

FBR Limited Quarterly Report | March 2019

Tuesday, 16 April 2019 – Robotic technology company **FBR Limited (ASX:FBR)** ('FBR' or 'the Company') is pleased to provide its quarterly update for the three months ending March 31, 2019.

First outdoor build completed

On 11 February 2019, FBR announced that the Hadrian X had completed its first outdoor build. Known as Build1, FBR's first outdoor build of a three-bedroom, two-bathroom home structure was an important technical and commercial milestone for the Company, and a demonstration of the Hadrian X's ability to work through a range of environmental factors.

CTO Mark Pivac and the finished three-bedroom, two-bathroom structure built outdoors at FBR's High Wycombe facility

After the structure was completed, a selection of interior and exterior finishing items were applied to demonstrate the possible look and feel of a completed structure to the representatives from interested commercial parties and governments FBR hosted during the period.

MD & CEO Mike Pivac and the outdoor structure with finishing items applied

The Hadrian X was brought back indoors upon completion of the outdoor structure to implement improvements that were developed as a result of the initial outdoor testing efforts. The Hadrian X has since returned outdoors to continue the testing program.

Memorandum of Understanding with Brickworks announced

On 5 February 2019, FBR announced it had signed a Memorandum of Understanding (MOU) with Brickworks Building Products Pty Ltd ('Brickworks') under which FBR and Brickworks agreed to collaborate on the manufacture and certification of concrete masonry unit blocks suitable for use with the Hadrian X, and to negotiate in good faith the terms of a formal Shareholders Agreement in relation to a proposed joint venture between the parties. The joint venture, to be called Fastbrick Australia Pty Ltd, will begin Pilot Program operations in Western Australia immediately upon its commencement and will demonstrate the Wall as a Service™ operating model in Australia. The MOU period was extended by 45 days on 20 March 2019 to allow the parties additional time to negotiate the Shareholders Agreement and associated documentation.

Capital raise completed; additional facility secured; recruitment underway

During the period FBR announced it had successfully raised \$17 million via a placement to institutional and sophisticated investors. The funds raised will be used to accelerate the commercialisation of the Hadrian X and for working capital. The 161,904,769 fully paid ordinary shares issued as a result of the placement were allotted on 1 March 2019.

Following the completion of the capital raise, FBR secured the lease of a brand new 10,000m² facility in High Wycombe, in the same street, 200m from FBR's registered head office. The new significantly larger facility will allow FBR to expand its operations and will be used to further develop the Hadrian X and test and develop concepts for automated building and DST applications. The existing High Wycombe facility will continue as a workshop, outdoor testing facility and FBR's corporate head office, with activities at the Company's separate temporary indoor test facility to be moved to the new High Wycombe site and the lease ended.

FBR's new facility in High Wycombe

Also, following the capital raise FBR has begun a recruitment drive to grow the company's capability, particularly in the areas of engineering, software and controls. This will enable the continued acceleration of the commercialisation of the Hadrian technology.

Rachelle Brunet appointed Joint Company Secretary

On 8 March 2019, FBR announced the appointment of Ms Rachelle Brunet, Executive Officer, as Joint Company Secretary, joining Aidan Flynn who continues in his role as Chief Financial Officer and Joint Company Secretary.

FBR wins gold at Edison Awards

FBR was named a Gold Winner at the 2019 Edison Awards, held in New York on 4 April 2019. Being recognized with an Edison Award has become one of the highest accolades a company can receive in the name of innovation and business, and this year's ballot of nominees was judged by a panel of more than 3,000 leading business executives, including past award winners, academics and leaders in the fields of product development, design, engineering, science and medical. Each entry was judged on four evaluation criteria: concept, value, delivery and impact. The Hadrian X was awarded gold in the Robotics section of the Applied Technology category, with FBR's Chief Innovation Officer Steve Pierz in attendance at the ceremony in New York to accept the award.

Notes

1. The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity that wishes to disclose additional information is encouraged to do so, in a note or notes included in or attached to this report.
2. If this quarterly report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standard applies to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
