## **CROWN PRINCE HERITAGE SURVEY**

*Thundelarra is pleased to announce that the Heritage Survey has been completed for the initial drilling programme at Crown Prince (Prospecting Licence P51/3009).*

The Heritage Service Provider for the Garden Gully area Claimant Group has conducted a survey, with representatives of the Claimant Group, over the areas where our initial work is proposed at Crown Prince. He has provided his report.

Upon receipt of the grant of the Programme of Work (PoW) lodged with the DMIRS, a suitable drilling rig can be commissioned and mobilised to commence drilling at Crown Prince. It is planned to commence drilling with a diamond rig in order to maximise the amount of structural and geological data that can be generated from the work programme.

### **About Garden Gully.**

Thundelarra's wholly-owned Garden Gully project now comprises 15 granted Prospecting Licences and 2 granted Exploration Licences covering about 78 square kilometres, located in Western Australia's Doolgunna region about 20km north-west of the town of Meekatharra.

Since commencing exploration there in mid-2016, Thundelarra has drilled 85 reverse circulation holes for 13,721m advance and 2 diamond holes for 788m advance.

The addition of Crown Prince to the Garden Gully project is significant as it brings all the historical prospecting and production areas at Garden Gully into a single exploration project under one owner.
