

MARCH 2024 QUARTERLY ACTIVITIES REPORT

Mukinbudin REE Project

The Mukinbudin REE Project consists of one tenement, E70/5939, covering 384km² and two applications E70/6519 and 6520 covering 198km². The Project is located approximately 25km northwest of the town of Mukinbudin, 250km northeast of Perth.

Since the Project was acquired in late 2023, Caprice has completed multiple soil and rock chip sampling programs in a number of areas in the southern half of the tenement with results received confirming the prospectivity of the ground for REE mineralisation. Land access agreements for Colosseum and Gadolin South have been executed enabling the submission of a Program of Work to the Department of Energy, Mines, Industry Regulation and Safety.

The Company is currently reviewing, collating and interpreting the final 563 results of a regional soil sampling program which was designed to test the potential scale of the Colosseum prospect with results to be announced to the market in due course. Previous rock chip sampling has defined the +500m Colosseum prospect, approximately 2km north of Gadolin, which encompasses a coarse granite outcrop. Colosseum is currently delineated by 20 rock chip samples, 13 of which returned values greater than 1,000ppm TREO, with a peak value of 5,038ppm TREO (0.5% TREO) (24.8% MREO)¹. The anomalism remains open, with initial probative regional sampling undertaken over 1,120m spaced lines and 80m spaced samples.

Previous sampling at the Gadolin prospect delineated a significant soil anomaly in an area coinciding with an outcropping zoned pegmatite. Assays indicate anomalism greatly increases stepping east and west away from the intercepted emplacement structure initially targeted². Gadolin's strike currently stands at +3.4km, and with a currently defined 1.8km overall width, the exploration team remains encouraged that anomalism remains open in all directions. Of note, the southern trend indicates high grade channel of +2500ppm over 800m and remains open.

Northampton Project

Following a field visit to the Northampton Project during the previous quarter to undertake further regional reconnaissance and mapping programs, the Company has elected to rationalise its large tenure at the Northampton Polymetallic Project to key tenements. Accordingly, the Company has relinquished tenements granted in 2022 (E66/111, E66/112 and E66/113) and has retained the core tenements hosting historical workings and the site of recent drilling programs.

The 2023 drill program identified multiple intersections of significant grades and widths and a higher-grade zone extending another 100m to the south and remaining open. The mineralisation to date remains lead dominant, however there is some distinct variability in the metal mix. There are areas of zinc dominance, as well as one hole which intercepted copper and silver mineralisation (23NHRC0018).

The ultrafine soil sampling to test along strike to the north and south of Lady Sampson, as well as extending the lines laterally to assess the potential of additional lodes. The results of this program will assist in guiding the next round of drilling in due course.

The Island Gold and Murchison Project

Following on from the successful drill campaigns during 2022, no fieldwork was undertaken at the IGP during the quarter. The Company continues to assess results as it considers the next round of exploration.

Wild Horse Hill Project

The Company elected to relinquish the Wild Horse Hill Project in the Northern Territory prior to the renewal date in February 2024. No work was completed on the Project during the quarter.

Corporate Update

During the quarter, the Company restructured its Board with the appointments of Glenn Whiddon as Non-Executive Chairman and Scott Deakin as Non-Executive Director. Both Mr Whiddon and Mr Deakin have extensive experience that will be a valuable addition to the Board of Caprice. Mr David Church and Mr Mick Caruso resigned from the Board.

With the restructure of the Board, the Company has been reviewing its existing tenement portfolio with a view to streamlining the tenure and associated holding costs, and considering additional opportunities for the creation of shareholder value.

This announcement has been authorised for release by the Board of Caprice.

Appendix 2: Disclosures in relation to Quarterly Cashflow Report

In line with obligations under ASX Listing Rule 5.3.5, Caprice notes that the payments to related parties of the Company, as advised in the Appendix 5B (Quarterly Cashflow Report) for the period ended 31 March 2024, pertain to director fees, salaries and wages (including superannuation) and advisory fees paid during the quarter. The Company notes that all fees are agreed on standard commercial terms.

During the quarter ended 31 March 2024, the Company spent a total of \$137k on project and exploration activities. The majority of the project and exploration expenditure relates to tenement portfolio review and sampling and assaying at the Mukinbudin Project.
