STRONG DEMAND FOR NITRILE GLOVES CONTINUES TO SUPPORT ITS PRICE

Historical and Forecasted Global Latex/Nitrile/ Vinyl Gloves ASP, 2015 – 2025E (USD/Thousand pieces)

Source: Frost & Sullivan Report, October 2021

- Based on Frost & Sullivan Report, the sharp increase in ASP of disposable gloves in 2020 is due to the following:
 - high demand of disposable gloves,
 - higher raw materials price
 - lower production capacity in light of the COVID-19 pandemic
- As a result, the average price reached a peak in 2021 but it is expected to slowly normalize and remain slightly higher than pre-COVID level.
- At the same time, according to the Malaysian Rubber Glove Manufacturers Association (MARGMA), they expect there will be a shortfall of 80 billion pieces of gloves in 2021 as glove demand continue to outstrip global supply.
- Moving forward, demand is likely to slowly stabilize post pandemic. However, due to ongoing shortage of gloves, MARGMA expect glove demand will remain elevated with an estimated growth of 12% - 15% p.a. as compared to 8% -10% p.a. recorded pre-pandemic.
