

## **Stryker signs ViSafe™ contract with dorsaVi**

### **Key highlights:**

- **dorsaVi signs contract for a project with Stryker to commence immediately and potentially effective until February 2020**

**Melbourne, Australia, 22 February 2018;** dorsaVi (ASX: DVL) today announced it has signed an agreement with Fortune 500 company Stryker, one of the world's leading medical technology companies. Stryker manufactures products and services for the Orthopaedics, Medical and Surgical, and Neurotechnology and Spine fields. Stryker will be using dorsaVi's workplace assessment solution, ViSafe™, under the terms of the agreement.

ViSafe™ has been adopted by clients in various sectors - including companies in the healthcare, aged care, transport, and utilities industry - reflecting the technology's broad applicability, open market opportunity, and growing demand for data-driven solutions.

dorsaVi CEO Dr Andrew Ronchi noted: "Work-related musculoskeletal pain is a well-reported occupational health issue among a broad range of workers with physically demanding roles."

Other high-profile companies that have also adopted ViSafe™ include Heathrow Airport, Transport for London, Crown Resorts, Japara Healthcare, Sydney Water, Weyerhaeuser, Caterpillar, and Gates Corporation.

### **About dorsaVi**

dorsaVi (ASX: DVL) is an ASX company focused on developing innovative motion analysis device technologies for use in elite sports, occupational health and safety and clinical applications. dorsaVi believes its wearable sensor technology enables – for the first time – many aspects of detailed human movement and position to be accurately captured, quantified, and assessed outside a biomechanics lab, in both real-time and real situations for up to 24 hours.

Our technology has applications across three sectors:

- **Clinical:** ViMove and ViMove2 are transforming the management of patients by providing an objective assessment, monitoring outside the clinic and immediate biofeedback. ViMove is currently used by medical and physiotherapy practices in Australia, the United Kingdom, and the United States. ViMove2 is currently used in Australia and the United Kingdom.
- **Elite Sports:** ViPerform is allowing coaches and medical teams managing elite athletes and teams to screen athletes and provide objective evidence for decisions on return to play, measure biomechanics and provide immediate biofeedback out on the field, tailor and track training programs and optimise technique and peak performance. ViPerform is being used by AFL and NRL clubs, England and Wales Cricket Board and Board of Control for Cricket in India, Barclays Premier League (EPL) clubs in the UK and US-based sports clubs from the National Basketball Association (NBA), the Major Soccer League (MLS) and the National Football League (NFL) as well as various Olympic teams and athletes internationally.
- **OHS:** We combine innovation, measurement, and quality to reduce workplace incidents, costs, meet compliance and improve brand reputation. ViSafe and myViSafe enable employers to assess the risk of injury for employees as well as test the effectiveness of proposed changes to workplace design, equipment or methods based on objective evidence. Our workplace safety solutions are used by major corporations including Sodexo, London Underground, Vinci Construction, Crown Resorts, Caterpillar (US), Monash Health, Coles, Woolworths, Toll, Toyota, Orora (formerly Amcor), Crown and BHP Billiton.
