RotoGro Installs Oakum Cannabis Corporation's First Phase

Roto-Gro World Wide (Canada) Inc., a wholly-owned subsidiary of Roto-Gro International Limited ("ASX:RGI", "RotoGro" or the "Company"), is pleased to announce the installation of RotoGro Hydroponic Rotational Garden Systems pursuant to the \$600,000.00 purchase order (the "Purchase Order" or "Order") from Oakum Cannabis Corporation, formerly Frozen Penguin Medical Industries Inc. ("Oakum") (as announced 8 April 2019 and 13 August 2019).

About Oakum Cannabis Corp.

Oakum is currently completing the first phase (the "First Phase") of its proposed 40,000 sq. ft. state-of-the-art cultivation and processing facility located in Kelowna, British Columbia, Canada (the "Facility"). The First Phase is comprised of approximately 2,000 sq. ft. of grow rooms which are outfitted with RotoGro Hydroponic Garden Systems (installed in arrays of four units, two high) including RotoGro's propriety iGrow® growing management software.

The construction of the First Phase facilitates the completion of the final stages of Oakum's application to Health Canada for a license to cultivate lawful cannabis (the "License"). Once the License is issued, Oakum plans to commence the next phase of the facility's build-out in partnership and consultation with RotoGro. RotoGro's installation team has spent the past two weeks installing the First Phase, with the commissioning teams mobilising next week to complete testing, certification, training and growing management support for the planting of Oakum's first crops.

Oakum Cannabis Corp.'s Master Grower and Co-Founder, Anthony Charles states, "We are extremely pleased with the delivery and installation of our RotoGro rotational garden systems by the RotoGro team. We cannot speak highly enough of how competent and helpful the RotoGro team has been with the turnkey setup; taking full responsibility for the complete installation including the design and construction of our custom water delivery and return systems. It has been a pleasure working with such innovative and intelligent people, and having our expectations exceeded. We look forward to building on 16+ months of growing experience and know-how with the RotoGro system, with yields continually exceeding in excess of 8 lbs. per rotational garden system per harvest; establishing the

ROTOGRO

lowest cost per gram and the highest yield per square foot of consistently high-quality cannabis in the industry.”

Chief Executive Officer, Adam Clode states, “The delivery and installation of our RotoGro Hydroponic Rotational Garden Systems and Fertigation Systems to Oakum is an exciting time for both companies. Oakum’s research and testing of our systems, combined with the collaboration of RotoGro’s research and development team, supports the successful implementation of Oakum’s First Phase. We look forward to the planting of Oakum’s first crops and the invitation from Oakum to utilise its Facility as a global showcase for prospective RotoGro customers, solidifying our collaboration with Oakum to complete the design and buildout of its 40,000 sq. ft. facility.”

About Roto-Gro International Limited

Roto-Gro International Limited is an Australian-based company with global operations focused on the cultivation of lawful cannabis and perishable food (produce) which take advantage of its proprietary, patented, and patents-pending technology in the stackable rotary hydroponic garden space.

The Company has collaborated with Gibio Inc. and Freshero Pty Ltd. These ventures leverage RotoGro's patented rotational hydroponic garden systems, crop management fertigation hardware and proprietary software systems to produce greater yields and lower operating costs. In addition, the Company has entered into a Share Purchase Agreement to acquire all the issued and outstanding shares in the capital stock of Supra THC Services Inc. which holds a Dealer's License issued by Health Canada for lawful cannabis.

RotoGro's wholly owned subsidiary, Global Fertigation Solutions Inc. ("GFS"), provides a patent-pending specialized business line for water treatment and nutrient management in the viticulture, perishable foods and lawful cannabis space. GFS has successfully provided design solutions, installations and ongoing service contracts for licensed lawful cannabis facilities in the State of Nevada, USA and is embarking on expanding this offering globally.

The Company continues its focus on expanding into industry synergistic opportunities; exploring strategic partnerships in related markets which include, perishable food (produce) partnerships, lawful cannabis license ownership, growing management services, industry leading nutrients, emerging tissue culture (micropropagation) expertise and other supporting faculties of hydroponic growing.
