12 December 2018

LODGEMENT OF PROSPECTUS

Triton Minerals Limited (ASX: TON, **Triton** or **Company**) is pleased to advise that the attached Prospectus has today been lodged with the Australian Securities and Investments Commission (ASIC).

The Prospectus is for the issue to Eligible Optionholders of up to approximately 133,673,165 TONOD Options at an issue price of \$0.0054 per Option with each TONOD Option issued having an exercise price of \$0.10 and expiring on 30 September 2020, to raise up to approximately \$721,835 before expenses (**Offer**).

The Offer recognises the strong support that Triton has received from its Shareholders and Optionholders and allows Eligible Optionholders the opportunity to acquire TONOD options at the maximum permissible discount to recent trading prices.

The purpose of the Offer is to raise funds for:

- Development activities including permitting, engineering and financing; and
- Offer costs and working capital.

The TONOD Options will be issued pursuant to the Company's existing ASX Listing Rule 7.1 and 7.1A placement capacity. If the VWAP of the ASX traded price of the TONOD Options at the date on which the new TONOD Options to be issued pursuant to the offer exceeds \$0.007, then in order to ensure compliance with ASX Listing Rule 7.1A, the Offer shall be downsized such that the Offer is made pursuant to Triton's issuance capacity under ASX Listing Rule 7.1 only. This would result in an offer of approximately 98,734,302 TONOD Options at a price of \$0.0054 per TONOD Option to raise approximately \$533,165 before expenses.

Any Eligible Optionholders that do not receive the prospectus or have any queries in the relation to the Offer, should contact the Triton company secretary (+61 8 6381 9050).

Note: Given the timing of the Offer is during the holiday season, the Company requests that Optionholders make an election to receive communications electronically from the Company including the Offer documents. This can be done at www.investorcentre.com/au.

The pro-forma balance sheets have been prepared to provide investors with information on the anticipated impacts of the Offer and the Downsized Offer on the assets and liabilities of the Company. The historical and pro-forma financial information is presented in an abbreviated form, insofar as it does not include all of the disclosures required by Australian Accounting Standards applicable to annual financial statements.

The consolidated pro forma balance sheets at 31 October 2018, which are also unaudited have been adjusted for the following transactions:

- (a) the Offer of 133,673,165 TONOD Options pursuant to this Prospectus to raise up to \$721,835 on or before the Issue Date and in relation to the Downsized Offer 98,734,770 TONOD Options pursuant to this Prospectus to raise up to \$533,168 on or before the Issue Date ; and

Notes to the pro-forma Consolidated Balance Sheets

The pro-forma consolidated balance sheets:

- (a) include gross proceeds raised pursuant to the Offer and the Downsized Offer (less estimated expenses);
- (b) assumes that no existing Options are exercised prior to the TONOC Record Date; and
- (c) does not take into account any transactions between 31 October 2018 and the date of this Prospectus.

Other balance sheet changes and transactions for the period since 31 October 2018 that are not reflected in the pro forma balance sheets include:

- (a) a decrease in cash and cash equivalents and an increase primarily in exploration and evaluation assets due to the Company's expenditure on ongoing exploration and development at the Ancuabe Graphite Project; and
- (b) an increase in accumulated losses during the period due to Director and employee remuneration, travel costs, professional services and other corporate costs.

2.3 Effect on capital structure

The anticipated effect of the Offer on the capital structure of the Company, assuming all TONOD Options offered under the Offer are issued, and no Options are exercised prior to the Issue Date, is set out below.

a) Shares

There is no impact on the Shares on issue.

b) Options

Exercise Price	Expiry Date	Number
<i>Unquoted Options currently on issue</i>		
\$0.11	9 January 2020	9,500,000
<i>Quoted Options currently on issue¹</i>		
\$0.12	31 December 2018	34,269,724
\$0.10	30 September 2020	70,376,718

Expiry of TONOC Options on 31 December 2018		(34,269,724)
Maximum Options on issue after completion of the Offer²		213,549,883

1. TONOB Options expired on 30 November 2018.

2. If the Offer is downsized, the quoted TONOD Options to be issued pursuant to the Downsized Offer is 98,734,770 and the maximum Options on issue after completion of the Downsized Offer would be 178,611,488.

No Shares or Options on issue are subject to escrow restrictions, either voluntary or ASX imposed.

