No person is authorised to give information or to make any representation in connection with this Prospectus, which is not contained in this Prospectus. Any information or representation not so contained may not be relied on as having been authorised by the Company in connection with this Prospectus.

It is important that investors read this Prospectus in its entirety and seek professional advice where necessary. The Securities offered by this Prospectus should be considered as highly speculative.

Applications for Securities offered pursuant to this Prospectus can only be made by an original Entitlement and Acceptance Form or Shortfall Application Form.

This Prospectus is a transaction specific prospectus for an offer of continuously quoted securities (as defined in the Corporations Act) and has been prepared in accordance with section 713 of the Corporations Act. It does not contain the same level of disclosure as an initial public offering prospectus and is only required to contain information in relation to the effect of the issue of securities on a company and the rights attaching to the securities. It is not necessary to include general information in relation to all of the assets and liabilities, financial position, profits and losses or prospects of the issuing company.

Representations contained in this Prospectus are made taking into account that the Company is a disclosing entity for the purposes of the Corporations Act and certain matters are publicly available information or may reasonably be expected to be known to investors and professional advisers whom prospective investors may consult.

Forward-looking statements

This Prospectus contains forward-looking statements which are identified by words such as 'may', 'could', 'believes', 'estimates', 'targets', 'expects', or 'intends' and other similar words that involve risks and uncertainties.

These statements are based on an assessment of present economic and operating conditions, and on a number of assumptions regarding future events and actions that, as at the date of this Prospectus, are expected to take place.

Such forward-looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties, assumptions and other important factors, many of which are beyond the control of the Company, the Directors and the Company's management.

The Company cannot and does not give any assurance that the results, performance or achievements expressed or implied by the forward-looking statements contained in this Prospectus will actually occur and investors are cautioned not to place undue reliance on these forward-looking statements.

The Company has no intention to update or revise forward-looking statements, or to publish prospective financial information in the future, regardless of whether new information, future events or any other factors affect the information contained in this Prospectus, except where required by law.

These forward-looking statements are subject to various risk factors that could cause the Company's actual results to differ materially from the results expressed or anticipated in these statements. These risk factors are set out in Section 5.

Overseas shareholders

This Offer does not, and is not intended to, constitute an offer in any place or jurisdiction in which, or

to any person to whom, it would not be lawful to make such an offer or to issue this Prospectus.

It is not practicable for the Company to comply with the securities laws of overseas jurisdictions having regard to the number of overseas Shareholders, the number and value of Shares these Shareholders would be offered and the cost of complying with regulatory requirements in each relevant jurisdiction. Accordingly, the Offer is not being extended and Securities will not be issued to Shareholders with a registered address which is outside Australia, New Zealand, France, Germany or the Isle of Man.

For further information on overseas Shareholders please refer to Section 2.9.

Continuous disclosure obligations

The Company is a "disclosing entity" (as defined in section 111AC of the Corporations Act) for the purposes of section 713 of the Corporations Act and, as such, is subject to regular reporting and disclosure obligations. Specifically, like all listed companies, the Company is required to continuously disclose any information it has to the market which a reasonable person would expect to have a material effect on the price or the value of the Securities.

This Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to ASX and does not include all of the information that would be included in a prospectus for an initial public offering of securities in an entity that is not already listed on a stock exchange. Investors should therefore have regard to the other publicly available information in relation to the Company before making a decision whether or not to invest.

Having taken such precautions and having made such enquires as are reasonable, the Company believes that it has complied with the general and specific requirements of ASX as applicable from time to time throughout the three months before the issue of this Prospectus which required the Company to notify ASX of information about specified events or matters as they arise for the purpose of ASX making that information available to the stock market conducted by ASX.

Please refer to Section 6.2 for further details.

The Company reserves the right not to accept an Application Form from a person if it has reason to believe that when that person was given access to the electronic Application Form, it was not provided together with the electronic Prospectus and any relevant supplementary or replacement prospectus or any of those documents were incomplete or altered.

Company Website

No documents or other information available on the Company's website is incorporated into this Prospectus by reference.

Financial forecasts

The Directors have considered the matters set out in ASIC Regulatory Guide 170 and believe that they do not have a reasonable basis to forecast future earnings on the basis that the operations of the Company are inherently uncertain. Accordingly, any forecast or projection information would contain such a broad range of potential outcomes and possibilities that it is not possible to prepare a reliable best estimate forecast or projection.

Clearing House Electronic Sub-Register System (CHES) and Issuer Sponsorship

The Company will apply to participate in CHES, for those investors who have, or wish to have, a sponsoring stockbroker. Investors who do not wish to participate through CHES will be issuer sponsored by the Company.

Electronic sub-registers mean that the Company will not be issuing certificates to investors. Instead, investors will be provided with statements (similar to a bank account statement) that set out the number of Securities issued to them under this Prospectus. The notice will also advise holders of their Holder Identification Number or Security Holder Reference Number and explain, for future reference, the sale and purchase procedures under CHES and issuer sponsorship.

Electronic sub-registers also mean ownership of securities can be transferred without having to rely upon paper documentation. Further monthly statements will be provided to holders if there have been any changes in their security holding in the Company during the preceding month.

