

MyFiziq receives \$500,000 payment under the updated subscription agreement with ACAM

MyFiziq Limited (ASX: MYQ) (“MyFiziq” or the “Company”) would like to inform shareholders it has received a further \$500,000 payment under the placement with Asia Cornerstone Asset Management (“ACAM”).

As outlined to shareholders on the 4th June 2019, under the updated Subscription Agreement (“Agreement”), MyFiziq will receive the A\$5,200,000 with an initial \$4,700,000 now received. Over the tranches, the Company will issue a total of 8,666,667m fully paid shares in MYQ at A\$0.60 cents per share.

About MyFiziq:

Our mission is to globalize our technology and assist individuals, communities and populations to live better healthier lives by working with governments, healthcare providers and the best health & fitness identities and solutions available worldwide with the data we can provide in the palm of their hands.

Our software as a service solution (SAAS) offering allows flexibility and pricing scale reductions for our partners. MyFiziq partners with highly scaled or scalable new and existing applications and provides them with a deeper insight into the data they wish to retrieve from their users to empower them in their journeys.

Consumers engage daily with multiple needs that require the use or ability to track individual dimensions. Such as dieting, exercising, assessing their health or simply buying clothing online, the result is a drive toward understanding their personal dimensions or the changes they are undergoing. MyFiziq provides that missing link in other ecosystems.

MyFiziq is a patented technology we have developed with a proprietary image capturing system within a consumer’s smartphone, we empower a consumer with the ability to create a representation of their structure in the form of a 3D avatar with accurate circumference measurements. Partners embed our Software Development Kit’s (SDK’s) into their new or existing applications, and then customize the experience to meet their brand requirements.

MyFiziq has developed this capability by leveraging the power of Computer Vision, Machine Learning and patented algorithms, to process these images on secure, enterprise-level infrastructure, delivering an end-to-end experience that is unrivalled in the industry. Body measurements provide more useful information about physical changes than simply measuring weight. MyFiziq simplifies the collection of these measurements and removes the margin of human error present in traditional methods.
