 2040,

driven largely by electricity production and growth in developing and non-OECD countries, particularly India. Natural gas is anticipated to be the largest contributor, increasing its share in the global energy mix by 3.6% and overtaking coal as the second-largest energy source behind oil. Forecast increases in oil prices and tighter regulations surrounding energy efficiency are expected to drive this change.

US-based natural gas pricing is driven by global supply and demand factors and has the most readily available pricing data accessible in the public domain. Accordingly, we have presented the US natural gas spot price since 2013 and forecast prices from Consensus Economics through to 2032 below:

Source: Bloomberg (historical pricing), Consensus Economics (forecast)

Between January and December 2021, natural gas prices increased from US\$2.45/million British thermal units ('MMBtu') to US\$6.31 MMBtu, on the back of an increase in demand in line with the global recovery from the COVID pandemic. Volatility in natural gas prices in 2022 can be attributed to unfavourable developments in the global economic cycle driven by the pandemic, Russia's invasion of Ukraine and aggressive policy tightening by world central banks. Russia has cut off natural gas supplies to Europe via the Nord Stream pipeline and due to Europe's inability to easily swap natural gas suppliers or energy sources, there are concerns about energy rationing and a potential recession. This pushed prices as high as US\$9.68/MMBtu in August 2022.

The start of 2023 indicated a sharp decrease in natural gas prices due largely to an unexpectedly mild winter experienced in Europe, slowing demand, and allowing capacity to be filled at European storage facilities, reducing immediate supply risks. Uncertainty in demand following the recent alleviation of zero-COVID policy restrictions in China has further caused prices to fall. Prices reached as low as US\$1.99/MMBtu in late March 2023. Consensus Economics highlighted the low in US natural gas prices was driven by output increasing, subdued seasonal demand and reduced LNG exports. Consensus Economics forecasts natural gas prices to increase to US\$3.10/MMBtu by the end of 2023, then to marginally rise to US\$3.82/MMBtu in 2027, before steadily increasing to the long-term forecast (from 2028 to 2032) of US\$4.34/MMBtu.

Substitutes for oil and gas include coal, solar power, wind power, hydroelectricity and nuclear energy. The DISER predicts that renewable energy sources will experience the fastest average annual consumption growth rate of 6.8%. However, it is anticipated that oil and gas will still supply more than 50% of global energy needs by 2040. As discoverable reserves are depleted and alternative fuels become more widely

available with advances in technology, these traditional fuel sources will face a more apparent threat of substitution. Nonetheless, for the medium term, oil and gas will continue to play a fundamental role in all economies, particularly in developing countries lacking the investment and infrastructure necessary to move to renewable fuel sources.

7.3 Central and Eastern Australian Natural Gas Industry Outlook

The Australian Government's Australian Energy Market Operator publishes an annual Gas Statement of Opportunities Report ('GSOO') examining and forecasting the demand and supply of natural gas, based on information from companies within the industry. The March 2023 GSOO includes forecasts for all non-Western Australian jurisdictions in Australia from 2023 through to 2042.

As Australia moves toward net zero emissions, gas will continue to play a part in providing a reliable and dispatchable form of electricity generation and may provide ways to incorporate hydrogen and other 'green' gasses within Australia's energy mix.

Demand

Residential and small commercial natural gas consumption is forecast to decline slightly in the short term and more significantly in the medium to longer-term (10+ years), as the economy transitions to net zero emissions. Electrification is forecast to reduce consumption in these sectors from 233 petajoules ('PJ') in 2022 to 75 PJ in 2042.

Industrial and large commercial consumption is forecast to endure a sharp decline in the near term, driven by the closure of Incitec Pivot's Gibson Island facility in Brisbane in January 2023. In the longer term, more steady levels of consumption are expected from these sectors, with forecasts declining slightly from 259 PJ in 2022 to 229 PJ in 2042, predominantly driven by the sectors transitioning from natural gas to hydrogen.

Gas consumption for electricity generation across all sectors is forecast to rise into 2023, before entering a downward trend to 2026, driven by growth in wind and solar. In the medium to longer term, as coal-based electricity generation declines, gas consumption is forecast to rise again, playing a role in a variable renewable energy system, complementing electricity storage systems such as batteries.

The forecast also highlights the seasonality of gas-fired electricity generation becoming more significant, especially in winter. With the withdrawal of coal-based electricity generation, gas is forecast to take over part of coal's role as a seasonal energy reserve for the electricity system, particularly during times when weather-dependent variable renewable energy is less available. Notably, gas consumption is also naturally higher in winter months due to gas heating.

Supply

Producers have reported higher existing and committed production from 2023 to 2027 compared to what was reported in 2022. Whilst production capacity is higher than expected, there is a sustained forecast decline in production capacity compared to historical levels. Gas supply issues are expected going forward, driven by:

- A decline of gas supply in the Gippsland region;
- Capacity limits on the Moomba Sydney Pipeline and Southwest Queensland Pipeline; and

- Changing production and flow dynamics, meaning that New South Wales, the Australian Capital Territory, Victoria, South Australia and Tasmania all share shortfall risks, with SA forecasted to be in the constrained supply region.

Natural gas that is contracted for export may need to be supplied to domestic customers from 2026 onwards to meet Australian demand, if domestic supply is not expanded. The volumes of gas exported overseas via Curtis Island in Queensland represent the majority of the gas demand on Australia's East Coast. Operations of these facilities can have a significant impact on meeting domestic demand. Natural gas exporters have excess supply relative to export contracts in 2023 and sufficient production to meet forecast exports until 2027.

Notably, if there is a reduced supply from the NT to the East Coast via the Northern Gas Pipeline, extra supply from natural gas exporters to the domestic market will be necessary, potentially impacting their ability to meet contracted export quantities. However, there may be an economic incentive to export gas rather than supply domestic markets if international markets are more profitable, creating a supply gap.

Although forecasts show a decline in gas consumption, supply is declining faster than forecast demand, leading to supply gaps forecast from 2027 onwards.

7.4 ASX Exploration Sector for Mineral Assets and Oil and Gas

BDO reports on the financial health and cash positions of ASX-listed exploration companies based on the quarterly Appendix 5B reports lodged with the ASX. ASX-listed mining and oil and gas exploration companies are required to lodge an Appendix 5B report each quarter, outlining the company's cash flows, their financing facilities available and management's expectation of future funding requirements. BDO's report for the June quarter of 2023 suggests that following the volatile financial markets experienced in March 2023, there has been an improvement in financial market conditions following a turbulent global macroeconomic environment, favouring in particular gold and battery mineral companies.

Unlike the previous two quarters of subdued operations and investment, the June 2023 quarter showed a reset in investor sentiment, demonstrated by the increase in financing, investments and exploration spending as cash balances remained healthy. This quarter also saw a return in consolidation activity among explorers, particularly in the gold sector, while IPOs focused on critical minerals, comprising lithium and rare-earth minerals.

Interestingly, seven companies were acquired or merged with in the June 2023 quarter, signifying the commencement of a healthy wave of consolidation activity across the sector, particularly within the gold sector, as explorers favour this route over running the gauntlet with current uncertain and volatile capital markets.