Photographs used in this Prospectus which do not have descriptions are for illustration only and should not be interpreted to mean that any person shown endorses the Prospectus or its contents or that the assets shown in them are owned by the Company. Diagrams used in this Prospectus are illustrative only and may not be drawn to scale.

1.5 Details of Substantial Holders

Based on publicly available information as at the date of this Prospectus, those persons which (together with their associates) have a relevant interest in 5% or more of the Shares on issue are set out below:

Shareholder	Shares	%
Tolga Kumova	11,954,821	10.01
Kingslane Pty Ltd <Cranston Super Pension A/C>	9,006,428	7.54

In the event all Entitlements are accepted there will be no change to the substantial holders on completion of the Offer.

1.6 Effect on Control

Based on current shareholding and Entitlements of Shareholders (including substantial Shareholders) as at the date of this Prospectus, regardless of the amount raised under the Offer, no Shareholder will increase their holding, to an amount in excess of 19.9% through applying for their Entitlements.

Further as set out in Section 2.6, on the basis of the allocation policy, no person will acquire, through participation in the Shortfall Offer a holding of Shares of, or increase their holding to, an amount in excess of 19.9% of all the Shares on issue on completion of the Offer.

1.7 Potential dilution on non-participating Shareholders

In addition to potential control impacts set out in Section 1.8, Shareholders should note that if they do not participate in the Offer, their holdings are likely to be diluted by approximately 28.57% (as compared to their holdings and number of Shares on issue as at the date of this Prospectus).

For illustrative purposes, the table below shows how the dilution may impact the holdings of Shareholders:

Holder	Holding as at Record date	% at Record Date	Entitlements under the Offer	Holdings if Offer not taken Up	% post Offer
Shareholder 1	10,000,000	8.37%	4,000,000	10,000,000	5.98%
Shareholder 2	5,000,000	4.19%	2,000,000	5,000,000	2.99%
Shareholder 3	1,500,000	1.26%	600,000	1,500,000	0.90%
Shareholder 4	400,000	0.33%	160,000	400,000	0.24%
Shareholder 5	50,000	0.04%	20,000	50,000	0.03%
Total	119,410,328		47,764,132		167,174,460

Notes:

1. Assumes that the Maximum Subscription of 47,764,131 Shares has been achieved.
2. This is based on a share capital of 119,410,328 Shares as at the date of the Prospectus and assumes no other Shares are issued including Options exercised.
3. The dilutionary effect shown in the table is the maximum percentage on the assumption that those Entitlements not accepted by Eligible Shareholders are placed under the Shortfall Offer. In the event all Entitlements are not accepted and some or all of the resulting Shortfall was not subsequently placed, the dilution effect for each Shareholder not accepting their Entitlement would be a lesser percentage.

2.3 Payment options

(a) By BPAY®

For payment by BPAY®, please follow the instructions on the Entitlement and Acceptance Form. You can only make a payment via BPAY® if you are the holder of an account with an Australian financial institution that supports BPAY® transactions. Please note that should you choose to pay by BPAY®:

- (i) you do not need to submit the Entitlement and Acceptance Form but are taken to have made the declarations on that Entitlement and Acceptance Form;

- (ii) if you do not pay for your Entitlement in full, you are deemed to have taken up your Entitlement in respect of such whole number of Shares which is covered in full by your Application monies; and
- (iii) if you pay more than is required to subscribe for your Entitlement, you will be taken to have applied for Shortfall Securities (if any) under the Shortfall Offer, to the extent of the excess.

You should be aware that your own financial institution may implement earlier cut-off times with regard to electronic payment, and you should therefore take this into consideration when making payment. **It is your responsibility to ensure that funds submitted through BPAY® are received by 5:00 pm (WST) on the Closing Date. The Company shall not be responsible for any delay in the receipt of the BPAY® payment.**

Guidance where you have more than one CRN (Shareholding of Shares)

If you have more than one shareholding of Shares and consequently receive more than one Entitlement and Acceptance Form, when taking up your Entitlement in respect of one of those Shareholdings only use the CRN specific to that Shareholding as set out in the applicable Entitlement and Acceptance Form. **Do not use the same CRN for more than one of your Shareholdings.** This can result in your Application monies being applied to your Entitlement in respect of only one of your Shareholdings (with the result that any Application in respect of your remaining Shareholdings will not be valid).

(b) By Electronic Funds Transfer (overseas applicants)

For payment by Electronic Funds Transfer (**EFT**) for overseas Eligible Shareholders, please follow the instructions on the Entitlement and Acceptance Form. You can only make a payment via EFT if you are the holder of an account that supports EFT transactions to an Australian bank account. Please note that should you choose to pay by EFT:

- (i) you do not need to submit the Entitlement and Acceptance Form but are taken to have made the declarations on that Entitlement and Acceptance Form;
- (ii) if you do not pay for your Entitlement in full, you are deemed to have taken up your Entitlement in respect of such whole number of Shares which is covered in full by your Application monies; and
- (iii) if you pay more than is required to subscribe for your Entitlement, you will be taken to have applied for Shortfall Securities (if any) under the Shortfall Offer, to the extent of the excess.

