DECEMBER 2016 QUARTERLY ACTIVITIES AND CASH FLOW REPORT

Beacon Minerals Limited (ASX:BCN) (Beacon or Company) is pleased to present its Quarterly Activities Report for the period ended 31 December 2016.

Highlights

- **Beacon Executes Option to Purchase Jaurdi Gold Project**
- **Appointment of Project Manager**
- **Beacon Pays Inaugural Dividend**

Beacon Executes Option to Purchase Jaurdi Gold Project

On 3 January 2017, the Company announced that it had executed an exclusive option to purchase the Jaurdi Gold Project comprising Mining Lease M16/529 (ML) from Fenton and Martin Mining Developments Pty Ltd (Fenton and Martin) (Option to Purchase Agreement).

The Jaurdi Gold Project is located 35 kilometres north west of Coolgardie and is close to infrastructure, including public and private road access to Coolgardie and Kalgoorlie.

Under the Option to Purchase Agreement, Beacon will have 110 days to undertake due diligence on the Jaurdi Gold Project, which will include the following:

- A detailed survey of all previous work on the ML, which includes 114 RAB/RC drill holes by the current and former tenement holders;
- Collation and audit of the data within the BM Geological Services Pty Ltd (BMGS) database. BMGS have already undertaken work on the project for current and previous tenement holders; and
- Design and implement a drill program on the ML to:
 - Drill check holes against existing holes;
 - Delineate the extent of the gold mineralised system within the ML; and
 - Compile a resource inventory.
- During the option period Fenton and Martin can continue to mine ore on the tenement up to a maximum of 20,000 tonnes. The mining of this ore will not materially affect the resource tonnes or ounces and will provide valuable information for Beacon's decision to exercise the option.

The key terms of the Option to Purchase Agreement with Fenton and Martin include the following:

- a) Beacon will pay \$100,000 to purchase the ML; and
- b) Beacon will pay an initial royalty of \$90 per refined ounce of gold for the first 10,000 ounces produced from the tenement and \$80 per refined ounce of gold produced thereafter.

A pre-paid royalty of \$900,000 will be paid to Fenton and Martin upon the transfer of the tenement and this amount will satisfy the royalty payments up to this amount.

Subsequent to the end the quarter a survey of previous drill collars has been undertaken, a drill program designed and drilling has commenced.

Phase 1 of the drilling campaign on the ML, consisting of 2,100 metres of shallow reverse circulation drilling, using both air-core and hammer techniques, was completed on 23 January 2017. The Company is waiting on the receipt of all the results from the Phase 1 drilling campaign, including bottle rolls at an independent laboratory.
