## HYTERRA. A WORLD OF OPPORTUNITY.

### Exploring for natural hydrogen and helium resources near major industrial hubs

Geologic or white hydrogen's potential as a low-carbon feedstock or fuel has spurred millions in new investment and created a world rich with opportunities for first movers.

HyTerra was the first company to list on the ASX with a focus on white hydrogen, which is generated naturally by the Earth. White hydrogen potentially has much lower production costs and carbon emissions than man-made hydrogen.

Our Nemaha Project in Kansas, USA holds 100% owned and operated leases across the emerging Nemaha High natural hydrogen and helium play fairway. Our Geneva Project in Nebraska, USA is a 16% earn-in interest in a Joint Development with Natural Hydrogen Energy LLC targeting natural hydrogen and helium.

Both projects could be connected via railways, roads, and/or pipelines to multiple nearby off-takers, including ethanol and ammonia manufacturers, and petrochemical plants.