(c) By Cheque

Payment by cheque or cash will not be accepted.

2.4 Implications of an acceptance

Returning a completed Entitlement and Acceptance Form or paying any Application monies by BPAY® or EFT will be taken to constitute a representation by you that:

- (a) you have received a copy of this Prospectus and the accompanying Entitlement and Acceptance Form, and read them both in their entirety;
- (b) you acknowledge that once the Entitlement and Acceptance Form is returned, or a BPAY® or EFT payment instruction is given in relation to any Application monies, the application may not be varied or withdrawn except as required by law.

2.5 Minimum subscription

There is no minimum subscription.

2.6 Shortfall Offer

Any Entitlement not taken up pursuant to the Offer will form the Shortfall Offer (**Shortfall Securities**). The Shortfall Offer is a separate offer made pursuant to this Prospectus and will remain open for up to three months following the Closing Date. The issue price for each Share to be issued under the Shortfall Offer shall be \$0.05 being the price at which Shares have been offered under the Offer.

If you do not wish to take up any part of your Entitlement you are not required to take any action. That part of your Entitlement not taken up will form part of the Shortfall Offer and potentially be allocated to other Eligible Shareholders or other third parties as part of the Shortfall Offer. The Shortfall Offer will only be available where there is a Shortfall between applications received from Eligible Shareholders and the number of Shares proposed to be issued under the Offer.

Eligible Shareholders who wish to subscribe for Securities above their Entitlement are invited to apply for Shortfall Securities under the Shortfall Offer by completing the appropriate section on their Entitlement and Acceptance Form or by making payment for such Shortfall Securities in accordance with Sections 2.3.

The Board presently intends to allocate Shortfall Securities as follows:

- (a) to Eligible Shareholders who apply for an excess of their full Entitlement, so long as the issue of Shortfall Securities to that Eligible Shareholder would not take their voting power to in excess of 19.99%; and then
- (b) to other parties identified by the Directors, which may include parties who are not currently Shareholders.

No Shares will be issued to a party under the Shortfall Offer if the effect would be to increase that party's voting power in the Company to an amount greater than 19.99%.

The Company reserves the right to issue an Eligible Shareholder a lesser number of Shortfall Securities than applied for or no Shortfall Securities at all. However, the Directors do not intend to refuse an application for Shortfall Securities from Eligible Shareholders other than in circumstances of oversubscription or where acceptance may result in a breach of the Corporations Act. If the number of Shortfall Securities applied for by Eligible Shareholders exceeds the total Shortfall,

the Shortfall Securities will be allocated among applying Eligible Shareholders proportionate to their existing holdings.

All decisions regarding the allocation of Shortfall Securities will be made by the Directors and will be final and binding on all applicants under the Shortfall Offer; as such there is no guarantee that any Shortfall Securities applied for will be issued to Eligible Shareholders.

The Company will have no liability to any Applicant who receives less than the number of Shortfall Securities they applied for under the Shortfall Offer. If the Company scales back any applications for Shortfall Securities under the Shortfall Offer any Application monies will be returned (without interest) as soon as practicable.

2.7 ASX listing

Application for Official Quotation of the Shares offered pursuant to this Prospectus will be made within 7 days after the date of this Prospectus. If ASX does not grant Official Quotation of the Shares offered pursuant to this Prospectus before the expiration of three months after the date of issue of the Prospectus, (or such period as varied by the ASIC), the Company will not issue any Shares and will repay all Application monies for the Shares within the time prescribed under the Corporations Act, without interest.

The fact that ASX may grant Official Quotation to the Shares is not to be taken in any way as an indication of the merits of the Company or the Shares now offered for subscription.

2.8 Issue of Securities

Securities issued pursuant to the Offer will be issued in accordance with the ASX Listing Rules and timetable set out at Section 1.

Securities issued pursuant to the Shortfall Offer will be issued on a progressive basis. Where the number of Securities issued is less than the number applied for, or where no issue is made surplus Application monies will be refunded without any interest to the Applicant as soon as practicable after the closing date of the Shortfall Offer.

Pending the issue of the Securities or payment of refunds pursuant to this Prospectus, all Application monies will be held by the Company in trust for the Applicants in a separate bank account as required by the Corporations Act. The Company, however, will be entitled to retain all interest that accrues on the bank account and each Applicant waives the right to claim interest.

Holding statements for Securities issued under the Offer will be mailed as soon as practicable after the issue of Securities and for Shortfall Securities issued under the Shortfall Offer as soon as practicable after their issue.

2.9 Overseas shareholders

This Offer does not, and is not intended to, constitute an offer in any place or jurisdiction in which, or to any person to whom, it would not be lawful to make such an offer or to issue this Prospectus.

It is not practicable for the Company to comply with the securities laws of overseas jurisdictions having regard to the number of overseas Shareholders, the number and value of Securities these Shareholders would be offered and the

cost of complying with regulatory requirements in each relevant jurisdiction. Accordingly, the Offer is not being extended and Shares will not be issued to Shareholders with a registered address which is outside Australia, New Zealand, France, Germany or Isle of Man.

