## Carrapateena cave breaks through to surface

OZ Minerals today announced that the Carrapateena cave safely propagated to surface on 29 December 2022.

OZ Minerals Managing Director and Chief Executive Officer, Andrew Cole, said: "The Carrapateena cave safely breaking through to surface marks a significant milestone for the mine and an important de-risking event for ongoing operations. With the cave now through to surface it enables mine planning to be optimised for production rather than prioritising the safe development of the cave, which has been the primary focus over the first 2 years of the mine's life.

"I'd like to take this opportunity to congratulate the Carrapateena team for their dedication and focus to deliver a safe working environment and successfully managing the cave propagation to surface."

**This announcement is authorised for market release by OZ Minerals' Managing Director and CEO, Andrew Cole.**
