Oakum Cannabis Harvests First Commercial Crops

Highlights

- Oakum successfully implements commercial operations at its state-of-the-art facility
- Harvested crops focused on optimizing the resin content and cannabinoid profiles
- First crops consist of 26% THC on average and present a pristine microbial profile
- RotoGro's turnkey technology provides industry-leading yield and quality at lowest operational costs

Roto-Gro World Wide (Canada) Inc., a wholly-owned subsidiary of Roto-Gro International Limited ("ASX:RGI", "RotoGro" or the "Company"), is pleased to announce that Oakum Cannabis Corporation, formerly Frozen Penguin Medical Industries Inc. ("Oakum"), has harvested its first large scale commercial lawful cannabis crops, cultivated with 48 of its recently installed and commissioned RotoGro Rotational Hydroponic Garden Systems (as announced on 6 November 2019 and 27 August 2019).

Oakum has successfully initiated and conducted commercial operations at its state-of-the-art facility, recently harvested its first crops which have met and exceeded Oakum's expectations. The recently harvested crops focused on optimizing the resin content and cannabinoids of each plant to optimise the extraction output. Oakum is extremely impressed with its current protocols utilising RotoGro Hydroponic Garden Systems, cultivating lawful cannabis crops consisting of 26% THC on average and presenting a pristine microbial profile.

Oakum's Master Grower and Co-Founder, Anthony Charles, states, "After receiving our test results from the laboratory, we are extremely pleased with the THC and Cannabinoid levels. Our laboratory technicians also advised us that the crop samples displayed the best microbial profiles they have ever seen. In my opinion, the RotoGro Hydroponic Garden Systems are clearly the best technology

ROTOGRO

available in the cannabis space, cultivating plants of consistently, high-quality at the industry's lowest costs. We look forward to our continued collaboration with RotoGro as we expand the awareness of our "Moment" and "Discovery" brands and refine our growing and extraction protocols over the coming months. Overall, we have had remarkable results and we could not be happier with RotoGro as our facility and technology partner." www.oakumcannabis.com

Chief Executive Officer, Adam Clode, states, "We are extremely pleased with both the qualitative and quantitative results of Oakum's first harvest. The team at Oakum are very experienced in the cannabis space and have taken the step change from pilot facility to commercial operations in stride. We will continue our collaboration as Oakum further refines its nutrient profiles while using our automated software and integrated fertigation systems to economise and optimise nutrient delivery and product quality outcomes. Our collaboration with Oakum sets the foundation for other near-term projects such as Siksika Herbz GP Inc. (as announced in our Q3, 2019 Quarterly Activity Report) as well as the opportunity to establish numerous micro-cultivation facilities."

This announcement is authorised for release to the market by the Board of Directors of Roto-Gro International Limited.

About Roto-Gro International Limited

Roto-Gro International Limited is an Australian-based company with global operations focused on the cultivation of lawful cannabis and perishable food (produce) which take advantage of its proprietary, patented, and patents-pending technology in the stackable rotary hydroponic garden space.

The Company has collaborated with Gibio Inc. and Freshero Pty Ltd. These ventures leverage RotoGro's patented rotational hydroponic garden systems, crop management fertigation hardware and proprietary software systems to produce greater yields and lower operating costs. In addition, the Company has entered into a Share Purchase Agreement to acquire all the issued and outstanding shares in the capital stock of Supra THC Services Inc. which holds a Dealer's License issued by Health Canada for lawful cannabis.

RotoGro's wholly owned subsidiary, Global Fertigation Solutions Inc. ("GFS"), provides a patent-pending specialized business line for water treatment and nutrient management in the viticulture, perishable foods and lawful cannabis space. GFS has successfully provided design solutions, installations and ongoing service contracts for licensed lawful cannabis facilities in the State of Nevada, USA and is embarking on expanding this offering globally.

The Company continues its focus on expanding into industry synergistic opportunities; exploring strategic partnerships in related markets which include, perishable food (produce) partnerships, lawful cannabis license ownership, growing management services, industry leading nutrients, emerging tissue culture (micropropagation) expertise and other supporting faculties of hydroponic growing.
