# Directors' Report

# Directors' Report

For the half year ended 30 September 2023

The Directors of MBL submit their report with the financial report of the Consolidated Entity for the half year ended 30 September 2023.

## Directors

At the date of this report, the Directors of MBL are:

### Independent Directors

G.R. Stevens AC, Chair

J.R. Broadbent AC

P.M. Coffey

M.J. Coleman

M.A. Hinchliffe

S.J. Lloyd-Hurwitz

R.J. McGrath

M. Roche

I.M. Saines

D.J.K. Whiteing

### Executive Voting Directors

S.D. Green, Managing Director and Chief Executive Officer

S.R. Wikramanayake

Other than Ms Lloyd-Hurwitz and Mr Whiteing, the Directors listed above each held office as a Director of MBL throughout the period and until the date of this report.

Ms N.M. Wakefield Evans AM retired from her role as an Independent Director of MBL effective at the conclusion of the Macquarie Group Limited Annual General Meeting held 27 July 2023.

Ms Lloyd-Hurwitz was appointed as an Independent Director effective 28 July 2023 and Mr Whiteing was appointed as an Independent Director effective 27 September 2023.

Those Directors listed as Independent Directors have been independent throughout the period of their appointment.

## Result

The financial report for the half year ended 30 September 2023 and the results herein are prepared in accordance with AASB 134 *Interim Financial Reporting* and the *Corporations Act 2001* (Cth).

The consolidated profit attributable to the ordinary equity holder of Macquarie Bank, in accordance with Australian Accounting Standards, for the period was \$A1,317 million (half year to 31 March 2023: \$A2,630 million; half year to 30 September 2022: \$A1,275 million).

# Operating and financial review

For the half year ended 30 September 2023

## Review of performance and financial position

### Overview

Macquarie Bank's consolidated profit attributable to the ordinary equity holder of \$A1,317 million for the half year ended 30 September 2023 increased 3% from \$A1,275 million in the prior corresponding period<sup>1</sup> and decreased 50% from \$A2,630 million in the prior period.<sup>2</sup>

	HALF YEAR TO			MOVEMENT	
	Sep 23	Mar 23	Sep 22	Mar 23	Sep 22
	\$Am	\$Am	\$Am	%	%
Net operating income	5,577	7,758	5,033	(28)	11
Operating expenses	(3,750)	(4,102)	(3,278)	(9)	14
Income tax expense	(510)	(1,026)	(480)	(50)	6
Profit after income tax	1,317	2,630	1,275	(50)	3
Profit attributable to the ordinary equity holder	1,317	2,630	1,275	(50)	3

<sup>1</sup> Prior corresponding period (pcp) refers to the six months ended 30 September 2022.

<sup>2</sup> Prior period refers to the six months ended 31 March 2023.

# Operating and financial review

For the half year ended 30 September 2023 continued

## Net profit contribution<sup>1</sup> by Operating Group

### Banking and Financial Services (BFS)

# \$A638m

↑ 10% on pcg due to

- higher net interest and trading income mainly driven by growth in the loan portfolio and BFS deposits, and improved average margins from the rising interest rate environment, partially offset by changes in portfolio mix and ongoing lending competition
- higher fee income due to increased administration fees from higher average funds on platform and lending and transaction volumes.

Partially offset by:

- higher credit impairment charges driven by portfolio growth
- higher expenses driven by increased headcount and technology investment to support business growth and regulatory requirements, as well as inflationary pressure.

### Commodities and Global Markets (CGM)

# \$A1,368m

↓ 28% on pcg due to

- decreased risk management revenue across the platform, particularly from Resources, and EMEA Gas, Power and Emissions due to decreased client hedging and trading activity as volatility and price movements stabilised across commodity markets following record highs in the prior corresponding period, partially offset by an increased contribution across Agricultural markets
- higher operating expenses driven by higher employment, technology platform and infrastructure, compliance and regulatory management spend, and the impact of unfavourable foreign exchange movements.

Partially offset by:

- higher fee and commission income due to increased activity in futures and risk premia products.

### Corporate

# Net expenses of \$A689m

↓ 43% on pcg due to

- increased net interest and trading income, primarily driven by an increase in earnings on capital which reflects higher central bank interest rates, and the deployment of the Banking Group's previously elevated centrally held liquidity and funding surpluses by the Operating Groups, as well as accounting volatility from changes in the fair value of economic hedges
- increase in fee and commission income, reflecting the recovery from the Non-Bank of a higher Central Service Group's cost base driven by a higher average headcount
- lower profit share expense driven by the performance of the Consolidated Entity.

<sup>1</sup> Net profit contribution is management accounting profit before unallocated corporate items, profit share and income tax.

## Net operating income

Net operating income of \$A5,577 million for the half year ended 30 September 2023 increased 11% from \$A5,033 million in the prior corresponding period mainly driven by higher net interest and trading income, fee and commission income and net other operating income, and lower credit and other impairment charges.

### Net interest and trading income

HALF YEAR TO			↑ <b>6%</b> on pcg
30 Sep 23	31 Mar 23	30 Sep 22	
\$Am	\$Am	\$Am	
<b>3,999</b>	6,190	3,758	

This movement was largely driven by:

- growth in the loan portfolio and BFS deposits, and improved average margins from the rising interest rate environment, partially offset by changes in portfolio mix and ongoing lending competition in BFS
- higher earnings on capital reflecting higher central bank rates.

Partially offset by:

- lower risk management revenue on a strong prior corresponding period, primarily in Resources and EMEA Gas, Power and Emissions, partially offset by an increased contribution across Agricultural markets in CGM.

### Fee and commission income

HALF YEAR TO			↑ <b>15%</b> on pcg
30 Sep 23	31 Mar 23	30 Sep 22	
\$Am	\$Am	\$Am	
<b>1,308</b>	1,256	1,140	

This movement was largely driven by:

- increased fees received from the Non-Bank for services provided by the Central Services Group reflecting a higher underlying Central Services Group cost base
- higher fee and commission income due to increased activity in futures and risk premia products in CGM
- higher fee income due to increased administration fees from growth in average funds on platform and higher lending and transaction volumes.

### Credit and other impairment charges

HALF YEAR TO			↓ <b>90%</b> on pcg
30 Sep 23	31 Mar 23	30 Sep 22	
\$Am	\$Am	\$Am	
<b>(7)</b>	(47)	(67)	

This movement was largely driven by:

- release of credit provisions reflecting normalisation in sector and counterparty exposures as certain commodity prices normalised in CGM.

Partially offset by:

- increase in specific provisions on a small number of underperforming positions
- portfolio growth in BFS.

### Net other operating income

HALF YEAR TO			↑ <b>37%</b> on pcg
30 Sep 23	31 Mar 23	30 Sep 22	
\$Am	\$Am	\$Am	
<b>277</b>	359	202	

This movement was largely driven by:

- higher operating lease income due to increased volumes in the technology sector and the impact of favourable exchange movements in CGM.

# Operating and financial review

For the half year ended 30 September 2023 continued

## Operating expenses

Total operating expenses of \$A3,750 million for the half year ended 30 September 2023 increased 14% from \$A3,278 million in the prior corresponding period with increases across all expense categories.

### Employment expenses

HALF YEAR TO			↑ <b>15%</b> on pcp
30 Sep 23	31 Mar 23	30 Sep 22	
\$Am	\$Am	\$Am	
2,488	2,594	2,164	

This movement was largely driven by:

- higher salary and related expenses from higher average headcount and wage inflation
- higher share-based payments driven by prior years' performance of the Consolidated Entity
- unfavourable foreign exchange movements.

Partially offset by:

- lower profit share expense mainly as a result of the performance of the Consolidated Entity.

### Brokerage, commission and fee expenses

HALF YEAR TO			↑ <b>14%</b> on pcp
30 Sep 23	31 Mar 23	30 Sep 22	
\$Am	\$Am	\$Am	
278	276	244	

This movement was largely driven by:

- increased trading and brokerage activities in CGM.

### Non-salary technology expenses

HALF YEAR TO			↑ <b>8%</b> on pcp
30 Sep 23	31 Mar 23	30 Sep 22	
\$Am	\$Am	\$Am	
475	450	440	

This movement was largely driven by:

- increased investment in technology initiatives, with a focus on data and digitalisation to support business activity and compliance
- unfavourable foreign exchange movements.

### Other operating expenses

HALF YEAR TO			↑ <b>18%</b> on pcp
30 Sep 23	31 Mar 23	30 Sep 22	
\$Am	\$Am	\$Am	
509	782	430	

This movement was largely driven by:

- higher occupancy costs and higher indirect and other tax expenses.

## Income tax expense

Income tax expense of \$A510 million for the half year ended 30 September 2023 increased 6% from \$A480 million in the prior corresponding period. The effective tax rate for the half year ended 30 September 2023 was 27.9%, up from 27.4% in the prior corresponding period and down from 28.1% in the prior period.

The higher effective tax rate compared to the prior corresponding period was mainly driven by the geographic composition and nature of earnings.

## Statement of financial position

The Consolidated Entity's Statement of financial position was impacted during the half year ended 30 September 2023 by changes resulting from a combination of business activities, Group Treasury management initiatives and macroeconomic factors.

