About ECT

ECT is in the business of commercialising leading-edge energy and resource technologies, which are capable of delivering financial and environmental benefits.

We are focused on advancing a portfolio of technologies, which have significant market potential globally.

ECT's business plan is to pragmatically commercialise these technologies and secure sustainable, profitable income streams through licensing and other commercial mechanisms.

About Coldry

When applied to lignite and some sub-bituminous coals, the Coldry beneficiation process produces a black coal equivalent (BCE) in the form of pellets. Coldry pellets have equal or superior energy value to many black coals and produce lower CO₂ emissions than raw lignite.

About HydroMOR

The HydroMOR process has the potential to revolutionise primary iron making.

HydroMOR is a simple, low cost, low emission, hydrogen-driven technology which enables the use of 'low value' feedstocks to produce primary iron.

About COHgen

The COHgen process has the potential to deliver a lower cost, lower emission method for hydrogen production from brown coal.

COHgen is currently advancing through fundamental laboratory development to inform its patent application ahead of scale up and commercialisation.

About CDP-WTE

The catalytic depolymerisation-based waste-to-energy process converts 'low-value' resources into higher-value diesel and other valuable by-products.

CDP-WTE can be deployed as a standalone solution or integrated with the Coldry process to deliver higher-value, lower-emission energy solutions to lignite resource owners.

Chairman's Letter

Dear Investors,

The New Shares are being offered to Eligible Shareholders at an issue price of 0.10 cents each. For every 3 New Shares subscribed, Eligible Shareholders will also receive 1 free New Option. Eligible Shareholders for this purpose are holders of ECT as at 5.00 pm on the Record Date, being Friday 1 November 2019.

Each New Option is exercisable for 1 Share at a price of 0.3 cents at any time up to 3 years after issue.

The Directors have arranged for various forms of support for the Offer. The company has received pre-commitments which subscribe for 1,587,501,000 New Shares from certain creditors. Under the Pre-commitments, the Lenders have agreed to subscribe for New Shares and attaching New Options if available under the Shortfall Offer. The Company's liabilities will be reduced by issuing New Shares (with New Options attached) to these Lenders, should the Entitlement Offer not be fully subscribed. If the Entitlement Offer is fully subscribed, no New Shares will be issued to these Lenders and the Company will repay the Lenders in cash in due course, except where the Lenders seek conversion to equity on the terms of the Offer, in which case the New Shares and Options will be issued as a placement.

The issue of New Shares under this Prospectus will provide funding for implementation of 2 key components of the Companies strategic plan, namely:

- Generate commercial revenue targeted to improve the Company's operational earnings, and;
- Establish the capital infrastructure base to increase scale and provide access to additional markets.

The successful delivery of these activities is intended to:

- Improve market ratings for our asset class;
- Support the feasibility of building a larger Coldry plant in Latrobe Valley, and
- Allow holders of New Shares access to the value generated should the Company positively advance its commercialisation strategy.

Full details of how the New Shares will be allocated are detailed in section 3 of the Prospectus.

The nature of research, development and commercialisation requires a clear long-term vision and considerable investment. Developing capital-intensive first-of-a-kind technologies and processes is challenging.

Crucial to meeting this long-term challenge is establishing operational cashflows which evidence the commercialisation of our technology suite.

Over the past 8 months, ECT has been advancing a strategy aimed at developing near-term operational cash-flows in parallel to proposed projects in India, the Latrobe Valley and other regions.

To improve group cashflows, the Company aims to maximise revenues from its existing facility at Bacchus Marsh. Further, this will support ongoing market and application testing of Coldry products to underpin the offtake from larger capacity Coldry plants, including the proposed Latrobe Valley project.

Additionally, the Company believes there are significant upside opportunities for technology-leveraged business acquisitions. Through increased economies of scale, and supported by organic revenue growth, the Company aims to consolidate its market position through the acquisition of businesses with complementary processes, similar products and established earnings. These target businesses would be evaluated for synergies with ECT's existing suite of technologies and, where appropriate benefit from their deployment or integration post-acquisition can be identified, leverage the existing business value.

Finally, in building earnings with the first two tiers, ECT is also considering corporate transactions and structures that improve market ratings for our asset class. At the core of the Company's business model is the development of technology which beneficiates low-rank and waste resources. ECT's technology suite utilises a diverse set of waste feedstocks to produce higher value products with low to zero emissions profiles.

The Company believes that this approach will allow the market to better categorise and rate its value according to earnings multiples commensurate with its market peers.

This current corporate strategy aligns with ECT's 5-year stated purpose where we aim to *"bridge the gap between today's use of resources and tomorrow's zero emission future."*

The Board recommends that you read this Prospectus in full and consider the following information. The Board is focused on creating shareholder value through the advancement of its corporate strategy and believes the issue of New Shares and New Options will promote this endeavour.

Yours faithfully,

Glenn Fozard
Chairman

Members of the public in New Zealand who are not existing Shareholders on the Record Date are not entitled to apply for any New Shares. This Prospectus has not been registered, filed or approved by any New Zealand regulatory authority. This Prospectus is not an investment statement or prospectus under New Zealand law and is not required to, and may not, contain all the information that an investment statement or prospectus under New Zealand law is required to contain.

3.9 Treatment of ineligible shareholders and sale for ineligible shareholders' entitlement

Given the small number of Ineligible Shareholders and the cost of complying with applicable regulations outside Australia and New Zealand, the Company has decided that it would be unreasonable to extend the Offer to Ineligible Shareholders. The Prospectus will not be sent to those Shareholders.

