ASX ANNOUNCEMENT AND MEDIA RELEASE

12 November 2019

AAM – EXPERIENCED GERMAN EXECUTIVE APPOINTED TO SUPERVISORY BOARD

Highlights

- Mr Werner Klatten appointed to the supervisory board of AAM AG
- Highly experienced German industry executive
- Formerly CEO of SAT.1 GmbH, SpiegelNet AG and EMTV AG

Altech Chemicals Limited (Altech/the Company) (ASX: ATC) (FRA: A3Y) is pleased to announce the appointment of experienced German executive Mr. Werner Klatten to the supervisory board of Altech Advanced Materials AG (AAM)* (FRA: AMA1).

Mr. Klatten, a lawyer by profession, has held a number of significant positions in the German media industry including chairman of the management board and chief executive officer (CEO) of Sat.1 GmbH, and CEO of EMTV AG (now Constantin Medien AG). Most recently, Mr Klatten held the position as CEO of Deutsche Sporthilfe, where he moved to the supervisory board in March 2010 as chairman. Mr Klatten is also chairman of the advisory board of teNeues Verlag GmbH Co.KG, chairman of the real estate company Puma Brandenburg Ltd. and chairman of the advisory board of Tamara Comolli Fine Jewellery GmbH.

Mr Klatten said that he is pleased to be invited to join the supervisory board of AAM. Commenting on Altech's high purity alumina (HPA) project and its European strategy, Mr. Klatten said, "*Europe would seem to be a natural fit for Altech's HPA production technology given the impending unprecedented scale of capital investment that European auto-makers and their suppliers have in the pipeline to underpin the transition from traditional internal combustion engines to electric vehicles – HPA is an often understated but key part of this transition. Minimising supply chain risks for electric vehicle and associated battery component production has been identified as important, incentives to assist with the regional integration of the supply chain and production processes are being prioritised. I am very pleased to be part of Altech's European HPA strategy – and the opportunity to be involved at the very start of this exciting journey is most satisfying,*" he said.

– end –

* Altech is a 29% shareholder of Frankfurt Stock Exchange listed Altech Advanced Materials AG (AAM) and Altech managing director Mr Iggy Tan and alternate director Mr Uwe Ahrens sit on the management board of AAM. In August 2019, AAM purchased a right from Altech to acquire up to a 49% interest in Altech's high purity alumina (HPA) project for US\$100m (refer ASX Announcement titled "Altech – German Project Equity Strategy Commenced", dated 23 August 2019 for details).

About Altech Chemicals (ASX:ATC) (FRA:A3Y)

Altech Chemicals Limited (Altech/the Company) is aiming to become one of the world's leading suppliers of 99.99% (4N) high purity alumina (Al₂O₃) through the construction and operation of a 4,500tpa high purity alumina (HPA) processing plant at Johor, Malaysia. Feedstock for the plant will be sourced from the Company's 100%-owned kaolin deposit at Meckering, Western Australia and shipped to Malaysia.

HPA is a high-value, high margin and highly demanded product as it is the critical ingredient required for the production of synthetic sapphire. Synthetic sapphire is used in the manufacture of substrates for LED lights, semiconductor wafers used in the electronics industry, and scratch-resistant sapphire glass used for wristwatch faces, optical windows and smartphone components. Increasingly HPA is used by lithium-ion battery manufacturers as the coating on the battery's separator, which improves performance, longevity and safety of the battery. With global HPA demand approximately 19,000t (2018), it is estimated that this demand will grow at a compound annual growth rate (CAGR) of 30% (2018-2028); by 2028 HPA market demand is forecast to be approximately 272,000t, driven by the increasing adoption of LEDs worldwide as well as the demand for HPA by lithium-ion battery manufacturers to serve the surging electric vehicle market.

German engineering firm SMS group GmbH (SMS) is the appointed EPC contractor for construction of Altech's Malaysian HPA plant. SMS has provided a USD280 million fixed price turnkey contract and has proposed clear and concise guarantees to Altech for plant throughput and completion. Altech has executed an off-take sales arrangement with Mitsubishi Corporation's Australian subsidiary, Mitsubishi Australia Ltd (Mitsubishi) covering the first 10-years of HPA production from the plant.

Conservative (bank case) cash flow modelling of the project shows a pre-tax net present value of USD505.6million at a discount rate of 7.5%. The Project generates annual average net free cash of ~USD76million at full production (allowing for sustaining capital and before debt servicing and tax), with an attractive margin on HPA sales of ~63%. (Refer to ASX Announcement "Positive Final Investment Decision Study for 4,500TPA HPA project" dated 23 October 2017 for complete details. The Company confirms that as at the date of this announcement there are no material changes to the key assumptions adopted in the study).

The Company has been successful in securing senior project debt finance of USD190 million from German government owned KfW IPEX-Bank as senior lender. Altech has also mandated Macquarie Bank (Macquarie) as the preferred mezzanine lender for the project. The indicative and non-binding mezzanine debt term sheet (progressing through due diligence) is for a facility amount of up to USD90 million. To maintain project momentum during the period leading up to financial close, Altech has raised ~A\$39 million in the last 24 months to fund the commencement of Stage 1 and 2 of the plant's construction; Stage 1 construction commenced in February 2019 with Stage 2 now underway.

Altech recently announced the sale of an option to Frankfurt stock exchange listed Youbisheng Green Paper AG (since renamed Altech Advanced Materials AG (AAM)), whereby AAM can acquire up to a 49% interest in Altech's HPA project for USD100 million. AAM has commenced the process of securing the funds to enable it to exercise its option, which once complete is anticipated would be a catalyst for project financial close.

Forward-looking Statements

This announcement contains forward-looking statements which are identified by words such as 'anticipates', 'forecasts', 'may', 'will', 'could', 'believes', 'estimates', 'targets', 'expects', 'plan' or 'intends' and other similar words that involve risks and uncertainties. Indications of, and guidelines or outlook on, future earnings, distributions or financial position or performance and targets, estimates and assumptions in respect of production, prices, operating costs, results, capital expenditures, reserves and resources are also forward-looking statements. These statements are based on an assessment of present economic and operating conditions, and on a number of assumptions and estimates regarding future events and actions that, while considered reasonable as at the date of this announcement and are expected to take place, are inherently subject to significant technical, business, economic, competitive, political and social uncertainties and contingencies. Such forward-looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties, assumptions and other important factors, many of which are beyond the control of the Company, the directors and management. We cannot and do not give any assurance that the results, performance or achievements expressed or implied by the forward-looking statements contained in this announcement will actually occur and readers are cautioned not to place undue reliance on these forward-looking statements. These forward-looking statements are subject to various risk factors that could cause actual events or results to differ materially from the events or results estimated, expressed or anticipated in these statements.