Following a decrease of 55% in the amount of funds raised in the previous quarter, financing cash inflows for the June 2023 quarter increased 111% to total \$2.84 billion. Alongside, the average financing inflows per company was up 8.5% to total \$3.65 million, when compared to the two-year average of \$3.36 million. The recent volatility in financing cash flows, as outlined in the chart below, is a consequence of the adverse reaction from capital markets to increasing interest rates since May 2022, in conjunction with an inflationary environment, and global economic uncertainty.

In the June 2023 quarter, 53 companies (which we have termed ‘Fund Finders’) raised capital exceeding A\$10 million, up from 34 in the previous quarter. For the second successive quarter, both gold and lithium secured the top spots on our Fund Finders, underscoring the notion that market sentiment is being both driven by the demand for battery metals, yet tempered by economic volatility. Oil and gas companies which are typically in the top three of our Fund Finder commodities, were seventh in the June 2023 quarter, affirming the recent trends that investors are putting more capital into the renewable energy space.

Financing Cash Flows (\$M)

Explorers’ cash positions increased modestly in the June 2023 quarter, with 82% of exploration companies reporting a cash balance of over A\$1 million, up from 81% in the March 2023 quarter. Notably, this marks a slight reversal of a trend of explorers with cash balances over A\$1 million reducing since the June 2022 quarter. This development is encouraging, especially considering the industry-wide rise in investment and exploration expenditure throughout the quarter, in tandem with the prevailing inflationary environment.

In the June 2023 quarter, total exploration expenditure increased for the first time since the record-billion dollar spend in the September 2022 quarter of A\$1.07 billion. The June 2023 quarter’s A\$914 million exploration spend represented a 10% increase from the March 2023 quarter. The average exploration spend per company rebounded by 12% to A\$1.17 million from the two-year low of A\$1.05 million shown in the March 2023 quarter.

Total Exploration Expenditure - Last Two Years (\$M)

The top ten exploration spending companies comprised four lithium companies, three gold companies, one nickel-copper, graphite, and coal company. Gold and oil and gas typically account for the largest portion of the top 10 exploration spends, however, this quarter, we have also observed growth in exploration spending for lithium that has likely been driven by the sustained demand for renewable energy sources to meet future requirements.

Contradictory macroeconomic signals defined the macroeconomic landscape in the June 2023 quarter. For example, gold topped our Fund Finders for the fourth consecutive quarter, which would potentially serve as an indicator of ongoing economic turbulence, given the recognised safe haven attributes of gold. However, despite the prevailing economic uncertainty, there was a resurgence of capital market support during the same period, largely driven by the demand for battery metals. Nonetheless, the results from the June 2023 quarter suggests that the sector has healthily rebounded from the noticeable industry wide slowdown observed in the preceding two quarters.

8. Implications of the Scheme

8.1 Ownership Structure

If the Scheme is approved and becomes effective:

- Tamboran US HoldCo will acquire the entire issued share capital of Tamboran and become the new parent and holding company for Tamboran Group;
- Scheme Shareholders as at the Record Date (whether or not they voted for or against the Scheme and other than Ineligible Foreign Holders) will receive the Scheme Consideration;
- Scheme Shareholders who hold Tamboran Shares (other than Ineligible Foreign Holders) will receive one Tamboran US HoldCo CDI for every one Tamboran Share held on the Record Date;
- One Tamboran US HoldCo CDI will confer a beneficial interest in 1/200th of a Tamboran US HoldCo Share as part of an implicit Share consolidation of the shares of Tamboran Group, which will not have an impact on the initial interest of the Scheme Shareholder (subject to the Sale facility aspect of the Scheme); and
- Ineligible Foreign Holders will receive a pro rata share of the net proceeds from the sale of all Scheme Consideration sold through the Sale Facility. The net proceeds include a deduction for applicable brokerage, foreign exchange, stamp duty and other selling costs, taxes and charges.

8.2 Board and Senior Management

Following the implementation of the Scheme, the current Directors and Senior Management of Tamboran will continue to remain as the Directors and senior management of Tamboran US HoldCo and by extension, Tamboran Group.

In particular, the board of Directors of Tamboran Group will comprise:

- Mr. Richard Stoneburner - Chairman;
- Mr. Joel Riddle - Managing Director and Chief Executive Officer;
- Mr. Fred Barrett - Non-Executive Director;
- Hon. Andrew Robb AO - Non-Executive Director;
- Mr. John Bell - Non-Executive Director;
- Mr. Patrick Elliott - Non-Executive Director;
- Mr. David Siegel - Non-Executive Director;
- Ms. Stephanie Reed - Non-Executive Director; and
- Mr. Ryan Dalton - Non-Executive Director.

The Senior management of Tamboran Group will comprise:

- Mr. Joel Riddle - Managing Director and Chief Executive Officer;
- Mr. Eric Dyer - Chief Financial Officer; and
- Mr. Faron Thibodeaux - Chief Operating Officer.

The Directors and senior management will receive their current remuneration as Tamboran Directors in Tamboran US HoldCo and will be engaged on substantially similar terms.

8.3 Relisting on ASX and proposed listing on US securities exchange

Following the implementation of the Scheme, Tamboran will become a wholly-owned subsidiary of Tamboran US HoldCo and will be removed from the official list of the ASX. Subject to approval from ASX, Tamboran US HoldCo will then be admitted to the official list of the ASX and Tamboran US HoldCo CDIs will be admitted for official quotation by the ASX.

Therefore, Scheme Shareholders will continue to own an interest in the underlying assets and liabilities of Tamboran Group on the ASX, except that it will be held through Tamboran US HoldCo CDIs traded on the ASX.

In addition, it is presently intended that following the implementation of the Scheme, Tamboran US HoldCo will at some point in the future, pursue a listing of Tamboran US HoldCo Shares on a US securities exchange, such as the New York Stock Exchange ('NYSE').

We note however that this is not a condition of the Scheme and that no applications have been made to date, hence there is no guarantee that this will proceed.

8.4 Legal and regulatory

If the Scheme is approved, Shareholders will no longer hold shares in an Australian company as they will exchange them for a beneficial interest in shares in Tamboran US HoldCo, a company domiciled in the US. Tamboran US HoldCo will therefore be governed by the statutory regime and the laws applicable in the US.

In particular, as a company incorporated in the state of Delaware, Tamboran US HoldCo will be governed by the state's corporate code, the Delaware's General Corporation Law ('DGCL'), which is common for large, public companies in the US.

Furthermore, in the event that the Company is admitted to the official list of a US securities exchange such as the NYSE, its respective listing rules, including rules promulgated by the US Securities and Exchange Commission (the 'SEC'), will apply to Tamboran US HoldCo.

A detailed comparison of Australian and the US legal regime is outlined in Annexure G of the Scheme Booklet.

Whilst some differences in the legal regimes between Australia and the US may be advantageous to Shareholders, some differences will be disadvantageous. However, we broadly consider that the legal environment in the US is generally understood to be more litigious than Australia, and that Tamboran US HoldCo may be more exposed to such litigation risk by being governed as a Delaware US-based corporation.

