### **About dorsaVi**

dorsaVi (ASX: DVL) is an ASX company focused on developing innovative motion analysis device technologies for use in elite sports, occupational health and safety and clinical applications. dorsaVi believes its wearable sensor technology enables – for the first time – many aspects of detailed human movement and position to be accurately captured, quantified, and assessed outside a biomechanics lab, in both real-time and real situations for up to 24 hours.

Our technology has applications across three sectors:

- **Clinical:** dorsaVi is transforming the management of patients with its clinical solutions - ViMove, ViMove2 and Professional Suite – which provide objective assessment, monitoring outside the clinic and immediate biofeedback. dorsaVi is currently used by medical and physiotherapy practices globally.
- **Elite Sports:** ViPerform is allowing coaches and medical teams managing elite athletes and teams to screen athletes and provide objective evidence for decisions on return to play, measure biomechanics and provide immediate biofeedback out on the field, tailor and track training programs and optimise technique and peak performance. ViPerform is being used in the US by the National Basketball Association (NBA), the Major Soccer League (MLS) and the National Football League (NFL), by the AFL and NRL clubs, Cricket Australia, and the Australian Institute of Sport (AIS) in Australia, and by Barclays Premier League (EPL) clubs, England and

Wales Cricket Board and the Board of Control for Cricket in India as well as various Olympic teams and athletes internationally.

- **OHS:** dorsaVi enables employers to assess risk of injury for employees as well as test the effectiveness of proposed changes to workplace design, equipment or methods based on objective evidence. dorsaVi has been used by major corporations including Sodexo, London Underground, Vinci Construction, Crown Resorts, Caterpillar (US), Monash Health, Coles, Woolworths, Toll, Toyota, Orora (formerly Amcor), Crown and BHP Billiton.