New Zealand

The Securities are not being offered to the public within New Zealand other than to existing shareholders of the Company with registered addresses in New Zealand to whom the offer of these securities is being made in reliance on the transitional provisions of the Financial Markets Conduct Act 2013 (New Zealand) and the Financial Markets Conduct (Incidental Offers) Exemption Notice 2021 (New Zealand).

This Prospectus has been prepared in compliance with Australian law and has not been registered, filed with or approved by any New Zealand regulatory authority. This document is not a product disclosure statement under New Zealand law and is not required to, and may not, contain all the information that a product disclosure statement under New Zealand law is required to contain.

European Union

This document has not been, and will not be, registered with or approved by any securities regulator in the European Union. Accordingly, this document may not be made available, nor may the Shares be offered for sale, in any member state of the European Union except in circumstances that do not require a prospectus under Article 1(4) of Regulation (EU) 2017/1129 of the European Parliament and the Council of the European Union (**Prospectus Regulation**).

- (b) to fewer than 150 natural or legal persons (other than qualified investors); or
- (c) in any other circumstance falling within Article 1(4) of the Prospectus Regulation.

3. PURPOSE AND EFFECT OF THE OFFER

3.1 Purpose of the offer

The purpose of the Offer is to raise up to \$2,388,207 before costs.

The funds raised from the Offer are intended to be applied in accordance with the table set out below:

Item	Proceeds of the Offer	Maximum Subscription (\$)	%
1.	Exploration – Cote d'Ivoire and Mali ¹	1,200,000	50
2.	Corporate Administration ²	600,000	25
3.	Working capital ³	555,725	23
4.	Expenses of the Offer ⁴	32,482	2
	Total	2,388,207	100

Notes:

1. Comprises exploration activities including drilling, trenching, soil sampling and associated costs.
2. Corporate administration may be applied towards Directors' fees or executive fees and other general administration expenses including ASX and share registry fees, legal, tax and audit fees, insurance and travel costs.

4. In the event less than the Maximum Subscription is raised the above use of funds will be reduced in line with the amount to which the Offers fall short of full subscription
5. Refer to Section 6.7 for further details relating to the estimated expenses of the Offer.

On completion of the Offer, the Board believes the Company will have sufficient working capital to achieve its stated objectives. In the event the Offer is not fully subscribed, funds will be first applied proportionally between Item 1 and 2 in the table above and then towards Item 3 in the table above (after first accounting for the Item 4).

In addition, it should be noted that the Company's budgets and forecasts will be subject to modification on an ongoing basis depending on the results achieved from its business activities, business operations and available capital.

The above table is a statement of current intentions as of the date of this Prospectus. As with any budget, intervening events (including exploration success or failure) and new circumstances have the potential to affect the manner in which the funds are ultimately applied. The Board reserves the right to alter the way funds are applied on this basis.

3.2 Effect of the Offer

The principal effect of the Offer, assuming all Entitlements are accepted and no Shares are issued including on exercise of other Securities on issue prior to the Record Date, will be to:

The reviewed balance sheet as at the 30 June 2022 and the unaudited pro-forma balance sheet as at the 30 June 2022 shown below have been prepared on the basis of the accounting policies normally adopted by the Company and reflect the changes to its financial position.

The pro-forma balance sheet has been prepared assuming all Entitlements are accepted, no Options or convertible securities are exercised prior to the Record Date and including expenses of the Offer.

The pro-forma balance sheet has been prepared to provide investors with information on the assets and liabilities of the Company and pro-forma assets and liabilities of the Company as noted below. 4. RIGHTS AND LIABILITIES ATTACHING TO SECURITIES

4.1 Rights and liabilities attaching to Shares

A summary of the rights attaching to Shares in the Company is below. This summary is qualified by the full terms of the Constitution (a full copy of the Constitution is available from the Company on request free of charge) and does not purport to be exhaustive or to constitute a definitive statement of the rights and liabilities of Shareholders. These rights and liabilities can involve complex questions of law arising from an interaction of the Constitution with statutory and common law requirements. For a Shareholder to obtain a definitive assessment of the rights and liabilities which attach to Shares in any specific circumstances, the Shareholder should seek legal advice.

(a) General meeting and notices

Shareholders are entitled to be present in person, or by proxy, attorney or representative to attend and vote at general meetings of the Company.

Shareholders may requisition meetings in accordance with section 249D of the Corporations Act and the Constitution of the Company.

(b) Ranking of Shares

At the date of this Prospectus, all Shares are of the same class and rank equally in all respects. Specifically, the Shares issued pursuant to this Prospectus will rank equally with existing Shares.

(c) Voting rights

Subject to any rights or restrictions, at general meetings of Shareholders or classes of shareholders:

- (i) every Shareholder present and entitled to vote may vote in person or by attorney, proxy or representative;
- (ii) on a show of hands, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder has one vote; and
- (iii) on a poll, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder, has one vote for every fully paid Share held and a fraction of one vote for each partly paid up Share held, equal to the proportion which the amount paid up on that Share (excluding amounts credited) is to the total amounts paid up and payable (excluding amounts credited) on that Share.