8.5 Taxation

The Australian income tax consequences for Shareholders of implementing a re-domicile scheme depend on whether shares are held on capital account, on revenue account or as trading stock. A distinguishing feature of shares held on capital account and shares held either on revenue account or as trading stock is the purpose for which they were acquired:

- shares held on revenue account, or as trading stock, are acquired for resale at a profit in the short term; whereas
- shares held on capital account are acquired for the purposes of deriving dividend income and long term appreciation of value.

While it is outside the scope of this Report to comment on or consider the specific taxation consequences as they apply to individual Shareholders, we note the following is a general guide to the Australian taxation implications for Shareholders of the Scheme. These implications are further elaborated in Section 8 of the Scheme Booklet.

The disposal of Tamboran Shares by a Scheme Shareholder who is an Australian resident for tax purposes will trigger a Capital Gains Tax ('CGT') event for Australian tax purposes. There will not, however, be any CGT for those who receive CDIs under the Scheme that qualify and have elected to receive CGT roll-over relief. Ineligible foreign holders who receive cash consideration under the sale facility may have a CGT obligation.

Foreign tax residents that hold their Tamboran Shares on capital account may be subject to Australian CGT on the disposal of their Tamboran Shares as Tamboran Shares and Tamboran US HoldCo CDIs may constitute an indirect real property interest.

Shareholders who hold their shares on revenue account will be subject to income tax on any gains arising from the exchange of Tamboran Shares for Tamboran US HoldCo CDIs. Non-resident Shareholders whose revenue gains are sourced in Australia may be protected by an applicable tax treaty. In addition, if the Commissioner of Taxation considers that the Income Tax Assessment Act 1997 Division 615 rollover applies to the Scheme, then Division 615-45 will provide roll-over relief in respect of CDIs received under the Scheme and held on revenue account.

Furthermore, as Tamboran US HoldCo will not be an Australian resident for tax purposes, Shareholders will receive a beneficial interest in shares in a foreign company, which will have ongoing implications for Shareholders. The impact of these taxation implication will vary for different Shareholders.

The tax implications of the Scheme will affect Shareholders differently subject to their own respective circumstances, and as such, if necessary, Shareholders should seek their own individual tax advice.

8.6 Implementation and subsequent costs

The process of implementing the Scheme has a number of steps and involves numerous one-off transaction costs, which Tamboran Directors estimate to total approximately A\$0.55 million.

We do however note that the majority of these costs have already been incurred, or will be incurred by the date of the meeting to approve the Scheme, regardless of whether the Scheme is approved or not. As a consequence, the quantum of the initial transaction costs of the Scheme is not considered to be material to the decision to be made by Shareholders.

If the Scheme is approved, there will also be additional ongoing operating costs incurred in relation to maintaining a company and share register in the US and adhering to the relevant US laws, DGCL, company bylaws and SEC regulation. Furthermore, in the event that Tamboran US HoldCo is subsequently admitted to the official list of a US securities exchange such as the NYSE, there may be additional regulation and compliance requirements for Tamboran US HoldCo additional to the current listing fees and regulatory fees paid to list its CDIs on the ASX.

9. Do the advantages of the Scheme outweigh the disadvantages?

If the Scheme is approved, there will be no material change in value to Shareholders. Consequently, in order to determine whether the Scheme is in the best interests of Shareholders, we have considered the advantages, disadvantages and other factors that are likely to impact Shareholders.

9.1 Advantages of the Scheme

We have considered the following advantages when assessing the Scheme.

9.1.1. Potential access to new funds

One of the main advantages of the Scheme (and change in domicile of Tamboran Group) is that Tamboran US HoldCo will have direct access to the capital markets of the US.

The Tamboran board believes that the re-domiciliation of Tamboran Group in the US has several benefits including:

- Increased attractiveness of Tamboran Group to a broader North American investor pool, including US investors who cannot invest in non-US securities;
- Increased exposure to the US market that is generally better informed regarding exploration and production companies due to its greater number of market participants and investors;
- Improved access to lower-cost debt and equity capital markets, which are larger and more diverse than Australian capital markets, thus enabling future growth to be financed at a lower cost; and
- In the event of a listing on a US securities exchange, an increased demand for Tamboran US HoldCo shares due to greater familiarity and exposure to the US market, as well as the eligibility for inclusion in US-based stock indices, which further enhances capital market visibility.

The US capital markets are the largest in the world. The change in domicile will give access to a broader investor base, which is likely to result in an increased number of investors on Tamboran Group's share register.

The growing level of US investors on the share register over time may translate into an increased ease in raising capital to fund existing or new projects in the future. Better access to funding is particularly important for the Company and its current objective to fund the development of the Beetaloo Project, which is expected to require a substantial level of initial capital expenditure prior to generating earnings.

We have also considered the current economic environments for Australia and the US, which are detailed further in Section 6 of our Report. Recent banking concerns following the closure of the Silicon Valley Bank in March 2023 have caused volatility in both debt and equity markets worldwide and are expected to influence tighter financial conditions.

Despite this, the RBA considers the Australian banking system to be strong, well capitalised and highly liquid. The US financial system is also said to have remained resilient with Federal Open Market Committee projections showing that real GDP is still expected to grow in the medium term.

We note that the change in domicile of Tamboran Group will not necessarily preclude the Company from continuing to access funding in Australia (given the Beetaloo Project is Australian-based), but instead will provide improved access to new debt and equity markets in the US and internationally.

However, Shareholders should be aware that there is no guarantee that Tamboran US HoldCo would be successful in obtaining the funding required to develop the Beetaloo Project following the implementation of the Scheme.

9.1.2. Favourable financing conditions for oil and gas companies in the US

In addition to accessing new funds in the US, we also consider that the financing conditions for oil and gas companies are comparably more favourable in the US as opposed to Australia.

As outlined in Section 7.4 of our Report, investor focus within the ASX exploration sector has been skewed towards gold and battery metals in recent quarters, with demand for oil and gas equities being relatively subdued compared to historical trends.

Additionally, within debt markets, several large Australian banks have updated their policies relating to funding for fossil fuels and have joined the Net-Zero Banking Alliance ('NZBA'), a United Nations initiative focused on reaching net zero emissions within the banking sector by 2050. We have provided the following examples below.

On 31 May 2023, National Australia Bank's ('NAB') Chief Climate Officer published a statement regarding its goal to achieve net-zero emissions. NAB claimed as a member of the NZBA it is not directly financing any new thermal coal mining projects and has not since 2015. The bank also stated it is not financing expansions of coal-fired power generation facilities or taking on any new thermal coal mining customers. More relevantly, NAB described that it has capped all oil and gas exposures at US\$2.4 billion and placed restrictions on oil and gas financing.

In July 2022, Westpac Banking Corporation ('Westpac') joined the NZBA and in November 2022, it released its fifth Climate Change Position Statement and Action Plan. This plan outlined several emission reduction targets, including that it will only consider directly financing new oil and gas projects that are in accordance with the International Agency Net-Zero by 2050 scenario, or if they are necessary for national energy security. Furthermore, Westpac stated it will not finance oil and gas exploration projects in high-risk frontier basins or shale or deepwater projects.