(a) Performance rights

The Company also has 9,000,000 performance rights on issue expiring on various dates to 2 December 2019, the conversion of which is subject to the satisfaction of certain vesting conditions.

Holder	Summary
Mr David Edwards	1,500,000 performance rights, convertible into one Share per performance right upon satisfaction of the vesting conditions described in the ASX announcement dated 17 March 2017.

Ms Lisa Park	1,500,000 performance rights, convertible into one Share per performance right upon satisfaction of the vesting conditions described in the ASX announcement dated 17 March 2017.
Mr Peter Canterbury	6,000,000 performance rights, convertible into one Share per performance right upon satisfaction of the vesting conditions described in the Notice of Annual General Meeting announced 2 November 2016.

The Company has engaged Mr Robert Sills as a marketing and contract consultant. As part of Mr Sills' fee, the Company has agreed to issue a non-cash incentive of 300,000 performance rights for each binding offtake agreement over 10,000 tonnes per annum (excluding potential binding offtake agreements with Haida Graphite, Qingdao Tianshengda Graphite Co. and Qingdao Chenyang Graphite). 50% of the performance rights vest on execution of a binding offtake agreement which meets the requisite criteria, and the other 50% vest on loading the first ore on a ship pursuant to that binding offtake agreement.

2.4 Potential dilutionary impact of the Offer and the Downsized Offer and effect on control of the Company

As no new Shares are being offered pursuant to the Offer, there will be no immediate dilutionary effect of the Offer on Shareholders.

If the TONOD Options being issued under this Offer are exercised (which must occur on or before 30 September 2020, if at all), an additional 133,673,165 Shares will be issued by the Company. This equates to approximately 14.42% of all the issued Shares in the Company following completion of the Offer (assuming no other Options on issue are exercised). In relation to the Downsized Offer if the TONOD Options being issued under this Offer are exercised (which must occur on or before 30 September 2020, if at all), an additional 98,734,770 Shares will be issued by the Company. This equates to approximately 10.65% of all the issued Shares in the Company following completion of the Offer (assuming no other Options on issue are exercised).

The Underwriter is presently a Shareholder and Optionholder of the Company. The number of TONOD Options held by the Underwriter will increase by 133,673,165 assuming no take up of the Offer or in relation to the Downsized Offer, 98,734,770 assuming no take up of the Offer, however, it is unlikely that no TONOB and TONOC Optionholders will apply for TONOD Options under the Offer. The interest of the Underwriter of the TONOD Options will be reduced to the extent that sub-underwriters take up any Shortfall.

The Company and the Underwriter have confirmed that no sub-underwriter nor existing Shareholder of the Company will increase its shareholding to above 19.99% as a result of the Offer (or in relation to the Downsized Offer).

If the Offer is fully subscribed, the Company will raise approximately between approximately \$533,168 and \$721,835 before expenses through the issue of TONOD Options. The funds raised will be applied to:

- (a) Development activities including permitting, engineering and financing; and
- (b) Offer costs and working capital.

3.3 Legal action

As at the date of this Prospectus, the Company is not involved in any legal proceedings. Other than as set out in this Prospectus, the Directors are not aware of any legal proceedings pending or threatened against the Company.

4 Risk Factors

4.1 Introduction

This section identifies the areas that the Directors regard as the major risks associated with an investment in the Company. Investors should be aware that an investment in the Company involves many risks, which may be higher than the risks associated with an investment in other companies. Intending investors should read the whole of this Prospectus in order to fully appreciate such matters and the manner in which the Company intends to operate before any decision is made to apply for TONOD Options.

There are numerous widespread risks associated with investing in any form of business and with investing in the share market generally. There is also a range of specific risks associated with the Company's business. These risk factors are largely beyond the control of the Company and its Directors because of the nature of the business of the Company. The following summary, which is not exhaustive, represents some of the major risk factors which potential investors need to be aware of.

4.2 Risks specific to the Offer

ASX quotation

ASX requires the Company to meet certain conditions for quotation of the Options issued under the Offer on ASX. There is a risk that the Company may not be able to meet those requirements. If ASX does not grant Official Quotation of the TONOD Options offered under the Offer (or the Downsized Offer) within three months after the date of this Prospectus (or such period as varied by ASIC), the

Company will not allot under the Offer and will repay all application monies within the time period prescribed under the Corporations Act, without interest.