This Prospectus does not constitute an offer of securities in any jurisdiction where, or to any person to whom, it would not be lawful to issue the Prospectus or make the Offer. No action has been taken to register or qualify the New Shares, New Options or the Offer or otherwise to permit an offering of the New Shares and New Options in any jurisdiction other than as set out in this section.

This document is not for publication or distribution, directly or indirectly, in or into the United States of America (including its territories and possessions, any state of the US and the District of Columbia). This document is not an offer of securities for sale into the United States or to, or for the account or benefit of, US Persons. The securities referred to herein have not been and will not be registered under the US Securities Act and may not be offered or sold in the United States or to, or for the account or benefit of, US Persons. No public offering of securities is being made in the United States.

Recipients may not send or otherwise distribute this Prospectus or the Entitlement and Acceptance Form to any person outside Australia or New Zealand (other than to Eligible Shareholders).

For the purposes of Listing Rule 7.7.1(c), the Company has appointed the Manager as nominee to arrange for the sale of the Ineligible Shareholders' Entitlements and to account to them for the net proceeds of the sale (if any). The net proceeds of sale (in Australian dollars) will be distributed to the Ineligible Shareholder for whose benefits the Rights have been sold in proportion to their shareholdings as at the Record Date (after deducting the costs of the sale).

3.10 Beneficial holders, nominees, trustees and custodians

Nominees and custodians that hold Shares should note that the Offer is available only to Eligible Shareholders. The Company is not required to determine whether or not any registered holder is acting as a nominee or the identity or residence of any beneficial owners of securities. If any nominee or custodian is acting on behalf of a foreign person, that holder, in dealing with its beneficiary, will need to assess whether indirect participation by the beneficiary in the Offer is compatible with applicable foreign laws.

3.11 Allotment and application money

New Shares will be issued only after all application money has been received and ASX has granted permission for the New Shares to be quoted. It is expected that New Shares and the attaching New Options will be issued on 26 November 2019 and normal trading of the New Shares and New Options on ASX is expected to commence on 27 November 2019.

All application monies will be deposited into a separate bank account of the Company and held in trust for Applicants until the New Shares are issued or application monies returned. Any interest that accrues will be retained by the Company and will not be paid to Applicants.

3.12 New Options

Each New Option is exercisable for 1 Share at a price of 0.3 cents at any time up to 3 years after issue (**Expiry Date**). See section 7.2 for more information.

3.13 Quotation

The Company will apply to ASX within 7 days after the date of this Prospectus for quotation of the New Shares and New Options offered by this Prospectus on ASX. If ASX does not grant permission for the quotation of the New Shares or New Options within 3 months after the date of this Prospectus, or such longer period as modified by ASIC, none of the New Shares or New Options offered by this Prospectus will be allotted or issued. In these circumstances, all Applications will be dealt with in accordance with the Corporations Act including the return of all application monies without interest.

A decision by ASX to grant official quotation of the New Shares and New Options is not to be taken in any way as an indication of ASX's view as to the merits of the Company or of the New Shares or New Options.

Quotation, if granted, of the New Shares and New Options offered by this Prospectus will commence as soon as practicable after statements of holdings of the New Shares and New Options are dispatched.

3.14 Market prices of existing shares on ASX

The highest and lowest market sale price of the existing Shares, which are on the same terms and conditions as the New Shares being offered under this Prospectus, during the 3 months immediately preceding the lodgement of this Prospectus with the ASIC, and the last market sale price on the date before the lodgement date of this Prospectus, are set out below.

	3-month high	3-month low	Last market sale price
Price	\$0.005	\$0.001	\$0.002
Date	14 August 2019	1 November 2019	1 November 2019

3.15 CHES

The Company participates in the Clearing House Electronic Subregister System (**CHES**). CHES is operated by ASX Settlement Pty Ltd (**ASPL**), a wholly owned subsidiary of ASX.

Under CHESS, the Company does not issue certificates to investors. Instead, security holders will receive a statement of their holdings in the Company, including New Shares issued under this Prospectus. If an investor is broker sponsored, ASPL will send a CHESS statement.

The CHESS statement will set out the number of New Shares issued under this Prospectus, provide details of your holder identification number and give the participation identification number of the sponsor.

If you are registered on the issuer sponsored sub register, your statement will be dispatched by the Company's share registrar and will contain the number of New Shares issued to you under this Prospectus and your security holder reference number.

A CHESS statement or issuer sponsored statement will routinely be sent to Shareholders at the end of any calendar month during which the balance of their shareholding changes. Shareholders may request a statement at any other time; however, a charge may be made for additional statements.

3.16 Taxation and duty implications

The Directors do not consider that it is appropriate to give Eligible Shareholders advice regarding the taxation consequences of the Company conducting the Offer or Eligible Shareholders applying for New Shares (with attaching New Options) under this Prospectus, as it is not possible to provide a comprehensive summary of the possible taxation positions of Eligible Shareholders. The Company, its advisers and officers, do not accept any responsibility or liability for any taxation consequences to Shareholders in the Offer. Eligible Shareholders should, therefore, consult their own professional tax adviser in connection with the taxation implications of the Offer.

No brokerage or stamp duty is payable by Applicants in respect of Applications for New Shares (with attaching New Options) under this Prospectus.

3.17 Privacy

The Company collects information about each Applicant provided on an Entitlement and Acceptance Form for the purposes of processing the Application and, if the Application is successful, to administer the Applicant's security holding in the Company.

