

## **Innamincka –Yarrow Joint Seismic Acquisition Agreement**

### **HIGHLIGHTS**

---

- **Yarrow 3 seismic acquisition programme agreed covering parts of PRL14 and PRL17**
- **The seismic acquisition provides for Red Sky to be free carried through the programme**
- **Acquisition expected in Q4 2023**

**Red Sky Energy** (ASX:ROG) (**Red Sky** or the **Company**) is pleased to advise that it has agreed a Seismic Acquisition programme with Santos Limited (**ASX:STO**) (**Santos**) in conjunction with the adjacent permit to cover parts of PRL14 including Yarrow and PRL17 at the Innamincka Dome in the Cooper Basin. The joint acquisition is cost effective and will result in a shared benefit area. Seismic acquisition will provide valuable information about the subsurface structure, which is important to Red Sky's placement of further development wells and exploration activities.

**Commenting on the Seismic Acquisition, Red Sky Managing Director, Andrew Knox, said:**

*"Red Sky will be free carried through the seismic acquisition and processing and will complete Santos' farm-in obligations. This is an important next step in the full field development of Yarrow."*

Seismic acquisition plays a fundamental role in obtaining accurate and reliable subsurface information, helping exploration companies make informed decisions about drill locations. The primary goal of seismic acquisition is to create detailed images of the Earth's subsurface by measuring the way seismic waves propagate through different layers of rock and other materials. These waves are generated artificially using a seismic source which sends energy into the ground. The energy travels through the subsurface and reflects back when encountering boundaries between different rock layers or other geological features.

Red Sky holds 20% working interest in six PRLs (14, 17, 18, 180, 181, 182) at the Innamincka Dome in the Cooper Basin.

Various statements in this report constitute statements relating to intentions, future acts and events. Such statements are generally classified as forward-looking statements and involve unknown risks, expectations, uncertainties and other important factors that could cause those future acts, events and circumstances to differ from the way or manner in which they are expressly or impliedly portrayed herein.

Some of the more important of these risks, expectations and uncertainties are pricing and production levels from the properties in which the Company has interests and the extent of the recoverable reserves at those properties. In addition, the Company has a number of exploration permits. Exploration for oil and gas is expensive, speculative and subject to a wide range of risks. Individual investors should consider these matters in light of the personal circumstances (including financial and taxation affairs) and seek professional advice from their accountant, lawyer or other professional advisor as to the suitability for them of an investment in the Company.
