## **KEY GEOLOGICAL APPOINTMENT – ANDREW FORD**

**Myanmar Metals Limited** (“MYL” or “the Company”) is pleased to advise that it has secured the services of Andrew Ford as General Manager – Geology.

Andrew is an experienced geologist with over 20 years exploration, development and mining experience for base metals and gold as well as a variety of other commodities internationally and throughout Australia.

Andrew has been consulting to a number of listed and private groups since 2015 prior to which he was Chief Operating Officer of Rubicon Resources Limited for several years. He has managed exploration and development of gold, base metal and uranium projects for companies including Rubicon, Peninsula Energy and Barrick Gold. His experience extends through exploration to mining at open cut and underground mines in Australia and Africa.

Andrew has a Bsc. (Hons.) Geology from the University of Adelaide and is a member of the AusIMM.

John Lamb, CEO and Chairman, said “Andrew’s appointment is significant and very timely for Myanmar Metals. Andrew is a seasoned and well experienced geologist who will provide the full-time commitment that we require.

We have a 5,000 metre RC and diamond drilling program underway at Bawdwin, the first assays from which should soon be available. The drilling program has been designed with the aim to provide sufficient sample density in the upper portion of the Bawdwin Deposit to establish a classification of “Indicated” in accordance with the JORC Code 2012 edition.

Busy times ahead and I have no doubt that Andrew, with the assistance of our key geological consultants at CSA Global, will hit the ground running.”

**John Lamb**  
**Chairman and Chief Executive Officer**
