DRILLING COMMENCES AT PAYNES FIND GOLD PROJECT

Oakajee Corporation Ltd (“**Oakajee**” or “**the Company**”) is pleased to advise that Aircore (AC) drilling has commenced at the Paynes Find Gold Project in Western Australia. The current program will see up to 2,500m of drilling to test specific structural trends in the Matriarch prospect area and the southern structural continuation of the Paynes Find Gold camp.

The AC drilling program is expected to take approximately one week to complete.

About the Paynes Find Gold Project - Western Australia

The Paynes Find Gold Project is located adjacent to the Paynes Find settlement, approximately 455km by road northeast of Perth. The land holding represents the second largest exploration project area within the Paynes Find Greenstone Belt which has produced more than 72,000oz of gold.

The Paynes Find Gold Project covers mostly greenstone sequences along strike and to the west of the Paynes Find Gold camp. Whilst the Paynes Find Gold Project has been explored since the 1970's, little effective testing of the greenstone sequences has been undertaken due to fragmented tenement holdings and alluvial cover limiting the effectiveness of conventional surface sampling.