Total assets			<div>↑2%</div> <div>on 31 Mar 23</div>
AS AT			
30 Sep 23	31 Mar 23		
\$Am	\$Am		
336,970	330,823		
Total assets of \$A337.0 billion as at 30 September 2023 increased 2% from \$A330.8 billion as at 31 March 2023.			
The principal drivers for the increase were as follows:			
<ul style="list-style-type: none"><li>cash collateralised lending and reverse repurchase agreements of \$A57.8 billion as at 30 September 2023 increased 34% from \$A43.2 billion as at 31 March 2023, driven by an increase in holdings of reverse repurchase agreements as part of Group Treasury’s liquidity portfolio</li><li>loan assets of \$A149.5 billion as at 30 September 2023 increased 5% from \$A141.8 billion as at 31 March 2023, driven by loan volume growth in BFS home loans and business lending portfolios</li><li>trading assets of \$A19.2 billion as at 30 September 2023 increased 22% from \$A15.8 billion as at 31 March 2023, driven by an increase in holdings of listed equity securities in CGM</li><li>held for sale and other assets of \$A9.1 billion as at 30 September 2023 increased 45% from \$A6.3 billion as at 31 March 2023, driven by higher commodity-related receivables from increased volumes in CGM.</li></ul>			
These increases are partially offset by:			
<ul style="list-style-type: none"><li>cash and bank balances of \$A25.5 billion as at 30 September 2023 decreased 39% from \$A41.6 billion as at 31 March 2023, driven by a reduction in the overnight deposit held with the Reserve Bank of Australia (RBA) as part of Group Treasury’s liquidity portfolio</li><li>derivative assets of \$A28.9 billion as at 30 September 2023 decreased 19% from \$A35.8 billion as at 31 March 2023, driven by stability in price movements, demand and reduced levels of volatility in commodity markets, as well as maturity of prior period positions. After taking into account related financial instruments, cash and other financial collateral, the residual derivative asset exposure was \$A7.3 billion (31 March 2023: \$A9.6 billion). The majority of the residual derivative asset exposure is short-term in nature and managed within the Consolidated Entity’s market and credit risk frameworks, with a substantial portion of the exposure with investment grade counterparties.</li></ul>			

Total liabilities			<div>↑2%</div> <div>on 31 Mar 23</div>
AS AT			
30 Sep 23	31 Mar 23		
\$Am	\$Am		
316,814	310,471		
Total liabilities of \$A316.8 billion as at 30 September 2023 increased 2% from \$A310.5 billion as at 31 March 2023.			
The principal drivers for the increase were as follows:			
<ul style="list-style-type: none"><li>issued debt securities and other borrowings of \$A74.0 billion as at 30 September 2023 increased 12% from \$A66.1 billion as at 31 March 2023, driven by the issuance of short-term commercial paper and certificates of deposit by Group Treasury and unfavourable foreign exchange movements</li><li>trading liabilities of \$A8.1 billion as at 30 September 2023 increased 69% from \$A4.8 billion as at 31 March 2023, driven by an increase in short listed equity securities positions in CGM</li><li>deposits of \$A135.9 billion as at 30 September 2023 increased 1% from \$A134.6 billion as at 31 March 2023, driven by volume growth in retail and business banking deposits in BFS</li><li>held for sale and other liabilities of \$A9.8 billion as at 30 September 2023 increased 29% from \$A7.6 billion as at 31 March 2023, driven by higher commodity-related payables from increased volumes in CGM.</li></ul>			
These increases are partially offset by:			
<ul style="list-style-type: none"><li>cash collateralised borrowing and repurchase agreements of \$A13.5 billion as at 30 September 2023 decreased 28% from \$A18.7 billion driven by a reduction in trading activity in CGM and partial maturity of the RBA Term-Funding Facility</li><li>derivative liabilities of \$A29.3 billion as at 30 September 2023 decreased 10% from \$A32.5 billion as at 31 March 2023, commensurate with the movement in derivative assets. After taking into account related financial instruments, cash and other financial collateral, the residual derivative liability was \$A7.1 billion (31 March 2023: \$A6.5 billion).</li></ul>			

Total equity			<div>↓1%</div> <div>on 31 Mar 23</div>
AS AT			
30 Sep 23	31 Mar 23		
\$Am	\$Am		
20,156	20,352		
Total equity of \$A20.2 billion as at 30 September 2023 decreased 1% from \$A20.4 billion as at 31 March 2023.			
The decrease in the Consolidated Entity’s equity is on account of \$A1.7 billion dividend payments, partially offset by \$A1.3 billion of earnings generated during the current period and a \$A0.2 billion increase in foreign currency translation reserve largely driven by appreciation of the US Dollar to Australian Dollar.			

Notice to readers: The percentage movements on this page have been calculated based on balances to the nearest million from the Consolidated statement of financial position in the Financial Report. Therefore, the percentage movement may round differently if calculated based off the balances on this page which are presented to the nearest billion.

# Operating and financial review

For the half year ended 30 September 2023 continued

## Funding

Macquarie Bank's liquidity risk management framework is designed to ensure that it is able to meet its obligations as they fall due under a range of market conditions.

Macquarie Bank has diversity of funding across a range of tenors, currencies and products. The weighted average term to maturity of term funding maturing beyond one year (excluding equity and securitisations) was 3.2 years as at 30 September 2023.

**3.2**  
years

Weighted  
average  
maturity

## Term funding profile

Detail of drawn funding maturing beyond one year

\$A billion

Macquarie Bank has a liability driven approach to balance sheet management, where funding is raised prior to assets being taken on to the balance sheet. Since 1 April 2023, Macquarie Bank has continued to raise term wholesale funding across various products and currencies.

Details of term funding raised between 1 April 2023 and 30 September 2023:

		Total \$Ab
Issued paper	- Senior and subordinated	3.5
Secured funding	- Term securitisation and other secured finance	2.8
Loan facilities	- Unsecured loan facilities	0.3
<b>Total<sup>1</sup></b>		<b>6.6</b>

Macquarie Bank has continued to develop its major funding markets and products during the half year ended 30 September 2023.

<sup>1</sup> Issuances cover a range of tenors, currencies and product types and are Australian dollar equivalent based on FX rates at the time of issuance. Includes refinancing of loan facilities.

## Capital

The minimum Common Equity Tier 1 capital ratio (CET1) in accordance with Prudential Standard APS 110 Capital Adequacy is 9%. This includes the industry minimum CET1 requirement of 4.5%, capital conservation buffer (CCB) of 3.75% and a countercyclical capital buffer (CCyB)<sup>1</sup> of 0.75%. The corresponding requirement for Tier 1 capital is 10.5%, inclusive of the CCB and CCyB<sup>1</sup>. APRA also requires ADIs to maintain a minimum leverage ratio of 3.5%. In addition, APRA may impose ADI-specific minimum ratios which may be higher than these levels.

Macquarie Bank is well capitalised, with the following capital adequacy ratios as at 30 September 2023.

Bank Group Level 2 Basel III ratios	APRA Basel III	Harmonised Basel III <sup>2</sup>
Common Equity Tier 1 Capital Ratio	13.2%	18.0%
Tier 1 Capital Ratio	15.2%	20.3%
Leverage Ratio	5.0%	5.6%

For more details on the financial performance of the Operating Groups, see section 3.0 Segment analysis of the management Discussion and Analysis available at [macquarie.com/results](https://macquarie.com/results)

<sup>1</sup>The CCyB of the Bank Group at Sep-23 is 0.71%, this is rounded to 0.75% for presentation purposes. The individual CCyB varies by jurisdiction and the Bank Group CCyB is calculated as a weighted average based on exposures in different jurisdictions at period end.

<sup>2</sup>Harmonised Basel III estimates are calculated in accordance with the updated BCBS Basel III framework, noting that MBL is not regulated by the BCBS therefore the ratios are indicative only.

# Operating and financial review

Our strategy

## Our Purpose

Empowering people to innovate and invest for a better future.

### What we stand for

#### Opportunity

#### Accountability

#### Integrity

The way we fulfil our purpose is defined by these three long-held principles that determine how we conduct business and guide what we do every day. Our purpose and principles and what we expect of our staff are set out in our *Code of Conduct*.

The balance between opportunity and accountability, while operating with integrity within a strong risk management framework, is a feature of Macquarie Bank's success and a key factor in our long record of unbroken profitability.

The Code of Conduct is available at [macquarie.com/what-we-stand-for](https://www.macquarie.com/what-we-stand-for)

## Our business strategy

Consistent with the principles of *What We Stand For*, Macquarie's business strategy is focused on the medium-term with the following key aspects:

---

### Risk management approach

Adopting a conservative approach to risk management underpinned by a sound risk culture. Macquarie Bank's robust risk management framework and risk culture are embedded across all Bank Group entities.

Macquarie's risk management framework, material risks and approach to managing these risks are outlined in Macquarie Bank Limited's Annual Report for the year ended 31 March 2023.

---

### Strong balance sheet

Maintaining a strong and conservative balance sheet.

This is consistent with Macquarie Bank's longstanding policy of holding a level of capital which supports its business and managing its capital base ahead of ordinary business requirements.

