CRUSHER COMMISSIONED AS KANMANTOO PREPARES FOR FIRST COPPER

HIGHLIGHTS

- Ore has successfully been processed through the dry plant, which includes the primary and secondary crushers, screening plant, conveyor belts and associated electrical and process control systems as part of the processing plant re-commissioning program.
- First copper production is on track for early 2024.

Commenting on commissioning of the dry circuit, Hillgrove CEO and Managing Director, Lachlan Wallace said:

“Commissioning the dry circuit of the processing plant is an important milestone as we prepare for first copper production early next year. Over the next few weeks, we will commence stoping from the underground and commission the wet plant.”