In August 2023, Commonwealth Bank Australia ('Commbank') announced the alignment of its financing restrictions to the goals of the Paris Agreement and net zero emissions by 2050. The new policy ruled out financing any new and expanded oil and gas projects as well as some oil and gas infrastructure such as pipelines to oil and gas fields. More relevant to Tamboran, Commbank failed to rule out lending to new LNG projects. The bank did state however it will not fund any fossil fuel company from 2025 that does not have an independently verified plan to cut all emissions in line with the Paris Agreement.

In comparison, the US market continues to have a robust appetite for fossil fuels with little evidence to indicate that large banks have cut back on their ability to finance new oil and gas projects. For example, out of the 133 member banks in the NZBA, there are only nine US member banks, compared to five Australian members. As a proportion of the total number of banks in each country, the proportion of representation of US banks in the NZBA is substantially less than Australia.

Furthermore, as outlined in Section 6.2, the US government has a clear focus on developing its clean energy industry and supply chain through recent funding initiatives. Whilst Tamboran Group may not necessarily be eligible for all the funding initiatives discussed in Section 6.2, as majority of them relate to battery production and renewable energy, its focus on producing low reservoir CO₂ natural gas may position itself for future grants amidst the US government's current focus on energy supply.

9.1.3. Dual listing on a US-based stock exchange and ASX provides higher liquidity

Following the implementation of the Scheme, Tamboran will become a wholly-owned subsidiary of Tamboran US HoldCo and will be removed from the official list of the ASX. Subject to approval from ASX, Tamboran US HoldCo will then be admitted to the official list of the ASX and Tamboran US HoldCo CDIs will be admitted for official quotation by the ASX.

In addition, as outlined in Section 6.2 of the Scheme Booklet, it is presently intended following the implementation of the Scheme, that Tamboran US HoldCo will at some point in the future, pursue a listing of Tamboran US HoldCo Shares on a US-based securities exchange, such as the NYSE.

The US capital markets are the most liquid markets in the world. A listing on a US securities exchange should result in higher trading volumes and market liquidity as compared to Australian-based securities exchanges.

Given Tamboran Group will continue to remain listed on the ASX through the quotation of Tamboran US HoldCo CDIs, the change in domicile provides the Company with the added advantage of gaining greater access to the liquidity of a US-based stock exchange while Shareholders continue to retain the ability to trade on the ASX.

Whilst we note that Tamboran Group does not necessarily need to redomicile to the US in order to pursue a listing in the US, we consider that coupling the listing with becoming a US-domiciled company would maximise the opportunity to access funds.

Furthermore, we note that it is possible following a listing on a US securities exchange, that Tamboran US HoldCo will elect for its CDIs to be removed from the official list on the ASX in order to avoid paying duplicate costs associated with a dual listing. However, we consider that in any event, the opportunity to list on a US-based stock exchange is expected to provide Shareholders with higher levels of liquidity and market depth.

9.1.4. Proposed listing on a US-based securities exchange may result in a favourable liquidation event for Shareholders

Following on from Section 9.1.3 above, a new listing or IPO is commonly regarded as a favourable liquidation event for shareholders that invested in a company prior to its listing. This is because a company's valuation is often deemed to be higher when receiving the benefit of an enhanced level of liquidity. As such, a listing or IPO is a common exit strategy for many private equity firms and other institutional investment funds that often realise a positive return on investment upon a successful listing.

As outlined in sections above, the US capital markets are characterised by a greater level of market depth and liquidity, and therefore, a subsequent listing on a US securities exchange may attract a higher valuation for Tamboran US HoldCo shares upon listing and hence generate investment returns for existing Shareholders.

Whilst we note that Tamboran Group does not necessarily need to redomicile to the US in order to pursue a listing in the US, we consider that coupling the listing with becoming a US-domiciled company would maximise the opportunity to access funds.

9.1.5. US domicile can enhance transaction potential

Several of the largest listed natural gas producers in the world are listed on US-based exchanges and, as such, executives and shareholders of those companies would be expected to be more familiar with corporate and governance laws in the US than those in relation to an Australian domiciled company.

We consider that changing to a US domicile coupled with the proposed listing on a US securities exchange would provide Tamboran Group with a more attractive corporate structure for a potential US merger, sale or acquisition in the future, due to the market's familiarity and preference for domestic, US domiciled companies, as well as:

- Simpler tax and structure considerations for any future merger, sale or acquisition, which may lower transaction costs and enable quicker transaction completion; and
- Increased flexibility to execute acquisitions through the ability to provide US-listed scrip (if the proposed listing is successful).

Consequently, this better alignment may make Tamboran Group more attractive as a potential takeover target to US market participants. Additionally, the US market tends to be a platform for greater global visibility as compared to the Australian market, which may attract large strategic acquirers, investors and industry players from other parts of the world such as Europe, the Middle East, Africa and Asia.

Furthermore, upon a successful listing, Tamboran Group may become eligible for inclusion in US-based indices which require a domestic corporate domicile. This will provide Tamboran Group with access to media coverage and a longer tail of US-based funds that are more accessible through a listing in the US.

9.1.6. Better alignment of the corporate structure with key business stakeholders

If the Scheme is implemented, the Company's corporate structure would be better aligned with majority of Tamboran Group's key business stakeholders:

- The majority (75.9%) of Tamboran's institutional investors are located in the US (refer to Section 5.6 of our Report for a more detailed breakdown of institutional shareholders by geographic region);
- The Company's strategic joint venture partner, Daly Waters Energy LP owned by Bryan Sheffield, is domiciled in the US;
- The Company's technical team, credited for designing drilling approaches at the Beetaloo Project, is based in the US; and
- A majority of the Directors and senior management are based in the US (see Section 5.1).

Additionally, US-based employees will be more familiar with the legislative and regulatory requirements in the US and have easier access to legal, accounting, and other resources to comply with regulations. US-based employees are also likely to better understand a US corporate structure, which Tamboran Group's board believes will increase employee attraction and retention through equity-based compensation.

9.1.7. Presence of other global natural gas producers operating within Australia

We note there to be a significant presence of global natural gas producers operating within Australia, despite being domiciled overseas. Examples of such companies include Chevron Corporation, Shell plc and

ConocoPhillips. Following the implementation of the Scheme, Tamboran Group will apply a similar business model to these companies by operating an Australian asset whilst being domiciled in the US.

As outlined in Section 5.2 of our Report, Tamboran's objective is to supply natural gas domestically to Australia's NT and East Coast markets as well as internationally to LNG markets in Asia. We consider that having a US domicile and becoming a multinational corporation, does not limit Tamboran Group's ability to do so, but may instead enhance their position in accessing global markets and networks.

9.2 Disadvantages of the Scheme

We have considered the following disadvantages when assessing the Scheme.

9.2.1. Implementation costs

The implementation of the Scheme involves several one-off transaction costs, including filing fees, advisory fees and registration, which are estimated to be around A\$0.55 million. However, these are largely sunk costs as management expects that the majority of the implementation costs will have been incurred before the Scheme Meeting. As a result, we do not consider transaction costs to be material to Shareholders' decision.

9.2.2. Higher listing and regulatory fees

Following the implementation of the Scheme, if Tamboran successfully lists on a US based securities exchange whilst remaining listed on the ASX, the dual listing will result in increased regulation and compliance fees for Tamboran Group, in addition to the current listing fees and regulatory fees paid to list its CDIs on the ASX.