A decision by ASX to grant Official Quotation of the TONOD Options is not to be taken in any way as an indication of ASX's view as to the merits of the Company, or the TONOD Options now offered for subscription.

Underwriting risk

The Company has entered into the Underwriting Agreement with the Underwriter who has agreed to underwrite the Offer (and Downsized Offer) to the Underwritten Amounts, subject to certain terms and conditions. If certain conditions are not satisfied or certain events occur, the Underwriter may terminate the Underwriting Agreement.

If the Underwriting Agreement is terminated and the Offer (or Downsized Offer) does not proceed or does not raise the funds required for the Company to meet its stated objectives, the Company would need to find alternative financing to meet its funding requirements. There is no guarantee that alternative funding could be sourced, either at all or on satisfactory terms and conditions. Termination of the Underwriting Agreement could materially adversely affect the Company's business, cash flow and financial position.

4.3 Risks specific to the Company

Funding risk

The Company's ability to operate its business and effectively implement its business plan within the timeframe that it is aiming to achieve, in particular the construction and commissioning of mining operations and processing facilities at the Ancuabe Graphite Project so as to commence production in the first half of 2020, will depend in part on its ability to raise further substantial funds by way of debt and equity. There is no guarantee that the Company will be able to secure any additional funding or be able to secure funding on terms favourable to the Company.

Existing funds (including the funds raised under the Offer) will not be sufficient for expenditure required for certain aspects of the Company's business plan, including the construction and commissioning of mining operations and processing facilities at the Ancuabe Graphite Project.

Any additional equity financing may dilute Shareholdings, and debt financing, if available, may involve restrictions on financing and operating activities. There is no guarantee that the Company will be able to secure any additional funding or will be able to secure funding on terms favourable to the Company.

Development and operational risks

The development of mineral deposits involves significant risks, which even a combination of careful evaluations, experience and knowledge may not eliminate. The Company has begun early works and construction with a view to development; there is no certainty that the development of the Ancuabe Graphite Project will proceed as planned or at all.

In addition, the Company's future operations and profitability will be subject to operational risks. These include geological conditions, technical difficulties, metallurgical issues, mineral processing risk, quality and flake size of the graphite, securing and maintaining licenses, availability of supplies, access to certain key infrastructure such as power, water, sanitation, roads, accommodation, ports and laydown/storage areas (in a timely and economic manner), health and safety risks, weather and construction of efficient processing facilities. The operation may be affected by force majeure, engineering difficulties and other unforeseen events.

Further, the Company requires approvals and licences necessary to conduct mining, which may impose conditions the Company must satisfy in order to proceed with production of the graphite. It may not be possible for the Company to satisfy these conditions.

These factors affect the Company's ability to establish mining operations, continue with its projects, earn income from its operations and will affect the price of its TONOD Options.

Mineral resource estimation risk

Resource estimates are expressions of judgment based on knowledge, experience and industry practice. Estimates that were valid when made may change significantly when new information becomes available.

In addition, resource estimates are necessarily imprecise and depend to some extent on interpretations, which may prove to be inaccurate. Should the Company encounter mineralisation or formations different from those predicted by past drilling, sampling and similar examinations, resource estimates may have to be adjusted and mining plans may have to be altered in a way which could adversely affect the Company's operations.

Graphite price risk

The demand for, and the price of, commodities are highly dependent on a variety of factors, including international supply and demand, the price and availability of substitutes, actions taken by governments and global economic and political developments. Given the Company's main activities, which primarily involve potentially the production of graphite, the Company's operational and financial performance, as well as the economic viability of its projects, is heavily reliant on the prevailing global price of graphite, among other things. Volatility in commodity markets may therefore materially affect the profitability and financial performance of the Company and the price of its TONOD Options.

In addition, any sustained low global price for graphite (as well as other related commodities) may adversely affect the Company's business and financial results, and its ability to finance, and the financing arrangements for, its activities or its planned capital expenditure commitments (in the ordinary course of the Company's operations).

The factors which affect the prices for graphite, as well as other related commodities (which are outside the control of the Company and its Directors) include, among many other factors, manufacturing and construction activities; the quantity of global supply in each of these respective commodities as a result of the commissioning of new mines and the decommissioning of others; political developments in countries which produce material quantities of these named commodities; the weather in these same countries; the price and availability of appropriate substitutes; advancements in technologies and the uses and potential uses of graphite, and the demand for the applications for which these commodities may be used; and sentiment or conditions in the countries and sectors in which the Company or its future business/commercial partners will potentially sell their products. Given the complex array of factors which contribute to the prevailing global price of these commodities, it is particularly difficult for the Company to predict with any certainty the prevailing price for these commodities and accordingly, investors are cautioned not to place undue reliance on any price or demand forecasts provided by the Company or by external analysts.

