Notice of Annual General Meeting

NOTICE OF ANNUAL GENERAL MEETING

Iluka Resources Limited
Annual General Meeting
Friday 28 April 2017, commencing 9.30am (WST)
Perth Convention and Exhibition Centre

Dear Shareholder,

I am pleased to invite you to Iluka Resources Limited's 2017 Annual General Meeting. The Meeting will be held on Friday 28 April 2017 at the Perth Convention and Exhibition Centre. Details of the business of the Meeting are contained from page 7. The following pages include a summary of the key attributes of the 2016 year; a financial summary, including information on the balance sheet; and your Company's dividend framework and approach. Detailed information is available in the Iluka Annual Report and the Iluka Review accessible at www.iluka.com.

Your participation in the Annual General Meeting is important to Iluka and a valuable opportunity for the Board to consider with shareholders the performance of the Company.

During 2016, a number of matters which will be of interest to you include:

- the impact of continued subdued zircon market conditions on the financial performance of the business, as reflected by lower zircon sales and zircon prices. Your Board is cautiously optimistic that market conditions for the Company's products may be beginning to improve after an extended period of bottom-of-cycle market conditions;
- the appointment in September 2016 of Tom O'Leary as Iluka's new Managing Director and CEO;

- consistent with previously announced strategy, securing of a new long-life, high quality reserve and resource base for the Company, through the acquisition of Sierra Rutile Limited in December 2016;
- the review by the new Managing Director of the Company's current project set, exploration activities and associated resourcing levels and cost base resulting in a refocus on fewer, high quality, near-term value accretive opportunities, resulting in an approximate \$20 million reduction in non-production cash costs expected in 2017, relative to 2016 on a like-for-like basis;
- as a consequence of the Managing Director's business review and priorities, \$201 million pre-tax of non-cash impairments in relation to idled property, plant and equipment, project development costs and evaluation expenditure;
- an increase in rehabilitation provisions of \$45 million (pre-tax), mainly related to the now permanently closed United States' operations and projects;
- a review of Ore Reserves in the context of the acquisition of the Sierra Rutile operation as well as the Company's current 10 year mine plan. This review led to a reclassification of approximately 27 per cent of Iluka's (non-Sierra Rutile) Reserves to Mineral Resources; and
- the continued commitment to the highest standards of business sustainability, with a focus in the areas of health, personal and process safety, community engagement, environmental performance, land management and remediation.

Financial performance

Iluka's full year financial result was a loss of \$224 million after tax. The loss included non-recurring items of \$244 million pre-tax or \$183 million after tax, as detailed on page 5. The underlying result before adjustments was also influenced by lower mineral sands revenues, mainly attributable to lower received product prices and a lower contribution from the Mining Area C iron ore royalty. Iluka generated modest free cash flow of \$47 million. After the assumption of Sierra Rutile net debt of \$80 million, Iluka ended the year with net debt of \$506 million.

In the context of the Company's potential investment opportunities, including Cataby and the Sierra Rutile expansion opportunities, the Directors have determined no final dividend will be declared for 2016. Iluka's interim dividend was 3.0 cents per share, fully franked. On a cumulative basis since 2010, the payout ratio has been 66 per cent.

New Managing Director

Tom O'Leary commenced as Iluka's Chief Executive Officer on 5 September 2016 and was invited to join the Board as Managing Director in October 2016. Tom succeeded David Robb, who served as Managing Director from October 2006 until September 2016. Tom has a depth of business development, major transactional and capital deployment experience and has also led complex operating businesses. Importantly, Tom has committed to providing continuity in terms of the capital disciplines and capital allocation decisions that have been a distinguishing feature of Iluka.

Tom has pursued the completion of the Sierra Rutile acquisition with professionalism and he is focussed on ensuring that the integration and operational performance objectives are delivered. Tom has taken early and valuable steps to focus the business and reduce costs, to review asset configurations and operating regimes for the Company, and has evaluated the timing and nature of the organic project options the Company has available to it.

Sierra Rutile acquisition

Iluka acquired Sierra Rutile Limited in 2016. Sierra Rutile is a large, long life rutile deposit and provides Iluka with a significant addition to its strong position in high grade titanium dioxide products.

Your Directors are cognisant that acquiring an operating mine in West Africa represents a change in the Company's risk profile. During due diligence, careful attention was given to the risks identified with such an acquisition and to the risk mitigation plans and arrangements that were required to ensure an effective integration process, involving senior Iluka management and drawing on the skilled and experienced local Sierra Rutile workforce. Efforts continue to focus on integration, safety and operational improvements and on developing dependable and enduring relationships with both the local community, as well as with government.