9.2.3. The trading value of Tamboran US HoldCo CDIs is uncertain after the Implementation Date

Although the Scheme will not change the underlying ownership interests of Shareholders in Tamboran (subject to the Sale Facility aspect of the Scheme), the quoted price of Tamboran US HoldCo CDIs on the ASX, and hence the trading value of the Scheme Consideration, is uncertain after the Implementation Date.

In addition, the Sale Agent will be issued the Tamboran US HoldCo CDIs that would otherwise have been issued to Ineligible Foreign Holders and will sell them as soon as reasonably practicable, but no later than 30 Business Days after the Implementation Date. Although the quantum of these sales is expected to be limited, it is possible that such sales may exert downward pressure on the share price of Tamboran US HoldCo during the applicable period.

9.2.4. Changes to protection of Shareholders under new jurisdiction

On implementation of the Scheme, Shareholders will become holders of Tamboran US HoldCo CDIs as a company incorporated in Delaware in the US. Tamboran US HoldCo will not be subject to the majority of the provisions of the Corporations Act to which Tamboran is currently subject and which may be more familiar to the Shareholders residing in Australia. The rights of Tamboran US HoldCo CDI holders will instead be governed by the laws of the State of Delaware, including the DGCL, US federal securities laws, and Tamboran US HoldCo's certificate of incorporation and by-laws.

Furthermore, in the event that the Tamboran US HoldCo is admitted to the official list of a US securities exchange such as the NYSE, its respective listing rules, including rules promulgated by the SEC, will apply to Tamboran US HoldCo.

The Scheme Shareholders may also have reduced takeover protection under Delaware and US laws, compared to the protection available under Australian law.

Tamboran, as an Australian public company, is subject to the takeover provisions of the Corporations Act, which protect minority shareholders on a change of control or acquisition above 20% and restrict the Tamboran board's ability to take defensive steps that could impact competition for control of the Company. Delaware law provides alternate and, in some respects, reduced protection, which may impact shareholders negatively in certain circumstances.

Shareholders should refer to Annexure G of the Scheme Booklet for further information in relation to the US provisions to which Tamboran US HoldCo will be subject to.

9.2.5. Ineligible Foreign Holders will not receive Tamboran US HoldCo CDIs

The Tamboran US HoldCo CDIs that would otherwise have been issued under the Scheme to Ineligible Foreign Holders will be issued to the Sale Agent appointed by Tamboran US HoldCo to disburse proceeds through the Sale Facility.

Under the Sale Facility, the amount of money to be received by each Ineligible Foreign Holder will be calculated on a pro rata basis using the net proceeds of all such sales after deduction of any applicable brokerage, foreign exchange, stamp duty and other selling costs, taxes and charges.

Consequently, the Ineligible Foreign Holders will no longer hold equivalent securities in Tamboran US HoldCo that they previously held in the Company and will not be able to benefit in any potential future upside that may have resulted from such a holding. They will however be able to deploy the sale proceeds as they see fit (including purchasing Tamboran US HoldCo Shares).

Refer to Section 4.7 of the Scheme Booklet for more information on the Sale Facility.

9.2.6. Exposure to additional litigation risk

Tamboran US HoldCo may be exposed to increased litigation as a Delaware US-based corporation, as the legal environment in the US is generally understood to be more litigious than Australia.

For instance, under Delaware law, derivative action brought by shareholders must be settled or dismissed through a court approval process. Further, shareholders in the US are entitled to commence class action suits to enforce any obligations directly owed to them by a company. Consequently, there is increased risk that a dispute could add litigation costs as well as adversely affect Tamboran US HoldCo's reputation, financial performance, or value. For completeness, we note the gap between the legal environments is closing due to increased class action litigation in Australia in recent years.

9.3 Other considerations

We have also considered the following factors when assessing whether the advantages of the Scheme outweigh the disadvantages.

9.3.1. Impacts on investment portfolios and risk preferences

The Scheme will have potential impacts on the investment portfolios of Shareholders who may have specific preferences with respect to the jurisdiction of their investments. The effect of changing the domicile of Tamboran Group from Australia to the US may mean that Tamboran (and in due course Tamboran US HoldCo) will no longer be an appropriate investment for those Shareholders due to the nature of their individual investment portfolio strategies and risk preferences. Conversely, the change in domicile may attract new investors as Tamboran US HoldCo will become an appropriate investment for investors with a preference for US incorporated equities.

In this regard given all Shareholders are likely to have differing preferences, we note that Shareholders should seek their own individual advice as necessary.

9.3.2. Legal implications for Shareholders

If the Scheme proceeds, Tamboran US HoldCo will be domiciled in Delaware, and will be subject to US laws. There are differences between the laws and regimes in the US and Australia. The differences are detailed in Annexure G of the Scheme Booklet. Whilst some differences may be advantageous to Shareholders, some differences will be disadvantageous.

9.3.3. Franking credits

If the Scheme is implemented, Tamboran US HoldCo will not be an Australian tax resident and hence Australian-based shareholders may not be able to benefit from franking credits going forward as future Company profits are likely to be derived principally from non-Australian sources. However, Scheme Shareholders may be able to obtain a non-refundable tax offset and use it to reduce their tax liabilities in the relevant year (subject to certain conditions).

As outlined in Section 6.11 of the Scheme Booklet, the board of Tamboran has not historically paid dividends to Shareholders. Furthermore, given Tamboran's estimated significant capital expenditure requirements over the next few years in relation to the development of the Project, we consider it unlikely that the Company will pay a dividend until such time that the Beetaloo Project begins generating significant cash inflows. Therefore, we consider that any potential disadvantage to Shareholders due to the lack of franking credits is mitigated as the Company is unlikely to be in a position to pay dividends in the near term.

9.3.4. Tamboran US HoldCo will change reporting standards to US GAAP

As outlined in Section 6.8 of the Scheme Booklet, that the Company currently reports under the International Financial Reporting Standards ('IFRS'). If the Scheme proceeds, the financial reporting regime will initially continue under IFRS until such a time it becomes subject to reporting requirements of the Exchange Act, following which it will report in accordance with US Generally Accepted Accounting Principles ('US GAAP'). The Company's fiscal year end will remain the same as 30 June.

The Directors of Tamboran have considered there to be no material difference in reported results under the different sets of financial statements and that Tamboran Shareholders will continue to understand the content of the accounts in Tamboran US HoldCo.

In addition, if admitted to the official list on a US securities exchange, Tamboran US HoldCo will also be required to prepare annual, quarterly and other reports in US dollars, adopting US GAAP, to lodge with the

SEC. A comparison of financial reporting standards between Australia and the US is detailed in Annexure H of the Scheme Booklet.

We note that the preparation of financial statements under US GAAP will align Tamboran's financial statements with other similar companies reporting in the US.

9.3.5. Foreign exchange implications

We have considered the following foreign exchange implications that are a result of the change in domicile from Australia to the US:

- Tamboran's operating cash flows, assets and liabilities are largely in AUD and this will not change as a result of the change in domicile, however there is some risk that these values will change as a result of future movements between the US and Australian foreign exchange rate (translation risk);
- Corporate costs are largely in AUD and as a result of the change in domicile to the US, corporate costs will largely be in USD; and
- The Company has not entered into any foreign currency swaps or other derivative arrangements for the benefit of Australian shareholders prior to the proposed Scheme and has no intention of doing so in the future.