Macquarie Bank has a liability driven approach to balance sheet management, where funding is raised prior to assets being taken on to the balance sheet.

We continue to pursue the strategy of diversifying funding sources by growing Macquarie Bank's deposit base and accessing wholesale funding across a variety of products and markets.

---

### Business mix

Conducting a mix of annuity-style and markets-facing businesses that deliver consistent returns in a range of market conditions.

---

### Diversification

Operating a diversified set of businesses across different locations and service offerings: asset finance, lending, banking, and risk and capital solutions across debt, equity and commodities.

Macquarie Bank offers a range of services to government, institutional, corporate and retail clients. This diversity in services and clients mitigates concentration risk and provides resilience to Macquarie Bank.

---

### Proven expertise

Utilising proven deep expertise has allowed Macquarie Bank to establish leading market positions as a global specialist in sectors including resources, commodities and energy.

---

### Adjacencies

Expanding progressively by pursuing adjacencies through organic opportunities and selective acquisitions.

These include products and geographies adjacent to our established areas of expertise, supporting sustainable evolutionary growth.

---

### Pursuit of growth opportunities

Targeting continued evolution and growth through innovation. We start with knowledge and skill, and we encourage ingenuity and entrepreneurial spirit coupled with accountability.

Ideas for new businesses are typically generated in the Operating Groups. Additionally, there are no specific businesses, markets or regions in which our strategy dictates that we operate. This means we retain operational flexibility and can adapt the portfolio mix to changing market conditions within the boundaries of the Risk Appetite Statement (RAS) approved by the Board.

## Events after the reporting date

There were no material events subsequent to 30 September 2023 and up until the authorisation of the financial statements for issue, requiring a disclosure in the interim financial report, other than those that have been disclosed elsewhere in the financial statements.

## Interim dividend

On 30 June 2023 and 29 September 2023, the Company paid a dividend of \$A1,119 million and \$A623 million respectively.

No other dividends or distributions were declared or paid during the current period.

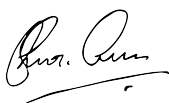

## Rounding of amounts

In accordance with ASIC Corporations (Rounding in Financial/ Directors' Reports) Instrument 2016/191, amounts in the Directors' Report and the Interim Financial Report have been rounded off to the nearest million dollars unless otherwise indicated.

This report is made in accordance with a resolution of the Directors.

## Auditor's independence declaration

For the half year ended 30 September 2023

As lead auditor for the review of Macquarie Bank Limited for the half year ended 30 September 2023, I declare that to the best of my knowledge and belief, there have been:

- (a) no contraventions of the auditor independence requirements of the *Corporations Act 2001* (Cth) in relation to the review; and
- (b) no contraventions of any applicable code of professional conduct in relation to the review.

This declaration is in respect of Macquarie Bank Limited and the entities it controlled during the period.

# Notes to the consolidated financial statements

For the half year ended 30 September 2023

## Note 1

### Basis of preparation

This general purpose interim financial report for the half year reporting period ended 30 September 2023 has been prepared in accordance with Australian Accounting Standard AASB 134 *Interim Financial Reporting* (AASB 134) and the *Corporations Act 2001* (Cth). Compliance with AASB 134 ensures compliance with International Accounting Standard IAS 34 *Interim Financial Reporting* as issued by the International Accounting Standards Board (IASB).

This interim financial report comprises the consolidated financial report of Macquarie Bank Limited (MBL or the Company) and the entities it controlled at the end of, or during the half year ended 30 September 2023 (the Consolidated Entity).

This interim financial report does not include all the disclosures of the type that are normally included in the Consolidated Entity's annual financial report. Accordingly, this report is to be read in conjunction with the Consolidated Entity's annual financial report for the year ended 31 March 2023 and any public announcements made by the Consolidated Entity during the reporting period in accordance with the continuous disclosure requirements issued by the Australian Securities Exchange (ASX).

In accordance with ASIC Corporations (*Rounding in Financial/ Directors' Reports*) Instrument 2016/191, amounts in the Directors' Report and the interim financial report have been rounded to the nearest million Australian dollars (\$) unless otherwise indicated.

The accounting policies adopted in the preparation of the interim financial report are consistent with those adopted and disclosed in the Consolidated Entity's annual financial report for the year ended 31 March 2023.

### (i) Critical accounting estimates and significant judgements

The preparation of this interim financial report in conformity with Australian Accounting Standards requires the use of certain critical accounting estimates. It also requires management to exercise judgement in the process of applying the Consolidated Entity's accounting policies.

Areas of estimation uncertainty and the basis of key judgements applied by management in preparing the interim financial report are consistent with those that were applied and disclosed in the Consolidated Entity's annual financial report for the year ended 31 March 2023.

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including reasonable expectations of future events. Consistent with the previous reporting period, an increased level of estimation uncertainty was involved in the preparation of the interim financial report arising from the changing economic environment and market conditions, including the impact of rising interest rates and the current inflationary environment.

Management believes that the estimates and judgements used in preparing the interim financial report, which reflect the aforementioned factors, are reasonable. It is however reasonably possible that future outcomes that are different from the Consolidated Entity's assumptions and estimates at 30 September 2023, other than adjusting events that provide evidence of conditions that existed at the end of the reporting period, could require an adjustment to the carrying amounts of the reported assets and liabilities in future reporting periods.

### (ii) New Australian Accounting Standards and amendments to Australian Accounting Standards and interpretations that are effective in the current period

#### (a) AASB 17 *Insurance Contracts* (AASB 17)

AASB 17 amends the accounting for insurance contracts and replaces AASB 4 *Insurance Contracts*, AASB 1023 *General Insurance Contracts* and AASB 1038 *Life Insurance Contracts*. The adoption of AASB 17, mandatorily effective for the Consolidated Entity's interim financial reporting period beginning on 1 April 2023, did not have a material impact on this interim financial report.

#### (b) AASB 2023-2 *Amendments to Australian Accounting Standards – International Tax Reform – Pillar Two Model Rules* (AASB 2023-2)

The Pillar Two Model Rules are part of the Organisation of Economic Co-operation and Development's inclusive framework designed to address the tax challenges arising from the digitalisation of the economy. The Pillar Two model rules:

- aim to ensure that large multinational groups pay a minimum amount of tax on income arising in each jurisdiction in which they operate; and
- would achieve that aim by applying a system of top-up taxes that results in the total amount of taxes payable on profit in each jurisdiction representing at least the minimum rate of 15%.

### The Consolidated Entity's Pillar Two Project

During 2022, the Consolidated Entity initiated a project to manage the impact of the Pillar Two rules globally. The project's scope is to ensure the Consolidated Entity and its subsidiaries can meet their Pillar Two compliance obligations.

As part of the project, the Consolidated Entity is monitoring the progress of the implementation of the model rules into domestic legislation and certain jurisdictions in which the Entity has operations have started to enact the rules generally with operational effect for accounting periods beginning on or after 1 January 2024.

### Impacts on financial reporting

In June 2023, the AASB issued AASB 2023-2 which makes amendments to AASB 112 *Income Taxes* with immediate effect. The standard provides a mandatory temporary exception to accounting for deferred taxes arising from the implementation of the Pillar Two model rules published by the Organisation for Economic Co-operation and Development. The Consolidated Entity has applied this exception in preparing its interim financial report.

## Note 1

### Basis of preparation continued

#### (c) Other amendments made to existing standards

The amendments made to existing standards that were mandatorily effective for the annual reporting period beginning on 1 April 2023 did not result in a material impact on this interim financial report.

#### (iii) Other developments

##### (a) ISSB sustainability reporting standards

During the period, the International Sustainability Standards Board (ISSB) published the following sustainability reporting standards:

- IFRS S1 *General Requirements of Sustainability-related Financial Information* (IFRS S1), which sets out the overall requirements for sustainability-related financial disclosures, and
- IFRS S2 *Climate-related Disclosures* (IFRS S2), which will require the disclosure of information that enables the users of financial statements to understand the reporting entity's governance, strategy, risk management, and metrics and targets in relation to climate-related risks and opportunities.

The Australian-equivalent standards have not yet been issued. Notwithstanding, the Consolidated Entity acknowledges the growing importance of sustainability-related disclosures and continues to progress its established project to assess and prepare for future sustainability and climate-related reporting obligations.

##### (b) IBOR reform: Transition from inter-bank offered rates (IBOR) to alternative reference rates (ARRs)

IBOR interest rate benchmarks that are used in a wide variety of financial instruments (such as derivatives and lending arrangements) are undergoing reform. The nature of such reforms varies by benchmark and jurisdiction.

IBOR including the GBP, JPY, EUR, CHF and USD London Inter-bank Offered Rate ('LIBOR'), as well as IBOR for certain other minor currencies (excepting the Canadian Dollar Offer Rate (CDOR)), have ceased publication. The Consolidated Entity's IBOR reform project oversaw the transition of such exposures and the Consolidated Entity ceased the use of LIBOR in new products in accordance with industry and regulatory guidance.

The Consolidated Entity continues to have certain exposures referencing CDOR which will cease publication on 28 June 2024.

Similar to the transition of ceased LIBORs, the transition approach for CDOR will vary by product and nature of the counterparty.