(d) Dividend rights

Subject to the rights of the holders of any shares with special rights to dividends, the Directors may determine or declare a dividend to be paid to the Shareholders entitled to the dividend which shall be payable on all Shares according to the proportion that the amount paid is of the total amounts paid and payable in respect of such Shares.

No dividend carries interest against the Company and the declaration of Directors as to the amount to be distributed is conclusive.

The Company must not pay a dividend unless the Company's assets exceed its liabilities immediately before the dividend is declared and the excess is sufficient for the payment of the dividend. The Directors may capitalise any profits of the Company and distribute that capital to the Shareholders, in the same proportions as the Shareholders are entitled to a distribution by dividend.

(e) **Variation of rights**

If at any time the share capital is divided into different classes of shares, the rights attaching to the Shares may only be varied by the consent in writing of the holders of three-quarters of the issued shares of that class, or with the sanction of a special resolution passed at a separate general meeting of the holders of the shares in that class.

(f) **Transfer of Shares**

Shares can be transferred upon delivery of a proper instrument of transfer to the Company or by a transfer in accordance with the ASX Settlement Operating Rules. The instrument of transfer must be in writing, in the approved form, and signed by the transferor and the transferee. Until the transferee has been registered, the transferor is deemed to remain the holder, even after signing the instrument of transfer.

In some circumstances, the Directors may refuse to register a transfer if upon registration the transferee will hold less than a marketable parcel. The Board may refuse to register a transfer of Shares upon which the Company has a lien. The Company must refuse to register a transfer of Shares where the Corporations Act, Listing Rules or ASX Settlement Operating Rules or a law about stamp duty requires the Company to do so.

(g) **Future increase in capital**

The issue of any new Shares is under the control of the Board of the Company as appointed from time to time. Subject to restrictions on the issue or grant of Securities contained in the Listing Rules, the Constitution and the Corporations Act (and without affecting any special right previously conferred on the holder of an existing Share or class of shares), the Directors may issue Shares and other Securities as they shall, in their absolute discretion, determine.

(h) **Unmarketable parcels**

The Company's Constitution provides for the sale of unmarketable parcels subject to any applicable laws and provided a notice is given to the minority Shareholders stating that the Company intends to sell their relevant Shares unless an exemption notice is received by a specified date.

(i) **Rights on winding up**

If the Company is wound up, the liquidator may with the sanction of special resolution, divide among the Shareholders in kind the whole or any part of the property of the Company and may for that purpose set

such value as the liquidator considers fair on any property to be so divided and may determine how the division is to be carried out as between the Shareholders or different classes of Shareholders.

(j) **Alteration of constitution**

In accordance with the Corporations Act, the Constitution can only be amended by a special resolution passed by at least three quarters of Shareholders present and voting at the general meeting. In addition, at least 28 days written notice specifying the intention to propose the resolution as a special resolution must be given.

5. RISK FACTORS

5.1 Introduction

The Shares offered under this Prospectus should be considered as highly speculative and an investment in the Company is not risk free.

The Directors strongly recommend that prospective investors consider the risk factors set out in this Section 5, together with all other information contained in this Prospectus.

The future performance of the Company and the value of the Securities may be influenced by a range of factors, many of which are largely beyond the control of the Company and the Directors. The key risks associated with the Company's business, the industry in which it operates and general risks applicable to all investments in listed securities and financial markets generally are described below.

The risks factors set out in this Section 5, or other risk factors not specifically referred to, may have a materially adverse impact on the performance of the Company and the value of the Shares. This Section 5 is not intended to provide an exhaustive list of the risk factors to which the Company is exposed.

Before determining whether to invest in the Company you should ensure that you have a sufficient understanding of the risks described in this Section 5 and all of the other information set out in this Prospectus and consider whether an investment in the Company is suitable for you, taking into account your objectives, financial situation and needs.

If you do not understand any matters contained in this Prospectus or have any queries about whether to invest in the Company, you should consult your accountant, financial adviser, stockbroker, lawyer or other professional adviser.

5.2 Company specific

Risk Category	Risk
Potential dilution for	<p>Upon completion of the Offer, assuming all Entitlements are accepted, no other Shares are issued including Options are exercised prior to the Record Date, the number of Shares in the Company will increase from 119,410,328 currently on issue to 167,174,460. This means that immediately after the Offer each Share will represent a significantly lower proportion of the ownership of the Company.</p> <p>Shareholders should not that if they do not participate in the Offer, their holdings are likely to be diluted by approximately 28.57% (as compared to their holdings and number of Shares on issue as at the date of this Prospectus).</p> <p>It is not possible to predict what the value of the Company, a Share will be following the completion of the Offer being implemented and the Directors do not make any representation as to such matters.</p> <p>The last trading price of Shares on ASX prior to the Prospectus being lodged of \$0.095 is not a reliable</p>

