

BINDING 1.4MT ORE SALE AGREEMENT FOR BOORARA ENABLES GOLD PRODUCTION TO RESUME IN H2 2024

Horizon Minerals Limited (ASX: HRZ) ("Horizon" or "the Company") is pleased to announce that it has entered into a binding Ore Sale Agreement ("OSA") with Paddington Gold Pty Ltd to treat 1.4Mt of Horizon ore from the Boorara Gold Project.

HIGHLIGHTS

- Binding OSA has been executed with Paddington Gold Pty Ltd, a wholly owned subsidiary of Norton Gold Fields Ltd
- Horizon will arrange contract mining and hauling of ore from Boorara for ore processing at Norton's 3.8Mtpa Paddington Mill, located ~56km by road from Boorara
- An agreed 1.4Mt ("Agreed Amount") will be processed over a period of 22 months, commencing in the September 2024 Quarter
- The OSA contains competitive ore treatment rates with the payment structure as follows:
 - Within 5 days of delivering ore to the Paddington ROM pad, Paddington to pay Horizon 50% of gross revenue less estimated processing costs and royalties, based on the determined grade for each stockpile
 - Gross revenue calculated based on the Perth Mint spot price on the date of gold pours
 - Within 5 days of Paddington fully treating the stockpile, a final revenue calculation shall be made based on the determined grade, moisture and metallurgical recovery, less agreed costs for processing and state gold royalty payments, to calculate a final payment to Horizon
 - Stockpiles to be between 10,000t – 50,000t from a combination of oxide, transitional and fresh sources, with Paddington having the right to reject any stockpile that does not meet specifications
 - Agreed Amount represents less than 15% of the current Boorara Mineral Resource of 11Mt @ 1.26g/t Au for 448,240oz
 - Agreed Amount can be increased or decreased by mutual agreement
 - Conditions precedent include Paddington receiving JORC clause 12 modifying factors for an Ore Reserve from Horizon, and Horizon demonstrating all mining permits, approvals, mining and haulage contracts in place within 45 business days
- An Ore Reserve for Boorara based on the tonnage going to Paddington, including forecast economics for the ore processing agreement, will be estimated in the current June Quarter
- Boorara is fully environmentally permitted (with last mining in 2020) and ready for development which is expected to commence within the current June Quarter

ASX ANNOUNCEMENT

Commenting on the return to gold production, Chief Executive Officer Mr Grant Haywood said: ¹

“This is a great opportunity for Horizon to generate strong cashflows in this high gold price environment and takes us further down our pathway to sustained gold production. We continue to work on our other projects to bring additional near-term cashflow into the production pipeline, along with the additional resources and optionality of projects to come through our proposed merger with Greenstone Resources.”

Figure 2: Horizon's Boorara Project initial pit optimisations

Next Steps ¹

- AMC Consultants has been engaged and undertaken preliminary work on Boorara and will progress Boorara into an Ore Reserve study under the JORC (2012) code for release in the June 2024 Quarter
- Continue engagement with mining and haulage contractors to finalise tenders for Boorara and award contracts in the June 2024 Quarter
- Finalise the 200,000 tonne mill allocation with FMR Investments' Greenfields mill with an executed Toll Milling Contract to support mining at the Cannon Gold Project
- Complete the proposed merger with Greenstone Resources to enhance the long-term production profile with development ready high-grade projects

Authorised for release by the Board of Directors

Confirmation

The information in this report that relates to Horizon's Mineral Resources estimates on the Nimbus Silver Zinc Project is extracted from and was originally reported in Intermin's and MacPhersons' ASX Announcement "Intermin and MacPhersons Agree to Merge – Creation of a New Gold Company Horizon Minerals Ltd" dated 11 December 2018 and in MacPhersons' ASX announcements "Quarterly Activities Report" dated 25 October 2018, "New High Grade Nimbus Silver Core Averaging 968 g/t Ag" dated 10th May 2016 and "Nimbus Increases Resources" dated 30th April 2015, each of which is available at www.asx.com.au. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements and that all material assumptions and technical parameters underpinning the estimates in those announcements continue to apply and have not materially changed. The Company confirms that the form and context of the Competent Person's findings in relation to those Mineral Resources estimates have not been materially modified from the original market announcements.

ASX ANNOUNCEMENT

Forward Looking and Cautionary Statements

Some statements in this report regarding estimates or future events are forward looking statements. They include indications of, and guidance on, future earnings, cash flow, costs and financial performance. Forward looking statements include, but are not limited to, statements preceded by words such as “planned”, “expected”, “projected”, “estimated”, “may”, “scheduled”, “intends”, “anticipates”, “believes”, “potential”, “could”, “nominal”, “conceptual” and similar expressions. Forward looking statements, opinions and estimates included in this announcement are based on assumptions and contingencies which are subject to change without notice, as are statements about market and industry trends, which are based on interpretations of current market conditions. Forward looking statements are provided as a general guide only and should not be relied on as a guarantee of future performance. Forward looking statements may be affected by a range of variables that could cause actual results to differ from estimated results and may cause the Company’s actual performance and financial results in future periods to materially differ from any projections of future performance or results expressed or implied by such forward looking statements. These risks and uncertainties include but are not limited to liabilities inherent in mine development and production, geological, mining and processing technical problems, the inability to obtain any additional mine licenses, permits and other regulatory approvals required in connection with mining and third party processing operations, competition for among other things, capital, acquisition of reserves, undeveloped lands and skilled personnel, incorrect assessments of the value of acquisitions, changes in commodity prices and exchange rate, currency and interest fluctuations, various events which could disrupt operations and/or the transportation of mineral products, including labour stoppages and severe weather conditions, the demand for and availability of transportation services, the ability to secure adequate financing and management’s ability to anticipate and manage the foregoing factors and risks. There can be no assurance that forward looking statements will prove to be correct.

Statements regarding plans with respect to the Company’s mineral properties may contain forward looking statements in relation to future matters that can only be made where the Company has a reasonable basis for making those statements.

This announcement has been prepared in compliance with the JORC Code (2012) where applicable and the current ASX Listing Rules.

The Company believes that it has a reasonable basis for making the forward-looking statements in the announcement, including with respect to any production targets and financial estimates, based on the information contained in this and previous ASX announcements.
