## ASX Announcement

### **PolyNovo granted US Department of Defence and other access to Federal supply contracts**

PolyNovo has been granted access to the US Department of Defence (DoD) contracts through a Defence Acquisition and Program Administration (DAPA) and Veteran's Affairs (VA) contract. This access allows DoD facilities to purchase NovoSorb BTM for the treatment of serving military, veteran's, and their families. DoD health facilities, anywhere in the world, will now be able to purchase NovoSorb BTM.

In addition, PolyNovo has been granted access to several other United States Government contracts. The US Government will provide BTM access to Medicare/Medicaid patients under the Federal Supply Services (FSS) contract. Importantly, this enables both inpatient and outpatient treatments using BTM to be reimbursed.

CEO Paul Brennan said; *"This access offers significant opportunity for NovoSorb BTM in a large network of military health care facilities in the US and globally. We are honoured to be able to supply the US armed forces, their families and veterans with lifesaving and life changing products. The US military have been very supportive of PolyNovo's work with BARDA so it is very satisfying to now have the opportunity to supply the military with our products."*

Chairman David Williams said: *"We are pleased that the reimbursed FSS access to Medicare/Medicaid patients will allow BTM to be used on patients who might not otherwise be able to access the products. The BTM is such an important product that we want it to be available as widely as possible."*