Risk Category	Risk
	indicator as to the potential trading price of Shares after implementation of the Offer.
Going Concern	<p>The Company's financial report for the half year ended 31 December 2021 (Financial Report), the Company's auditor noted the following:</p> <p><i>"At 30 June 2022, the Group had cash and cash equivalents of \$761,261 (31 December 2021: \$3,471,375). The Group incurred a net loss of \$1,030,125 (30 June 2021: \$896,604) and had cash outflows from operating and investing activities of \$2,792,433 during the half year ended 30 June 2022 (30 June 2021: \$2,094,268). The ability of the Group to continue as a going concern is dependent upon the future successful raising of the necessary funding through disposal of assets, equity and/or debt and the successful exploitation of the Group's tenements.</i></p> <p><i>The Directors believe it is appropriate to prepare the financial statements on a going concern basis because the Directors have appropriate plans to raise additional funds.</i></p> <p><i>These financial statements have been prepared on the basis that the Group can meet its commitments as and when they fall due and can therefore continue normal business activities and the realisation of its assets and settlement of its liabilities can occur in the ordinary course of business.</i></p> <p><i>In the event the Group is not able to achieve the above requirements, there is a material uncertainty that may cast significant doubt as to whether the Group will continue as a going concern and realise its assets and extinguish its liabilities in the normal course of business and at the amounts stated in its financial report."</i></p> <p>Notwithstanding the 'going concern' qualification included in the Financial Report, the Directors believe that upon the successful completion of the Offer, the Company will have sufficient funds to adequately meet the Company's current exploration commitments and short term working capital requirements. However, it is highly likely that further funding will be required to meet the medium to long term working capital costs of the Company.</p> <p>In the event that the Offer is not completed successfully there is significant uncertainty as to whether the Company can continue as a going concern which is likely to have a material adverse effect on the Company's activities.</p>
Exploration costs	The exploration costs of the Company are based on certain assumptions with respect to the method and timing of exploration. By their nature, these estimates and assumptions are subject to significant uncertainties and,

Risk Category	Risk
	<p>accordingly, the actual costs may materially differ from these estimates and assumptions. Accordingly, no assurance can be given that the cost estimates and the underlying assumptions will be realised in practice, which may materially and adversely affect the Company's viability.</p>
<p>Funding and future capital needs</p>	<p>As at the date of this Prospectus, the Company has no income producing assets and will generate losses for the foreseeable future. Until it is able to develop a project and generate appropriate cash flow, it is dependent upon being able to obtain future equity debt funding to support long term exploration (including exploration associated with the Acquisition), after the expenditure of the net proceeds raised under the Offers. Further funding will be required by the Company to support its ongoing activities and operations. There can be no assurance that such funding will be available on satisfactory terms or at all. Further, if additional funds are raised by issuing equity securities, this may result in dilution for some or all of the Shareholders.</p> <p>Neither the Company nor any of the Directors or any other party can provide any guarantee or assurance that if further funding is required, such funding can be raised on terms favourable to the Company.</p> <p>Any additional equity funding will dilute existing Shareholders.</p> <p>Also, no guarantee or assurance can be given as to when a project can be developed to the stage where it will generate cash flow. As such, a project would be dependent on many factors, for example exploration success, subsequent mine development, commissioning and operational performance.</p>
<p>New projects and acquisitions</p>	<p>The Company will actively pursue and assess other new business opportunities in the resources sector. These new business opportunities may take the form of direct project acquisitions, joint ventures, farm-ins, acquisition of tenements/permits, and/or direct equity participation.</p> <p>The acquisition of projects (whether completed or not) may require the payment of monies (as a deposit and/or exclusivity fee) after only limited due diligence or prior to the completion of comprehensive due diligence. There can be no guarantee that any proposed acquisition will be completed or be successful. If the proposed acquisition is not completed, monies advanced may not be recoverable, which may have a material adverse effect on the Company. If an acquisition is completed, the Directors will need to reassess at that time, the funding allocated to current projects and new projects, which may result in the Company reallocating funds from other projects and/or raising additional capital (if available). Furthermore, notwithstanding that an acquisition may proceed upon the completion of due</p>

Risk Category	Risk
	diligence, the usual risks associated with the new project/business activities will remain.

5.3 Risks specific to doing business in Cote D'Ivoire and Mali

Risk Category	Risk
Risks associated with operating in West Africa	<p>The Company's Projects lie within the West African countries of Côte d'Ivoire and Mali and the Company will be subject to the risks associated with operating there. Such risks can include economic, social or political instability or change, disease outbreak, hyperinflation, currency non-convertibility or instability and changes of law affecting foreign ownership, government participation, taxation, working conditions, rates of exchange, exchange control, exploration licensing, export duties, repatriation of income or return of capital, environmental protection, mine safety, labour relations as well as government control over mineral properties or government regulations that require the employment of local residents or contractors or require other benefits to be provided to local residents.</p> <p>In addition, changes to exploration, mining or investment policies and legislation or a shift in political attitude in the jurisdictions in which the Company operates may adversely affect the Company's proposed operations and profitability. The Company may also be required by local authorities to invest in social projects for the benefit of the local community. Additional social expenditures in the future may have a negative impact on the Company's profitability.</p>
Legal system	<p>The legal systems of Côte d'Ivoire and Mali are less developed than those in more established countries and this could result in the following risks:</p> <ul style="list-style-type: none"> (a) political difficulties in obtaining effective legal redress in the courts whether in respect of a breach of law or regulation or in an ownership dispute; (b) a higher degree of discretion held by various government officials or agencies; (c) the lack of political or administrative guidance on implementing applicable rules and regulations, particularly in relation to taxation and property rights; (d) inconsistencies or conflicts between and within various laws, regulations, decrees, orders and resolutions; or (e) relative inexperience of the judiciary and courts in matters affecting the Company. <p>The commitment from local business people, government officials and the judicial system to abide by legal</p>

