

DECEMBER 2017 QUARTERLY ACTIVITIES REPORT

HIGHLIGHTS

- All DNRM statutory reporting and rental payments are up to date and in compliance
- Renewal of EPC 1403 approved for a further 3 year period.
- Monitoring of developments in the adjacent Galilee Basin continues, including the progress of Adani's Carmichael project

BLACKALL COAL PROJECT

The Blackall Project consists of three main coal resource areas within MDL464, EPC1398 and EPC1399. It is located immediately to the south of the township of Blackall in central western Queensland.

These permits host a combined **JORC Total Coal Resource Estimate of 3.44 billion tonnes** of thermal quality coal.^{Note 1}

In addition, an Exploration Target in the range of 2.0 to 2.5 billion tonnes has been identified with EPC 1398 and EPC 1399. References to Reported Exploration Targets are in accordance with the guidelines of the JORC Code (2012). The potential quantity and grade of the targets is conceptual in nature and there has been insufficient exploration to estimate a Mineral Resource. It is uncertain if further exploration will result in the estimation of a Mineral Resource.^{Note 1}

With the reduced demand for new sources of thermal coal the company has minimised its expenditure and has carried out no field work during the quarter. Alternative strategies for development of the resource continue to be considered.

^{Note 1}. See ASX announcement dated 10 July 2014 - EER REPORTS 3.44 BILLION TONNE JORC RESOURCE

Disclaimer: The Company confirms that it is not aware of any new information or data that would materially affect the resources and all material assumptions and technical parameters underpinning the Resource estimates continue to apply and have not materially changed in the meantime.

ASX: EER

East Energy Resources is a coal exploration and development company primarily focused in the Eromanga Basin in Queensland.

EER has combined Total JORC Resources of 3.44Bt of Thermal Coal (627.5Mt Indicated and 2817Mt Inferred) located south west of the major deposits of GVK Hancock Coal and Waratah Coal in the Galilee Basin.

Figure 1: Blackall Project Location Map

Mineral Development License (MDL 464)

MDL464 was granted for a period of 5 years, with a commencement date from 1 August 2014. The MDL covers some 37,000ha over the central portion of the main coal resource where initial mining is most likely to occur should the project proceed.

Statutory Compliance and Reporting

All tenements remain in good standing with rents paid, statutory obligations complied with and the necessary government reports lodged on time. The Group was advised by Department of Natural Resources and Mines (DNRM) that their application to renew 1403 for a three year period had been approved. During the quarter the Group also lodged an application to renew EPC 1149 for a further three-year period, with a decision from DNRM expected in the March quarter.

The Company During the quarter the Company continued to assess the demand for thermal coal and the potential for further development of the coal resource within MDL 464 and the three EPCs covering the main body of the Blackall Coal Project.

The Board continues to monitor the progress of coal projects in the Galilee Basin. The proposed rail line for Adani's Carmichael Coal Mine will provide a crucial link for the future transport of coal from the Blackall Project.

CORPORATE

During the previous quarter, the Company requested to be suspended from official quotation, as it was in discussions with its financier, Noble Group Limited (Noble). This situation caused uncertainty for the Company and so therefore it was deemed appropriate to request a voluntary suspension whilst it sought resolution to these issues, which were critical to the Company's solvency.

On 24 November 2017, the Company announced that Noble had agreed to provide an advance of \$500,000 to the Company and in exchange for the funding, the Company agreed:

- to bring forward the date upon and from which Noble's rights of conversion shall be exercisable;
- to convene a general meeting in early 2018 for shareholders to approve the issue of shares in the Company to Noble upon the exercise of Noble's option to convert its debt into equity in the Company; and
- upon the exercise by Noble of its rights of conversion under the Facility Agreement, the incumbent officers of the Company and its subsidiaries will resign from their respective offices and Noble shall be entitled to appoint three officers to fill each office, which is so vacated.

The above along with the receipt of \$500,000 in funding from Noble on 24 November 2017 has resolved the Company's current discussions with Noble as referred to in the request for Voluntary Suspension made on 29 September 2017. The Company was reinstated to official quotation on 14 December 2017.