Third party risks

The Company has entered into:

- (a) Two binding agreements with third parties in relation to offtake; and
- (b) conditional agreements with third parties in relation to project development.

The binding offtake agreements cover approximately 53% of the Company's anticipated average annual graphite production from the Ancuabe Graphite Project and the Company may enter into additional offtake agreements in the future. If the Company fails to meet its obligations in terms of product quantity, quality or timing, there may be a risk that these contracts are cancelled. The agreements are also conditional upon Triton obtaining all approvals and a mining concession and completing construction of the mine and infrastructure. Cancellation of these agreements may have a material adverse effect upon the Company's financial performance and results of operations.

If any of the Company's counterparties default on the performance of their obligations, for example if an offtake counterparty defaults on payment or its funding commitments, it may be necessary to approach courts in Mozambique or Australia to seek enforcement or some other legal remedy, if no alternative settlement can be reached. Legal action can be uncertain and costly. There is a risk that the Company may not be able to seek legal redress against a defaulting counterparty, or that a legal remedy will not be granted on satisfactory terms.

There is also a risk of financial failure or default under the joint venture arrangements by a participant in any joint venture to which the Company may become, a party. Any withdrawal by a joint venture party or any issues with their ability to perform the obligations due under the joint venture arrangements could have a material adverse impact on the financial position of the Company. There is also the risk of disputes arising with any potential future joint venture partner, the resolution of which could lead to delays in the Company's proposed development activities or financial loss. To the extent that the consent of a third party is required in respect of the Company's proposed activities and is not obtained, there is a risk that the third party may avail itself of remedies available to it.

The Company has recently acquired an economic interest (to the extent permissible) in the 20% of Grafex Limitada previously held by Sheffield. The acquisition remains conditional upon the responsible Mozambique Minister consenting to the transfer of the interest which has yet to be obtained. Until the Company obtains this consent it does not have legal title to the minority interest but is entitled to the economic benefits of the 20% interest to the extent permissible, unless and until the required approval is obtained.

Taxation and compliance risk

In relation to the acquisition of the 80% economic interest in Grafex Limitada, the Company sought advice regarding any potential capital gains tax liability that may arise. Based on the advice received and the timing of the transaction, the Company has not disclosed a contingent liability in relation to any capital gains tax, but the possibility remains that capital gains tax in relation to this transaction is payable.

In relation, to the acquisition of the 20% economic interest in Grafex Limitada on 13 March 2018, the company has recognised a provision for an estimated potential capital gains tax liability of US\$448,000. The Company has commenced the process to undertake the self-assessment required to settle any potential liability.

Operations in Mozambique

The Company's operations are located in Mozambique and are exposed to various levels of political, economic and other risks and uncertainties. These risks and uncertainties include, but are not limited to, currency exchange rates; high rates of inflation; labour unrest; renegotiation or nullification of existing concessions, licenses, permits and contracts; changes in taxation policies; restrictions on foreign exchange; changing political conditions; currency controls and governmental regulations that favour or require the awarding of contracts to local contractors or require foreign contractors to employ citizens of, or purchase supplies from, a particular jurisdiction. The Company's acquisition of an 80% economic interest in Grafex Limitada has transferred and been registered but remains to be approved by the Mozambique government. There is no guarantee that this approval will be obtained and there is a risk that the Mozambique government will not recognise the Company's 80% economic interest in Grafex Limitada until such approval is obtained.

Changes, if any, in mining or investment policies or shifts in political attitude in Mozambique may adversely affect the Company's operations or profitability. Operations may be affected in varying degrees by governmental regulations with respect to, but not limited to: restrictions on production; price controls; export controls; currency remittance; income taxes; foreign investment; environmental legislation; land use; land claims of local people; water use; mine safety and government and local participation. Failure to comply strictly with applicable laws, regulations and local practices relating to mineral tenure and development, could result in loss, reduction or expropriation of entitlements.

