## ASX RELEASE

### Maiden drilling starts at Brimstone Gold Project, WA.

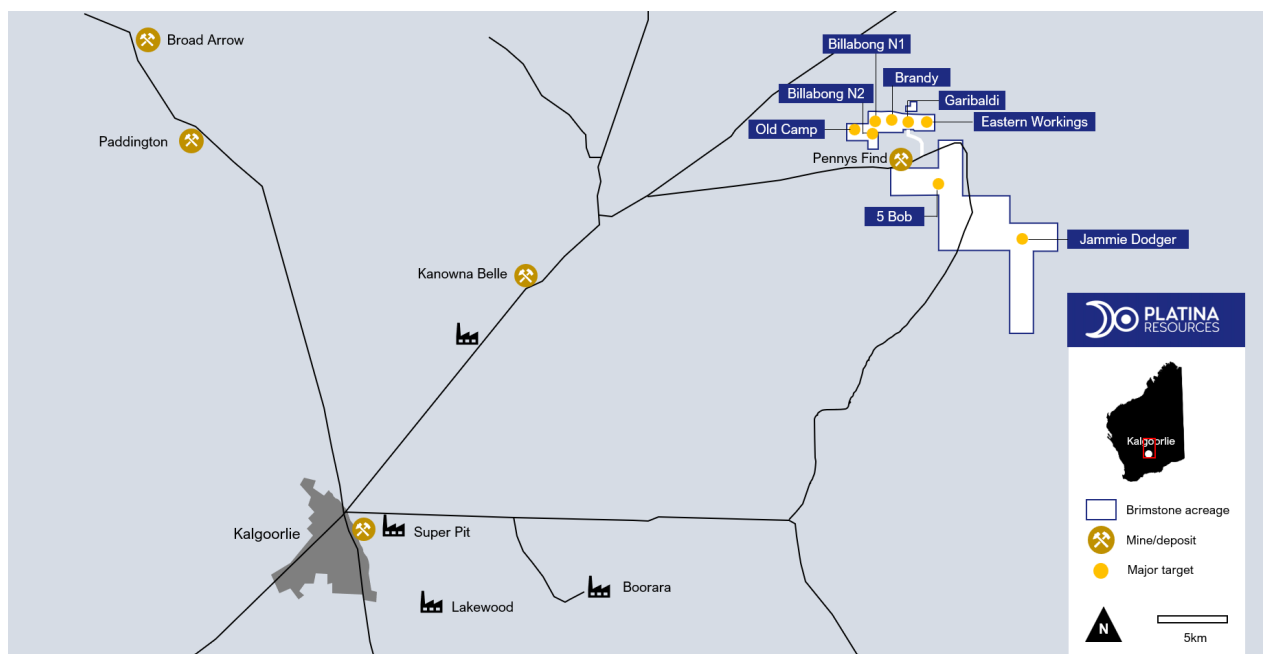

**Platina Resources Limited (ASX: PGM)** has commenced a maiden 5,500m aircore drilling program at its **Brimstone Gold Project**, 40 km north-east of Kalgoorlie in **Western Australia**.

Following a successful cultural heritage clearance program covering Brimstone's five northern Prospecting Licences, a phase one, 5,500m aircore drilling program is underway and expected to take 20 days to complete.

Platina Managing Director, Mr Corey Nolan, said the first phase aircore drilling will be focussed on priority targets including Brandy, Old Camp and Billabong North. There has been minimal to no drilling at these prospects.

"Old Camp has more than 500m of interpreted shear zone associated with a strong gold in soil anomaly and only nine shallow drill holes within a 150m zone," Mr Nolan said.

"The Brandy prospect is interpreted to be located on the northern extension of the Penny's Find shear zone, approximately 2.3 km from Horizon Minerals' Penny's Find gold deposit and defined high-grade mineral resource.