KEY OBJECTIVES FOR THE MARCH 2018 QUARTER

- ✦ Convene and hold the General Meeting to approve the issue of shares in the Company to Noble upon the exercise of Noble's option to convert its debt into equity in the Company
- ✦ Continue to review strategic options for development of the Blackall Project;
- ✦ Continue to appraise the market outlook for thermal coal
- ✦ Monitoring and assessment of rail and port infrastructure commitments by Galilee Basin projects and their impact on the potential development of the Blackall Project

Summary of tenement holdings and movements held by East Energy Resources Ltd

Tenement Reference	Location	Interest at beginning of quarter	Acquired/Disposed	Interest at end of Quarter
EPC 1149	Blackall, QLD	100%	N/A	100%
EPC 1398	Blackall, QLD	100%	N/A	100%
EPC 1399	Blackall, QLD	100%	N/A	100%

Competent Persons Statement – EPC 1399 Resources

The information in this report relating to estimates of Mineral Resources within EPC1399, is based on information compiled by Mr Peter Tighe who is a member of the Australian Institute of Mining and Metallurgy. Mr Tighe is a geological consultant to East Energy Resources Limited. Mr Tighe has had over 30 years' experience in exploration, mining and resource evaluation and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking, to qualify as Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr Tighe consents to the inclusion in the report of the matters based on the information, in the form and context in which it appears.

Competent Persons Statement – EPC 1398 Resources

The information in this announcement relating to the estimates of Mineral Resources within EPC 1398 is based on the 2004 JORC code and information reviewed by Mr Bill Knox, who is a Member of The AusIMM. This information was prepared and first disclosed under the JORC Code 2004. It has not been updated since to comply with the JORC Code 2012 on the basis that the information has not materially changed since it was last reported. Mr Knox has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the JORC Code. Mr Knox consents to the inclusion in this announcement of the matters based on this information in the form and context in which it appears.

Competent Persons Statement – EPC 1149 Resources

The Coal Resource estimation for the Blackall Project (EPC 1149) presented in this announcement has been carried out in accordance with the principles and guidelines of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code 2004) and the Australian Guidelines for Estimating and Reporting of Inventory Coal, Coal Resources and Coal Reserves, 2003. The information in the announcement to which this statement is attached, that relates to East Energy's Blackall Coal Resource on EPC 1149 is based on information reviewed by Dr Gerard McCaughan, who is a Member of The AusIMM and is a full time employee of SRK. This information was prepared and first disclosed under the JORC Code 2004. It has not been updated since to comply with the JORC Code 2012 on the basis that the information has not materially changed since it was last reported. Dr McCaughan has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the JORC Code. Dr McCaughan consents to the inclusion in the announcement of the matters based on this information in the form and context in which it appears.

Competent Persons Statement – Exploration Targets

The information in this announcement relating to Exploration Targets within EPC 1398 and EPC 1399 is based on information compiled by Mr Peter Tighe who is a Member of The AusIMM and a geological consultant to East Energy Resources Ltd. Mr Tighe has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr Tighe consents to the inclusion in this announcement of the matters based on this information in the form and context in which it appears.

Forward Looking Statements

This Announcement may contain forward looking statements. The words 'anticipate', 'believe', 'expect', 'project', 'forecast', 'estimate', 'likely', 'intend', 'should', 'could', 'may', 'target', 'plan' and other similar expressions are intended to identify forward-looking statements. Indications of, and guidance on, future earnings and financial position and performance are also forward-looking statements. Forward-looking statements are subject to risk factors associated with the Company's business, many of which are beyond the control of the Company. It is believed that the expectations reflected in these statements are reasonable but they may be affected by a variety of variables and changes in underlying assumptions which could cause actual results or trends to differ materially from those expressed or implied in such statements. There can be no assurance that actual outcomes will not differ materially from these statements. You should not place undue reliance on forward-looking statements and neither East Energy Resources Limited nor any of its directors, employees, servants, advisers or agents assume any obligation to update such information.

The company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements and, in the case of estimates of Mineral Resources, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The company confirms that the form and context in which the Competent Persons' findings are presented have not been materially modified from the original market announcement.