By submitting an Entitlement and Acceptance Form, each Applicant agrees that the Company may use the information provided by an Applicant on the Entitlement and Acceptance Form for the purposes set out in this privacy disclosure statement and may disclose it for those purposes to the Share Registry, the Company's related body corporates, agents, contractors and third party service providers, including mailing houses and professional advisers, and to ASX and regulatory authorities.

The Corporations Act requires the Company to include information about the Shareholder (including name, address and details of the Shares held) in its public register. The information contained in the Company's public register must remain there even if that person ceases to be a Shareholder. Information contained in the Company's register is also used to facilitate distribution payments and corporate communications (including the Company's financial results, annual reports and other information that the Company may wish to communicate to its security holders) and compliance by the Company with legal and regulatory requirements.

If you do not provide the information required on the Entitlement and Acceptance Form, the Company may not be able to accept or process your Application. An Applicant has the right to gain access to the information that the Company holds about that person subject to certain exceptions under law. A fee may be charged for access. Such requests must be made in writing to the Company's registered office.

4.3 Subscribe for all of your entitlement and apply for shortfall shares

Eligible Shareholders who take up their Entitlement in full may, in addition to their Entitlement, apply for Shortfall Shares regardless of the size of their present holding by completing the accompanying Entitlement and Acceptance Form in accordance with the instructions set out on that form. Surplus application moneys will be returned to Applicants as soon as practicable following the close of the Entitlement Offer.

Rights trading will commence on ASX on 31 October 2019. Sale of your Rights must be completed by 12 November 2019 when Rights trading is expected to cease.

Please complete the Entitlement and Acceptance Form, which accompanies this Prospectus, by inserting the number of New Shares for which you wish to accept (being less than as specified on the Entitlement and Acceptance Form) and complete the section marked "Instructions to Stockbroker" on the back of the form in respect of that part of your Entitlement you wish to sell.

Forward the form to your stockbroker together with your cheque for the total amount payable in respect of the New Shares accepted. Your stockbroker will need to ensure that the completed

Cash will not be accepted, and no receipts will be issued.

4.7 Allow all or part of your entitlement to lapse

If you are an Eligible Shareholder and do not wish to accept all or part of your Entitlement, you are not obliged to do anything.

If you take no action, your Entitlement will lapse. You will receive no benefit or New Shares, nor New Options and your Entitlement will become Shortfall Shares.

The number of Shares you hold as at the Record Date and the rights attached to those Existing Shares will not be affected if you choose not to accept any of your Entitlement.

4.8 Payment methods

BPAY

If you are paying by BPAY, refer to your personalised instructions on your Entitlement and Acceptance Form. Shareholders who wish to pay by BPAY must ensure that payment is received by no later than 5.00pm AEDT on the Closing Date.

You should be aware that your own financial institution may implement earlier cut-off times with regard to electronic payment, and you should therefore take this into consideration when making payment. It is your responsibility to ensure that funds submitted through BPAY are received by 5.00pm AEDT on the Closing Date.

If you have more than one shareholding and consequently receive more than one Entitlement and Acceptance Form, when taking up your Entitlement in respect of one of those shareholdings only use the Customer Reference Number specific to that shareholding as set out in the applicable Entitlement and Acceptance Form. Do not use the same Customer Reference Number for more than one of your shareholdings. This can result in your application monies being applied to your Entitlement in respect of only one of your shareholdings (with the result that any application in respect of your remaining shareholdings will not be recognised as valid).

The Company shall not be responsible for any postal or delivery delays or delay in the receipt of the BPAY payment.

Cheque, bank draft or money order

Alternatively, if you are paying by cheque, bank draft or money order, the completed Entitlement and Acceptance Form must be accompanied by a cheque, bank draft or money order made payable to 'Environmental Clean Technology Limited' and crossed 'Not Negotiable' for the appropriate application money in Australian dollars calculated at 0.10 cents per New Share accepted. Your cheque, bank draft or money order must be paid in Australian currency and be drawn on an Australian branch of an Australian financial institution. The Company will present the cheque or bank draft on the day of receipt of the Entitlement and Acceptance Form. You must ensure that your cheque account has sufficient funds to cover your payment, as your cheque will be presented for payment on receipt. If your bank dishonours your cheque your application will be rejected. Dishonoured cheques will not be represented.

If the amount of your cheque(s), bank draft(s) or money order(s) for application money (or the amount for which those cheque(s) or bank draft(s) clear in time for allocation) is insufficient to pay for the number of New Shares you have applied for in your Entitlement and Acceptance Form, you may be taken to have applied for such lower number of New Shares as your cleared application money will pay for (and to have specified that number of New Shares in your Entitlement and Acceptance Form) or your Application may be rejected.

The Entitlement and Acceptance Form must be received by the Company at the following addresses by no later than 5.00pm (AEDT) on the Closing Date, by post to:

Environmental Clean Technologies Limited
c/- Automic Registry Services
GPO Box 5193
Sydney NSW 2001
AUSTRALIA

4.9 Entitlement and Acceptance Form is binding

Receipt of a completed and lodged Entitlement and Acceptance Form together with a cheque, bank draft or money order for the application monies, or by making a payment in respect of an Application by BPAY, constitutes a binding offer to acquire New Shares and attaching New Options on the terms and conditions set out in this Prospectus and, once lodged, cannot be withdrawn.

