About Galilee

Galilee Energy is well advanced on a pathway to becoming an integrated and diversified sustainable energy company and a key supplier of natural gas to the east coast market of Australia. The company is the 100% owner of one of the largest uncontracted natural gas resources on the east coast of Australia at a time of acute gas shortages. The Glenaras Gas Project, located within Queensland’s Galilee Basin, is on the cusp of commercialization. The location and environmental credentials of the project, including low CO₂ natural gas and freshwater production to facilitate agricultural activities for CO₂ sequestration, uniquely positions Galilee as a future material supplier of sustainable energy.

Building an integrated & diversified sustainable energy company
