## **ASX ANNOUNCEMENT – SMARTTRANS HOLDINGS LIMITED (ASX:SMA)**

**1 August 2018**

### **Mine Shutdown Progress Report**

**SmartTrans Holdings Limited (ASX:SMA) ('SmartTrans or the Company')**, is pleased to announce that its Resource Logistics Division has completed the mine scheduled surface maintenance program trial which was announced on 19 April 2018.

The simulation trial was funded by Minset Pty Ltd a resources sector business improvement mining services provider. The simulation trial included a limited and controlled scope and met all its objectives. The program will now proceed to a fully paid trial implementing the Resource Connect Management System (RCMS) into a real and live scheduled shutdown program at an operating BHP mine.

The Company can report that it will partner with Minset again on this new, real time, mine shut down program for one BHP mine in cooperation with the inhouse maintenance team and coordinating 350 workers in September 2018. The platform will easily scale to multiple mines and maintenance schedules.

The real time BHP trial has proven the capabilities of RCMS. This phase has been negotiated on commercial terms. Future phases will be added and the RCMS solution will manage the compliance, reporting and the efficient movement of people and transportation assets during the shutdown program.
