ASX ANNOUNCEMENT

JAYEX HEALTHCARE SIGNS LICENCE AGREEMENT TO SELL LIFESPOT HEALTH'S EXISTING AND FUTURE TELEHEALTH PRODUCTS

HIGHLIGHTS

- Jayex has executed a Software Licence Agreement with Lifespot Health to market and sell its existing BodyTel software platform and integrated Bluetooth technology products and services
- Lifespot Health and Jayex Healthcare will collaborate to jointly develop additional telehealth products, Jayex has rights to sell these products under this agreement
- The Software Licence Agreement is for an initial term of 5 years with one additional 5 year extension and is exclusive for the United Kingdom, the Company's largest existing market, and non-exclusive for the growing Australian market
- Integration of BodyTel and Jayex Connect platform creates a powerful remote monitoring capacity for GP clinics – an increasing area of focus as a result of COVID-19
- The BodyTel software platform and integrated Bluetooth technologies allow patients to monitor chronic diseases and critical conditions with their mobile devices. Functionality includes medical diagnostic and monitoring, digital enabled drug delivery systems

Jayex Healthcare Limited (**ASX: JHL**) (**Jayex** or **Company**), is delighted to announce that it has executed a Software Licence Agreement with Lifespot Health Limited (**ASX: LSH**) (**Lifespot Health**) under which it has been granted an exclusive licence for the United Kingdom and a non-exclusive licence for Australia and New Zealand. The Software Licence Agreement will grant the Company the rights to market and sell Lifespot Health's existing BodyTel software platform and integrated Bluetooth technology products and services along with all future telehealth products and services developed.

Both Jayex and Lifespot Health recognise the importance of providing remote monitoring capacity to GP clinics in a post COVID-19 world. The Company is looking forward to integrating the BodyTel capability into the Jayex Connect Platform enhancing the capacity for the 20,000+ GP's in the Jayex UK ecosystem to care for their patients.

Nick Fernando, CEO of Jayex Healthcare said: "Lifespot's BodyTel platform is a recognised and well-established telehealth offering which is giving GP's and patients access to smarter tools enabling the remote monitoring and management of chronic disease. By adding this capability to our market-leading Jayex Connect platform we will

Jayex Healthcare Limited
(ACN 119 122 477)

Level 4, 100 Albert Road, South Melbourne, VIC, 3205

have one of the most comprehensive patient management systems available to GPs and respond to the increasing demand for telehealth and remote patient management options.”

KEY TERMS OF THE LICENCE AGREEMENT

Under the Licence Agreement, Lifespot Health has granted the Company an exclusive licence for the United Kingdom and a non-exclusive licence for Australia and New Zealand, to market and sell Lifespot Health’s existing developed BodyTel software platform and integrated Bluetooth technology products and services as well as future telehealth products and services developed during the term of the agreement.

The BodyTel software platform and integrated Bluetooth technologies comprise medical diagnostic and monitoring technology and digitally enabled drug delivery systems to combine sensor technology with self-learning algorithms allowing patients to monitor chronic diseases and critical conditions with their smartphones.

The Company looks forward to working collaboratively with Lifespot Health in pursuing this exciting opportunity in the rapidly developing global medical technology market.

About Lifespot Health Limited – www.lifespot-health.com

Lifespot Health, an ISO 13485 certified company, operates within the digital health sector and is focused on developing and commercialising medical diagnostic and monitoring technology. The Company’s systems and applications aim to bring efficiencies in the medical system to clients and end users, saving time and money.

Lifespot Health integrates software to combine enhanced sensor technology with self-learning algorithms, allowing patients and healthcare professionals to efficiently monitor chronic diseases and critical conditions on their personal and professional digital devices including Smartphone, iPad / Tablets and desktop.