By completing and returning your Entitlement and Acceptance Form with the requisite application monies, or by making a payment in respect of an Application by BPAY, you will be deemed to have represented that you are an Eligible Shareholder. In addition, you will also be deemed to have represented and warranted on behalf of yourself or each person on whose account you are acting that the law in your place of residence and/or where you have been given the Prospectus, does not prohibit you from being given the Prospectus and that you:

- (1) agree to be bound by the terms of the Offer;
- (2) declare that all details and statements in the Entitlement and Acceptance Form are complete and accurate;
- (3) declare that you are over 18 years of age and have full legal capacity and power to perform all your rights and obligations under the Entitlement and Acceptance Form;
- (4) authorise the Company and its respective officers or agents, to do anything on your behalf necessary for the New Shares (together with the attaching New Options) to be issued to you, including to act on instructions of the Company's share registry upon using the contact details set out in the Entitlement and Acceptance Form;
- (5) declare that you are the current registered holder of Shares and are an Australian or New Zealand resident, and you are not in the United States or a US Person, or acting for the account or benefit of a US Person;
- (6) acknowledge that the information contained in, or accompanying, the Prospectus is not investment or financial product advice or a recommendation that New Shares and attaching New Options are suitable for you given your investment objectives, financial situation or particular needs; and
- (7) acknowledge that the New Shares and any attaching New Options have not, and will not be, registered under the securities laws in any other jurisdictions outside Australia and New Zealand and accordingly, the New Shares may not be offered, sold or otherwise transferred except in accordance with an available exemption from, or in a transaction not subject to, the registration requirements of applicable securities laws in particular the US Securities Act.

The Entitlement and Acceptance Form does not need to be signed to be a valid application. An Application will be deemed to have been accepted by the Company upon the issue of the New Shares.

If the Entitlement and Acceptance Form is not completed correctly or if the accompanying payment of the application monies is for the wrong amount, it may still be treated as a valid application for New Shares. The Directors' decision whether to treat an acceptance as valid and how to construe, amend or complete the Entitlement and Acceptance Form is final. However, an Applicant will not be treated as having applied for more Shares than is indicated by the amount of the application monies received by the Company.

5 Effect of the Offer on the Company

The Company's financial reports for the financial year ended 30 June 2019 are available from the Company's website (www.ectltd.com.au) or the ASX website (www.asx.com.au).

- Funds raised will, in the event that more than the Minimum Subscription but less than Full Subscription is received, be allocated firstly towards the costs of the Offer, then to repayment of a short-term loan facility and then equally between the above items.

Material transactions since 1 July 2019

On 2 July 2019, the consolidated entity entered into an Asset Sale Agreement to acquire waste-to-energy (WTE) technology known as the catalytic de-polymerisation Process (CDP) capable of producing automotive diesel from a range of inputs including various waste streams, such as construction wood-waste and end-of-life plastics. Completion date for the acquisition was 8 July 2019. The new technology provides direct exposure to the waste-to-energy sector through existing project opportunities and potential integration with the Company's Latrobe Valley Coldry project. The total purchase price for the portfolio of intellectual property acquired was \$227,501 (inclusive of GST) and has been financed by a partial redraw of the securitised loan provided by Challenge Roofing and Bricks. The assets have been acquired by a subsidiary company set up for this purpose, ECT Waste-to-Energy Pty Ltd.

Since the end of the previous financial year, the Company has drawn down \$341,043 in additional debt from Innovation Structured Finance Co. LLC (Brevet). Brevet has provided a facility that allows the Company to draw down funds based on the accrued value of the tax rebate to be received under the research and development tax incentive program.

Since the end of the previous financial year, the Company has drawn down a loan of \$300,000 from LJ & K Thomson Pty Ltd. Proceeds from this loan were used to repay a loan of \$150,000 plus interest with the balance used for working capital.

5.4 Effect on the Company's income statement

The issue of New Shares and attaching New Options will have no effect on the Company's income statement for the full-year ended 30 June 2019.

5.5 Effect on the Company's capital structure

Set out below is a table showing the changes to the capital structure of the Company at the close the Offer, for both Minimum and Full Subscription, assuming that no further Shares are issued prior to the Record Date:

5.6 Effect on control of the Company

If all Shareholders do not take up their Entitlement some Shareholders may increase their voting power in the Company under the Shortfall Offer

The Directors reserve the right subject to the Corporations Act and Listing Rules to issue Shortfall Shares at their discretion, and to reject any application for Shortfall Shares or to issue a lesser number of Shortfall Shares than that applied for. In exercising their discretion subject to the Corporations Act the Directors will have regard to the prohibition on persons acquiring voting power in excess of 20%.

No Shareholder or new investor in the Company will acquire voting power in excess of 20% under the Offer.

None of the Lenders is an associate of another Lender or of the Company for the purposes of Chapter 6 of the Corporations Act. In aggregate the Lenders might acquire voting power of up to 5% in the Company, but all will individually be below that threshold even if they acquire the maximum number of New Shares under the Pre-commitments.

5.7 Dilution effect

Shareholders who do not participate in the Offer will have their holdings diluted. The tables below set out examples of the dilution effect, assuming full, minimum and 50% subscription and no further Shares are issued, or Options exercised.

6 Risk Factors

There are risks associated with an investment in the securities offered under this Prospectus. The risks associated with an investment in the securities include the risks associated with an investment in ECT.

Like other companies at a similar stage of development, ECT faces a number of specific and general risks which could adversely impact ECT's performance, and the value of its Shares. Eligible Shareholders should be aware of and consider these risks and should consult their stockbroker or other professional adviser before deciding whether to participate in the Offer.

6.1 Risks associated with shares

The New Shares entitle the holder to participate in an increase in the value of ECT, by way of an increase in the value of Shares listed on ASX, dividends that may be declared by ECT in the future, and in the assets of ECT if it is wound up.