Whilst IBOR reforms are important changes for the Consolidated Entity, the risks associated with the transition are managed within the Consolidated Entity's existing risk management framework. The Consolidated Entity's exposure to IBOR transition risk has not materially changed during the period to 30 September 2023, with the exception of exposures to USD LIBOR. Materially all USD LIBOR exposures of the Consolidated Entity have transitioned to ARRs.

#### (iv) Comparatives

Where necessary, comparative information has been re-presented to conform to changes in presentation in the current period.

## Note 3

### Segment reporting

#### (i) Operating segments

AASB 8 *Operating Segments* requires the 'management approach' to disclosing information about the Consolidated Entity's reportable segments. The financial information is reported on the same basis as used internally by Senior Management for evaluating Operating Segment performance and for deciding how to allocate resources to Operating Segments. Such information may be produced using different measures to that used in preparing the statutory income statement.

For internal reporting, performance measurement and risk management purposes, the Consolidated Entity is divided into Operating Groups and a Corporate segment (reportable segments).

The financial information disclosed relates to the Consolidated Entity's ordinary activities.

These segments have been set up based on the different core products and services offered. The Operating Groups comprise of:

- **BFS** which provides a diverse range of personal banking, wealth management, and business banking products and services to retail clients, advisers, brokers and business clients.
- **CGM** which is a global business offering capital and financing, risk management, market access, physical execution and logistics solutions to its diverse client base across Commodities, Financial Markets and Asset Finance.

The Corporate segment, which is not considered an Operating Group, comprises head office and Central Service Groups, and holds certain legacy and strategic investments, assets and businesses that are not allocated to any of the Operating Groups. Any individually immaterial balance not attributable to an Operating Segment is also reported as part of the Corporate segment.

Items of income and expense within the Corporate segment include the net result of managing Macquarie Bank's liquidity and funding requirements, earnings on capital and the residual accounting volatility relating to economically hedged positions where hedge accounting is applied, as well as accounting volatility for other economically hedged positions where hedge accounting is not applicable.

Other items of income and expenses within the Corporate segment include earnings from investments, changes in central overlays to impairments or valuation of assets, provisions for legacy matters, unallocated head office costs and costs of Central Service Groups, the Consolidated Entity's performance-related profit share and share-based payments expense and income tax expense.

Below is a selection of key policies applied in determining the Operating Segment results.

#### Internal funding arrangements

Group Treasury has the responsibility for managing wholesale funding for the Consolidated Entity, and Operating Groups obtain their required funding from Group Treasury. The Operating Groups are assumed to be fully debt funded for the purposes of internal funding charges. The interest rates charged by Group Treasury are determined by the currency and term of the funding. Break costs may be charged to Operating Groups for the early repayment of term funding.

Generally, with the exception of deposit funding, Operating Groups may only source funding directly from external sources where the funding is secured by the Operating Group's assets. In such cases, Operating Groups bear the funding costs directly and Group Treasury may levy additional charges where appropriate.

#### Transactions between Operating Segments

Operating Segments that enter into arrangements with other Operating Segments must do so on commercial terms or as agreed by the Consolidated Entity's Chief Executive Officer or Chief Financial Officer.

Internal transactions are recognised in each of the relevant categories of income and expense and eliminated on consolidation as appropriate.

#### Accounting for derivatives that economically hedge interest rate risk

With respect to businesses that predominantly earn income from lending activities, derivatives that hedge interest rate risk are measured at fair value through profit or loss (FVTPL). Changes in fair value are presented in net trading income and give rise to income statement volatility unless designated in hedge accounting relationships, in which case the carrying value of the hedged items are adjusted for changes in fair value attributable to the hedged risks to reduce volatility in the income statement. If designated in cash flow hedge accounting relationships, the effective portion of the derivatives' fair value gains or losses are deferred in the cash flow hedge reserve as part of Other Comprehensive Income (OCI), and subsequently recognised in the income statement at the time at which the hedged items affect the income statement for the hedged risks. For segment reporting, derivatives are accounted for on an accrual basis in the results of the Operating Groups to the extent that the Corporate segment manages the derivative volatility, either through the application of hedge accounting or where the derivative volatility may offset the volatility of other positions managed within the Corporate segment.

# Notes to the consolidated financial statements

For the half year ended 30 September 2023 *continued*

## Note 3

### Segment reporting *continued*

#### (i) Operating segments *continued*

##### Central Service Groups

The Central Service Groups provide a range of functions supporting MGL's Operating Groups, ensuring they have the appropriate workplace support and systems to operate effectively and the necessary resources to meet their regulatory, compliance, financial, legal and risk management requirements.

Central Service Groups recover their costs from Operating Groups generally on either a time and effort allocation basis or a fee for service basis. Central Service Groups include the Corporate Operations Group (COG), Financial Management Group (FMG), Risk Management Group (RMG), Legal and Governance Group (LGG) and Central Executive.

##### Performance-related profit share and share-based payments expense

Performance-related profit share and share-based payments expense relating to the Macquarie Group Employee Retained Equity Plan (MEREP) are recognised in the Corporate segment and not allocated to Operating Groups.

##### Income tax

Income tax expense and benefits are recognised in the Corporate segment and are not allocated to the Operating Groups. However, to recognise an Operating Group's contribution to permanent income tax differences, the internal management revenue/charge category is used.

This internal management revenue/charge category, which is primarily used for permanent income tax differences generated by the Operating Groups, is offset by an equal and opposite amount recognised in the Corporate segment such that they are eliminated on consolidation.

##### Presentation of segment income statements

The income statements on the following pages for each of the reported segments are in some cases summarised by grouping non-material balances together. Where appropriate, all material or key balances have been reported separately to provide users with information relevant to the understanding of the Consolidated Entity's financial performance. The financial information disclosed relates to the Consolidated Entity's ordinary activities.

##### Reportable segment assets

Segment assets are the external operating assets that are employed by a segment in its operating activities.

## Note 8

### Derivative assets

Held for trading	27,820	34,759	110,043
Designated in hedge relationships	1,089	1,061	1,466
<b>Total derivative assets</b>	<b>28,909</b>	<b>35,820</b>	<b>111,509</b>

Derivative instruments include futures, forwards and forward rate agreements, swaps and options in the interest rate, foreign exchange, commodity, credit and equity markets. These are entered into by the Consolidated Entity for client trading purposes and for hedging risks inherent in other recognised financial instruments as well as forecasted transactions.

The Consolidated Entity's approach to financial risk management, as set out in its financial statements for the year ended 31 March 2023 in Note 33 *Financial risk management*, remained unchanged during the period. This included entering into margining and collateralisation arrangements and enforceable netting arrangements with counterparties, particularly in respect of derivatives. The enforceable netting arrangements may allow for net settlement of specified contracts with a counterparty in the event of default or other pre-determined events, such that their potential effects on the Consolidated Entity's financial position in that circumstance is to settle these contracts as one arrangement.

These derivative balances are presented in the statement of financial position after offsetting balances where the Consolidated Entity has both a legally enforceable right to set off and the intention to settle on a net basis. After taking into account related financial instruments (primarily derivative liabilities) of \$15,198 million (31 March 2023: \$19,730 million; 30 September 2022: \$77,883 million), and cash collateral of \$6,421 million (31 March 2023: \$6,472 million; 30 September 2022: \$15,038 million) the residual derivative exposure amounts to \$7,290 million (31 March 2023: \$9,618 million; 30 September 2022: \$18,588 million). The majority of the residual derivative exposure is short-term in nature and managed within the Consolidated Entity's market and credit risk frameworks, with the majority of the exposure with investment grade counterparties.

## Note 9

### Held for sale and other assets

<sup>1</sup> The ECL allowance carried against loan assets measured at FVOCI is not presented in the table as the allowance is included in FVOCI reserves. Refer to Note 11 *Expected credit losses*.

<sup>2</sup> Includes \$14,322 million (half year to 31 March 2023: \$15,699 million; half year to 30 September 2022: \$18,832 million) loans that are held by consolidated Structured Entities (SEs), and which are available as security to note holders and debt providers. Refer to Note 16 *Issued debt securities and other borrowings*.

# Notes to the consolidated financial statements

For the half year ended 30 September 2023 continued

## Note 11

### Expected credit losses

The Consolidated Entity models the Expected Credit Losses (ECL) for on-balance sheet financial assets measured at amortised cost or FVOCI such as loans, debt securities and lease receivables, as well as off-balance sheet items such as undrawn loan commitments, certain financial guarantee contracts and letters of credit.

### Model Inputs

The Consolidated Entity segments its credit portfolio between retail and wholesale exposures, and further splits these portfolios into representative groupings which are typically based on shared risk characteristics.

The Consolidated Entity has developed several models to estimate the ECL. These models incorporate a range of inputs notably that of Exposure at Default (EAD), Probability of Default (PD) and Loss Given Default (LGD) ('credit inputs') as well as Forward Looking Indicators (FLI).

For retail portfolios, behavioural variables are also considered in the determination of inputs for ECL modelling.

