## Operations

### Treasure Creek Project

#### Infill drilling NW Array Target Southern Zone

During the quarter the Company commenced an infill drill program initially aiming for 40 holes and 3,500m at the NW Array Southern Zone Exploration Target (ET). The NW Array Southern Zone ET represents an approximate 600m x 900m area located in the southern section of the NW Array prospect (refer ASX release 14 March 2023). The 2023 RC drill program was designed to assess the continuity and potential extensions of the gold mineralisation identified in 2022, particularly in shallow oxide resources.

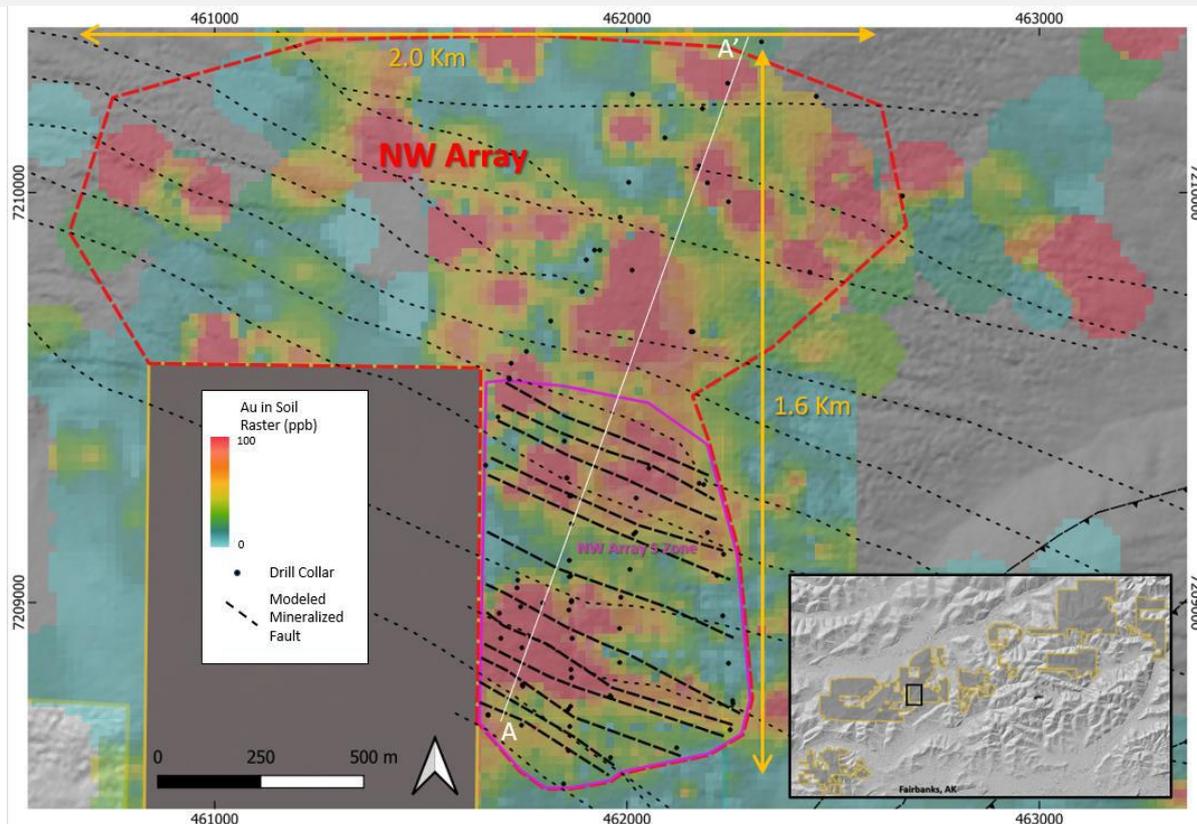

At quarter end the Company had successfully concluded the infill drill program for 45 holes and 4,278m and target drilling of 5 holes for 419m at the Traverse Prospect East near the Scrafford Prospect. Assays are expected throughout July and August.

#### Exploration Target Cautionary Statement

The Exploration Target potential quantities and grades are conceptual in nature and there has been insufficient exploration to date to define a Mineral Resource. It is not certain that further exploration will result in the determination of a Mineral Resource under the Australian Code for Reporting Exploration Results, Mineral Resources and Ore Reserves (JORC 2012). The Exploration Target is not being reported as part of any Mineral Resource or Ore Reserve.

## NW Array Drilling Assays

Subsequent to quarter end the Company received the first assays from 11 holes with the following significant intercepts (refer ASX release 3 July):

- **Hole 23TCRC135:**                    **100.5m @ 1.14g/t Au from 21.3m**  
*incl.*    **47m @ 1.7g/t Au from 38.1m**
- **Hole 23TCRC136:**                    10.7m @ 0.455g/t Au from 7.6m  
 and    4.6m @ 0.61g/t Au from 22.9m  
 and    64m @ 0.64g/t Au from 48.8m  
*incl.*    **4.6m @ 2.44g/t Au from 77.7m**
- **Hole 23TCRC138:**                    **70.1m @ 1.6g/t Au from 6.1m**  
*incl.*    **7.6m @ 6.4g/t Au from 21.3m**  
*incl.*    **3.0m @ 7.0g/t Au from 48.8m**  
*incl.*    **6.0m @ 2.1g/t Au from 57.9m**
- **Hole 23TCRC143:**                    62.5m @ 0.56g/t Au from 1.5m  
*incl.*    **6.1m @ 1.5g/t Au from 42.7m**

The initial eleven drill holes focused on establishing the continuity of gold mineralisation and determining the structural orientation and controls of mineralisation. The preliminary results indicate positive outcomes, with the identification of extensive zones of gold mineralisation and identification of high-grade zones.

Geological logging and analysis from the initial drill holes indicate a notable NNE (north-north-east) trend in the most coherent gold mineralisation, leading to a subsequent drilling shift during the program to further define this trend, which remains open to the NNE.

Furthermore, the presence of stibnite, a primary antimony mineral, was observed in several drill holes. Laboratory assays to determine the extent of antimony mineralisation in this program, as well as in selected 2022 drill holes, is currently being undertaken.

No exploration activity was conducted at NE Fairbanks during the quarter.

**MHT**

## About Felix

Felix Gold Limited (ASX: FXG) is an ASX-listed gold discovery business operating in the highly endowed Tintina Gold Province of Alaska in the United States.

Our flagship asset is a substantial landholding in the world-class Fairbanks Gold District, where historical gold production exceeds 16 Moz. In Fairbanks, our tenements sit within one of the largest gold production centres in the entire Tintina belt and lie in close proximity to both Kinross Gold's Tier 1 gold mine, Fort Knox, and the rapidly growing Freegold Ventures' discovery, Golden Summit. We hold four key projects across over 392 km<sup>2</sup> of tenure in the heart of this premier gold production district.

Felix's key projects are located only 20 minutes from our operational base in the central mining services hub of Fairbanks City, Alaska. This base is a strong advantage for Felix with its existing infrastructure, low-cost power, skilled workforce and long history of gold production. It allows us to work year-round and delivers genuine potential development pathways for our assets.

Our key projects are located along the main Fairbanks gold trend and contains multiple identified prospects, extensive alluvial gold production, large gold-in-soil anomalies and historical drill intercepts which remain wide open and mimic other major deposits in the district. We have multiple walk-up drill targets with evidence of large-scale gold potential. We also possess an existing Mineral Resource at Grant-Ester with significant upside opportunity.

**Felix's value proposition is simple: we are striving to be the premier gold exploration business in the Tintina Province through the aggressive pursuit and realisation of Tier 1 gold discoveries.**