ECT, being a company listed on ASX, is subject to the market forces that influence the broad share market trends and the price of securities of individual companies. Recent global political and economic events may cause share price fluctuations in the Australian share market and globally. Fluctuations in the price of the Shares are therefore a key risk for investors in New Shares.

6.2 Risks associated with options

Note that New Options will only be issued if an Eligible Shareholder applies for New Shares and such application is accepted by the Company.

Each New Option entitles the holder to subscribe for a Share at a price of 0.3 cents.

Because Shares are readily available on the market, a New Option is only valuable if

- If and to the extent that at a particular time the New Option allows the holder to acquire a Share at less than the market price, or
- if, and to the extent at that time there is, a prospect that the New Option will in the future, but prior to the Expiry Date, allow the holder to acquire a Share at less than the prevailing market price.

Shares are currently trading at a price of approximately 0.2 cents.

Accordingly, but for the fact that a New Option can be exercised at any time up to the Expiry Date, a New Option will have no initial value.

Because New Options will be listed on ASX, many of the risk factors applicable to Shares also apply to New Options. Fluctuations in the market price of the New Options are a key risk for investors in New Options.

6.3 Risks associated with the offer

(1) Dilution

Shareholders who do not take up their Entitlement will have their holding in the Company diluted. Details of dilution are set out in section 5.7 above.

(2) Control

The Directors have taken reasonable steps to help ensure a reasonable distribution of voting power under the Offer. However, assuming some shareholders take up their Entitlement and others do not, there is a risk that voting power may be consolidated among fewer shareholders and the interests of these Shareholders may not align with other Shareholders' interests.

6.4 Specific risks associated with the performance of ECT

(1) Financial risks

As a small technology company without an established revenue stream, ECT is reliant on the funds raised from this Offer to satisfy its working capital and technology development

requirements. If the Minimum Subscription is not satisfied and ECT is unable to secure funding from an alternative source, for example through a placement or the issue of some form of convertible funding, ECT will not have sufficient working capital to continue its operations beyond the end of the financial year ended 30 June 2020. Without the necessary working capital, ECT is likely to become insolvent and external administrators would need to be appointed to manage the affairs of the Company. Such an appointment could materially reduce or eliminate the amount that Shareholders can realise from their investment in ECT.

(2) **Market conditions**

Lignite

The demand for thermal coal has been growing in recent years, as has supply. International coal prices have suffered to an extent from oversupply. If the growth in demand for coal reduces significantly or substantial new black coal resources become available to meet international demand, the price of coal may be reduced to the point where Coldry production from any of ECT's projects will not be commercially viable. Localised specific issues such as transport and distribution of international or distant energy resources may offset partially or wholly such pricing disadvantages.

Trends in thermal coal pricing tend to track those of replacement energy sources. Known global reserves of lignite and higher-moisture brown coals exceed those of known black coal reserves (today ~51% ~49%) and significantly longer lifespans are expected for lignite and high moisture sub-bituminous coals based on current consumption ratios of these resources. Accordingly, power generators will need to consider the use of non-black coal resources to fire their power stations in the coming decades. This could enhance the commercial attractiveness of Coldry technology.

Char

The char market available to ECT is based on 3 main markets including:

- Char feedstock to BBQ briquettes
- Carburiser for the steel industry
- Soil conditioner for the agricultural sector

Currently char is supplied by both domestic producers and imported products. The Company has been in the process of evaluating the char market in Australia and has made progress in securing off take arrangements for char supplied through the proposed upgrades at its Bacchus Marsh site. Whilst the indicated demand for new char supply exceeds the targeted production from the Bacchus Marsh site, these offtake arrangements are currently not finalised, and as such the final volume, specification and prices for char may change.

Exposure to other markets

As the Company proceeds with the commercialisation of its other technologies, it will be exposed to the various industrial and commodity markets for the end products it produces and sells, either directly or indirectly. These markets may include:

- Matmor / Hydromor - exposure to iron ore and steel supply, demand and pricing; coking coal supply, demand and pricing
- CDP Waste-2-Energy – exposure to supply dynamics of input waste materials (plastics, timber and lignite) and end product markets for diesel and heavy oil products
- COHgen – exposure to lignite and catalyst supply, and hydrogen demand and pricing

The extent to which the Company is exposed to these market risks will be determined by the structure of offtake arrangements that it may develop in the future.

(3) **Protection of intellectual property rights**

A key component of the Coldry process is covered by an invention that is the subject of the International Patent Application number PCT/AU 2004/001319.

A key component of the Matmor technology is covered by an invention that is the subject of international and/or Australian patent numbers 767268 and 703821 and International and/or Australian Patent Application No. PCT/AU2017/051281

A key component of the CDP Technology is covered by an invention that is the subject of International and/or Australian Patent PCT/AU2017/000137

COHgen has yet to reach patent stage however the Company anticipates that it will shortly enter in the patent process on completion of current R&D programs.

Noting the above patent structure, ECT's success depends in part on its ability to:

- obtain and maintain commercially valuable patents;
- protect know-how, technical information and trade secrets;
- operate without infringing upon the intellectual property rights of others;
- prevent others from infringing ECT's intellectual property rights and intellectual property rights licensed to ECT; and
- apply its intellectual property in the delivery of plant that has economically viable capital and operating costs.
- Establish and maintain access (via license or other means) to the intellectual property related to external technologies to be acquired or integrated by ECT

ECT will only be able to protect its intellectual property from unauthorised use to the extent that these rights are covered by valid and enforceable patents or are effectively maintained as trade secrets.