We also note that future shareholder returns may also be subject to increased foreign exchange risk. The repatriation of future dividends and/or capital gains made by Tamboran US HoldCo, if any, to Australian shareholders will be subject to currency risk, both positive and negative, to future movements between the US and Australian foreign exchange rate. In our view, the Scheme will not result in material foreign exchange implications of the Company or Shareholders.

9.3.6. Exchange Ratio under the Scheme

The Scheme Shareholders will receive one Tamboran US HoldCo CDI for every one Tamboran Share held by that Scheme Shareholder on the Record Date. One Tamboran US HoldCo CDI will confer a beneficial interest in 1/200th of a Tamboran US HoldCo Share. The Exchange Ratio of 200-to-1 effectively consolidating Tamboran's existing Shares as part of the Scheme, and therefore Tamboran US HoldCo will have 1/200th of the number of Shares on issue upon implementation of the Scheme. We do not expect the consolidation to have any material impact on the equity value attributable to all Shareholders in aggregate.

9.3.7. Taxation implications

An overview of the tax implications for Shareholders is set out in Section 8.5 of our Report. Shareholders are also directed to Section 8 of the Scheme Booklet for a more detailed explanation. The tax position of each Shareholder can differ significantly and individual Shareholders are advised to obtain their own tax advice, having regard to their personal circumstances and relevant jurisdiction.

9.3.8. The Scheme may be implemented even if Shareholders do not vote

In the event that the Scheme is approved by the requisite majority of Shareholders and by the Federal Court of Australia and the remaining conditions precedent are satisfied or waived, the Scheme will be implemented, even if individual Shareholders do not vote, or vote against the Scheme.

If this occurs, all Tamboran shares will be transferred to Tamboran US HoldCo, and Shareholders (other than Ineligible Foreign Shareholders) will be entitled to receive one Tamboran US HoldCo CDI for every one Tamboran Share held on the Record Date.

9.3.9. Position of the Shareholders if the Scheme is not approved

In the event that the Scheme is not approved by either the Shareholders or the Federal Court of Australia, we note that Shareholders' position will remain the same and they will retain their existing interest in Tamboran as an Australian-domiciled company. The advantage and disadvantages (as discussed in Sections 9.1 and 9.2 of our Report) of being a company domiciled in the US will not come to fruition.

However, we note that the transaction costs associated with the Scheme of approximately A\$0.55 million, some of which have already been incurred, will be expended by Tamboran, irrespective of whether the Scheme proceeds or not. If the Scheme is implemented, Shareholders will be able to capitalise on the funds already invested by the Company and benefit from the expected advantages of the Scheme.

In addition, it is likely that Tamboran will need to reconsider how it will seek additional funds from both the shareholders who currently have holdings in Tamboran as well as new shareholders from the US to fund their Australian operations. The directors of Tamboran consider that it is important to provide the corporate structure that current investors and potential investors from North America will be more comfortable investing in.

10. Conclusion

It is our view that, on balance and considering Shareholders as a whole, the advantages of the Scheme outweigh its disadvantages. Therefore, in our opinion, the Scheme is in the best interests of Shareholders as a whole, in the absence of an alternative proposal or any further information.

Before forming a view on whether to vote in favour of or against the Scheme, we recommend that Shareholders:

- Have regard to the information set out in the Scheme Booklet and the balance of this Report;

3 Explanatory memorandum

3.1 Introduction

This Explanatory Memorandum has been prepared for the information of Tamboran Shareholders in connection with the business to be conducted at the Scheme Meeting to be held at Cliftons Sydney, Level 13, 60 Margaret Street, Sydney NSW 2000 on Friday, 1 December 2023 at 10:00am (Sydney time).

This Explanatory Memorandum should be read in conjunction with, and forms part of, the accompanying Notice of Scheme Meeting. The purpose of this Explanatory Memorandum is to provide information to Tamboran Shareholders in deciding whether or not to pass the resolution set out in the Notice of Scheme Meeting.

A Proxy Form is located at the end of this Explanatory Memorandum.

3.2 Required voting majority

In order for the Scheme to become effective, the resolution set out in the Notice of Scheme Meeting must be passed at a meeting by:

- (a) unless the Court orders otherwise, a majority in number (more than 50%) of Shareholders present and voting at the Scheme Meeting (whether in person, online or by proxy, attorney or body corporate representative) at the meeting; and
- (b) at least 75% of the votes cast on the resolution,

(the **Requisite Majority**).

The Court has the discretion under section 411(4)(a)(ii)(A) of the Corporations Act to approve the Scheme if it is approved by at least 75% of the votes cast on the resolution but not by a majority in number of Tamboran Shareholders present and voting at the Scheme Meeting.

Voting at the Scheme Meeting will be by poll rather than by a show of hands.

3.3 Court approval

In accordance with section 411(4)(b) of the Corporations Act, the Scheme (with or without alteration or conditions) is subject to approval of the Court. If the resolution proposed at the Scheme Meeting is approved by the Requisite Majority, and the relevant conditions of the Scheme (other than approval by the Court) are satisfied, or waived, by the time required under the Scheme, Tamboran intends to apply to the Court for the necessary orders to give effect to the Scheme.

3.4 Action to be taken by Tamboran Shareholders

Tamboran Shareholders should read the Notice of Scheme Meeting including this Explanatory Memorandum carefully before deciding how to vote on the resolution proposed at the Scheme Meeting.

Annexure F – Summary of CDIs

1 Definitions

Capitalised terms used in this Annexure and not otherwise defined have the same meanings as set out in the Glossary of the Scheme Booklet.

2 Introduction

In order for Tamboran US HoldCo Shares to trade electronically on ASX, Tamboran US HoldCo intends to participate in the electronic transfer system known as CHESS operated by ASX Settlement.

CHESS cannot be used directly for the transfer of securities of companies domiciled in certain foreign jurisdictions, including the United States. To enable companies, such as Tamboran US HoldCo, to have their securities cleared and settled electronically through CHESS, CHESS depositary interests (**CDIs**) are issued on ASX. Accordingly, Tamboran US HoldCo CDIs will be issued under the Scheme to Scheme Shareholders.

Only Tamboran US HoldCo CDIs (not Tamboran US HoldCo Shares) can be traded on ASX.

3 Features of CDIs

3.1 General

CDIs are financial products quoted on ASX that confer the beneficial ownership in the underlying security of a foreign company to the holder. The legal title is held by the Australian depositary. This allows investors to trade interests in foreign securities by trading the relevant CDIs on ASX.

Tamboran US HoldCo will appoint CHESS Depositary Nominees Pty Ltd ACN 071 346 506 (**CDN**) to act as its Australian depositary. CDN is a wholly owned subsidiary company of ASX that was created to fulfil the functions of a depositary nominee.

All Tamboran US HoldCo Shares, including those beneficially held by CDN in connection with the Tamboran US HoldCo CDIs, will rank equally in all respects with all Tamboran US HoldCo Shares. The rights attaching to a Tamboran US HoldCo Share that underlies a Tamboran US HoldCo CDI must be exercised under the direction of CDN.