In addition, the transportation and service infrastructure in Mozambique are under-developed and can be unreliable in some of the areas where the Company is operating. Material delays in the transportation of equipment, supplies and resources may delay the exploration and development of the Company's projects and/or the commercialisation of those projects. Any such delay is likely to increase the cost of exploring and developing the projects, and such increase may materially affect the Company's business, results of operations and financial condition. Specific infrastructure risks relate to the adequacy of port facilities and the supply of power to the Company's projects where they are ultimately developed. Grid power may not be available in the quantities required by the Company's projects, necessitating the use of diesel-powered alternatives, which may adversely impact on the project economics.

The Company's investment may be exposed to adverse political developments that could affect the economics of the project. The Mozambique government has supported the Company with its activities to date, but there is no assurance that this support will continue.

Operating in a foreign jurisdiction with legal systems and laws different to Australia may lead to uncertainty for the Company in enforcing legal and contractual rights in those jurisdictions. If the Company is unable to enforce its legal and contractual rights this may have a material adverse effect on the Company. Any future material adverse changes in government policies or legislation in Mozambique that affect foreign ownership, mineral exploration, development or mining activities, may affect the viability and profitability of the Company.

Competition

Competition from Australian and international graphite producers, developers and explorers may affect the potential future cash flow and earnings which the Company may realise from its operations. For example, the introduction of new mining and processing facilities and any increase in competition and supply in the global graphite market could lower the price of these commodities.

Access to land

The licenses comprising the Company's projects are all located in Mozambique and the subject of the laws of that country, including its mining laws. If, in the future, the Company acquires interests in licenses outside Mozambique, they will be subject to differing legislative requirements in relation to the processes for application, conversion, grant and renewal.

There is no guarantee that any applications or conversions for licenses and mining concessions in which the Company has a current or potential interest will be granted or as to the conditions that will apply.

The grant, extension and renewal of licenses is subject to a number of specific legislative conditions including payment of rent and minimum annual expenditure commitments. The renewal of a license is subject to the discretions that may be available under the Mozambique mining laws. The inability to meet those conditions could restrict the ability to renew a granted license, adversely affecting the financial position and performance of the Company.

The Company will experience delays and cost overruns in the event it is unable to access the land required for its operations. This may be as a result of weather, environmental restraints, native title, harvesting, landholder's activities or other factors.

Reliance on key personnel

The Company's prospects depend in part on the ability of its executive officers, senior management and key consultants to operate effectively, both independently and as a group. The loss of the services of one or more of such key management personnel could have an adverse effect on the Company. The Company's ability to manage its development activities, and hence its success, will depend in large part on the efforts of these individuals. Investors must be willing to rely to a significant extent on management's discretion and judgement, as well as the expertise and competence of outside contractors.

Environmental liabilities risk

The Company's activities are subject to potential risks and liabilities associated with the potential pollution of the environment and the necessary disposal of mining waste products resulting from mineral exploration and production. Insurance against environmental risk (including potential liability for pollution or other hazards as a result of the disposal of waste products occurring from exploration and production) is not generally available to the Company (or to other companies in the minerals industry) at a reasonable price. To the extent that the Company becomes subject to environmental liabilities, the satisfaction of any such liabilities would reduce funds otherwise available to the Company and could have a material adverse effect on the Company. Laws and regulations intended to ensure the protection of the environment are constantly changing and are generally becoming more restrictive.

Land rehabilitation requirements

Although variable, depending on location and the governing authority, land rehabilitation requirements are generally imposed on mineral exploration companies, as well as companies with mining operations, in order to minimise long term effects of land disturbance. Rehabilitation may include requirements to control dispersion of potentially deleterious effluents and to reasonably re-establish pre-disturbance land forms and vegetation. In order to carry out rehabilitation obligations imposed on the Company in connection with its mineral exploration, the Company must allocate financial resources that might otherwise be spent on further exploration and/or development programs.

Insurance coverage risk

Exploration and development operations on mineral properties involve numerous risks, including unexpected or unusual geological operating conditions, rock bursts, cave-ins, ground or slope failures, fires, floods, earthquakes and other environmental occurrences, political and social instability that could result in damage to or destruction of mineral properties or producing facilities, personal injury or death, environmental damage, delays in mining caused by industrial accidents or labour disputes, changes in regulatory environment, monetary losses and possible legal liability.