Maintaining ECT's patent position involves complex legal and factual questions. Legal standards relating to the validity and scope of claims in respect of patents in the relevant industry are still evolving.

(4) **Commercialisation of products and market acceptance**

ECT has made significant progress in the development of the its core technologies. Key milestones that have been achieved, include:

- Engineering design and planning for proposed commercial expansion of its high-volume test facility at Bacchus Marsh targeting the production of char for domestic commercial industrial markets.
- Completion of basic engineering design delivering a comprehensive construction package for an integrated Coldry-Matmor pilot plant;
- Acquisition of CDP and revised structure for research, development, commercialisation and patent protection
- Development and planning for an integrated Coldry-CDP Latrobe Valley project including completion of feasibility study and scope for basic engineering design
- Completion of the first two phases of research and development related to the COHgen technology which targets low CO₂ emissions production of hydrogen
- Growth in commercial income from the delivery of 'Steam and Boiler Packages' (SBP)

These achievements have provided solid progress to the commercialisation of the Company's technology; however, the Directors are cognisant of the risks for the next phase of delivery. These include, but are not limited to;

- Successful implementation of the proposed expansion to the HVTF at Bacchus Marsh
- Progress with additional partners in India for implementation of a pilot scale Matmor project
- Successful funding and completion of the restructured CDP research, development and commercialisation program
- Investment in and completion of integrated Coldry-CDP Latrobe Valley project
- Continued commitment from additional clients in the SBP program

(5) **Key employee risks**

ECT has built a small team with engineering, technical, sales and marketing expertise as it relates to the Companies Coldry, Matmor, COHgen and CDP technologies. A loss of any of ECT's key personnel may delay the commercial exploitation of these technologies whilst replacement expertise is secured and trained.

The Board has a range of remuneration, retention and other programs aimed at retaining key personnel.

(6) **Production risks**

There can be no assurance given that ECT will achieve commercially viable levels or production from its proposed projects. Additionally, there is no assurance that even if ECT produces commercially viable products, there will be a market for the sale and supply of these products. Accordingly, ECT may not be able to recoup the costs of production or generate sufficient revenue for the Company to be profitable.

(7) **Risk as to profitability**

Anticipated or estimated possible production levels from key projects may not be achieved, and even if achieved, may not result in the Company being profitable. The ability of ECT to pay dividends will depend on it generating revenue and then deriving sufficient free cash flow to be able to do so. As stated above, market acceptance of ECT's technologies and products is dependent in part on the successful completion of the relevant R&D programs, commercialisation programs and related offtake arrangements. If these processes and activities are not successful, ECT may be unable to generate the necessary revenue for ECT to continue as a going concern in the future.

(8) **Dependency on others**

The future success of ECT will be in part dependent on the competency of organisations chosen from time to time to be operators of ECT's technology projects and on each operator's capacity to manage day to day operations. ECT's future growth will also be dependent in part upon engagement of management capable of managing and expanding the Company's operations beyond the present anticipated pilot scale and commercial projects.

(9) **Contract risks**

ECT is entering into significant contracts with a number of industry organisations.

The contracts that ECT enters into will carry risks associated with the performance by the other parties to those contracts of their obligations as to the timing and quality of work performed.

ECT intends to enter into service agreements with operators and sub-contractors for the construction and operation of its proposed pilot and commercial plants. Sale of products will be affected through various marketing and off-take agreements. A number of the necessary contractual relationships are yet to be formalised.

(10) **Insurance risk**

As a result of the recent fire at its Bacchus Marsh facility, the Company is currently undertaking a claims process with its insurers. ECT has maintained comprehensive insurance for plant and equipment, product stockpiled at the site, and the costs of site remediation. The company is reliant on its insurance claims to cover the costs associated with the repair and replacement of affected plant and equipment, costs associated with any stock damaged or loss, and the costs associated with the remediation of the site including disposal of debris. Where the proceeds of the claims are less than that required to bring the site back to operational status, ECT will have to provide alternative sources of funding which may impact on the timeframes associated with activities planned under this Prospectus.

6.5 General risks associated with the performance of ECT

(1) Economic conditions

The performance of ECT may be significantly affected by changes in economic conditions, and particularly conditions that affect the coal mining, power generation and broader energy sector. Profitability of the business may be affected by factors such as market conditions, interest rates, inflation and global commodity prices.

(2) Geo-political factors

ECT may be affected by the impact that geo-political factors have on the various national economies or the Australian economy or on financial markets and investments generally or specifically.

(3) Competition risk

The structure of the markets in which ECT operates may alter or new competitors may enter some or all of those markets, resulting in increased competition. Increased competition may result in lower prices, operating margins and profit for ECT.

(4) Operational risks

Other risk factors include those normally found in conducting business, including litigation resulting from the breach of agreements or in relation to employees or contractors (through personal injuries, industrial matters or otherwise) or any other cause, including strikes, loss of service of key management or operational personnel, non-insurable risks, delay in resumption of activities after reinstatement following the occurrence of an insurable risk and other matters that may interfere with the business or trade of ECT.

(5) Currency exchange risks

Revenue and expenditure in overseas jurisdictions are subject to the risk of fluctuations of international currency exchange markets. Foreign taxes, limitations on repatriation of earnings, compliance with foreign accounting and business laws and cultural differences carry a certain amount of risk.

(6) Changes to Australian and foreign legislation and policy

There may be changes to the *Income Tax Assessment Act 1997* (Cth), the Corporations Act or other federal or state government legislation or policy, which may be detrimental to participants or investors in the resources and related industries.