The key model components used in measuring the ECL include:

- **Exposure at default (EAD):** The EAD represents the estimated exposure in the event of a default.
- **Probability of default (PD):** The calculation of PDs for retail and wholesale exposures is generally performed at a facility level. Retail exposures are segmented based on product type and shared characteristics that are highly correlated to credit risk such as region, product, counterparty groupings, loan-to-value ratio (LVR) and other similar criteria. Wholesale portfolio PDs are a function of industry type, internal credit ratings, region and transition matrices are used to determine a point in time PD estimate. PD estimates for both retail and wholesale portfolios are also adjusted for FLI.
- **Loss given default (LGD):** The LGD associated with the PD used is the magnitude of the ECL in a default event. The LGD is estimated using historical loss rates considering relevant factors for individual exposures or portfolios.

### Significant increase in credit risk (SICR)

The Consolidated Entity periodically assesses exposures to determine whether there has been a SICR, which may be evidenced by either qualitative or quantitative factors. Qualitative factors include, but are not limited to, material change in internal credit rating, whether an exposure has been identified and placed on CreditWatch, an internal credit monitoring mechanism supervised by the CreditWatch Forum to closely monitor exposures showing signs of stress. All exposures on CreditWatch are classified as Stage II or, if defaulted, as Stage III.

SICR thresholds, which require judgement, are used to determine whether an exposure's credit risk has increased significantly. The SICR methodology is based on relative credit risk approach which

considers changes in an underlying exposure's credit risk since origination. This may result in exposures being classified in Stage II that are of a higher credit quality than other similar exposures that are classified as Stage I. Accordingly, while increases in the quantum of Stage II exposures will suggest a relative deterioration of credit quality, it should not necessarily be inferred that the assets are of a lower credit quality.

### Retail exposures

Exposures are assigned a behavioural score which considers the exposures' lifetime PD on initial recognition. This behavioural score is periodically assessed and updated to reflect changes in the underlying exposures' credit behaviour. SICR movement thresholds between origination and reporting date of behavioural score movements have been established that, where exceeded, result in the exposure being categorised as Stage II.

### Wholesale exposures

The Consolidated Entity assigns an internal credit rating to each exposure at origination based on information available at that date. These internal ratings are broadly aligned to external credit rating agencies such as Standard & Poor's and Moody's.

Where an exposures' assigned credit rating deteriorates beyond pre-defined thresholds per credit rating at origination, the exposure is categorised as Stage II. The methodology has been calibrated so that a larger change in rating is required for higher quality credit rated exposures than for lower quality credit rated exposures to be classified as Stage II.

For both retail and wholesale portfolios:

- the AASB 9 'low credit risk' exemption is not applied by the Consolidated Entity to material portfolios
- for material retail portfolios, the credit risk for an exposure or portfolio is generally deemed to have increased significantly if the exposure is more than 30 days past due, unless there are product specific characteristics that indicate that this threshold should be rebutted.

### Definition of default

The Consolidated Entity's definition of default determines the reference point for the calculation of the ECL components, and in particular the PD. Default is generally defined as the point when the borrower is unlikely to pay its credit obligations in full, without recourse by the Consolidated Entity to actions such as realisation of available security; or the borrower is 90 days or more past due on an obligation to the Consolidated Entity.

The Consolidated Entity periodically monitors its exposures for potential indicators of default such as significant financial difficulty of the borrower including breaches of lending covenants; it is probable that the borrower will enter bankruptcy or other financial reorganisation; the disappearance of an active market for that financial asset because of financial difficulties; or the purchase or origination of a financial asset at a deep discount that reflects the incurred credit losses.

## Note 11

### Expected credit losses continued

#### Forward-looking information (FLI)

The inclusion of FLI in calculating ECL allowances adjusts the PD, the determination of SICR as well as the LGD (that is relevant to the determination of the recovery rates on collateral). The predicted relationships between these key indicators and the key model components (EAD, PD and LGD) in measuring the ECL have been developed by analysing historical data as part of the development of internal models, and the calibration and validation process.

The Consolidated Entity applies its professional judgement in determining whether there are any inherent risks in the models' predictive outcomes. The overlays primarily reflect management's assessment of the current economic and credit environment relative to the FLI credit cycle model. These overlays account for the risk that underlying credit risk events have occurred, but observable modelled inputs are yet to reflect those events, as well as risks that are specific to regions, counterparties or industries which are difficult to account for within the modelled outcomes. Overtime the credit models are recalibrated to enhance the predictive capability. At the reporting date this overlay was approximately \$190 million (31 March 2023: \$225 million, 30 September 2022: \$300 million). These judgements are reviewed by FMG and RMG at each reporting date.

RMG is responsible for the FLI including the development of scenarios and recommending the range of probability weights to apply to those scenarios. For this purpose, four possible economic scenarios have been developed for this period, being an upside, downside, more severe downside, and baseline scenario. In calculating the ECL, each of the scenarios is probability weighted and then applied to the exposures' PDs and LGDs.

The scenarios have been developed using a combination of publicly available data, internal forecasts, and third-party information to form the initial baseline. Internal specialists within the Consolidated Entity are consulted to assist in refining and challenging the baseline and the alternate scenarios. For the current reporting period, the Consolidated Entity has generated three alternate scenarios in addition to the baseline scenario, to which the alternate scenarios are anchored on a relative basis.

Refinement of the scenarios includes benchmarking to external data from reputable sources. These sources, includes forecasts published from a range of market economists and official data sources, including major central banks, where available.

Where there are limited official data sources against which to benchmark key economic indicators on a forward-looking basis, management exercises judgement when determining the duration, severity and impact of the macroeconomic scenarios used by the Consolidated Entity.

Assigning probabilities to these scenarios requires professional judgement which draws on internal risk and economics' specialist input and comparison to general market outlooks and publicly available market commentary.

The scenarios and the associated probabilities are ultimately approved by senior risk and finance executives.

The scenarios for each of the key regions where the Consolidated Entity's ECL is derived have been set out on the following pages. Noting the diversity of possible scenarios and macroeconomic outcomes, and the continuing uncertainty regarding the path of monetary policy, inflation and global geopolitical threats, these scenarios represent plausible forward-looking views as at the reporting date.

These scenarios impact the modelled ECL provisioning levels through determination of probabilities of default and determination of losses that may be incurred should a default occur. The ability of borrowers to service their obligations through personal or business income is generally estimated using unemployment rates, GDP, commodity prices and interest rates. The losses that the Consolidated Entity may incur should a default occur, and the collateral utilized is generally estimated through property and share price index outlooks.

Future economic conditions may differ to the scenarios outlined, the impact of which will be accounted for in future reporting periods.

# Notes to the consolidated financial statements

For the half year ended 30 September 2023 continued

## Note 11

### Expected credit losses continued

#### Forward-looking information continued

Scenario	Weighting	Expectation
<b>Baseline</b> A 100% weighting to this scenario would result in an estimated total expected credit loss provision on balance sheet at the reporting date of ~\$750 million <sup>1</sup>	Probable	<p><b>Global:</b> The baseline scenario assumes 2023 global GDP growth of approximately 2.2% year-on-year, slowing to 1.0% in 2024 as the impact of tight monetary policy feeds through to an expected global slowdown. Interest rates are forecast to remain high in the short term, with decline in interest rates to support growth by mid-2024 possible.</p> <p><b>Australia:</b> Full-year annual growth of 1.4% is anticipated for 2023, slowing to 0.8% in 2024, with a technical recession expected to be narrowly avoided. Unemployment is forecast to rise steadily, peaking at 4.6% in mid-2025. Policy rate rises from the Reserve Bank of Australia (RBA) are assumed to conclude in 2023, with interest rate decline possible by mid-2024.</p> <p>House prices are expected to rise further as interest rates stabilise as the prospect of monetary easing nears. Equity prices are forecast to remain broadly flat over the next 12 months as inflation concerns ease but growth slows.</p> <p><b>United States:</b> GDP growth is projected to turn negative in 2023, leading to a full-year contraction in GDP of 1.0% in 2024 and an overall peak-to-trough decline of 1.5% over 12 months. The unemployment rate is projected to increase to 5.5% by the end of 2024. Interest rate cuts to support the economy are anticipated from mid-2024.</p> <p><b>Europe:</b> The Eurozone economy is projected to contract by 0.5% in 2024 as the effects of tight monetary policy continue.</p>
<b>Downside</b> A 100% weighting to this scenario would result in an estimated total expected credit loss provision on balance sheet at the reporting date of ~\$900 million <sup>1</sup>	Possible	<p><b>Global:</b> The downside scenario projects annual growth in global GDP that is approximately 1 percentage point lower than the baseline until early 2025.</p> <p><b>Australia:</b> The scenario projects a recession in late-2023 into early-2024 due to monetary tightening and continued inflation. The unemployment rate is project to rise in the scenario to 5.5% in 2024 and is expected to reduce slowly in a projected low growth environment. The RBA cash rate is forecast to rise further, and house prices are projected to fall by approximately 14% in the two years to June 2025.</p> <p><b>United States:</b> The scenario projects four consecutive quarters of negative growth beginning in late 2023, resulting in a 3.5% decline in real GDP. Persistent inflation is forecast to result in the US Federal Reserve delaying monetary support until disinflationary trends are clear. Unemployment is projected to rise by 3 percentage points to 6.9% at end-2024.</p> <p><b>Europe:</b> The scenario projects a 1.3% fall in real GDP in 2024, driving the unemployment rate to approximately 8.8%. Equity markets are projected to fall over 10% and fail to recover to prior peaks in the forecast period to 2027.</p>
<b>More Severe Downside</b> A 100% weighting to this scenario would result in an estimated total expected credit loss provision on balance sheet at the reporting date of ~\$1,150 million <sup>1</sup>	Unlikely	<p><b>Global:</b> The scenario projects a sharp slowdown in annual GDP growth, around 3 to 3.5 percentage points lower than the baseline. The global economy is projected to contract by ~2.6% in the next twelve months and stagnate for the subsequent 12 months.</p> <p><b>Australia:</b> The scenario projects five consecutive quarters of contraction in real GDP, resulting in a 2.6% decline by end-2024. Unemployment peaks at 7.3% in mid-2025, and house prices fall by over 25%.</p> <p><b>United States:</b> The scenario projects a 4.7% fall in GDP to the end of 2024, contracting for six straight quarters and failing to recover prior output levels by the end of 2027. Unemployment is projected to reach 8.9% by the end of 2024, and housing and equity prices are expected to fall by 15% and 25% respectively.</p> <p><b>Europe:</b> The scenario projects a recession that extends until the end of 2024, and GDP falls by 3.5% from current levels. Unemployment rates are projected to peak at 9.8% in early 2025 and recede slowly.</p>
<b>Upside</b> A 100% weighting to this scenario would result in an estimated total expected credit loss provision on balance sheet at the reporting date of ~\$700 million <sup>1</sup>	Unlikely	<p><b>Global:</b> The upside scenario projects annual growth in global GDP that is approximately 1 percentage point higher than the baseline scenario until late 2024.</p> <p><b>Australia:</b> The scenario projects a slight slowdown in GDP growth to around 1.5% annually, but growth remains positive throughout. Unemployment rates are forecast to increase only modestly, remaining below 4.5%. Interest rate rises are sufficient to manage inflation without sharply slowing growth, and are gradually eased to maintain growth.</p> <p><b>United States:</b> The scenario projects slowing GDP growth to 0.7% in 2024, with one modest quarterly contraction in output. The US Federal Reserve pauses monetary tightening as inflation recedes, achieving a 'soft landing' scenario.</p> <p><b>Europe:</b> The scenario projects GDP to grow only 0.1% in 2023 and 0.6% in 2024, avoiding a technical recession. Thereafter, growth remains around 1.5-2% annually through to 2026, and unemployment stabilises at around 7.4%.</p>

