

The logo for RENERGEN, featuring the word in a bold, white, sans-serif font. The letter 'R' is stylized with a yellow square at its top-left corner, and the letter 'N' has a yellow square at its bottom-right corner. The background is a dark, high-contrast image of a celestial body, possibly a moon or planet, showing a horizon line and a heavily cratered surface.

RENERGEN

FUTURE ENERGY, TODAY

Quarterly Activity Report

June 2022

Introduction

Herewith the quarterly activities report for the quarter ended 31 May 2022. Please note that all the company's Production Right areas remained fully owned by our 100% owned subsidiary Tetra4, however the Company reached conditional agreement to sell a 10% interest in Tetra4 to the Central Energy Fund (CEF) as announced to market on the 28th March 2022. The Ivanhoe due diligence is ongoing.

Highlights

Significant highlights from this quarter, in chronological order, include:

 US\$ 500m debt retainer signed with US DFC

 US\$ 600m debt offer letters from 5 banks

 Commencement of commissioning

 Phase 1 construction update

 New Gas Strike, Gandalf

US\$500m Debt Funding for Phase 2 From US DFC, Additional Lenders Too

The US Development Finance Corporation (“DFC”) has conducted a preliminary screening of the proposal to fund Phase 2 project with up to US\$ 500m of senior debt, along with 5 additional lenders offering a cumulative amount of c. US\$ 600m over the DFC amount

- Renegen recently announced signing a retainer letter with the US Development Finance Corporation (“DFC”) for a loan of up to US\$ 500mn after successfully passing screening
- DFC is already a lender for Phase 1
- In addition to the DFC, there are three other lenders that have provided letters of interest to a cumulative amount of up to US\$ 600m of debt, co-lending beside the DFC
- On this basis, Renegen is targeting a 65% debt level for the Phase 2 project
- This is a major de-risking event, giving investors certainty on the level of dilution in raising the funds for the construction of Phase 2

Commencement of Commissioning and Phase 1 Construction Update

Completed commissioning items include:

- Alarm systems and monitoring
- All lines insulated
- Plant filled with pure helium, with full leak detection tests done showing no leaks throughout
- On site laboratory complete
- Flare systems ready
- Main compressor building complete

Drilling Update – New Gas Strike

- **Gandalf** (New Well Intersected): blowing at 90,000 standard cubic feet on initial gas intersection at a depth of 480m. The target zone is located at 1,200m, so drilling has recommenced and is anticipated to be complete by early August
- **Balrog**: casing and cementation is complete. The cement is being drilled out, following which the well will be deepened to intersect deeper structures. Anticipated completion by the middle to end of July

Other Items of Business

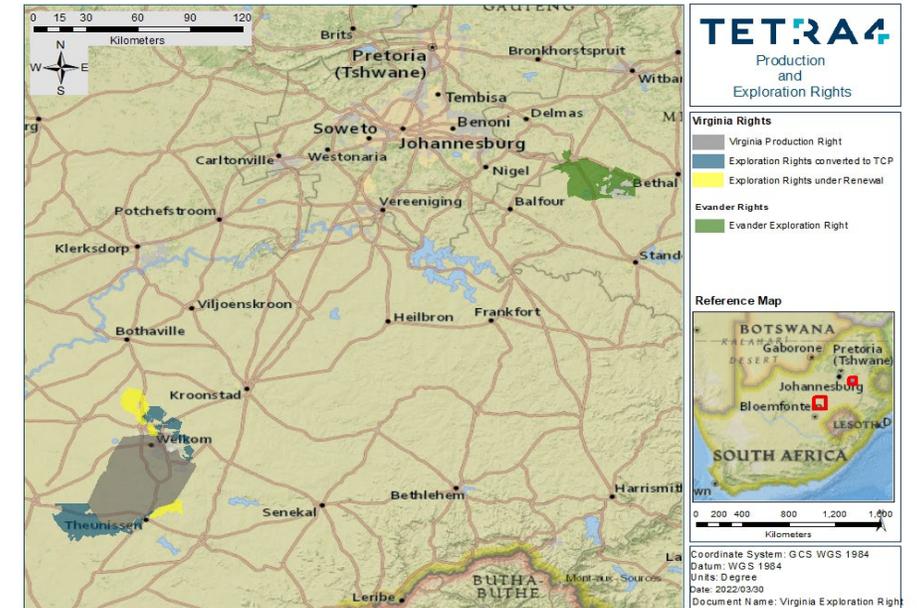

As of 31 May 2022, Renergen has an interest in the following Exploration Rights (ER's) and Technical Cooperation Permits (TCP's) in the Free State Province and Mpumalanga, South Africa.