ECT may be affected by changes to foreign government policies and legislation including those relating to property, the environment, superannuation, taxation, the regulation of trade practices and competition, government grants and incentive schemes.

7 Rights and liabilities attaching to Securities

7.1 Rights and liabilities attaching to Shares

The rights attaching to Shares are set out in the Constitution, a copy of which is available for inspection at ECT's registered office during normal business hours or at www.ectltd.com.au. Rights are affected by the Corporations Act, the ASX Listing Rules and statute and general law.

The following is a summary of the more significant rights and liabilities attaching to the Shares. This summary is not exhaustive and does not constitute a definitive statement of the rights and liabilities of Shareholders. To obtain such a statement, persons should seek independent legal advice.

(1) Voting

Subject to any rights and restrictions for the time being attached to any class or classes of Shares, at general meetings of Shareholders or, classes of Shareholders:

- (a) each Shareholder entitled to vote may vote in person or by proxy, attorney or representative; and
- (b) on a show of hands, every person present who is a shareholder or a proxy, attorney or representative of a Shareholder has one vote; and
- (c) on a poll, every person present who is a shareholder or a proxy, attorney or representative of a shareholder shall, in respect of each fully paid Share held by him, or in respect of which he is appointed a proxy, attorney or representative, have one vote for the Share but in respect of partly paid Shares, shall have such number of votes as bears the same proportion which the amount paid (not credited) is of the total of such Shares registered in the Shareholder's name as the amount paid (not credited) bears to the total amounts paid and payable (excluding amounts credited).

(2) General meetings

Each shareholder is entitled to receive notice of and to be present in person, or by proxy, attorney or representative to attend and vote at general meetings of ECT and to receive all notices, accounts and other documents required to be sent to shareholders under the Constitution, the Corporations Act or the ASX Listing Rules.

A shareholder may requisition meetings in accordance with the Corporations Act and the Constitution.

(3) Election of Directors

At every annual general meeting one third of the Directors (rounded up to the nearest whole number) must retire from office. Any Director who would have held office for more than 3 years if that Director remains in office until the next general meeting must retire. These retirement rules do not apply to certain appointments including the Managing Director.

(4) Dividends

The Directors may from time to time declare a dividend to be paid to the Shareholders entitled to the dividend.

Subject to the rights of any preference Shareholders and to the rights of the holders of any Shares created or raised under any special arrangement as to dividends, the dividend as declared shall be payable on all Shares according to the proportion that the amount paid (not credited) is of the total amounts paid and payable (excluding amounts credited) in respect of such Shares in accordance with Part 2.5 of Chapter 2H of the Corporations Act. The Directors may from time to time pay to the shareholders any interim dividends that they may determine.

No dividend shall be payable except out of profits. A determination by the Directors as to the profits of the Company shall be conclusive.

No dividend shall carry interest as against the Company.

In addition, the Company must comply with section 254T of the Corporations Act when declaring a dividend.

(5) **Transfer of shares**

Subject to the Constitution, Shareholders may transfer any Share held by them by an:

- ASX Settlement, Transfer or any other method of transferring or dealing in Shares introduced by ASX or operated in accordance with the ASX Settlement Operating Rules or Listing Rules and in any such case recognised under the Corporations Act; or
- instrument in writing in any usual or common form or in any other form that the Directors approve.

(6) **Future issue of shares**

Without prejudice to any special rights previously conferred on the holders of any existing Shares or class of Shares, unissued Shares shall be under the control of the Directors and, subject to the Corporations Act, the Listing Rules and the Constitution, the Directors may at any time issue such number of Shares either as ordinary Shares or Shares of a named class or classes (being either an existing class or a new class) at the issued price that the Directors determine and with such preferred, deferred, or other special rights or such restrictions, whether with regard to dividend, voting, return of capital or otherwise, as the Directors shall, in their absolute discretion, determine.

(7) **Issue of options**

Subject to the Listing Rules, the Directors may at any time and from time to time issue options in the Company on such terms and conditions as the Directors shall, in their absolute discretion determine.

(8) **Issue of preference shares**

Subject to the Listing Rules and the Corporations Act, the Company may issue preference Shares:

- (a) that are liable to be redeemed whether at the option of ECT or otherwise; and
- (b) including, without limitation preference Shares of the kind described above in accordance with Schedule 1 of the Constitution.

(9) **Entitlement to share certificate and option certificate**

- (a) A person whose name is entered as a Shareholder in the Register of Shareholders is entitled without payment to receive a Share certificate or notice (as the case may be) in respect of the Share under seal in accordance with the Corporations Act.
- (b) If the securities of the Company are CHES Approved Securities and held in uncertificated mode, then the Company shall allot such CHES Approved Securities and enter them into the Shareholder's uncertificated holding in accordance with the Listing Rules and the ASX Settlement Operating Rules. In these circumstances the Shareholder will not receive a Share certificate.
- (c) Where the Directors have determined not to issue share certificates or to cancel existing Share certificates, a Shareholder shall have the right to receive such statements of holdings of the Shareholder as are required to be distributed to a Shareholder under the Corporations Act or the Listing Rules.
- (d) Where a Share certificate is lost, worn out or destroyed, the Company shall issue a duplicate certificate in accordance with the requirements of section 1070D of the Corporations Act and the Listing Rules.