Except for certain differences noted below, the rights attaching to Tamboran US HoldCo CDIs are economically equivalent to the rights attaching to Tamboran US HoldCo Shares, and Tamboran US HoldCo will generally be required to treat holders of Tamboran US HoldCo CDIs as if they were the holders of the Tamboran US HoldCo Shares represented by those Tamboran US HoldCo CDIs in accordance with the ASX Settlement Rules. This means that economic benefits such as dividends, bonus issues and rights issues will generally flow through to holders of Tamboran US HoldCo CDIs as if they were the registered holders of the underlying Tamboran US HoldCo Shares.

3.2 Number of CDIs issued in relation to Tamboran US HoldCo Shares

Each Tamboran US HoldCo CDI will represent a beneficial interest in 1/200th of a Tamboran US HoldCo Share.

Given the ratio of Tamboran US HoldCo CDIs to Tamboran US HoldCo Shares is not 1:1, and any entitlement will be determined on the basis of Tamboran US HoldCo Shares rather than

Tamboran US HoldCo CDIs, a holder of Tamboran US HoldCo CDIs may not always benefit to the same extent. Tamboran US HoldCo will, however, be required under the ASX Settlement Rules to minimise any such differences where legally permissible. If a cash dividend or any other cash distribution is declared in a currency other than Australian dollars, Tamboran US HoldCo currently intends to convert that dividend or other cash distribution to which a holder of Tamboran US HoldCo CDIs are entitled to Australian dollars and distribute it to the relevant holder of Tamboran US HoldCo CDIs in accordance with their entitlement.

Due to the need to convert dividends from United States dollars to Australian dollars in the above mentioned circumstances, holders of Tamboran US HoldCo CDIs may potentially be advantaged or disadvantaged by exchange rate fluctuations, depending on whether the Australian dollar weakens or strengthens against the United States dollar during the period between the resolution to pay a dividend and conversion into Australian dollars.

3.3 Evidence of ownership

If Tamboran US HoldCo CDIs are issued to a Scheme Shareholder under the Scheme, the Scheme Shareholder will receive a holding statement in respect of their Tamboran US HoldCo CDIs (setting out the number of Tamboran US HoldCo CDIs held and the reference number for the holding), rather than a holding statement or share certificate for the underlying Tamboran US HoldCo Shares. These holding statements will be provided to a holder when a holding is first established and where there is a change in the holdings of Tamboran US HoldCo CDIs. The despatch of holding statements and confirmation advices for Tamboran US HoldCo CDIs issued under the Scheme is expected to occur on the Implementation Date.

Tamboran US HoldCo will operate a register of shares in the United States, and an uncertificated issuer sponsored sub-register of CDIs and an uncertificated CHESS sub-register of CDIs in Australia. A share register is the register of legal title (and Tamboran US HoldCo's share register will reflect either registered legal title, or beneficial ownership, by CDN of the Tamboran US HoldCo Shares underlying the Tamboran US HoldCo CDIs) and the two uncertificated sub-registers combined will make up the register of beneficial title of the Tamboran US HoldCo Shares underlying the Tamboran US HoldCo CDIs.

3.4 Trading on ASX

(a) Cessation of trading in Tamboran Shares on ASX

Trading in Tamboran Shares on ASX is expected to cease from the close of trading on the Effective Date. This will be the last day for trading Tamboran Shares prior to the Scheme becoming Effective.

On a date to be determined by Tamboran US HoldCo, Tamboran will apply for termination of the official listing of Tamboran Shares on ASX.

(b) Trading in Tamboran US HoldCo CDIs on ASX

Trading in Tamboran US HoldCo CDIs on ASX will commence following the listing of Tamboran US HoldCo CDIs on ASX, which is expected to occur on a deferred settlement basis on the trading day after the Effective Date and, after that, on a normal T+2 settlement basis commencing on the Business Day after the Implementation Date (or such other date as ASX requires) following the despatch of holding statements and confirmation advices for Tamboran US HoldCo CDIs issued under the Scheme (expected to occur on the Implementation Date).

Former Tamboran Shareholders trading Tamboran US HoldCo CDIs on a deferred settlement basis and before the issue of holding statements in respect of their Tamboran US HoldCo CDIs, do so at their own risk. The proceeds from sale of securities sold on a deferred settlement basis will not be received until after the deferred settlement period has ended.

(c) **Local and international trading in Tamboran US HoldCo CDIs**

Tamboran US HoldCo CDI Holders who wish to trade their Tamboran US HoldCo CDIs will be transferring the beneficial interest in the underlying Tamboran US HoldCo Shares that the Tamboran US HoldCo CDIs represent, rather than the legal title to those Tamboran US HoldCo Shares. The transfer will be settled electronically by delivery of the relevant Tamboran US HoldCo CDI holding through CHESS. In other respects, trading in Tamboran US HoldCo CDIs is essentially the same as trading in other CHESS approved securities, such as Tamboran Shares.

3.5 Converting from a CDI holding to a direct holding of Tamboran US HoldCo Shares

Tamboran US HoldCo CDI Holders who wish to convert their ASX-listed Tamboran US HoldCo CDIs to Tamboran US HoldCo Shares can do so by instructing Tamboran US HoldCo's Australian share registry either:

- (a) directly in the case of CDIs on the issuer sponsored sub-register operated by Tamboran US HoldCo, CDI holders will be provided with a form entitled "CDI Cancellation: Australia to United States Share Register" for completion and return to the Australian share registry; or
- (b) through their 'sponsoring participant' (usually a broker) in the case of CDIs which are sponsored on the CHESS sub register. In this case, your sponsoring broker will arrange for completion of the relevant form and its return to the Australian share registry. Tamboran US HoldCo's Australian share registry will then arrange for the transfer of Tamboran US HoldCo Shares from CDN to the former CDI holder and issue to the former CDI holder a corresponding share certificate. This will cause Tamboran US HoldCo Shares to be registered in the name of the holder on Tamboran US HoldCo's share register and trading on the ASX will no longer be possible. It is expected that this process will be completed by the next Business Day, provided that Tamboran US HoldCo's Australian share registry is in receipt of a duly completed and valid removal request form. However, no guarantee can be given about the time for this conversion to take place. Tamboran US HoldCo's Australian share registry will not charge an individual security holder a fee for transferring CDI holdings into Tamboran US HoldCo Shares (although a fee will be payable by market participants). A holder of Tamboran US HoldCo Shares will not be able to trade those shares on ASX.

3.6 Converting from a direct holding of Tamboran US HoldCo Shares to a CDI holding

If holders of Tamboran US HoldCo Shares wish to convert their holdings to CDIs, they can do so by contacting Tamboran US HoldCo's US share registry. Tamboran US HoldCo's US share registry will not charge a fee to a shareholder seeking to convert Tamboran US HoldCo Shares to Tamboran US HoldCo CDIs (although a fee will be payable by market participants). In this instance, underlying Tamboran US HoldCo US Shares will be transferred to CDN and a

holding statement for the CDIs will be issued to the relevant security holder. No trading in Tamboran US HoldCo CDIs on ASX can take place until this transfer process is complete.

