Botswana (40% - 70%)

Funding Update

Walkabout Resources Ltd, **(the Company)** is currently conducting an international funding process through Pareto Securities (Pareto), to raise US\$40m to fund the development of the Lindi Jumbo Graphite Project in South East Tanzania. *(see ASX Release 25th Oct 2019)*

The funding process has involved management presentations to global investors and subsequent due diligence. The process remains ongoing and is not expected to be finalised by the end of this calendar year as initially anticipated.

In addition, the Company has received alternate funding proposals which are currently being assessed, on the basis they could potentially lower the total cost of finance.

Due to this ongoing process, in reference to the Shareholder Bridging Loan the Company is negotiating with the lenders to amend the Loan Agreement. *(refer ASX release 9th Oct 2019)*

This ASX release has been approved for release by Trevor Benson - Chairman
