

## General Shareholder Update Q&A Forum

**Friday 13 July 2018:** Environmental Clean Technologies Limited (ASX:ECT) (ECT or Company) is pleased to provide the following information in relation to its recent shareholder question and answer (Q&A) exercise.

Following on from the recent (30 May 2018) signing of its agreement with two Indian government-owned enterprises, NLC India Limited (NLCIL) and NMDC Limited (NMDC), for the establishment of the largest ever R&D project between the two countries, the Company received requests from shareholders to provide feedback on topical questions raised on the share market internet forum, Hot Copper.

As a result of feedback, the Company decided to invite participants to send in questions via email, encouraging direct engagement with the Company. For the purpose of this particular exercise, a deadline of 5 pm on Monday 2 July 2018 was set.

Over 100 questions were received across a range of topics. Many were similar allowing consolidation to 49 questions.

Whilst the answers to the questions do not contain any new material information, they may be of general interest to all shareholder and as such, the answers will be posted on the Company's website after market close today and can be accessed via the following link [www.ectltd.com.au](http://www.ectltd.com.au).

ECT Chairman Glenn Fozard commented, "The Company encourages all shareholders who wish to provide feedback or seek clarification to contact the Company directly, either via phone on (03) 9849 6203 or email via [info@ectltd.com.au](mailto:info@ectltd.com.au).

"Only information released by the Company via the ASX announcements platform or via its own website ([www.ectltd.com.au](http://www.ectltd.com.au)) may be relied upon."

The Company looks forward to providing further updates in due course.

#### About ECT

ECT is in the business of commercialising leading-edge energy and resource technologies, which are capable of delivering financial and environmental benefits.

We are focused on advancing a portfolio of technologies, which have significant market potential globally.

ECT's business plan is to pragmatically commercialise these technologies and secure sustainable, profitable income streams through licensing and other commercial mechanisms.

#### About Coldry

When applied to lignite and some sub-bituminous coals, the Coldry beneficiation process produces a black coal equivalent (BCE) in the form of pellets. Coldry pellets have equal or superior energy value to many black coals and produce lower CO<sub>2</sub> emissions than raw lignite.

**About MATMOR**

The MATMOR process has the potential to revolutionise primary iron making.

MATMOR is a simple, low cost, low emission production technology, utilising the patented MATMOR retort, which enables the use of cheaper feedstocks to produce primary iron.

**About the India R&D Project**

The India project is aimed at advancing the Company’s Coldry and Matmor technologies to demonstration and pilot scale, respectively, on the path to commercial deployment.

ECT has partnered with NLC India Limited and NMDC Limited to jointly fund and execute the project.

NLC India Limited is India’s national lignite authority, largest lignite miner and largest lignite-based electricity generator.

NMDC Limited is India’s national iron ore authority.