Risk Category	Risk
	<p>requirements and negotiated agreements may be more uncertain, creating particular concerns with respect to licences and agreements for business. These may be susceptible to revision or cancellation and legal redress may be uncertain or delayed. There can be no assurance that the Company will not be adversely affected by the actions of the government authorities or others. As such, the effectiveness and enforcement of such arrangements cannot be assured.</p>
<p>Enforcing liabilities against assets outside of Australia may be difficult</p>	<p>The majority of the Company's assets are located outside Australia. As a result, it may be difficult to enforce judgments obtained in Australian courts against those assets. In addition, there is uncertainty as to whether the courts of Côte d'Ivoire, Mali or any other jurisdictions in which the Company operates would recognise or enforce judgments of Australian courts obtained against the Company based on provisions of the laws of Australia. Furthermore, because the majority of the Company's assets are or will be located outside Australia, it may also be difficult to access those assets to satisfy an award entered against the Company in Australia. As a result of all of the above, Shareholders may have more difficulty in protecting their interests in the face of actions taken by management, the Board or controlling Shareholders than they would as shareholders of a company with assets in Australia.</p>

5.4 Mining Industry Risks

Risk Category	Risk
<p>Title</p>	<p>The exploration licences in which the Company has now, or may, in the future, acquire an interest, including its applications for permits, are subject to the applicable local laws and regulations. The ownership of mineral exploration licences in Côte d'Ivoire and Mali are governed primarily by the relevant Mining Codes. Although the Company has taken steps to verify the title to the resource properties in which it has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee title. Title to resource properties may be subject to unregistered prior agreements or transfers, and may also be affected by undetected defects or other stakeholder rights.</p> <p>All of the tenements in which the Company has an interest will be subject to application for licences renewal from time to time. Renewal of the term of each licence is subject to applicable legislation. There is no guarantee that any licences, applications or conversions in which the Company has a current or potential interest will be granted. If the licence is not renewed for any reason, the Company may suffer significant damage through loss of the opportunity to develop and discover any mineral</p>

Risk Category	Risk
	resources on that licence.
Exploration and development risks	<p>Mineral exploration and development are high-risk undertakings, and there is no assurance that exploration of the Company's tenements will result in the discovery of an economic resource deposit. Even if an apparently viable deposit is identified there is no guarantee that it can be economically exploited.</p> <p>The future exploration activities of the Company may be affected by a range of factors including geological conditions, limitations on activities due to permitting requirements, availability of appropriate exploration equipment, exploration costs, seasonal weather patterns, unanticipated operational and technical difficulties, industrial and environmental accidents and many other factors beyond the control of the Company.</p> <p>The success of the Company will also depend upon the Company having access to sufficient development capital, being able to maintain title to its tenements and obtaining all required approvals for its activities. In the event that exploration programmes prove to be unsuccessful this could lead to a diminution in the value of the tenements, a reduction in the case reserves of the Company and possible relinquishment of the tenements.</p>
Operating risk	<p>The operations of the Company may be affected by various factors, including failure to locate or identify mineral deposits, failure to achieve predicted grades in exploration and mining, operational and technical difficulties encountered in mining, difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, unanticipated metallurgical problems which may affect extraction costs, adverse weather conditions, industrial and environmental accidents, industrial disputes and unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment.</p> <p>No assurances can be given that the Company will achieve commercial viability through the successful exploration and/or mining of its tenements, or any other tenements that may be acquired by the Company in the future. Until the Company is able to realise value from its projects, it is likely to incur ongoing operating losses.</p>
Metallurgy	<p>Metal and/or mineral recoveries are dependent upon the metallurgical process, and by its nature contain elements of significant risk such as:</p> <ul style="list-style-type: none"> (a) identifying a metallurgical process through test work to produce a saleable metal and/or concentrate; (b) developing an economic process route to produce a metal and/or concentrate; and (c) changes in mineralogy in the ore deposit can result in inconsistent metal recovery, affecting