It is not always possible to obtain insurance against all such risks and the Company may decide not to insure against certain risks because of high premiums or other reasons. Moreover, insurance against risks such as environmental pollution or other hazards as a result of exploration and development is not generally available to the Company or to other companies in the industry on acceptable terms. Should such liabilities arise, they could reduce or eliminate any further profitability and result in increasing costs and a decline in the value of the securities of the Company.

4.4 General Risks

Economic Risks

General economic conditions, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's development and production activities, as well as on its ability to fund those activities and to receive future dividends.

Unforeseen expenses

The Company may be subject to significant unforeseen expenses or actions. This may include unplanned operating expenses, future legal actions or expenses in relation to future unforeseen events. The Directors expect that the Company will have adequate working capital to carry out its stated objectives however there is the risk that additional funds may be required to fund the Company's future objectives.

Securities market risk

The market price of the Company's TONOD Options could fluctuate significantly. The market price of the Company's TONOD Options may fluctuate based on a number of factors including the Company's operating performance and the performance of competitors and other similar companies, the public's reaction to the Company's press releases, other public announcements and the Company's filings with the various securities regulatory authorities, changes in earnings estimates or recommendations by research analysts who track the Company's Shares or Options or the shares of other companies in the resource sector, changes in general economic conditions, the number of the Company's TONOD Options publicly traded and the arrival or departure of key personnel, acquisitions, strategic alliances or joint ventures involving the Company or its competitors.

In addition, the market price of the Company's TONOD Options are affected by many variables not directly related to the Company's success and are therefore not within the Company's control, including other developments that affect the market for all resource sector shares, the breadth of the public market for the Company's TONOD Options, and the attractiveness of alternative investments.

Litigation risk

The Company is subject to litigation risks. All industries, including the minerals exploration industry, are subject to legal claims, with and without merit. Defence and settlement costs of legal claims can be substantial, even with respect to claims that have no merit.

Due to the inherent uncertainty of the litigation process, the resolution of any particular legal proceeding to which the Company is or may become subject could have a material effect on its financial position, results of operations or its activities.

Speculative nature of investment

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of TONOD Options.

5 Additional Information

5.1 Continuous disclosure obligations

The Company is a "disclosing entity" (as defined in section 111AC of the Corporations Act) and is subject to the regime of continuous disclosure and periodic reporting requirements. Specifically, as a listed company, the Company is subject to the Listing Rules which require continuous disclosure to the market of any information possessed by the Company which a reasonable person would expect to have a material effect on the price or value of its TONOD Options.

The Board has adopted a policy on compliance with the Listing Rules which sets out the obligations of the Directors, officers and employees to ensure the Company satisfies the continuous disclosure obligations imposed by the Listing Rules and the Corporations Act. The policy provides information as to what a person should do when they become aware of information which could have a material effect on the Company's securities and the consequences of non-compliance.

5.2 Legal framework of this Prospectus

As a "disclosing entity", the Company has issued this Prospectus in accordance with section 713 of the Corporations Act applicable to prospectuses for an offer of securities which are quoted enhanced disclosure (ED) securities and the securities are in a class of securities that were quoted ED securities at all times in the 3 months before the issue of this Prospectus (or Options over the same).

This Prospectus is a "transaction specific prospectus". In general terms, a transaction specific prospectus is only required to contain information in relation to the effect of the issue of securities on a company and the rights attaching to the securities. It is not necessary to include general information in relation to all of the assets and liabilities, financial position, profits and losses or prospects of the issuing company.

This Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to ASX and does not include all of the information that would be included in a prospectus for an initial public offering of securities in an entity that is not already listed on a stock exchange. Investors should therefore have regard to the other publicly available information in relation to the Company before making a decision whether or not to invest.

Having taken such precautions and having made such enquiries as are reasonable, the Company believes that it has complied with the requirements of ASX as applicable to disclosing entities from time to time, and which require the Company to notify ASIC of information available to the stock market conducted by ASX, throughout the 3 months before the issue of this Prospectus.

Information that is already in the public domain has not been reported in this Prospectus other than that which is considered necessary to make this Prospectus complete.

5.3 Information available to Optionholders

The ASX maintains files containing publicly disclosed information about all listed companies. The Company's file is available for inspection at ASX in Perth during normal working hours. In addition, copies of documents lodged by, or in relation to, the Company with ASIC may be obtained from, or inspected at, any regional office of ASIC. The Company will provide a copy of each of the following documents, free of charge, to any investor who so requests during the application period under this Prospectus:
