ASX Announcement COVID-19 Update

Rectifier Technologies is pleased to inform that we have been granted an exemption from the Movement Control Order (MCO) by the Ministry of International Trade and Industry for Rectifier Technologies (M) Sdn. Bhd., our primary manufacturing facility in Malaysia, to resume work in a limited capacity.

Although given this concession, we are mindful that the Covid-19 virus is still spreading at an alarming rate and will prioritise the health and safety of our employees above all. We will enforce protocols to ensure that our team in Malaysia operates in full compliance with the requirements of the Malaysian government.