<sup>1</sup> This number provides comparative ECL provision information as at the reporting date assuming the scenarios outlined, but does not reflect changes in the credit rating of the counterparties that may occur if these scenarios were to occur. Changes in credit ratings may have a material impact on these ECL provisions.

## Note 14

### Derivative liabilities

Held for trading	27,950	31,423	109,973
Designated in hedge relationships	1,394	1,099	1,287
<b>Total derivative liabilities</b>	<b>29,344</b>	<b>32,522</b>	<b>111,260</b>

These derivative balances are presented in the statement of financial position after offsetting balances where the Consolidated Entity has both a legally enforceable right to set off and the intention to settle on a net basis. After taking into account related financial instruments (primarily derivative assets) of \$15,122 million (31 March 2023: \$19,605 million; 30 September 2022: \$75,870 million) and cash collateral of \$7,076 million (31 March 2023: \$6,459 million; 30 September 2022: \$12,308 million), the residual derivative exposure amounts to \$7,146 million (31 March 2023: \$6,458 million; 30 September 2022: \$23,082 million). Refer to Note 8 *Derivative assets* for details of the Consolidated Entity's approach to derivative instruments and financial risk management.

## Note 15

### Held for sale and other liabilities

<b>Held for sale liabilities</b>			
Liabilities held for sale	—	—	9
<b>Other financial liabilities</b>

<b>Total held for sale and other liabilities</b>	<b>9,808</b>	<b>7,627</b>	<b>6,249</b>

<sup>1</sup> In the ordinary course of its business, the Consolidated Entity may be subject to actual and potential civil claims and regulatory enforcement actions. During the current period, these include matters in the Commonwealth of Australia, the United States of America, the United Kingdom, and the Federal Republic of Germany. The civil claims may result in settlements or damages awards. The regulatory enforcement actions may result in outcomes such as penalties, fines, disgorgement of profits and non-monetary sanctions. This amount includes provisions for such outcomes. The amount and timing of the outcomes are uncertain and may differ from the provisions recognised. Based on existing information, the range of likely outcomes, and any change in provisions during the current period, did not have and are not currently expected to have a material impact on the Consolidated Entity. The Consolidated Entity consider the risk of there being a material adverse effect in respect of claims and actions that have not been provided for to be remote.

<sup>2</sup> Revenue authorities undertake risk reviews and audits as part of their normal activities. The Consolidated Entity has assessed these and other taxation claims and litigation, including seeking external advice where appropriate, and considers that it holds appropriate provisions.

## Note 16

### Issued debt securities and other borrowings

	As at 30 Sep 23 \$m	As at 31 Mar 23 \$m	As at 30 Sep 22 \$m
Commercial paper	31,070	23,466	36,836
Bonds	19,318	19,464	23,693
Securitised notes <sup>1</sup>	10,925	11,424	14,208
Certificates of deposit	3,207	2,274	2,292
Structured notes <sup>2,3</sup>	995	1,351	1,260
<b>Total issued debt securities</b>	<b>65,515</b>	<b>57,979</b>	<b>78,289</b>
Other borrowings	8,515	8,103	6,305
<b>Total issued debt securities and other borrowings</b>	<b>74,030</b>	<b>66,082</b>	<b>84,594</b>

The Consolidated Entity has not had any defaults of principal, interest, or other breaches with respect to its issued debt securities and borrowings during the reported periods.

### Reconciliation of issued debt securities and other borrowings by major currency

(In Australian dollar equivalent)

United States dollar	45,877	38,132	53,089
Australian dollar	20,033	20,252	23,742
Euro	4,348	3,491	3,115
Pound sterling	2,395	2,209	2,636
Swiss franc	342	818	1,160
Other	1,035	1,180	852
<b>Total issued debt securities and other borrowings</b>	<b>74,030</b>	<b>66,082</b>	<b>84,594</b>

<sup>1</sup> Represents payable to note holders and debt holders for which loan assets are held by consolidated Structured Entities (SEs) and are available as security. Refer to Note 10 *Loan assets*.

<sup>2</sup> The amount that would be contractually required to be paid at maturity to the holders of issued debt securities which are measured at DFVTPL is \$1,350 million (31 March 2023: \$1,660 million; 30 September 2022: \$1,609 million). This amount is based on the final notional amount rather than the fair value. Refer to Note 20 *Measurement categories of financial instruments* for the carrying value of issued debt securities measured at DFVTPL.

<sup>3</sup> Includes a cumulative fair value gain of \$10 million (31 March 2023: \$15 million gain; 30 September 2022: \$5 million loss) due to changes in own credit risk on DFVTPL debt securities recognised in OCI. The fair value movement is recognised in OCI.

## Note 19

### Contingent liabilities and commitments

	As at 30 Sep 23 \$m	As at 31 Mar 23 \$m	As at 30 Sep 22 \$m
<b>Credit risk related exposures:</b>			
Undrawn credit facilities and debt commitments <sup>1</sup>	22,142	20,378	20,411
Letters of credit and guarantees <sup>2</sup>	2,222	2,156	2,160
<b>Total credit risk related exposures</b>	<b>24,364</b>	22,534	22,571
<b>Other contingencies and commitments:</b>			
Asset development and purchase commitments	1,010	1,476	1,052
Performance-related contingencies <sup>2</sup>	444	677	871
<b>Total other contingencies and commitments</b>	<b>1,454</b>	2,153	1,923
<b>Total contingent liabilities and commitments</b>	<b>25,818</b>	24,687	24,494

<sup>1</sup> Undrawn credit facilities include fully or partially undrawn commitments against which clients can borrow money under defined terms and conditions. Balance includes revocable undrawn commitments for certain retail banking products \$14,973 million (31 March 2023: \$13,723 million; 30 September 2022: \$13,922 million) which are considered to be exposed to credit risk.

<sup>2</sup> It is not practicable to ascertain the timing of any outflow and the possibility of any reimbursement related to these contingent liabilities. Certain contingent liabilities are collateralised and any cash collateral (and related liability to return the collateral) is recognised in the Statement of financial position.

## Note 20

### Measurement categories of financial instruments

The following table contains information relating to the measurement categories (i.e. Held for Trading (HFT), FVTPL, DFVTPL, FVOCI or Amortised cost) of assets and liabilities of the Consolidated Entity. The description of measurement categories are included in Note 41(vii) *Financial Instruments* in the Consolidated Entity's March 2023 Annual Financial Statements.

The methods and significant assumptions that have been applied in determining the fair values of assets and liabilities are disclosed in Note 21 *Fair values of assets and liabilities*.

	FINANCIAL INSTRUMENTS CARRIED AT					Non- financial instruments	Statement of financial position total	FAIR VALUE OF ITEMS CARRIED AT

Total liabilities	36,489	5,269	1,394	—	269,429	4,233	316,814	43,152	268,528

<sup>1</sup> Non-financial assets under 'Trading assets' represent commodities inventory carried at fair value less costs to sell.

