

## Innamincka –Yarrow 3 Well MPLT Completed

### HIGHLIGHTS

---

- **Yarrow 3 Well activity by Santos continues**
- **MPLT has been completed and confirms relative contribution from the two zones**
- **Post-frac flowback indicated a stable rate of approximately 5.0 MMscf/d at WHP of 790psi on 36/64” choke**
- **Forward plan includes further analysis of pressure data to inform assessment of volumes**

Red Sky Energy (ASX:ROG) (Red Sky or the Company) is pleased to advise that the activity by Santos Limited (ASX:STO) (Santos) at Yarrow 3 Well continues after fracing of the well was completed (refer to [ASX Announcement 23 November 2022](#)).

Memory Production Logging Tool (MPLT) is now complete and this has confirmed the flow is in line with initial data from the fracc with 85% from the Patchawarra formation and 15% from the Tirrawarra sandstone. The forward plan is to continue monitoring over the next week to obtain pressure data which will be used in estimation of volumes.

As per previous release, the post-frac flowback indicated a stable rate of approximately 5.0 MMscf/d at WHP of 790psi on 36/64” choke.

**Commenting on the Yarrow 3 activity, Red Sky Managing Director, Andrew Knox, said:**

*“Red Sky is pleased to advise the contribution from respective zones is in line with expectations and we look forward to providing further updates as they are received.”*

Red Sky holds 20% working interest in six PRLs (14, 17, 18, 180, 181, 182) at the Innamincka Dome in the Cooper Basin.

Various statements in this report constitute statements relating to intentions, future acts and events. Such statements are generally classified as forward-looking statements and involve unknown risks, expectations, uncertainties and other important factors that could cause those future acts, events and circumstances to differ from the way or manner in which they are expressly or impliedly portrayed herein.

Some of the more important of these risks, expectations and uncertainties are pricing and production levels from the properties in which the Company has interests and the extent of the recoverable reserves at those properties. In addition, the Company has a number of exploration permits. Exploration for oil and gas is expensive, speculative and subject to a wide range of risks. Individual investors should consider these matters in light of the personal circumstances (including financial and taxation affairs) and seek professional advice from their accountant, lawyer or other professional advisor as to the suitability for them of an investment in the Company.