Business sustainability

The safety of our people and the integrity of Iluka's operations, including the newly acquired Sierra Rutile operation, remain the priority focus of the Company from Board level to mine face. In 2015 Iluka committed to progressively aligning its sustainability practices with the International Council on Mining and Metals (ICMM) Framework for Sustainable Development. This is particularly relevant to Iluka's increasing international activities. Iluka has separated the sustainability content from the 2016 Iluka Review into a more detailed sustainability report to be released in April. This report will demonstrate Iluka's progressive alignment with ICMM and be in accordance with the Global Reporting Initiative public reporting guidelines.

Board and governance

On Board and governance matters, the Company's governance and risk management practices have been reviewed and, where necessary, enhanced. Several areas, such as anti-bribery and corruption, have been enhanced through an external professional review.

Board evolution continued during the year with the retirement in December 2016 of Gavin Rezos, who had served as a non-executive Director since 2006 and since 2014 as an Iluka-appointed Director to the Board of MetalYSIS Ltd, the UK based titanium technology Company in which Iluka has a significant shareholding. On behalf of the Directors, I'd like to acknowledge and thank Gavin for his contributions to Board decision-making and effectiveness over his time on the Board.

Finally, on behalf of my fellow Directors, I would like to acknowledge the valuable contribution David Robb made as Managing Director of Iluka in nearly a decade of service. In what was yet another tough year for the Company, the sustained commitment and contribution of Iluka's people is both acknowledged and greatly appreciated. And by no means least, I would like to thank our shareholders for their continuing interest and support for the business.

Greg Martin

Chairman

¹ Underlying Group EBITDA excludes non-recurring adjustments including impairments, Sierra Rutile Limited transaction costs, changes to rehabilitation provisions for closed sites. Underlying EBITDA also excludes Iluka's share of Metalys Ltd's losses, which are non-cash in nature.

1. Mineral sands revenue

Mineral sands revenue declined by 11.4 per cent to \$726.3 million. Zircon/rutile/synthetic rutile (Z/R/SR) revenue was 5.8 per cent lower at \$696.8 million, primarily reflecting lower zircon prices, with sales volumes also slightly lower. Rutile and synthetic rutile sales volumes increased in 2016 and prices were relatively stable. Ilmenite and by-product revenue declined 63.2 per cent to \$29.5 million as Iluka increased its internal use of mined ilmenite for synthetic rutile production.

2. Underlying mineral sands EBITDA¹

Underlying mineral sands EBITDA declined 55.5 per cent to \$103.0 million. This result reflects the combination of lower zircon revenue and increased costs across several business areas including restructure and idle capacity charges (relating to operational settings at Jacinth-Ambrosia and the United States) and resource development costs (associated with Balranald development evaluation). Cash production costs were lower in 2016, reflecting lower operational settings, in line with market conditions.

3. Mining Area C EBITDA

Royalty income from Mining Area C declined 22.9 per cent to \$47.5 million. 2015 royalty income included a one-off payment of \$10.4 million associated with modification of the royalty agreement with BHP Billiton. In 2015 capacity payments of \$3.0 million were received; nil in 2016. Net royalty income in 2016, excluding the one-off payment, was slightly lower due to lower iron ore sales volumes.

4. Underlying Group EBITDA¹

Underlying Group EBITDA decreased 48.7 per cent to \$150.5 million, reflecting factors referred to above.

5. Net loss after tax

The 2016 net loss includes the impact of impairment charges and increased rehabilitation provisions. These are detailed as follows.

Non-recurring items - asset impairments

Non-cash impairments of \$201.0 million pre-tax (\$140.7 million after-tax).

The impairments relate to the following assets:

- idle and surplus equipment in the Murray Basin of \$156.0 million;
- \$20.4 million of capitalised costs associated with feasibility work for the previous conventional development approach for the Balranald deposit in New South Wales; and
- \$24.6 million related to exploration and evaluation assets previously capitalised and mine reserves in the Perth and Murray Basins.

Rehabilitation provision increase

Provisioning for rehabilitation and mine closure activities increased by \$44.8 million to \$528.1 million. For Iluka's discontinued United States' operations, now undergoing rehabilitation, the provision has been increased by US\$30.2 million or \$40.9 million. Of the \$44.8 million increase, \$42.6 million relates to closed sites, which is charged against the profit and loss statement, and \$2.2 million relates to open sites, which is reflected on the balance sheet.

An income tax benefit of \$53.7 million on a pre-tax loss of \$277.7 million reflects no tax benefit in respect of United States operating loss, nor for international exploration.