<sup>2</sup> Items measured at amortised cost or cost includes, where applicable, fair value hedge accounting adjustments for designated hedged risks.

<sup>3</sup> Due from other Macquarie Group entities and due to other Macquarie Group entities include derivatives and trading positions classified as HFT. All other receivables or intercompany payables are carried at amortised cost except for non-financial assets and liabilities.

<sup>4</sup> The fair value of other liabilities carried at amortised cost excludes lease liabilities.

## Note 21

### Fair values of assets and liabilities

Fair value reflects the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Quoted prices or rates are used to determine fair value where an active market exists. If the market for a financial and non-financial instrument is not active, fair values are estimated using present value or other valuation techniques, using inputs based on market conditions prevailing at the measurement date.

The values derived from applying these techniques are affected by the choice of valuation model used and the underlying assumptions made regarding such inputs.

Items measured at fair value are categorised in their entirety, in accordance with the levels of the fair value hierarchy as outlined below.

<b>Level 1:</b>	unadjusted quoted prices in active markets for identical assets or liabilities
<b>Level 2:</b>	inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices)
<b>Level 3:</b>	inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The appropriate fair value hierarchy level for an item is determined on the basis of the lowest level input that is significant to the fair value measurement.

AASB 13 *Fair Value Measurement* requires the use of the price within the bid-offer spread that is most representative of fair value. Valuation systems will typically generate mid-market prices. The bid-offer adjustment reflects the extent to which bid-offer costs would be incurred if substantially all of the residual net exposure to market risks were closed on a portfolio basis.

The following methods and significant assumptions have been applied in determining the fair values of the following items carried at amortised cost in the Statements of financial position (as disclosed in Note 20 *Measurement categories of financial instruments*).

Asset or liability	Valuation techniques, inputs and other significant assumptions
<b>Cash and bank balances, Cash collateralised lending and reverse repurchase agreement, Cash collateralised borrowing and repurchase agreement</b>	The fair values of cash and bank balance, cash collateralised lending and reverse repurchase agreement, cash collateral borrowing and repurchase agreement approximates their carrying amounts as these are highly liquid and short-term in nature.
<b>Loan assets and Deposits</b>	The fair values of fixed rate loan assets and term deposits is determined with reference to changes in interest rates and credit spreads. The fair values of variable rate loan assets and deposits approximates their carrying amounts, subject to any adjustment for changes in the credits spreads. The fair values of demand deposits with no fixed maturity approximates their carrying amount as they are short-term in nature or are payable on demand.
<b>Financial investments</b>	The fair values of liquid assets and other instruments maturing within three months are approximate to their carrying amounts. The fair values of fixed rate debt investments carried at amortised cost is estimated by reference to current market rates offered on similar securities and the creditworthiness of the borrower. The fair values of variable rate investments approximate their carrying amounts, subject to any adjustment for changes in credit spreads.
<b>Issued debt securities and other borrowings and Loan capital</b>	The fair values of issued debt securities, borrowings and loan capital is based on quoted prices in active markets where available. Where quoted prices are not available the fair value is based on discounted cash flows using rates appropriate to the term and incorporates changes in the Consolidated Entity's own credit spread.
<b>Margin money, settlement assets and settlement liabilities, Other financial assets and financial liabilities</b>	The fair values of margin money, settlement assets, settlement liabilities, other financial assets and financial liabilities approximate their carrying amounts.

## Note 21

### Fair values of assets and liabilities continued

The following methods and significant assumptions have been applied in determining the fair values of following items carried at fair value in the Statements of financial position.

Asset or liability	Valuation techniques, inputs and other significant assumptions
<b>Trading assets, Trading liabilities and Derivatives</b>	Trading assets, including commodities and commodity contracts, trading liabilities, derivative financial instruments and other transactions undertaken for trading purposes are measured at fair value by reference to quoted prices in active markets where available (for example, listed securities). If quoted prices in active markets are not available, then fair values are estimated on the basis of other recognised valuation techniques.  The Consolidated Entity has incorporated the market implied funding costs for uncollateralised derivative positions as a Funding Valuation Adjustment (FVA). FVA is determined by calculating the net expected exposures at a counterparty level and applying the Consolidated Entity's internal Treasury lending rates as an input into the calculation.
<b>Repurchase and reverse repurchase agreements</b>	Repurchase and reverse repurchase agreements, being collateralised financing arrangements, are measured at fair value with reference to current market rates and giving considerations to the fair value of securities held or provided as collateral.
<b>Financial investments</b>	Financial investments classified as FVTPL or FVOCI are measured at fair value by reference to quoted prices in active markets where available (for example, listed securities). If quoted prices in active markets are not available, the fair values are estimated on the basis of other recognised valuation techniques that maximise the use of quoted prices and observable market inputs.
<b>Loan assets and Issued debt securities</b>	Fair values of loans and issued debt securities are measured by reference to quoted prices in active markets where available. If quoted prices are not available in active markets, the fair values are estimated with reference to current market rates.
<b>Other financial assets and financial liabilities</b>	Fair values of other financial assets and financial liabilities are based upon data or valuation techniques, appropriate to the nature and type of the underlying instruments.

For financial assets carried at fair value, in order to measure counterparty credit risk, an adjustment is incorporated into the valuation. Where exposures are managed on a portfolio basis, the adjustment is calculated on a counterparty basis for those exposures. For financial liabilities carried at fair value, in order to measure the Consolidated Entity's own credit risk, an adjustment is incorporated into the valuations.

Where valuation techniques are used to determine fair values, they are validated and periodically reviewed by qualified personnel independent of the area that created them. The output of a valuation technique is always an estimate of a fair value that cannot be measured with complete certainty. All models are reviewed before they are used. Models are calibrated periodically to test the outputs and reflect the prices from observable current market transactions in same instrument or other available observable market data.

To the extent possible, models use only observable market data, however management is required to make assumptions for certain inputs that are not supported by prices from observable current market transactions in the same instrument such as volatility and correlation.

Other (loss)/income	<b>—</b>	<b>(9)</b>	<b>6</b>	<b>—</b>	<b>—</b>	<b>(3)</b>
Fair value movements recognised in OCI	<b>—</b>	<b>20</b>	<b>—</b>	<b>—</b>	<b>—</b>	<b>20</b>
<b>Balance as at 30 Sep 2023</b>	<b>1,157</b>	<b>374</b>	<b>60</b>	<b>8</b>	<b>(211)</b>	<b>1,388</b>
Fair value movements for the period included in the income statement for assets and liabilities held at the end of the period <sup>3</sup>	<b>25</b>	<b>3</b>	<b>6</b>	<b>1</b>	<b>(172)</b>	<b>(137)</b>

<sup>1</sup> The derivative financial instruments in the table above are represented on a net basis. On a gross basis, derivative assets are \$701 million (31 March 2023: \$752 million; 30 September 2022: \$906 million) and derivative liabilities are \$912 million (31 March 2023: \$747 million; 30 September 2022: \$1,156 million).

<sup>2</sup> Assets and liabilities transferred into or out of Level 3 are presented as if those assets or liabilities had been transferred at the beginning of the period.

<sup>3</sup> The Consolidated Entity employs various hedging techniques in order to manage risks including foreign exchange risks in Level 3 positions. The gains and losses relating to such hedging techniques, may include the purchase or sale of financial instruments measured at fair value that are classified as Level 1 or 2 positions or foreign currency financial instruments measured at amortised cost that are not presented in the table above.

## Note 21

### Fair values of assets and liabilities continued

#### Significant transfers between levels of the fair value hierarchy

During the period, the Consolidated Entity did not have significant transfers between Level 1 and Level 2.

Transfers into Level 3 were due to the lack of observable valuation inputs for certain investments and trading balances. Transfers out of Level 3 were principally due to valuation inputs becoming observable during the period. Financial assets reclassified in/out of the fair value hierarchy disclosure due to recognition and measurement category changes, or where there have been changes in significant influence or control but some forms of interests in assets are still retained, are also presented as transfers into/out of Level 3.

#### Unrecognised gains or losses

The best evidence of fair value at initial recognition is its transaction price, unless its fair value is evidenced by comparison with other observable current market transactions in the same instrument or based on a valuation technique for which variables include only data from observable markets. Where such alternative evidence exists, the Consolidated Entity recognises profit or loss immediately when the asset or liability is recognised ('day 1 profit or loss'). When significant unobservable inputs are used to determine fair value, the day 1 profit or loss is deferred and is recognised in the income statement over the life of the transaction or when the inputs become observable.

The table below summarises the deferral and recognition of profit or loss where a valuation technique has been applied for which significant unobservable inputs are used:

	Half year to 30 Sep 23 \$m	Half year to 31 Mar 23 \$m	Half year to 30 Sep 22 \$m
Balance at the beginning of the period	247	141	53
Deferred gain on new transactions and other adjustments	46	142	86
Foreign exchange movements	—	(3)	24
Recognised in net trading income during the period	(51)	(33)	(22)
<b>Balance at the end of the period</b>	<b>242</b>	<b>247</b>	<b>141</b>

# Notes to the consolidated financial statements

## Note 21

### Fair values of assets and liabilities continued

#### Significant unobservable inputs

The following table contains information about the significant unobservable inputs used in Level 3 valuations, and the valuation techniques used to measure fair value. The range of values represent the highest and lowest input used in the valuation techniques. The range does not therefore reflect the level of uncertainty regarding a particular input, but rather the different underlying characteristics of the relevant assets and liabilities.