Risk Category	Risk
	the economic viability of the project.
Payment obligations	<p>The Company will become subject to payment and other obligations. In particular, holders are required to expend the funds necessary to meet the minimum work commitments attaching to the Projects. Failure to meet these work commitments may render the Projects subject to forfeiture or result in the holders being liable for fees. Further, if any contractual obligations are not complied with when due, in addition to any other remedies that may be available to other parties, this could result in dilution or forfeiture of the Company's interest in the Projects.</p>
Metals and currency volatility and price	<p>The Company's ability to proceed with the development of its projects and benefit from any future mining operations will depend on market factors, some of which may be beyond its control. It is anticipated that any revenues derived from mining will primarily be derived from the sale of gold and base metals. Consequently, any future earnings are likely to be closely related to the price of this commodity and the terms of any off-take agreements that the Company enters into.</p> <p>The world market for minerals is subject to many variables and may fluctuate markedly. These variables include world demand for gold and base metals that may be mined commercially in the future from the Company's project areas, forward selling by producers and production cost levels in major mineral-producing regions. Mineral prices are also affected by macroeconomic factors such as general global economic conditions and expectations regarding inflation and interest rates. These factors may have an adverse effect on the Company's exploration, development and production activities, as well as on its ability to fund those activities.</p> <p>Metals are principally sold throughout the world in US dollars. The Company's cost base will be payable in various currencies including Australian dollars and US dollars. As a result, any significant and/or sustained fluctuations in the exchange rate between the Australian dollar and the US dollar could have a materially adverse effect on the Company's operations, financial position (including revenue and profitability) and performance. The Company may undertake measures, where deemed necessary by the Board to mitigate such risks.</p>
Competition risk	<p>The industry in which the Company will be involved is subject to domestic and global competition, including major mineral exploration and production companies. Although the Company will undertake all reasonable due diligence in its business decisions and operations, the Company will have no influence or control over the activities or actions of its competitors, which activities or actions may, positively or negatively, affect the operating</p>

Risk Category	Risk
	and financial performance of the Company's projects and business.
Land access risk	<p>Land access is critical for exploration and evaluation to succeed. In all cases the acquisition of prospective mining licences is a competitive business, in which proprietary knowledge or information is critical and the ability to negotiate satisfactory commercial arrangements with other parties is often essential.</p> <p>Access to land for exploration purposes can be affected by small non-mechanised mining operations or land ownership, including registered and unregistered land interests and regulatory requirements within the jurisdiction where the Company operates.</p>
Third party risks	<p>The Company acknowledges that exploration success may result in extended work programs on the Tenements that may require further third party consents and/or compliance with compensation obligations with respect to the private landholders, underlying petroleum tenure, native title processes and pastoralist activities. As part of the process of submitting a program of works for any ground disturbing activities, pastoralists and other third parties will be notified and the Company will work to minimise disturbance in relation to the proposed activities in accordance with applicable law. The Directors acknowledge that delays may be caused to commencement of exploration programs.</p>
Environmental risk	<p>As with all exploration projects and mining operations, the Company's activities are expected to have an impact on the environment, particularly if mine development proceeds.</p> <p>The Company intends to conduct its activities in an environmentally responsible manner and in accordance with applicable laws. The costs and complexity of complying with the applicable environmental laws and regulations may prevent the Company from being able to develop potentially economically viable mineral deposits.</p> <p>Activities on the Company's tenements must comply with the conditions of their respective environmental authorities. The Company may be required to obtain further approvals from the relevant authorities before it can undertake particular activities that are likely to impact the environment. Failure to obtain such approvals will prevent the Company from undertaking its desired activities.</p> <p>Environmental issues may compromise the exploration and development of the Company's tenements.</p>
Licences, permits and approvals	<p>The Company holds all material authorisations required to undertake the current exploration programs of the Company. However, many of the mineral rights and interests to be held by the Company are subject to the</p>

Risk Category	Risk
	need for ongoing or new government approvals, licences and permits. These requirements, including work permits and environmental approvals, will change as the Company's operations develop. Delays in obtaining, or the inability to obtain, required authorisations may significantly impact on the Company's operations.
Reliance on key management	<p>The responsibility of overseeing the day-to-day operations and the strategic management of the Company depends substantially on its senior management and its key personnel.</p> <p>There can be no assurance given that there will be no detrimental impact on the Company if one or more of these employees cease their employment.</p>
Conflicts of interest	Certain Directors are also directors and officers of other companies engaged in mineral exploration and development and mineral property acquisitions. Accordingly, mineral exploration opportunities or prospects of which these Directors become aware may not necessarily be made available to the Company. Although these Directors have been advised of their fiduciary duties to the Company, there exist actual and potential conflicts of interest among these persons and situations could arise in which their obligations to, or interests in, other companies could detract from their efforts on behalf of the Company.

5.5 General risks

Risk Category	Risk
Securities investments	There are risks associated with any securities investment. The prices at which the securities of the Company trade may fluctuate in response to a number of factors. Furthermore, the stock market, and in particular the market for mining and exploration companies, has experienced extreme price and volume fluctuations that have often been unrelated or disproportionate to the operating performance of such companies. There can be no guarantee that trading prices will be sustained. These factors may materially affect the market price of the securities of the Company regardless of its operational performance.
Economic risks	<p>General economic conditions, introduction of tax reform, new legislation, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's business activities and potential exploration and development programs, as well as on its ability to fund those activities.</p> <p>As with any exploration or mining project, the economics are sensitive to metal and commodity prices. Commodity prices fluctuate and are affected by many factors beyond the control of the Company. Such factors</p>

Risk Category	Risk
	include supply and demand fluctuations for minerals, technological advances, forward selling activities and other macro-economic factors. These prices may fluctuate to a level where the proposed mining operations are not profitable. Should the Company achieve success leading to mineral production, the revenue it will derive through the sale of commodities also exposes potential income of the Company to commodity price and exchange rate risks.
