OPERATIONS AND DEVELOPMENT UPDATE

Water Use Licence Granted for the Frankfort Mine

Theta Gold announced on 2 November 2022⁶ it had been awarded a Water Use Licence (WUL) by the South African Department of Water and Sanitation (DWS). This is the first of the two water use licences required for its TGME Underground Gold Mine and means that the Frankfort Mine is now fully permitted.

The new Greater TGME Integrated Water Use License was issued in accordance with Chapter 4 of the National Water Act, 1998 (Act 36 of 1998) for a period of 12 years. The WUL forms an integral part of TGME Underground Project since it authorises all current water use activities within Mining Right (MR) 83 area.

The approval of the WUL is a result of a comprehensive environmental specialist studies conducted with detailed engineering designs that satisfy the extensive regulatory requirements relating to water and waste management in South Africa.

The DWS informed all interested and affected parties of the issuing of this license. No public participation process is required for this license however any interested and effected parties may still appeal the licence. The Company did, however, in the interest of transparency sent out a notification to inform all of our stakeholders that the license was issued. No appeals were lodged during the review period and the licence was granted. Our stakeholder engagement forum will going forward be kept updated in terms of compliance monitoring of the license.

Now with the granting of this WUL, Theta Gold has now secured all of the regulatory licences required for the Frankfort Mine and can commence commercial bulk sampling and trial mining.

Project Permits and Approvals

In light of its latest round of successful license applications, the Company continues to advance the long-term environmental approvals process for MR83 following the release of its definitive Feasibility Study⁷ earlier this year (refer ASX Announcement 27 July 2022).

8.8	If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
	8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
	Answer: Yes	

8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

Answer:

The Company announced on 19 October 2022¹ it had executed a non-binding Term Sheet with Sprott Streaming and Royalty (Sprott) for up to US\$70 million (A\$110 million) streaming funding for pre-development, development capital and operating expenditure to bring the TGME Gold Project into production and reach positive cashflows. The transaction is subject to satisfactory due diligence to be completed by Sprott as well as the parties entering into a binding streaming agreement with the process currently ongoing.

In addition, as noted above and (as per ASX Release dated 25 March 2021), the Company has entered into an At-The-Market Subscription Deed ("ATM") with Acuity Capital. The ATM provides the Company the opportunity to draw-down up to A\$15 million of standby equity capital with the expiry of the ATM being 31 July 2023. (Note: converted using a 31 December 2022 exchange rate of 0.6775 for AUD:USD)

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer: Yes.

The Company has completed and released a definitive Feasibility Study (FS) to the ASX on 27 July 2022² with an NPV_{10%}, US\$324 million (A\$432 million³) and an initial Life-of-Mine (LOM) of 12.9 years from 1.08 Moz of recovered gold. The FS used an average gold price of US\$1,642, (A\$2,189) with an AISC of US\$834/Oz.

The group's large tenement holding in South Africa is potentially very prospective and remains largely unexplored using modern technology. The Theta Project, potential underground mines development and the prospective tenement holding should underpin the company's ability to raise funds for its business needs.

Furthermore, in addition to description in 8.8.2 above, the company are currently in negotiation with numerous financiers on project financing terms, with term sheets been exchanged and discussions in progress.

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.
