KEY AGREEMENTS & BUSINESS OPPORTUNITIES

OPPORTUNITIES IN INDONESIA:

INDOSAT

On 4 May 2018, as announced in the March 2018 quarterly report, TV2U commenced discussions culminating with a memorandum of understanding with Indosat. Following on from this, key terms were agreed and a definitive agreement executed giving the two companies an initial 36-month term through a subscription-based revenue share arrangement. Under the agreement, TV2U would white label its platform and application suite with remote support necessary to bring Indosat's iStream video service to market. Indosat's more than 100 million subscribers will be given the opportunity to operate a mobile first one-stop-shop for all their content needs. The platform will provide Indosat with both a B2B and B2C offering.

On 15 June 2018, TV2U announced that Indosat's iStream together with TV2U's multi tenanted platform would provide full coverage of the 2018 FIFA World Cup. This would be the first project to kick off TV2U's agreement with Indosat. The World Cup will become a valuable springboard for building iStream's user base before the service expands to become a broader content hub after the World Cup has finished. It is envisaged that iStream will become a major content hub in the region.
