## Notice of H1 FY23 results and investor webinar

16 February 2023

**Melbourne, Australia** – Close the Loop Limited (**Close the Loop, CLG** or the **Company**) (**ASX: CLG**), an end-to-end solutions provider from design and manufacturing, through to collection and recycling of products, is pleased to announce it will release its results for the first 6 months ending 31 December 2022 (H1 FY23) on Friday, 24 February 2023.

The Company will host an investor webinar with CEO Joe Foster and CFO Marc Lichtenstein, at 2.00pm AEDT on the same day – Friday, 24 February 2023 – to discuss the results.

Register for the investor webinar via the link below:

[https://us02web.zoom.us/webinar/register/WN\\_FyywR8F-TGquwp\\_p0b5e1Q](https://us02web.zoom.us/webinar/register/WN_FyywR8F-TGquwp_p0b5e1Q)

Questions can be pre-submitted to [investors@ctlgroup.com.au](mailto:investors@ctlgroup.com.au) or asked via the Q&A function during the webinar.

After registering, you will receive a confirmation email containing information about joining the webinar.

*This announcement has been authorised for release by the Board of Close the Loop Limited.*

### About Close the Loop Group

With locations across Australia, Europe, South Africa and the United States, Close the Loop create innovative products and packaging that includes recyclable and made-from recycled content, as well as collect, sort, reclaim and reuse resources that would otherwise go to landfill. From recovering print consumables, eyewear, cosmetics, and phone cases, through-to the reusing of toner and post-consumer soft plastics for an asphalt additive, the Group is focused on the future, sustainability and the circular economy.

Well positioned within the circular economy, Close the Loop consists of the merging of two secondary business groups - Close the Loop and O F Pack. The combining of these two entities allows for end-to-end solutions across packaging and consumables to a variety of markets, with advanced innovation in product development, as well as end of life take-back and recovery systems for complex waste streams to greatly reduce waste to landfill.