3.7 Communications from Tamboran US HoldCo

Tamboran US HoldCo will communicate directly with holders of Tamboran US HoldCo CDIs with respect to corporate actions and will send all notices, company announcements and other documents (such as notices of meeting and annual reports) that shareholders are entitled to receive from Tamboran US HoldCo.

3.8 Exercise of shareholder rights

As holders of CDIs are not registered shareholders of Tamboran US HoldCo, the rights attaching to Tamboran US HoldCo Shares which underlie their CDIs must be exercised by CDN as the depositary. A holder of CDIs may instruct the depositary to exercise those rights on their behalf.

In contrast, a registered holder of Tamboran Shares can directly exercise the rights attaching to their Tamboran Shares in such manner as they choose.

3.9 Voting

Tamboran US HoldCo CDIs Holders will be sent notices of general meeting of Tamboran US HoldCo Shareholders. Given that Tamboran US HoldCo CDI Holders are not the registered holders of the Tamboran US HoldCo Shares represented by the Tamboran US HoldCo CDIs they hold, they will not be automatically entitled to vote in person at a general meeting of Tamboran US HoldCo Shareholders.

However, under the Listing Rules, Tamboran US HoldCo (as an issuer of CDIs) must allow Tamboran US HoldCo CDI Holders to attend any meeting of the holders of the underlying securities unless the relevant United States laws at the time of the meeting prevents Tamboran US HoldCo CDI Holders from attending those meetings. Tamboran US HoldCo CDI Holders can then direct CDN to have votes cast in a particular manner on their behalf, or they can require CDN to appoint the holder (or a person nominated by the holder) as proxy to exercise the votes attaching to the Tamboran US HoldCo Shares represented by the holder's Tamboran US HoldCo CDIs, or they can convert their Tamboran US HoldCo CDIs into a holding of Tamboran US HoldCo Shares prior to the record date for the meeting and vote these at the meeting (however, if thereafter the former Tamboran US HoldCo CDI Holder wishes to sell their investment on ASX, it would be necessary to convert Tamboran US HoldCo Shares back to Tamboran US HoldCo CDIs). The conversion must be done prior to the record date for the meeting. CDI voting instruction forms and details of these alternatives will be included in each notice of meeting sent to Tamboran US HoldCo CDI Holders by Tamboran US HoldCo.

3.10 Dividends

Tamboran US HoldCo will distribute any dividend declared on Tamboran US HoldCo Shares directly to holders of Tamboran US HoldCo CDIs. Any dividends will not be franked on the basis that Tamboran US HoldCo is not expected to be an Australian resident for tax purposes.

3.11 Takeovers

Under the ASX Settlement Rules, CDN must not accept a takeover offer in respect of any Tamboran US HoldCo Shares representing Tamboran US HoldCo CDIs unless otherwise

authorised by the Tamboran US HoldCo CDI Holders to accept the offer. CDN must accept a takeover offer in respect of Tamboran US HoldCo Shares represented by a holding of Tamboran US HoldCo CDIs if the relevant holder of Tamboran US HoldCo CDIs instructs it to do so and must notify the entity making the takeover bid of the acceptance.

3.12 Rights on liquidation or winding up

In the event of Tamboran US HoldCo's liquidation, dissolution or winding up, a Tamboran US HoldCo CDI Holder will be entitled to the same economic benefit on their Tamboran US HoldCo CDIs as Tamboran US HoldCo Shareholders.

3.13 Fees

A Tamboran US HoldCo CDI Holder will not incur any additional ASX or ASX Settlement fees or charges as a result of holding CDIs rather than Tamboran US HoldCo Shares.

4 Further information

Further information about CDIs is available from ASX in ASX Guidance Note 5 – CHESS Depositary Interests or the Tamboran Share Registry.

Annexure G – Comparison of Australian and United States legal regimes

Tamboran is incorporated under Australian law and the rights attaching to Tamboran Shares are governed by the laws of Australia and Tamboran's constitution. Tamboran US HoldCo is incorporated under the laws of the State of Delaware, so the rights attaching to Tamboran US HoldCo Shares are governed by the law of the State of Delaware and the United States, and the Tamboran US HoldCo Charter Documents.

If the Scheme becomes Effective, the rights attaching to Tamboran US HoldCo Shares will be primarily governed by the law of the State of Delaware and the United States, the Tamboran US HoldCo Charter Documents, the Listing Rules and certain provisions of the Corporations Act applicable to registered foreign companies. Except for certain differences noted in Annexure F, the rights attaching to Tamboran US HoldCo CDIs are economically equivalent to the rights attaching to Tamboran US HoldCo Shares, and Tamboran US HoldCo will generally be required to treat holders of Tamboran US HoldCo CDIs as if they were the holders of the Tamboran US HoldCo Shares represented by those Tamboran US HoldCo CDIs in accordance with the ASX Settlement Rules.

A comparison of some of the material provisions of the law of Australia, the State of Delaware and the United States as they relate to Tamboran and Tamboran US HoldCo is set out below, along with a description of certain securities laws and stock exchange rules where applicable. A meeting at which a decision is made to wind up a solvent company requires at least 75% of votes cast by the shareholders present and voting.</p> <p>Tamboran's constitution states that if Tamboran is wound up and there is a surplus, the excess must be divided among Tamboran Shareholders in proportion to the Tamboran Shares held by them, irrespective of the amounts paid or credited as paid on the Tamboran Shares. Any amounts unpaid on Tamboran Shares will be treated as property of Tamboran, and the amount of excess that would otherwise be distributed to a holder of a partly paid Tamboran Share will be reduced by the amount unpaid (and, where that amount is a negative amount, the holder must contribute that amount to Tamboran). In respect of the division of property, the liquidator may, with the sanction of a special resolution, divide among the Tamboran Shareholders the whole or any part of the property of Tamboran and determine how the division is to be carried out as between the members or different classes of members.</p>	<p>After shareholders approve the board resolution or the shareholders consent to the dissolution in writing, a certificate of dissolution must be filed with the Delaware Secretary of State's office. Even after the dissolution is effective, the company will continue in existence for a period of three additional years, solely for the purposes of prosecuting and defending lawsuits, settling and closing the business, selling or disposing of property, and discharging liabilities and distributing assets.</p> <p>The board can choose one of two procedures to discharge and distribute assets: under the DGCL, the safe harbor procedures or the default procedures. The DGCL safe harbor procedures provide a mechanism to both provide fair treatment to future claimants and to allow directors to distribute assets on dissolution without fear that future claimants will allege the distribution was made in breach of the directors' duties. Under the safe harbor procedures, a corporation must comply with the notice and security procedures described below for known, contingent, and unknown future claimants. Under the DGCL default procedures, a corporation must adopt a plan of distribution before the expiration of the three-year continuation period. Under this plan of distribution the corporation must:</p> <ul style="list-style-type: none"> • pay or make provision for payment of all known claims (including contingent or unmatured claims); • make provision "that would be reasonably likely to be sufficient" to provide compensation against pending litigation; and • make provision "that would be reasonably likely to be sufficient" for payment of all unknown claims that are likely to arise within ten years of the date of dissolution.