	Assets \$m	Liabilities \$m	Valuation technique(s)	Significant unobservable inputs	RANGE OF INPUTS	
					Minimum value	Maximum value
AS AT 30 SEP 2023						
Commodities	1,760	888	Pricing model	Commodity margin curves	(372.2)	2,099.9
			Pricing model	Correlations	(50.0)%	100.0%
			Pricing model	Volatility and related variables	5.9%	415.0%
Interest rate and other products	344	24	Discounted cash flows	Discount rates - Credit spread	5.5%	20.0%
Equity and equity-linked products	196	—	Market comparability	Price in % <sup>1</sup>		
<b>Total</b>	<b>2,300</b>	<b>912</b>				
AS AT 31 MAR 2023						
Commodities	1,482	747	Pricing model	Commodity margin curves	(242.0)	2,243.0
			Pricing model	Correlations	(72.0)%	100.0%
			Pricing model	Volatility and related variables	6.0%	600.0%
Interest rate and other products	153	—	Discounted cash flows	Discount rates - Credit spread	0.0%	10.0%
Equity and equity-linked products	199	—	Market comparability	Price in % <sup>1</sup>		
<b>Total</b>	<b>1,834</b>	<b>747</b>				
AS AT 30 SEP 2022						
Commodities	1,474	1,152	Pricing model	Commodity margin curves	(245.5)	1,255.0
			Pricing model	Correlations	(25.0)%	100.0%
			Pricing model	Volatility and related variables	(20.0)%	300.0%
Interest rate and other products	221	4	Discounted cash flows	Discount rates - Credit spread	1.0%	10.0%
Equity and equity-linked products	531	—	Market comparability	Price in % <sup>1</sup>		
<b>Total</b>	<b>2,226</b>	<b>1,156</b>				

<sup>1</sup> The range of inputs related to market comparability has not been disclosed as the diverse nature of the underlying investments results in a wide range of inputs.

## Note 21

### Fair values of assets and liabilities continued

The following information contains details around the significant unobservable inputs which are utilised to fair value the level 3 assets and liabilities.

#### Commodities

**Commodity margin curves:** Certain commodities are valued using related observable products from the market and a margin is applied to the observable market inputs to mitigate the impact of differences in the products. Judgement is involved in the calculation of these margin curves depending on the quality of commodity or delivery location and other economic conditions.

**Correlation:** Correlation is a measure of the relationship between the movements of input variables (i.e. how the change in one variable influences a change in the other variable). It is expressed as a percentage between -100% and +100%, where 100% represents perfectly correlated variables and -100% represents inversely correlated variables. Correlation is a key input into the valuation of derivatives with more than one underlying (e.g., interest rates, credit spreads, foreign exchanges rates, inflation rates or equity prices) and is generally used to value hybrid and exotic instruments.

**Volatility:** Volatility is a measure of the variability or uncertainty in returns for a given underlying input and is generally expressed as a percentage, which represents an estimate of the amount a particular underlying instrument, parameter or index will change in value over time. Volatility is an input in the valuation of derivatives containing optionality. Volatility is impacted by the underlying risk, term and strike price of a derivative.

Correlations and volatilities are derived through the extrapolation of observable volatilities, recent transaction prices, quotes from other market participants and historical data adjusted for current conditions.

#### Interest rates and other products

**Discount rate - Credit spreads:** Loans are generally valued using discount rates. Significant unobservable inputs may include interest rates and credit spreads of counterparties and original issue discounts on primary debt issuances. Credit spread is the premium over a benchmark interest rate required by the market to accept lower credit quality which increase the discount factor applied to future cashflows thereby reducing the value of asset. Credit spreads may be implied from the market prices and may not be observable in more illiquid markets.

**Price in %:** Comparable transactions are leveraged to price the fair value of the assets and liabilities and a percentage is applied to ascertain the proportion of the transaction price that is comparable with the specific asset/liability. This price percentage is unobservable input and judgemental depending on the characteristics of the asset/liability.

#### Equity and equity-linked products

Unlisted equity securities are generally valued based on earnings or revenue multiples, referencing market transactions which are not directly comparable or quantifiable and are adjusted as appropriate for current economic conditions. Other significant unobservable inputs may include net asset value and discount rates determined using inputs specific to the underlying investment and forecast cash flows and earnings/revenues of investee entities.

# Notes to the consolidated financial statements

For the half year ended 30 September 2023 continued

## Note 21

### Fair values of assets and liabilities continued

#### Sensitivity analysis of valuations using unobservable inputs

The table below shows the sensitivity to reasonably possible alternative assumptions, for Level 3 assets and liabilities whose fair values are determined in whole or in part using unobservable inputs. The impact of the sensitivity of instruments which hedge the Level 3 positions, but are classified as Level 1 or 2, is not included in the table below:

	FAVOURABLE CHANGES	UNFAVOURABLE CHANGES
	Profit or loss	Profit or loss
	\$m	\$m
<b>Product type</b>		<b>AS AT 30 SEP 2023</b>
Commodities	158	(91)
Interest rate and other products	16	(32)
Equity and equity-linked products	15	(15)
<b>Total</b>	<b>189</b>	<b>(138)</b>
<b>Product type</b>		<b>AS AT 31 MAR 2023</b>
Commodities	116	(103)
Interest rate and other products	15	(15)
Equity and equity-linked products	2	(2)
<b>Total</b>	<b>133</b>	<b>(120)</b>
<b>Product type</b>		<b>AS AT 30 SEP 2022</b>
Commodities	147	(128)
Interest rate and other products	16	(20)
Equity and equity-linked products	3	(25)
<b>Total</b>	<b>166</b>	<b>(173)</b>

The favourable and unfavourable changes from using reasonably possible alternative assumptions for the valuation of the above product types have been calculated by recalibrating the valuation model using stressed significant unobservable inputs within the Consolidated Entity's range of reasonably possible estimates.

## Note 22

### Events after the reporting date

There were no material events subsequent to 30 September 2023 and up until the authorisation of the financial statements for issue, requiring a disclosure in the interim financial report, other than those that have been disclosed elsewhere in the financial statements.

## Directors' declaration

For the half year ended 30 September 2023

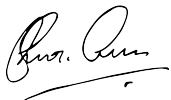

In the Directors' opinion:

- (a) the financial statements and notes set out on pages 16 to 59 are in accordance with the *Corporations Act 2001* (Cth) including:
  - (i) complying with the Australian Accounting Standards, and
  - (ii) giving a true and fair view of the Consolidated Entity's financial position as at 30 September 2023 and performance for the half year ended on that date, and
- (b) there are reasonable grounds to believe that Macquarie Bank Limited will be able to pay its debts as and when they become due and payable.

The Directors have been given the declarations by the CEO and CFO required by section 295A of the *Corporations Act 2001* (Cth). This declaration is made in accordance with a resolution of the Directors.

# Independent auditor's review report

To the member of Macquarie Bank Limited

## Report on the half year financial report

### Conclusion

We have reviewed the half year financial report of Macquarie Bank Limited (the Company) and the entities it controlled during the half year (together the Consolidated Entity), which comprises the consolidated statement of financial position as at 30 September 2023, the consolidated statement of comprehensive income, consolidated statement of changes in equity, consolidated statement of cash flows and consolidated income statement for the half year ended on that date, material accounting policy information and explanatory notes and the directors' declaration.

Based on our review, which is not an audit, we have not become aware of any matter that makes us believe that the accompanying half year financial report of Macquarie Bank Limited does not comply with the *Corporations Act 2001* (Cth) including:

- giving a true and fair view of the Consolidated Entity's financial position as at 30 September 2023 and of its performance for the half year ended on that date
- complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001* (Cth).

### Basis for conclusion

We conducted our review in accordance with ASRE 2410 *Review of a Financial Report Performed by the Independent Auditor of the Entity* (ASRE 2410). Our responsibilities are further described in the Auditor's responsibilities for the review of the half year financial report section of our report.

We are independent of the Consolidated Entity in accordance with the auditor independence requirements of the *Corporations Act 2001* (Cth) and the ethical requirements of the Accounting Professional & Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to the audit of the annual financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

### Responsibilities of the directors for the half year financial report

The directors of the Company are responsible for the preparation of the half year financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* (Cth) and for such internal control as the directors determine is necessary to enable the preparation of the half year financial report that gives a true and fair view and is free from material misstatement whether due to fraud or error.

### Auditor's responsibilities for the review of the half year financial report

Our responsibility is to express a conclusion on the half year financial report based on our review. ASRE 2410 requires us to conclude whether we have become aware of any matter that makes us believe that the half year financial report is not in accordance with the *Corporations Act 2001* (Cth) including giving a true and fair view of the Consolidated Entity's financial position as at 30 September 2023 and of its performance for the half year ended on that date, and complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001* (Cth).

A review of a half year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.
