QUARTERLY ACTIVITIES REPORT AND APPENDIX 5B

FOR THE PERIOD ENDING 30 JUNE 2024

HIGHLIGHTS

HTM commenced desktop review of Werner Lake Project compiling all available historical data and newly acquired data.

Desktop review to prepare for future exploration of the Werner Lake Project to unlock value.

HTM has relinquished the Ketete LCT Project in Ethiopia.

High-Tech Metals Limited (ASX: **HTM**) ("**High-Tech**", "**HTM**" or "**the Company**"), a critical battery minerals exploration Company, is pleased to provide the following report on its activities for the Quarter ending 30 June 2024. The Company's primary activities during the quarter were the desktop review of Werner Lake Project, Canada, ("**Werner Lake**") and relinquishment of Ketele LCT Project, Ethiopia ("**Ketele**").

Sonu Cheema, Executive Director, commented:

"It is a pleasure to update the market on quarterly activities of High-Tech's, specifically the Werner Lake cobalt, nickel, and PGE Project. Over the last 18 months High-Tech has generated significant data from the successful sampling and drilling programs. Through the compilation of the available historical data and the data derived from our successful exploration, I believe we will unlock the true value of Werner Lake."

Desktop Review – Werner Lake

HTM commenced a desktop review aimed at delineating future exploration programs based on all available historical data and newly acquired data. The data derived from the successful Drilling Program, which focused on high priority drill targets, adds to the extensive data available on Werner Lake (refer ASX announcement – *Drilling Results at Werner Lake – released 27 November 2023*).

High-Tech's Exploration at Werner Lake

From the outset of the 2023 campaign, focus was on testing new targets away from the Werner Lake deposit. Two areas were selected for a comprehensive evaluation and assessment of the potential to locate economic cobalt, nickel, and PGE targets. These are shown below, essentially, the 'East' and 'West' blocks or grids.

The objective was to test cobalt, copper and nickel targets on a portion of the Werner Lake Property. The drill program was planned and carried out by the in-country geological consultants, Apex Geoservice (**APEX**). The program was completed on time and under budget.

Targets were based on a comprehensive appraisal and evaluation of historical geological and production data covering exploration and production on and around the Property, and on the somewhat limited geological and production data from the Gordon Lake Cu-Ni mine.

The results from the ground-based magnetometer survey, lithogeochemical sampling, and prospecting provided additional focus with the primary targets all located on the east block, east of Gordon Lake and the Gordon Lake mine (refer ASX announcement – WERNER LAKE SAMPLING DISCOVER HIGH GRADE Ni SULPHIDE & Cu-Co – released 30 August 2023).

Ketele LCT Project

During the Quarter, HTM announced that it has initiated the process of relinquishing the Ketele LCT Project in Ethiopia due to the depressed nature of the lithium market.

Business Development

During the quarter, HTM considered several project opportunities. HTM will continue to identify and review projects which complement the Company's existing assets and support its strategy of building a portfolio of exploration, development, and operating mining assets.

HTM Corporate

The Company's consolidated cash at hand was \$1.446M as of 30 June 2024 with no debt. The majority of the expenditure was on Exploration and Evaluation (\$11K), Staff costs (\$49K) and Admin and Corporate costs (\$110K). This information is presented in the Quarterly Cashflow Report ("Appendix 5B").

About Hight-Tech Metals Limited

High-Tech Metals Limited (ASX:HTM) is an ASX-listed company focused on the exploration and development of its flagship, 100 per cent owned Werner Lake Cobalt Project (the Project) located in north-western Ontario, within the Kenora Mining District, approximately 85 km north-northwest of Kenora, Ontario and approximately 170 km east-northeast of Winnipeg, Manitoba. The Project was acquired from Global Energy Metals Corporation (70%) and Marquee Resources Limited (30%).

The two largest cobalt deposits defined in Canada to date are the Werner Lake Minesite Deposit and the West Cobalt Deposit. The area has seen extensive exploration and development work since the original discovery of cobalt in 1921. The Werner Lake Cobalt Mine produced cobalt ore in the 1930s and 1940s from the "Old Mine Site" deposit area and with the discovery of the main ore area at the West Cobalt Deposit, was taken to production decision in the late 1990s. At the time, infrastructure was put in place, including four season road, mill buildings, and tailings settling area. Decline ramp, drifts and raises of over 258 metres were driven into the heart of the deposit. Mineralisation remains open at depth and along strike with the potential for undiscovered high grade zones. Metallurgical studies have shown that excellent cobalt recoveries can be yielded from a standard flotation mill process followed by a low-pressure oxidative hydrometallurgical leach (net recovery 88%), to produce a cobalt carbonate end product.

Competent Persons Statement

The information in this report which relates to Exploration Results is based on information compiled by Mr. Rob L'Heureux, P.Geol. who is a member in good standing of the Association of Professional Engineers and Geoscientists of Alberta. Mr L'Heureux is a consultant to HTM and has sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the "Australian Code of Reporting of Exploration Results, Mineral Resources and ore Reserves". Mr. L'Heureux consents to the inclusion in this report of the matters based on the information in the form and context in which it appears.

Forward-Looking Statements

This document includes forward-looking statements. Forward-looking statements include, but are not limited to, statements concerning High-Tech Metals Limited's planned exploration programs, corporate activities, and any, and all, statements that are not historical facts. When used in this document, words such as "could," "plan," "estimate," "expect," "intend," "may", "potential," "should" and similar expressions are forward-looking statements. High-Tech Metals Limited believes that it has a reasonable basis for its forward-looking statements; however, forward-looking statements involve risks and uncertainties, and no assurance can be given that actual future results will be consistent with these forward-looking statements. All figures presented in this document are unaudited and this document does not contain any forecasts of profitability or loss.
