

SAMAN EXPLORATION PERMIT GRANTED

Predictive Discovery Limited (“Predictive” or “Company”) (ASX: PDI) is pleased to announce a further strengthening of its land position within Guinea’s Siguiri Basin with the granting of an Exploration Permit over the Saman Project, which was previously held through a Reconnaissance Authorisation. The new permit directly abuts Predictive’s Kaninko Permit and may contain a possible northern extension to the northernmost mineralised power auger hole in the NE Bankan gold mineralised zone (16m at 6.82g/t gold¹).

The Company also reports that it has completed a 65-hole (5-line) power auger drilling program, designed to explore for strike extensions of the NE Bankan discovery within the Saman Permit. Further power auger drilling on Saman is expected in the next week.

In Guinea, Reconnaissance Authorisations are short-term tenements on which reconnaissance exploration activities (e.g. geochemical sampling and geological mapping etc) are permitted. An Exploration Permit is a longer term holding (three-year initial term with two 2-year renewals for 7 years in total). Advanced exploration activities (e.g. RC and diamond drilling) are permitted on Exploration Permits.

-END-

Predictive advises that it is not aware of any new information or data that materially affects the exploration results contained in this announcement.

Competent Persons Statement

The exploration results reported herein are based on information compiled by Mr Paul Roberts (Fellow of the Australian Institute of Geoscientists). Mr Roberts is a full-time employee of the company and has sufficient experience relevant to the style of mineralisation and type of deposits being considered to qualify as a Competent Person as defined by the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Roberts consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

About Predictive Discovery

100%-OWNED GUINEA PORTFOLIO

Predictive holds approximately 800km² of prospective landholdings across nine permits/authorisations in Guinea, all containing artisanal gold workings.

All projects are within the Siguiri Basin which hosts AngloGold's large Siguiri Mine (+10Moz), the Siguiri Basin forms part of the richly mineralised West African Birimian gold belt.

JOINT VENTURE PORTFOLIO

Predictive holds a number important Joint Ventures across Cote D'Ivoire and Burkina Faso. The Cote D'Ivoire joint venture has provided Predictive with an experienced and well-funded project partner (Resolute Mining) to manage our exciting Ferkessedougou North and Boundiali Projects.