(10) **Variation of rights**

If at any time the share capital of the Company is divided into different classes of Shares, the rights attached to any class (unless otherwise provided by the terms of issue of the Shares of that class) may be varied, whether or not the Company is being wound up, with

the consent in writing of the holders of three quarters of the issued Shares of that class, or if authorised by a special resolution passed at a separate meeting of the holders of the Shares of the class. Any variation of rights shall be subject to Part 2F.2 of Chapter 2F of the Corporations Act. The provisions of the Constitution relating to general meetings shall apply so far as they are capable of application and with necessary alterations to every such separate meeting except that a quorum is constituted by two persons who together hold or represent by proxy not less than one-third of the issued Shares of the class.

(11) **Winding up**

The Company has only one class of shares on issue, being ordinary shares. Each ordinary share ranks equally in the event of liquidation.

If the Company is wound up, the liquidator may, with the authority of a special resolution, divide among the Shareholders in kind the whole or any part of the property of the Company, and may for that purpose set such value as he or she considers fair upon any property to be so divided, and may determine how the division is to be carried out as between the Shareholders or different class of Shareholders.

The liquidator may, with the authority of a special resolution, vest the whole or any part of any such property in trustees upon such trusts for the benefit of the contributories as the liquidator thinks fit, but so that no Shareholder is compelled to accept any Shares or other securities in respect of which there is any liability.

(12) **Shareholder liability**

As the Shares offered under the Prospectus are fully paid Shares, they are not subject to any calls for money by the Directors and will therefore not become liable for forfeiture.

(13) **Alteration to the constitution**

The Constitution can only be amended by a special resolution passed by at least three quarters of shareholders present and voting at the general meeting. At least 28 days written notice specifying the intention to propose the resolution as a special resolution must be given.

(14) **ASX Listing Rules**

Because ECT is listed on the official list of ASX, notwithstanding anything in the Constitution, if the ASX Listing Rules prohibit an act being done, the act must not be done. If the ASX Listing Rules require an act to be done or not to be done, authority is given for that act to be done or not to be done, and if a provision is required in the Constitution by the ASX Listing Rules, the Constitution will be treated as containing that provision. If any provision of the Constitution becomes inconsistent with the ASX Listing Rules, the Constitution will be treated as not containing that provision to the extent of the inconsistency.

- (c) If there is a Bonus Issue to the holders of Shares in the Company then the number of Shares over which each Option is exercisable will be increased by the number of Shares which the Holder would have received under the Bonus Issue if the Option had been exercised before the record date for the Bonus Issue.

8 Additional Information

8.1 Continuous disclosure

The Company is a 'disclosing entity' (as defined in section 111AC of the Corporations Act) for the purposes of section 713 of the Corporations Act and, as such, is subject to regular reporting and disclosure obligations. Specifically, like all listed companies, the Company is required to continuously disclose any information it has to the market which a reasonable person would expect to have a material effect on the price or the value of the Company's securities. The New Shares which will be issued pursuant to this Prospectus are in the same class of Shares that have been quoted on the official list of ASX during the 12 months prior to the issue of this Prospectus.

This Prospectus is a "transaction specific prospectus" to which the special content rules under section 713 of the Corporations Act apply. That provision allows the issue of a more concise prospectus in relation to an offer of securities in a class which has been continuously quoted by ASX in the three months prior to the date of the prospectus. In general terms "transaction specific prospectuses" are only required to contain information in relation to the effect of the issue of New Shares on the Company and the rights attaching to the New Shares. It is not necessary to include general information in relation to all of the assets and liabilities, financial position, profits and losses or prospects of the issuing company.

This Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to ASX and does not include all of the information that would be included in a prospectus for an initial public offering of securities in an entity that is not already listed on a stock exchange. Investors should therefore have regard to the other publicly available information in relation to the Company before making a decision whether or not to invest.

Having taken such precautions and having made such enquires as are reasonable, the Company believes that it has complied with the general and specific requirements of ASX as applicable from time to time throughout the relevant period which required the Company to notify ASX of information about specified events or matters as they arise for the purpose of ASX making that information available to the stock market conducted by ASX.

The Company confirms that, to the extent to which it is reasonable for investors and their professional advisers to expect to find the information in this Prospectus, that:

- (1) there is no other information that has been excluded from a continuous disclosure notice in accordance with ASX Listing Rules other than those contemplated in this Prospectus; and
- (2) there is no information that investors and their professional advisers would reasonably require for the purpose of making an informed assessment of:
 - (a) the assets and liabilities, financial position and performance, profits and losses and prospects of the Company; and
 - (b) the rights and liabilities attaching to New Shares.

Information that is already in the public domain has not been reported in this Prospectus other than that which is considered necessary to make this Prospectus complete.

The Company, as a disclosing entity under the Corporations Act states that:

- (1) it is subject to regular reporting and disclosure obligations;
- (2) copies of documents lodged with the ASIC in relation to the Company (not being documents referred to in section 1274(2)(a) of the Corporations Act) may be obtained from, or inspected at, the offices of the ASIC; and
- (3) it will provide a copy of each of the following documents, free of charge, to any person on request between the date of issue of this Prospectus and the Closing Date:

- (a) the annual financial statements of the Company for the financial year ended 30 June 2019 being the last financial statements for a financial year, of the Company lodged with the ASIC before the issue of this Prospectus;
- (b) if applicable any half-year financial report lodged with ASIC by the Company after the lodgement of that annual report and before the lodgement of this Prospectus; and
- (c) any continuous disclosure notices given by the Company after the lodgement of the financial statements referred to in paragraph (a) and before the lodgement of this Prospectus with ASIC.

Copies of all documents lodged with the ASIC in relation to the Company can be obtained free of charge from the Company's registered office during normal office hours or from ASX's website at www.asx.com.au or ECT's website at www.ectltd.com.au.
