FUTHER INFORMATION

VOLT RESOURCES LTD is a graphite exploration company listed on the Australian Stock Exchange under the ASX code: VRC. The company is focused on the exploration and development of its existing wholly-owned Namangale graphite project in Tanzania. As of December 2016, the Namangale project is the largest JORC resource deposit in Tanzania with 461Mt @ 4.9% TGC, with 22.6Mt of contained graphite. The project holds outstanding super jumbo and jumbo flake size distribution and high purity of up to 99.6% TGC. The Namangale project is ideally located near to critical infrastructure with sealed roads running through the tenement, mains power within close proximity and ready access to the deep-water port of Mtwara 140km away.