6. Cash flow

Operating cash flow of \$137.3 million and full year free cash flow of \$47.3 million.

Lower 2016 operating cash flow reflects lower mineral sands EBITDA.

Higher capital expenditure in 2016, including \$19.0 million for increased equity in Metalys Ltd (Iluka's equity stake is now 28.1 per cent), contributed to reduced free cash flow.

Changes to cash flow over recent years also reflect the utilisation of trade purchase facilities, entered into late 2014, affecting the timing of cash collections from customers.

7. Net (debt) cash

Net debt increased to \$506.3 million following the acquisition of Sierra Rutile in December 2016. Iluka assumed Sierra Rutile's net debt of \$79.7 million. Total acquisition and transaction costs were \$389.5 million.

8. Return on capital and return on equity

Return on capital was (18.3) per cent and return on shareholders' equity was (17.1) per cent, reflecting a reported loss inclusive of non-recurring items.

NOTICE OF ANNUAL GENERAL MEETING

Balance sheet and dividend framework

As at 31 December 2016 Iluka had total facilities of \$1,015.4 million.

Iluka recorded a net debt of \$506.3 million.

Iluka has a Multi Optional Facility Agreement (MOFA) which comprises a series of five year unsecured bilateral revolving credit facilities with several domestic and foreign institutions. Drawings under the MOFA at 31 December 2016 were \$611.2 million (2015: \$54.9 million). Undrawn MOFA facilities at 31 December 2016 were \$404.2 million (2015: \$955.0 million).

Of the above interest-bearing liabilities, \$611.2 million is subject to an effective weighted average floating interest rate of 2.7 per cent (2015: interest-bearing liabilities of \$54.9 million at 2.0 per cent).

Note 18 of Iluka's Annual Report provides details of the maturity profile and interest rate exposure.

Iluka assumed Sierra Rutile net debt of \$79.7 million in 2016, following the acquisition.

DEBT, GEARING AND DEBT FACILITIES PROFILE

Dividend framework and approach

Iluka's dividend framework is to pay a minimum of 40 per cent of free cash flow, after investing and not required for balance sheet activity. The Company also seeks to distribute the maximum franking credits practicable.

Directors have determined no final dividend will be declared for 2016. Iluka's interim dividend was 3.0 cents per share, fully franked. The dividend payment in 2016 represents 27 per cent of free cash flow generated. This is lower than the Iluka framework of a minimum of 40 per cent reflecting the Company's potential investment opportunities, including Cataby and the Sierra Rutile expansion options.

From the end of 2010 and inclusive of the 2016 dividend, Iluka has paid out a cumulative 66 per cent of free cash flow.

	2016	2015
Payout ratio % free cash flow	27	68
Cumulative dividend payout ratio (from 2010)%	66	68

How to Vote on Items of Business

All your securities will be voted in accordance with your directions.

Appointment of Proxy

Appointing the Chairman of the Meeting as proxy: If you wish to appoint the Chairman of the Meeting as your proxy, mark the box in Step 1. If you leave Step 1 blank, or your named proxy does not attend the Meeting or does not vote on a poll in accordance with your instructions, the Chairman of the Meeting will be your proxy.

Voting 100% of your holding: Direct your proxy how to vote by marking one of the boxes opposite each item of business. If you do not mark a box your proxy may vote or abstain as they choose (to the extent permitted by law). If you mark more than one box on an item your vote will be invalid on that item.

Voting a portion of your holding: Indicate a portion of your voting rights by inserting the percentage or number of securities you wish to vote in the For, Against or Abstain box or boxes. The sum of the votes cast must not exceed your voting entitlement or 100%.

Appointing a second proxy: If you are entitled to cast two or more votes you may appoint up to two proxies to attend the meeting and vote on a poll. If you appoint two proxies you must specify the proportion of votes or number of securities for each proxy, otherwise each proxy may exercise half of the votes. When appointing a second proxy write both names and the proportion of votes or number of securities for each in Step 1 overleaf.

Voting restrictions for members of the key management personnel (KMP): Please note that if you appoint a member of the KMP or one of their closely related parties as your proxy, they will not be able to vote your proxy on Resolution 3, unless you direct them how to vote or you appoint the Chairman of the Meeting as your proxy. If the Chairman of the Meeting is or becomes your proxy, but you do not mark a voting box for Resolution 3, then by completing and returning this form, you will be expressly authorising the Chairman of the Meeting to exercise your proxy on Resolution 3 as he thinks fit, even though the resolution is connected with the remuneration of the Company's KMP.

A proxy need not be a securityholder of the Company.