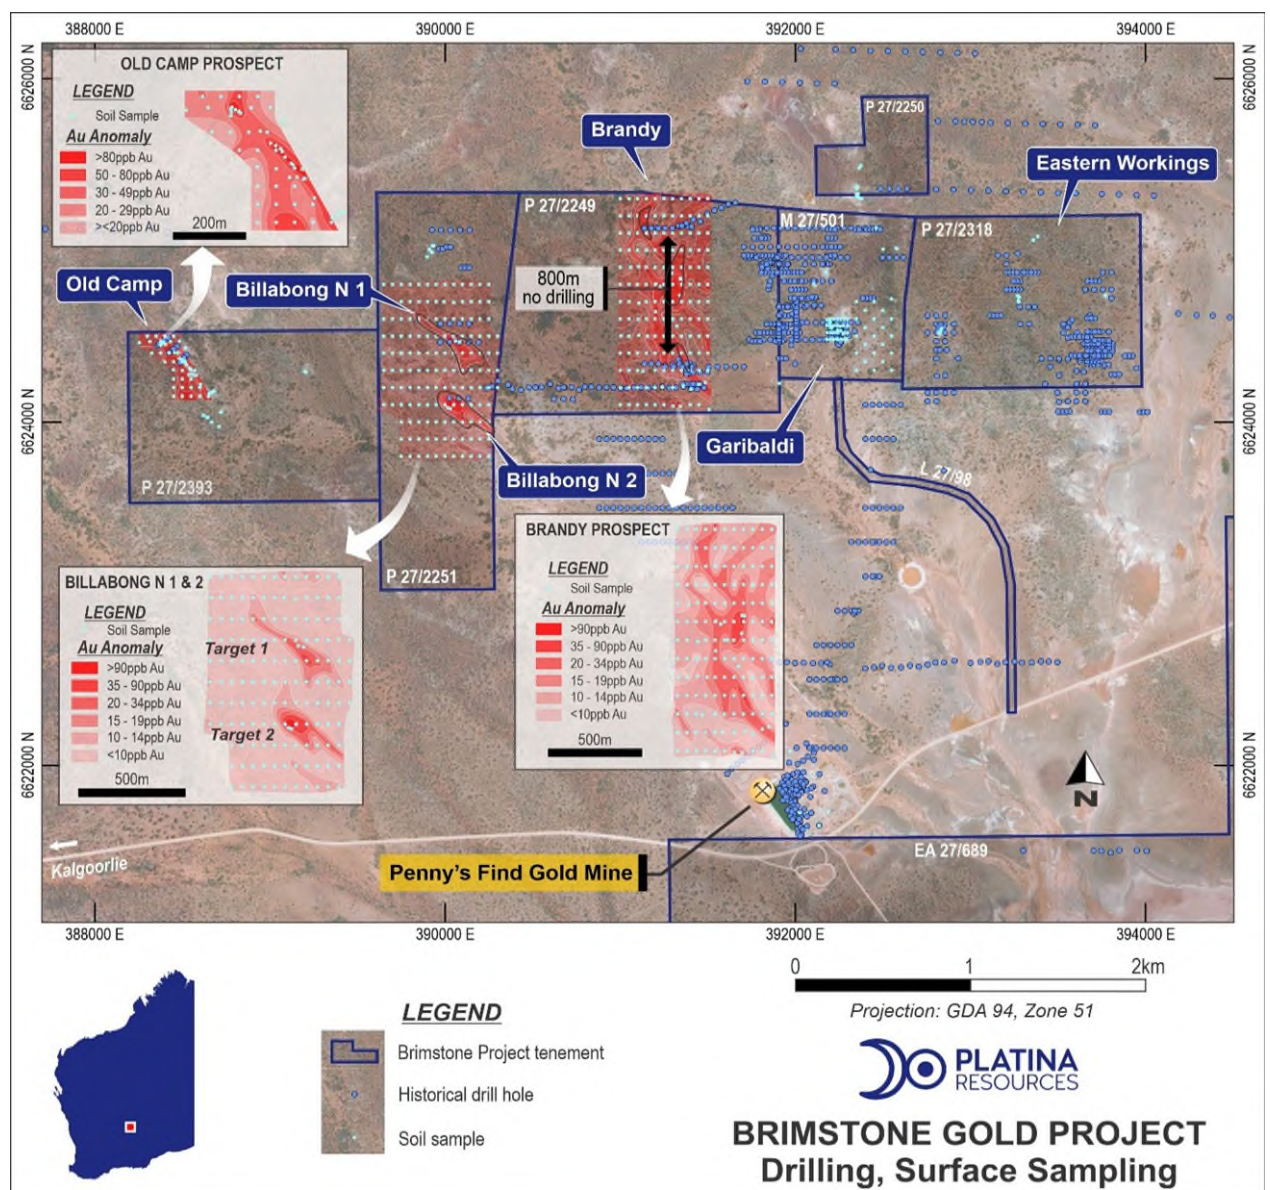

**Figure 1:** Brimstone Gold Project location, 40km north-east of Kalgoorlie with major prospects shown.

“A phase two drilling program will begin after final cultural heritage clearances are secured for the Garibaldi Mining Licence. The second phase will include a combination of air core and reverse circulation drilling to target the deeper potential of the system,” he said.

An additional cultural heritage survey would be required for the southern targets, which includes Jammie Dodger, once drilling on the northern tenements is completed.

The Brimstone tenements are located within a proven gold district in close proximity to the Penny’s Find gold deposit and 25km from Kanowna Belle gold mine. Apart from shallow and close spaced drilling at Garibaldi, this historical work has never been followed up with a systematic exploration campaign.

**ABOUT PLATINA RESOURCES LIMITED (ASX: PGM)**

Platina is an Australian-based company focused on advancing early-stage metals projects through exploration, feasibility, and permitting towards development. Shareholder value is created by monetising the projects through either sale, joint venture or development.

Platina controls a 100% interest in a portfolio of gold projects in the Yilgarn Craton and Ashburton Basin in Western Australia, and the Platina Scandium Project located in central New South Wales - one of the largest and highest-grade scandium deposits in the world. For more information please see: [www.platinaresources.com.au](http://www.platinaresources.com.au)

## **DISCLAIMER**

Statements regarding Platina Resources' plans with respect to its mineral properties are forward-looking statements. There can be no assurance that Platina Resources' plans for development of its mineral properties will proceed as currently expected. There can also be no assurance that Platina Resources will be able to confirm the presence of additional mineral deposits, that any mineralisation will prove to be economic or that a mine will successfully be developed on any of Platina Resources' mineral properties.

## **REFERENCES TO PREVIOUS ASX RELEASES**

The information in this report that relates to Exploration Results were last reported by the company in compliance with the 2012 Edition of the JORC Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves in market releases dated as follows:

- Pivotal acquisition increases Platina's gold footprint in Western Australia, 10 August 2022.
- Platina's maiden phase of exploration to commence at the Brimstone Gold Project, Western Australia, 1 March 2023.

The company confirms that it is not aware of any new information or data that materially affects the information included in the market announcements referred to above and further confirms that all material assumptions underpinning the exploration results contained in those market releases continue to apply and have not materially changed.
