

Venture continues to advance the Riley Iron Ore Mine towards production

- **Riley Iron Ore Mine site preparation for ore production nearing completion with the following civil infrastructure in place;**
 - **Site Offices installed,**
 - **Run-of-Mine (ROM) Pad constructed,**
 - **On-site haulage roads upgraded.**
- **Finalising negotiations on the road access agreement;**
- **Preferred road haulage tenderer status to be awarded shortly;**
- **Finalising port access agreement;**
- **Advanced discussions with shipping brokers;**
- **Work continued on mine scheduling and on more economical ore transport solutions in order to reduce operating costs.**

Venture Minerals Limited (**ASX:VMS**) (“Venture” or the “Company”) is pleased to announce that work continues to advance the Riley Iron Ore Mine towards production with site preparation nearing completion (*see Figures 1 & 2*). Pre-production capital expenditure over the last few months includes completion of installation of the site offices, construction of the ROM Pad and completion of upgrades to the on-site haulage roads.

The Company is close to finalising and negotiating the road access agreement for a portion of privately held road and nominating a preferred road haulage tenderer. Preparations for the first ore shipment are also well advanced with port access agreements being negotiated and positive ongoing discussions with shipping brokers regarding availability of ships for the Riley product.

Venture continues to work on additional strategies identified to further reduce operating costs on the project before the first ore shipment. These cost optimisation programs will focus on increased efficiencies from detailed mine scheduling and enhancing the logistics chain for transporting the iron ore including an application to go to 24-hour trucking.

The Company looks forward to keeping the market informed on any further developments on the Riley Iron Ore Mine.
