Clayton Howes, MONEYME's Managing Director and CEO said:

"I am pleased to announce MONEYME's strong FY23 performance, marking our successful transition from high growth to profit delivery. We delivered a statutory NPAT of \$12 million and a robust cash profit of \$24 million, with gross revenue reaching a record \$239 million, a 67% increase from FY22.

Amid the rising interest rate environment, we effectively protected our Net Interest Margin and elevated the credit profile of our loan book to mitigate evolving credit risk. Recognising the importance of standing by our customers during trying times, we also improved our financial hardship processes.

In FY23, we amplified our operating leverage by realising scale and technology benefits, and continued to enhance our offering through new product launches and increased automation. Our commitment to customer-centric innovation remains the driving force behind our high customer engagement and satisfaction.

I am also proud to announce MONEYME's B Corp Certification in August 2023, a testament to our significant environmental, social, and governance (ESG) strides in FY23.

Our transition to sustainable profitability, fuelled by scale, tech-led efficiencies and streamlined operations, provides a solid foundation for continued profitable returns in FY24 and beyond. Looking ahead, we will focus on readying the business for growth when the market conditions are suitable through extending our technology advantage, further improving the credit profile of our portfolio, simplifying, and focusing the business by removing non-core products, and strengthening our information security and data protection."
