Close the Loop to present at Automic Group's TechOpps investment conference

26 October 2022

Melbourne, Australia – Close the Loop Limited (**Close the Loop** or the **Company**) (**ASX: CLG**), an end-to-end solutions provider from design and manufacturing, through to collection and recycling of products advises that CEO, Joe Foster, will be presenting at Automic Group's *TechOpps 2022* conference.

TechOpps 2022 will be a hybrid event held over two days in Melbourne on the 2nd and 3rd of November, with attendees able to attend in-person or virtually.

Some of the ASX's leading business founders, executives, and CEOs will outline how their companies are utilising technology to better the lives of its customers on a daily basis.

The Keynote speaker for the event is Alex Waislitz, Executive Chairman of Thorney Investment Group.

Attendance is free. To register for the event and view the full event details, including program agenda, please go to: <https://www.techopps.automic.com.au/>

Mr Foster will be presenting in person at 11.45am AEDT on Wednesday, 2 November 2022.

This announcement has been authorised for release by the Board of Close the Loop Limited.

About Close the Loop Group

With locations across Australia, Europe, South Africa and the United States, Close the Loop create innovative products and packaging that includes recyclable and made-from recycled content, as well as collect, sort, reclaim and reuse resources that would otherwise go to landfill. From recovering print consumables, eyewear, cosmetics, and phone cases, through-to the reusing of toner and post-consumer soft plastics for an asphalt additive, the Group is focused on the future, sustainability and the circular economy.

Well positioned within the circular economy, Close the Loop consists of the merging of two secondary business groups - Close the Loop and O F Pack. The combining of these two entities allows for end-to-end solutions across packaging and consumables to a variety of markets, with advanced innovation in product development, as well as end of life take-back and recovery systems for complex waste streams to greatly reduce waste to landfill.
