13 March 2018

**Appointment of Exploration Manager**

Following its successful ASX listing, Podium Minerals Limited (Podium or the Company) is pleased to announce the key appointment of Doug Cook as Exploration Manager as it prepares to rapidly mobilise its exploration activities.

Doug brings over 30 years industry experience in Australia, Central Asia, Russia, Eastern Europe, Middle East and South America, covering all aspects of exploration and development of precious and base metal deposits including nickel sulphides, gold and platinum group metals (PGMs). He is a Member of the Australasian Institute of Mining and Metallurgy and Society of Economic Geologists.

Doug will lead the Company's maiden drilling program for approximately 4,000m of RC drilling which is planned to commence shortly. This campaign will focus on a 2km section in the western zone of Parks Reef and surrounding geophysical and geochemical targets.

Parks Reef comprises a zone of near surface platinum, palladium and gold mineralisation along a strike of 15km and an average width of 15m. The main objective of the maiden drilling campaign is to commence resource definition for the Company's PGM Project.

Doug has previously worked with Grant 'Rocky' Osborne who is a geologist and non-executive director of the Company and compliments the strong project development capability and experience within the Company's Board and Executives providing a highly efficient company management structure.

*Podium Minerals Limited is an ASX listed exploration and resources development company focused on platinum group metals, gold and nickel-copper sulphides.*

*Our core projects are located within our mining leases covering an area of 77km<sup>2</sup> over the entire Weld Range Complex in the Mid West Region Western Australia. The unique geology of our mining leases includes a 15km strike of identified near surface PGM-Au mineralisation in Parks Reef.*

*We are targeting high value metals with strong market fundamentals and growth prospects with a strategy to rapidly develop an alternative supply of PGMs to the world market.*
