5th February 2024

### **HIGHLIGHTS**

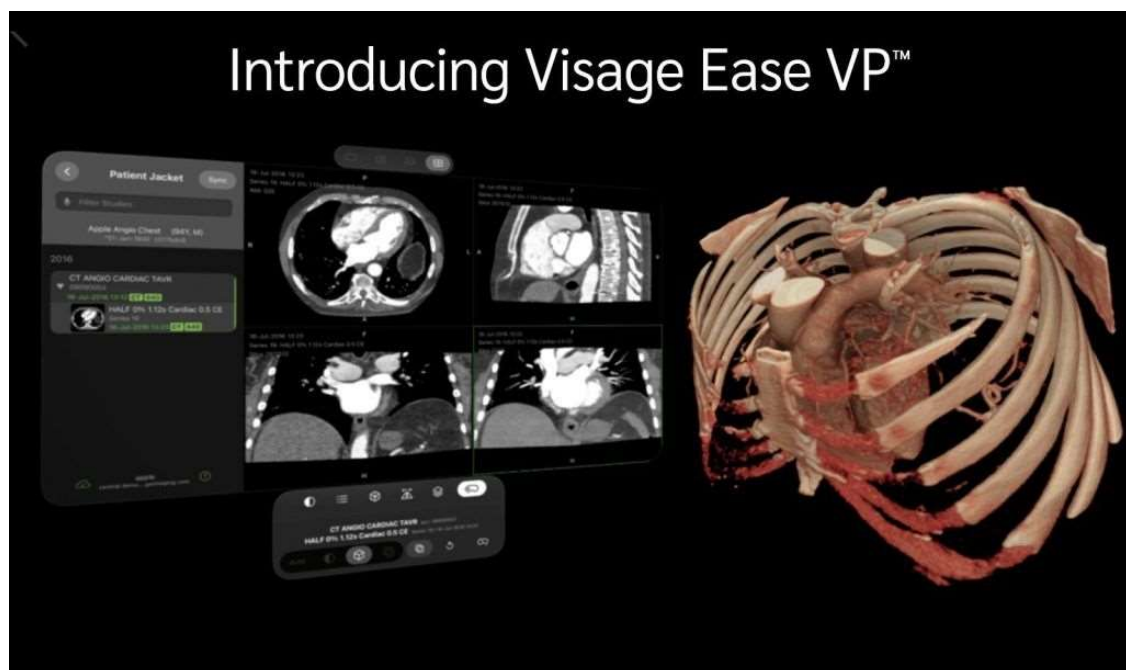

- **Visage has launched the groundbreaking Visage Ease VP for Apple Vision Pro**
- **Visage Ease VP supports immersive, spatial experiences for diagnostic imaging and multimedia**
- **Visage's cinematic rendering engine is natively available in Visage Ease VP providing stunning volume-rendered images in immersive space**
- **Visage Ease VP provides an end-user imaging experience that's unlike any other application**

Leading health imaging company Pro Medicus Limited [ASX: PME] today announced its wholly-owned U.S. subsidiary, Visage Imaging, Inc., has announced the launch of the groundbreaking Visage Ease VP for Apple Vision Pro, Apple's highly anticipated spatial computing platform.

Designed to take advantage of the unique capabilities of Apple Vision Pro, Visage Ease VP supports immersive, spatial experiences for diagnostic imaging and multimedia. Visage Ease VP includes all the proven functionality of Visage Ease™, plus the exciting addition of Visage's powerful cinematic rendering engine for stunning volume-rendered images in immersive space. Anywhere, on-the-go access with Visage Ease VP has additional flexibility with virtual screens at more than 4K resolution for each eye, independence from environmental lighting restrictions, and the ability to interact with imaging seamlessly in your physical space. Visage Ease VP uses the natural and intuitive input of eyes, hands, and voice navigation to provide an end-user imaging experience that's unlike any other application.

UC San Diego Health, a Tier 1 academic medical center and Visage customer, is the first health system to pilot the technology.

“The visualization of three-dimensional medical imaging in immersive space creates exciting opportunities to improve patient care,” said Dr. Paul Murphy, associate clinical professor at UC San Diego School of Medicine and radiologist at UC San Diego Health. “Technology that allows for sophisticated eye motion and gesture controls for reviewing 2D and 3D medical imaging could potentially help in efficient tumor board reviews and create collaborative spaces in healthcare.”

Today's launch of Visage Ease VP ushers in a new era of spatial imaging and workflow possibilities.

“Visage’s platform of enterprise imaging applications that support the Apple ecosystem are used by many of the world’s largest, most sophisticated healthcare organizations, and also integrated bi-directionally to the most widely used EHR,” said Malte Westerhoff, PhD, Visage co-founder and global chief technology officer. “With Visage Ease VP we can now extend our offering to immersive, spatial imaging which has the potential to open up a number of novel and exciting possibilities within both medical imaging and the wider healthcare space.”

**About Pro Medicus Limited:**

Pro Medicus Limited [ASX: PME] is a leading healthcare informatics company. Founded in 1983, the company provides a full range of medical imaging software and services to hospitals, imaging centres and health care groups worldwide. In January 2009, the company acquired Visage Imaging transforming it into a global provider of leading-edge medical imaging solutions. The company's Visage 7 suite of products are the foundation of an ultra-fast, clinically rich, and highly scalable platform that can seamlessly be implemented in both public and private cloud environments. The company offers a leading suite of RIS, PACS, Artificial Intelligence (AI) and e-health solutions constituting one of the most comprehensive end-to-end offerings in healthcare imaging. Pro Medicus has offices in Melbourne, Berlin and San Diego. [www.promedicus.com.au](http://www.promedicus.com.au)
